(c) Notwithstanding the provisions of section 553 (d) of title 5, United States Code, any regulation described in subsection (b) may become effective upon the date of its publication in the Federal Register.

MEDICAL ELIGIBILITY FOR SUPPLEMENTAL SECURITY INCOME RECIPIENTS

Beneficiaries

SEC. 13. (a)(1) Section 1901 of the Social Security Act (as amended by Public Law 92-603) is amended by striking out "permanently and totally disabled" and inserting "disabled" in lieu thereof.

(2) Section 1902(a)(5) of such Act is amended by—

(A) striking out "to administer the plan," and inserting in lieu thereof, "to administer or to supervise the administration of the plan;" and by striking out "to supervise the administration of the plan" and inserting in lieu thereof "to administer or to supervise the administration of the plan" in lieu thereof; and

(B) striking out "XVI (insofar as it relates to the aged)" and inserting "XVI (insofar as it relates to the aged) if the State is eligible to participate in the State plan program established under title XVI, or by the agency of agencies administering the supplemental security income program established under title XVI or the State plan approved under part A of title IV if the State is not eligible to participate in the State plan program established under title XVI" in lieu thereof.

(3) Section 1902(a)(10) of such Act is amended to read as follows:

"(10) provide—

"(A) for making medical assistance available to all individuals receiving aid or assistance under any plan of the State approved under title I, X, XIV, or XVI, or part A of title IV, or with respect to whom supplemental security income benefits are being paid under title XVI;

"(B) that the medical assistance made available to any individual described in clause (A)—

"(i) shall not be less in amount, duration, or scope than the medical assistance made available to any other such individual, and

"(ii) shall not be less in amount, duration, or scope than the medical assistance made available to individuals not described in clause (A); and

"(C) if medical assistance is included for any group of individuals who are not described in clause (A) and who do not meet the income and resources requirements of the appropriate State plan, or the supplemental security income program under title XVI, as the case may be, as determined in accordance with standards prescribed by the Secretary—

"(i) for making medical assistance available to all individuals who would, except for income and resources be eligible for aid or assistance under any such State plan or to have paid with respect to them supplemental security income benefits under title XVI, and who have insufficient (as determined in accordance with comparable standards) income and resources to meet the costs of necessary medical and remedial care and services, and

"(ii) that the medical assistance made available to all individuals not described in clause (A) shall be equal in amount, duration, and scope;

except that (I) the making available of the services described in paragraph (4), (14), or (16) of section 1905(a) to individuals meeting the age requirements prescribed therein shall not, by reason of this paragraph (10), require the making available of any such services, or the making available of such services of the same amount, duration, and scope, to individuals of any other ages, (II) the making available of supplementary medical insurance benefits under part B of title XVIII to individuals eligible therefor (either pursuant to an agreement entered into under section 1843 or by reason of the payment of premiums under such title by the State agency on behalf of such individuals), or provision for meeting part or all of the cost of deductibles, cost sharing, or similar charges under part B of title XVIII for individuals eligible for benefits under such part, shall not, by reason of this paragraph (10), require the making available of any such benefits, or the making available of services of the same amount, duration, and scope, to any other individuals, and (III) the making available of medical assistance equal in amount, duration, and scope to the medical assistance made available to individuals described in clause (A) to any classification of individuals approved by the Secretary with respect to whom there is being paid, or who are eligible, or would be eligible if they were not in a medical institution, to have paid with respect to them, a State supplementary payment shall not, by reason of this paragraph (10), require the making available of any such assistance, or the making available of such assistance of the same amount, duration, and scope, to any other individuals not described in clause (A);".

(4) Section 1902(a)(13)(B) of such Act is amended by striking out "the State's plan approved under title I, X, XIV, or XVI, or part A of title IV" and inserting "any plan of the State approved under title I, X, XIV, or XVI, or part A of title IV, or with respect to whom supplemental security income benefits are being paid under title XVI" in lieu thereof.

(5) Section 1902(a)(14)(A) of such Act is amended by striking out "a State plan approved under title I, X, XIV, or XVI, or part A of title IV, or who meet the income and resources requirements of the one of such State plans which is appropriate" and inserting "any plan of the State approved under title I, X, XIV, or XVI, or part A of title IV, or with respect to whom supplemental security income benefits are being paid under title XVI, or who meet the income and resources requirements of the appropriate State plan, or the supplemental security income program under title XVI, as the case may be, and individuals with respect to whom there is being paid, or who are eligible, or would be eligible if they were not in a medical institution, to have paid with respect to them, a State supplementary payment and are eligible for medical assistance equal in amount, duration, and scope to the medical assistance made available to individuals described in paragraph (10)(A)" in lieu thereof.

(6) Section 1902(a)(14)(B) of such Act is amended by—

(A) inserting "(other than individuals with respect to whom there is being paid, or who are eligible or would be eligible if they were not in a medical institution, to have paid with respect to them, a State supplementary payment and are eligible for medical assistance equal in amount, duration, and scope to the medical assistance made available to individuals described in paragraph (10)(A))" immediately after "with respect to individuals";

(B) inserting "and with respect to whom supplemental security income benefits are not being paid under title XVI" immediately after "any such State plan";

(C) striking out "the one of such State plans which is appropriate" and inserting "the appropriate State plan, or the supplemental security income program under title XVI, as the case may be," in lieu thereof; and

(D) striking out "or who, after December 31, 1973, are included under the State plan for medical assistance pursuant to section 1902(a)(10)(B) approved under title XIX".

(7) Section 1902(a)(17) of such act is amended by—

(A) striking out "the State's plan approved under title I, X, XIV, or XVI, or part A of title IV" and inserting "any plan of the State approved under title I, X, XIV, or XVI, or part A of title IV, and with respect to whom supplemental security income benefits are not being paid under title XVI" in lieu thereof;

(B) striking out "if he met the requirements as to need" and inserting "except for income and resources" in lieu thereof;

(C) striking out "a State plan approved under title I, X, XIV, or XVI, or part A of title IV" and inserting "any plan of the State approved under title I, X, XIV, or XVI, or part A of title IV, or to have paid with respect to him supplemental security income benefits under title XVI" in lieu thereof; and

(D) striking out "and amount of such aid or assistance under such plan" and inserting "such aid, assistance, or benefits" in lieu thereof.

(8) Sections 1902(a)(17) and 1902(a)(18) are each amended by striking out "is blind or permanently and totally disabled" and inserting "(with respect to States eligible to participate in the State program established under title XVI), is blind or permanently and totally disabled, or is blind or disabled as defined in section 1614 (with respect to States which are not eligible to participate in such program)" in lieu thereof.

(9) Section 1902(a)(20)(C) of such Act is amended by inserting ", section 603(a)(1)(A) (i) and (ii)," immediately after "section 3(a)(4)(A) (i) and (ii)".

10 Section 1902(f) of such act is amended by—

(A) inserting "not eligible to participate in the State plan program established under title XVI" immediately after "State" the first time it appears therein.

(B) striking out "such individual's payment under title XVI" and inserting "any supplemental security income payment and State supplementary payment made with respect to such individual" in lieu thereof;

(C) striking out "as defined in section 213 of the Internal Revenue Code of 1954" and inserting "as recognized under State law" in lieu thereof; and

(D) inserting at the end thereof the following new sentences: "In States which provide medical assistance to individuals pursuant to clause (10)(C) of subsection (a) of this section, an individual who is eligible for medical assistance by reason of the requirements of this section concerning the deduction of incurred medical expenses from income shall be considered an individual eligible for medical assistance under clause (10)(A) of that subsection if that individual is, or is eligible to be (1) an individual with respect to whom there is payable a State supplementary payment on the basis of which similarly situated individuals are eligible to receive medical assistance equal in amount, duration, and scope to that provided to individuals eligible under clause (10)(A), or (2) an eligible individual or eligible spouse, as defined in title XVI, with respect to whom supplemental security income benefits are payable; otherwise that individual shall be considered to be an individual eligible for medical assistance under clause (10)(C) of that subsection. In States which do not provide medical assistance to individuals pursuant to clause (10)(C) of that subsection, an individual who is eligible for medical assistance by reason of the requirements of this section concerning the deduction of incurred medical expenses from income shall be considered an individual eligible for medical assistance under clause (10)(A) of that subsection.".

(11) Section 1903(a)(1) of such Act is amended by striking out "individuals who are recipients of money payments under a State plan approved under title I, X, XIV, or XVI, or part A of title IV" and inserting "individuals who are eligible for medical assistance under the plan and (A) are receiving aid or assistance under any plan of the State approved under title I, X, XIV, or XVI, or part A of title IV, or with respect to whom supplemental security income benefits are being paid under title XVI, or (B) with respect to whom there is being paid a State supplementary payment and are eligible for medical assistance equal in amount, duration, and scope to the medical assistance made available to individuals described in section 1902(a)(10)(A)" in lieu thereof.

(12) Section 1903(f)(4) of such Act is amended to read as follows:

"(4) The limitations on payment imposed by the preceding provisions of this subsection shall not apply with respect to any amount expended by a State as medical assistance for any individual—

"(A) who is receiving aid or assistance under any plan of the State approved under title I, X, XIV, or XVI, or part A of title IV, or with respect to whom supplemental security income benefits are being paid under title XVI, or

"(B) who is not receiving such aid or assistance, and with respect to whom such benefits are not being paid, but (i) is eligible to receive such aid or assistance, or to have such benefits paid with respect to him, or (ii) would be eligible to receive such aid or assistance, or to have such benefits paid with respect to him if he were not in a medical institution, or

"(C) with respect to whom there is being paid, or who is eligible, or would be eligible if he were not in a medical institution, to have paid with respect to him, a State supplementary payment and is eligible for medical assistance equal in amount, duration, and scope to the medical assistance made available to individuals described in section 1902(a)(10)(A), but only if the income of such individual (as determined under section 1612, but without regard to subsection (b) thereof) does not exceed 300 percent of the supplemental security income benefit rate established by section 1611(b)(1),

at the time of the provision of the medical assistance giving rise to such expenditure."

(13) The matter before clause (i) in section 1905(a) of such Act is amended by striking out "individuals not receiving aid or assistance under the State's plan approved under title I, X, XIV, or XVI, or part A of title IV" and inserting "individuals (other than individuals with respect to whom there is being paid, or who are eligible, or would be eligible if they were not in a medical institution, to have paid with respect to them a State supplementary payment and are eligible for medical assistance equal in amount, duration, and scope to the medical assistance made available to individuals described in section 1902(a)(10) A)) not receiving aid or assistance under any plan of the State approved under title I, X, XIV, or XVI, or part A of title IV, and with respect to whom supplemental security income benefits are not being paid under title XVI" in lieu thereof.

(14) Section 1905(a)(iv) of such Act is amended by inserting "with respect to States eligible to participate in the State plan program established under title XVI," at the end thereof.

(15) Section 1905(a)(v) of such Act is amended by striking out "or" inserting "with respect to States eligible to participate in the State plan program established under title XVI," in lieu thereof.

(16) Section 1905(a)(vi) of such Act is amended by inserting "or" at the end thereof.

(17) Section 1905(a) of such Act is further amended by inserting immediately after clause (vi) the following new clause:

"(vii) blind or disabled as defined in section 1614, with respect to States not eligible under the title XVI,".

(18) Section 1905 of such Act is amended by inserting at the end thereof the following new subsections:

"(j) The term 'State supplementary payment' means any cash payment made by a State on a regular basis to an individual who is receiving supplemental security income benefits under title XVI or who would but for his income be eligible to receive such benefits, as assistance based on need in supplementation of such benefits (as determined by the Secretary), but only to the extent that such payments are made with respect to an individual with respect to whom supplemental security income benefits are payable under title XVI, or would but for his income be payable under that title.

"(k) Increased supplemental security income benefits payable pursuant to section 211 of Public Law 93–66 shall not be considered supplemental security income benefits payable under title XVI.".

Technical Clarification and Modification of Medicaid Eligibility and Federal Title XIX Matching Under Public Law 93–66.

(b)(1)(A) Clause (2)(A) of section 231 of Public Law 93–66 is amended by—

(i) inserting "received or" immediately before "would", and

(ii) striking out "or" at the end thereof and inserting "and" in lieu thereof.

(B) Clause (2)(B) of that section is amended by—

(i) striking out "was", and

(ii) striking out "need for care in such institution, considered to be eligible for aid or assistance under a State plan (referred to in subparagraph (A)) for purposes of determining his eligibility" and inserting "status as described in subparagraph (A), was included as an individual eligible" in lieu thereof.

(2) The first sentence of section 232 of Public Law 93–66 is amended by—

(A) striking out "(under the provisions of subparagraph (B) of such section)",

(B) striking out "to be a person described as being a person who 'would, if needy, be eligible for aid or assistance under any such State plan' in subparagraph (B)(i) of such section" and inserting "for purposes of title XIX to be an individual who is blind or disabled within the meaning of section 1614(a) of the Social Security Act" in lieu thereof, and

(C) inserting ", and the other conditions of eligibility contained in the plan of the State approved under title XIX (as it was in effect in December 1973)" before the period at the end thereof.

Medicaid Eligibility for Individuals Receiving Mandatory State Supplementary Payments

(c) In addition to other requirements imposed by law as conditions for the approval of any State plan under title XIX of the Social Security Act, there is hereby imposed (effective January 1, 1974) the requirement (and each such State plan shall be deemed to require) that medical assistance under such plan shall be provided to any individual—

(1) for any month for which there (A) is payable with respect to such individual a supplementary payment pursuant to an agreement entered into between the State and the Secretary of Health, Education, and Welfare under section 212(a) of Public Law 93–66, and (B) would be payable with respect to such individual such a supplementary payment, if the amount of the supplementary payments payable pursuant to such agreement were established without regard to paragraph (3)(A)(ii) of such section 212(a), and

(2) in like manner, and subject to the same terms and conditions, as medical assistance is provided under such plan to individuals with respect to whom benefits are payable for such month under the supplementary security income program established by title XVI of the Social Security Act.

Federal matching under title XIX of the Social Security Act shall be available for the medical assistance furnished to individuals who are eligible for such assistance under this subsection.

EFFECTIVE DATES

(d) The amendments made by subsection (a) shall be effective with respect to payments under section 1903 of the Social Security Act for calendar quarters commencing after December 31, 1973.

PAYMENTS TO SUBSTANDARD FACILITIES UNDER MEDICAID

SEC. 14. Section 1616 of the Social Security Act is amended by adding at the end thereof the following new subsection:

"(e) Payments made under this title with respect to an individual shall be reduced by an amount equal to the amount of any supplementary payment (as described in subsection (a)) or other payment made by a State (or political subdivision thereof) which is made for or on account of any medical or any other type of remedial care provided by an institution to such individual as an inpatient of such institution in the case of any State which has a plan approval under title XIX of this Act if such care is (or could be) provided under a State plan approved under title XIX of this Act by an institution certified under such title XIX.".

PAYMENT FOR SERVICES OF PHYSICIANS RENDERED IN A TEACHING HOSPITAL

SEC. 15. (a)(1) Notwithstanding any other provision of law, the provisions of section 1861(b) of the Social Security Act, shall subject to subsection (b) of this section, for the period with respect to which this paragraph is applicable, be administered as if paragraph (7) of such section read as follows:

"(7) a physician where the hospital has a teaching program approved as specified in paragraph (6), if (A) the hospital elects to receive any payment due under this title for reasonable costs of such services, and (B) all physicians in such hospital agree not to bill charges for professional services rendered in such hospital to individuals covered under the insurance program established by this title.".

(2) Notwithstanding any other provision of law, the provisions of section 1832(a)(2)(B)(i) of the Social Security Act, shall, subject to subsection (b) of this section, for the period with respect to which this paragraph is applicable, be administered as if subclause II of such section read as follows:

"(II) a physician to a patient in a hospital which has a teaching program approved as specified in paragraph (6) of section 1861(b) (including services in conjunction with the teaching programs of such hospital whether or not such patient is an inpatient of such hospital), where the conditions specified in paragraph (7) of such section are met, and".

(b) The provisions of subsection (a) shall not be deemed to render improper any determination of payment under title XVIII of the Social Security Act for any service provided prior to the enactment of this Act.

(c)(1) The Secretary of Health, Education, and Welfare shall arrange for the conduct of a study or studies concerning (A) appropriate and equitable methods of reimbursement for physicians' services under Titles XVIII and XIX of the Social Security Act in hospitals which have a teaching program approved as specified in Section 1861(b)(6) of such Act, (B) the extent to which funds expended under such titles are supporting the training of medical specialties which are in excess supply, (C) how such funds could be expended in ways which support more rational distribution of physician manpower both geographically and by specialty, (D) the extent to which such funds support or encourage teaching programs which tend to disproportionately attract foreign medical graduates, and (E) the existing and appropriate role of that part of such funds which are expended to meet in whole or in part the cost of salaries of interns and residents in teaching programs approved as specified in section 1861(b)(6) of such Act.

(2) The studies required by paragraph (1) shall be the subject of an interim report thereon submitted not later than December I, 1974, and a final report not later than July 1, 1975. Such reports shall be submitted to the Secretary, the Committee on Finance of the Senate, and the Committee on Ways and Means of the House of Representatives, simultaneously.

(3) The Secretary shall request the National Academy of Sciences to conduct such studies under an arrangement under which the actual expenses incurred by such Academy in conducting such studies will be paid by the Secretary. If the National Academy of Sciences is willing to do so, the Secretary shall enter into such an arrangement with such Academy for the conduct of such studies.

(4) If the National Academy of Sciences is unwilling to conduct the studies required under this section, under such an arrangement with the Secretary, then the Secretary shall enter into a similar arrangement with other appropriate non-profit private groups or associations under which such groups or associations shall conduct such studies and prepare and submit the reports thereon as provided in paragraph (2).

(5) The Social Security Administration shall study the interim report called for in paragraph (2) and shall submit its analysis of such interim report to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives not later than March 1, 1975. The Social Security Administration shall study and submit its analysis of the final report to the Committee on Finance of the Senate and the Committee on Ways and Means of the House of Representatives by October 1, 1975.

(d) The provisions of subsection (a) shall apply with respect to cost accounting periods beginning after June 30, 1973, and prior to January 1, 1975 except that if the Secretary of Health, Education, and Welfare determines that additional time is required to prepare the report required by subsection (c), he may by regulation, extend the applicability of the provisions of subsection (a) to cost accounting periods beginning after June 30, 1975.

BASIS OF MEDICARE PAYMENT FOR SERVICES PROVIDED BY AGENCIES AND PROVIDERS

SEC. 16. In the administration of titles V, XVIII, and XIX of the Social Security Act, the amount payable under such title to any provider of services on account of services provided by such hospital, skilled nursing facility, or home health agency shall be determined (for any period with respect to which the amendments made by section 233 of Public Law 92–603 would, except for the provisions of this section, be applicable) in like manner as if the date contained in the first and second sentences of subsection (f) of such section 233 were December 31, 1973, rather than December 31, 1972.

POSTPONEMENT ON EFFECTIVE DATE OF CERTAIN REQUIREMENTS IMPOSED WITH RESPECT TO PAYMENT FOR PHYSICAL THERAPY SERVICES

SEC. 17. (a) In the administration of title XVIII of the Social Security Act, the amount payable thereunder with respect to physical therapy and other services referred to in section 1861(v)(5)(A) of such Act (as added by section 151(c) of the Social Security Amendments of 1972) shall be determined (for the period with respect to which the amendment made by such section 151(c) would, except for the provisions of this section, be applicable) in like manner as if the "December 31, 1972", which appears in such subsection (d)(3) of such section 151, read "the month in which there are promulgated, by the Secretaryy of Health, Education, and Welfare, final regulations implementing the provisions of section 1861(v)(5) of the Social Security Act".

Clerical and Conforming Amendments to Social Security Act

In General

Inclusion of all Wage Level Increases in Automatic Adjustment of Earning Test

SEC. 18. (a) Section 203(f)(8)(B)(ii) of the Social Security Act is amended by—

(1) striking out "contribution and benefit base" and inserting "exempt amount" in lieu thereof; and

(2) striking out "section 230(a)" and inserting "subparagraph (A)" in lieu thereof.

Inclusion in Old-Age Insurance Benefit in Certain Cases of Related Retirement

(b) Section 202(w) of such Act is amended be inserting at the end thereof the following new paragraph:

"(5) If an individual's primary insurance amount is determined under paragraph (3) of section 215(a) and, as a result of this subsection, he would be entitled to a higher old-age insurance benefit if his primary insurance amount were determined under section 215(a) without regard to such paragraph, such individual's old-age insurance benefit based upon his primary insurance amount determined under such paragraph shall be increased by an amount equal to the difference between such benefit and the benefit to which he would be entitled if his primary insurance amount were determined under such section without regard to such paragraph."

Elimination of Benefit at Age 72 for Uninsured Individual Receiving Supplemental Security Income Benefits

(c) Section 228(d) of such Act is amended by inserting "and such individual is not an individual with respect to whom supplemental security income benefits are payable pursuant to title XVI or section 211 of Public Law 93–66 for the following month, nor shall such benefit be paid for such month if such individual is an individual with respect to whom supplemental security income benefits are payable pursuant to title XVI or section 211 of Public Law 93–66 for such month, unless the Secretary determines that such benefits are not payable with respect to such individual for the month following such month" immediately before the period at the end thereof.

Limitations on Eligibility Determinations Under Resources Tests of State Plans

(d) Section 1611 of such Act (as amended by Public Law 92–603) is amended by striking out subsection (g) and inserting in lieu thereof the following new subsection:

"(g) In the case of any individual or any individual and his spouse (as the case may be) who—

"(1) received aid or assistance for December 1973 under a plan of a State approved under title I, X, XIV, or XVI,

"(2) has, since December 31, 1973, continuously resided in the State under the plan of which he or they received such aid or assistance for December 1973, and

"(3) has, since December 31, 1973, continuously been (except for periods not in excess of six consecutive months) an eligible individual or eligible spouse with respect to whom supplemental security income benefits are payable,

the resources of such individual or such individual and his spouse (as the case may be) shall be deemed not to exceed the amount specified in sections 1611(a)(1)(B) and 1611(a)(2)(B) during any period that the resources of such individual or individuals and his spouse (as the case may be) does not exceed the maximum amount of resources specified in the State plan, as in effect for October 1972, under which he or they received such aid or assistance for December 1973."

Limitations on Eligibility and Benefit Determinations Under Income Tests of State Plans for Aid to the Blind

(e) Section 1611 of such Act is amended by striking out subsection (h) and inserting in lieu thereof the following new subsection:

"(h) In determining eligibility for, and the amount of, benefits payable under this section in the case of any individual or any individual and his spouse (as the case may be) who—

"(1) received aid or assistance for December 1973 under a plan of a State approved under title X or XVI,

"(2) is blind under the definition of that term in the plan, as in effect for October 1972, under which he or they received such aid or assistance for December 1973,

"(3) has, since December 31, 1973, continuously resided in the State under the plan of which he or they received such aid or assistance for December 1973, and

"(4) has, since December 31, 1973, continuously been (except for periods not in excess of six consecutive months) an eligible individual or an eligible spouse with respect to whom supplemental security income benefits are payable,

there shall be disregarded an amount equal to the greater of (A) the maximum amount of any earned or unearned income which could have been disregarded under the State plan, as in effect for October 1972, under which he or they received such aid or assistance for December 1973, and (B) the amount which would be required to be disregarded under section 1612 without application of this subsection."

Correction of Erroneous Designations and Cross-References

(f)(1) Section 226 of such Act is amended by—

(A) redesignating subsection (a)(1) as subsection (a);

(B) redesignating clauses (A) and (B) of subsection (a), as redesignated by this subsection, as clauses (1) and (2), respectively; and

(C) redesignating subsection (f) (as added by section 201(b)(5) of the Social Security Amendments of 1972 and redesignated by section 299I of that Act) and the subsection (f) (as enacted by section 101 of the Social Security Amendments of 1965 and redesignated by section 201(b)(5) of the Social Security Amendments of 1972) as subsections (h) and (i), respectively; and by inserting such subsections (h) and (i) (as so redesignated) immediately after subsection (g) of such section.

(2) Section 226(h)(1)(A) of such Act, as redesignated by this subsection, is amended by striking out "and 202(e)(5), and the term 'age 62' in sections" and inserting ", 202(e)(5)," in lieu thereof.

(3) Section 226(h)(1)(B) of such Act, as redesignated by this subsection, is amended by striking out "shall" and inserting "and the phrase 'before he attained age 60' in the matter following subparagraph (G) of section 202(f)(1) shall each" in lieu thereof.

(4) Paragraphs (2) and (3) of section 226(h) of such Act, as redesignated by this subsection, are each amended by striking

out "(a)(2)" and inserting "(b)" in lieu thereof.

Initial Payments to Presumptively Disabled Individuals Unrecoverable Only if Individual Is Ineligible Because Not Disabled

(g) Section 1631(a)(4)(B) of such Act is amended by inserting "solely because such individual is determined not to be disabled" immediately before the period at the end thereof.

Technical Correction of Limitation on Fiscal Liability of States for Optional Supplementation

(h)(1) Section 401(a)(1) of the Social Security Amendments of 1972 is amended by—

(A) inserting ", other than fiscal year 1974," immediately after "any fiscal year"; and

(B) inserting ", and the amount payable for fiscal year 1974 pursuant to such agreement or agreements shall not exceed one-half of the non-Federal share of such expenditures" immediately before the period at the end thereof.

(2) Section 401(c)(1) of such Act is amended by inserting "excluding" immediately before "expenditures authorized under section 1119".

Modification of Transitional Administrative Provisions

(i) Section 402 of the Social Security Amendments of 1972 is amended by—

(1) striking out "XVI" the first time that it appears therein and inserting "VI" in lieu thereof;

(2) inserting "the third and fourth quarters in the fiscal year ending June 30, 1974, and" immediately after "with respect to expenditures for"; and

(3) inserting "the third and fourth quarters of the fiscal year ending June 30, 1974, and any quarter of" immediately after "during such portion of".

Inclusion of Title VI in Limitation on Grants to States for Social Services

(j) Section 1130(a) of such Act is amended by inserting "603(a)(1)," immediately after "403(a)(3),".

Clarification of Coverage of Hospitalization for Dental Services

(k)(1) Section 1814(a)(2)(E) of such Act (as amended by Public Law 92–603) is amended to read as follows:

"(E) in the case of inpatient hospital services in connection with the care, treatment, filling, removal, or replacement of teeth or structures directly supporting teeth, the individual, because of his underlying medical condition and clinical status, requires hospitalization in connection with the provision of such dental services;".

(2) The last sentence of section 1814(a) is amended by striking out "or (D)" and inserting "(D), or (E)" in lieu thereof.

(3) Section 1862(a)(12) of such Act is amended by striking out "a dental procedure" and all that follows thereafter, and inserting "the provision of such dental services if the individual, because of his underlying medical condition and clinical status, requires hospitalization in connection with the provision of such services; or" in lieu thereof.

Continuation of State Agreements for Coverage of Certain Individuals

(l) Section 1843(b) of such Act is amended by adding at the end thereof the following: "Effective January 1, 1974, and subject to section 1902(f), the Secretary shall, at the request of any State not eligible to participate in the State plan program established under title XVI, continue in effect the agreement entered into under this section with such State subject to such modifications as the Secretary may by regulations provide to take account of the termination of any plans of such State approved under titles I, X, XIV, and XVI and the establishment of the supplemental security income program under title XVI.".

Technical Improvement of Provisions Governing Disposition of HMO Savings

(m) Section 1876(a)(3)(A)(ii) of such Act is amended by striking out ", with the apportionment of savings being proportional to the losses absorbed and not yet offset".

Technical Improvement of Provisions Governing Allowable HMO Premium Charges

(n) The last sentence of section 1876(g)(2) of such Act is amended by—

(1) inserting "of its premium rate or other charges" immediately after "portion";

(2) striking out "may" and inserting "shall";

(3) striking out "(i)"; and

(4) striking out "less (ii) the actuarial value of other charges made in lieu of such deductible and coinsurance".

Applications for Assistance on Behalf of Deceased Individuals

(o) Section 1902(a)(34) of the Social Security Act (as amended by Public Law 92–603) is amended by inserting "(or application was made on his behalf in the case of a deceased individual)" immediately after "he made application".

Expansion of Intermediate Care Facility Ownership Disclosure Requirements

(p) Section 1902(a)(35(A) of such Act is amended by inserting "or who is the owner (in whole or in part) of any mortgage, deed of trust, note, or other obligation secured (in whole or in part) by such intermediate care facility or any of the property or assets of such intermediate care facility" immediately after "intermediate care facility".

Technical Modification of Extended Medicaid Eligibility for AFDC Recipients

(q) Section 1902(e) of such Act is amended to read as follows:

"(e) Notwithstanding any other provision of this title, effective January 1, 1974, each State plan approved under this title must provide that each family which was receiving aid pursuant to a plan of the State approved under part A of title IV in at least 3 of the 6 months immediately preceding the month in which such family became ineligible for such aid because of increased hours of, or increased income from, employment, shall, while a member of such family is employed, remain eligible for assistance under the plan approved under this title (as though the family was receiving aid under the plan approved under part A of title IV) for 4 calendar months beginning with the month in which such family became ineligible for aid under the plan approved under part A of title IV because of income and resources or hours of work limitations contained in such plan.".

Limitation on Payments to States for Expenditures in Relation to Disabled Individuals Eligible for Medicare

(r)(1) Section 1903(a)(1) of such Act is amended by inserting "and disabled individuals entitled to hospital insurance benefits under title XVIII" immediately after "individuals sixty-five years of age or older".

(2) Section 1903(b)(2) of such Act is amended by inserting "and disabled individuals entitled to hospital insurance benefits under title XVIII" immediately after "individuals aged 65 or over".

Federal Payment for Cost of Inspecting Institutions Limited to Expenses Incurred During Covered Period

(s) Section 1903(a)(4) of such Act is amended by striking out "sums expended" and inserting "sums expended with respect to costs incurred" in lieu thereof.

Federal Payment for Family Planning Expenditures Not Limited to Administrative Costs

(t) Section 1903(a)(5) of such Act is amended by striking out "(as found necessary by the Secretary for the proper and efficient administration of the plan)".

Exception to Limitation on Payments to States for Expenditures in Relation to Individuals Eligible for Medicare

(u) Section 1903(b)(2) of such Act is amended by inserting ", other than amounts expended under provisions of the plan of such State required by section 1902(a)(34)" immediately before the period at the end thereof.

Utilization Review by Medical Personnel Associated With an Institution

(v) Section 1903(g)(1)(C) of such Act is amended by striking out "and who are not employed by" and by inserting ", or, except in the case of hospitals, employed by the institution" immediately after "any such institution".

Authority To Prescribe Standards Under Title XIX for Active Treatment of Mental Illness

(w) Section 1905(h)(1)(B) of such Act is amended by—

(1) striking out ", involves active treatment (i)" and inserting "(i) involve active treatment" in lieu thereof,

(2) striking out "pursuant to title XVIII", and

(3) striking out "(ii) which" and inserting "(ii)" in lieu thereof.

Correction of Erroneous Designations and Cross References

(x)(1) Section 1902(a)(13)(C) of such Act is amended by striking out "(14)" and inserting "(16)" in lieu thereof.

(2) Section 1902(a)(33)(A) of such Act is amended by striking out "last sentence" and inserting "penultimate sentence" in lieu thereof.

(3) Section 1902(a) of such Act is amended by—

(A) striking out the period at the end of paragraph (35) and inserting "; and" in lieu thereof; and

(B) redesignating paragraph (37) as paragraph (36).

(4) Sections 1902(a) (21), (24), and (26)(B), and the last sentence of section 1902(d), of such Act are each amended by striking out "nursing home" and "nursing homes" each time that they appear therein and inserting "nursing facility" and "nursing facilities", respectively, in lieu thereof.

(5) Section 1903(a) of such Act is amended by striking out "and section 1117" in the first parenthetical phrase.

(6) Section 1903(b) of such Act is amended by redesignating paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

(7) Section 1905(a)(16) of such Act is amended by striking out "under 21, as defined in subsection (e);" and inserting "under age 21, as defined in subsection (h); and" in lieu thereof.

(8) Section 1905(c) of such Act is amended by striking out "skilled nursing home" each time that it appears therein and inserting "skilled nursing facility" in lieu thereof.

(9) Section 1905 of such Act is amended by redesignating subsection (h) (which was enacted by section 299L(b) of the Social Security Amendments of 1972) as subsection (i).

(10) Section 1905(h)(2) is amended by striking out "(e)(1)" and inserting "(1)" in lieu thereof.

Deletion of Obsolete Provisions

(y)(1) Section 1903 of such Act is amended by—

(A) striking out subsection (c);

(B) striking out "(a), (b), and (c)" in subsection (d) and inserting "(a) and (b)" in lieu thereof.

(2) Section 1905(b) of such Act is amended by striking out everything after "section

1110(a)(8)" and inserting a period in lieu thereof.

(3) Section 1908 of such Act is amended by striking out the last sentence of subsection (d) and subsections (e) and (f), and redesignating subsection (g) as subsection (e).

Determination of Amount of Exclusion for Disapproved Capital Expenditures by Institutions Reimbursed on Fixed Fee or Negotiated Rate Basis

(z) The last sentence of section 1122(d)(1) of such Act is amended by inserting "or a fixed fee or negotiated rate" immediately after "per capita" each time that it appears therein.

Technical Improvement of Authority To Include Expenses Related to Capital Expenditures in Certain Cases

(z–1) Section 1122(d)(2) of such Act is amended by striking out "include" the last time that it appears therein and inserting "exclude" in lieu thereof.

Conforming Amendments to Title XI of the Social Security Act

(z–2)(1) Title XI of the Social Security Act is amended—

(A) in section 1101(a)(1), by—

(i) striking out "I,", "X,", "XIV,", and "XVI,", and

(ii) by adding at the end of such section 1101 (a) the following new sentence: "In the case of Puerto Rico, the Virgin Islands, and Guam, titles I, X, and XIV, and title XVI (as in effect without regard to the amendment made by section 301 of the Social Security Amendments of 1972) shall continue to apply, and the term 'State' when used in such titles (but not in title XVI as in effect pursuant to such amendment after December 31, 1973) includes Puerto Rico, the Virgin Islands, and Guam.",

(B) in section 1115, by—

(i) inserting (in the matter preceding subsection (a)) "VI," immediately after "title I,",

(ii) inserting (in subsection (a)) "602," immediately after "402,", and

(iii) inserting (in subsection (b)) "603," immediately after "403,", and

(C) in section 1116, by—

(i) inserting (in subsection (a)(1)) "VI," immediately after "title I,",

(ii) inserting (in subsection (a)(2)) "604," immediately after "404,",

(iii) inserting (in subsection (b)) "VI," immediately after "title I,", and

(iv) inserting (in subsection (d)) "VI," immediately after "title I,".

(2) The amendments made by this subsection shall be effective on and after January 1, 1974.

Effective Dates

(z–3)(1) The amendments made by subsctions (g), (h), (j), and (l) shall be effective January 1, 1974.

(2) The amendments made by subsection (k) shall be effective with respect to admissions subject to the provisions of section 1814 (a)(2) of the Social Security Act which occur after December 31, 1972.

(3) The amendments made by subsections (m) and (n) shall be effective with respect to services provided after June 30, 1973.

(4) The amendments made by subsections (o) and (u) shall be effective July 1, 1973.

MODIFICATION OF PROVISIONS ESTABLISHING SUPPLEMENTAL SECURITY INCOME PROGRAM

SEC. 19. (a) Section 303(c) of the Social Security Amendments of 1972 is amended to read as follows:

"(c) Section 9 of the Act of April 19, 1950 (64 Stat. 47) is amended to read as follows:

" 'SEC. 9. Beginning with the quarter commencing July 1, 1950, the Secretary of the Treasury shall pay quarterly to each State (from sums made available for making payments to the States under section 403(a) of the Social Security Act) an amount, in addition to the amount prescribed to be paid to such State under such section, equal to 80 per centum of the total amount of contributions by the State toward expenditures during the preceding quarter by the State, under the State plan approved under the Social Security Act for aid to dependent children to Navajo and Hopi Indians residing within the boundaries of the State on reservations or on allotted or trust lands, with respect to whom payments are made to the State by the United States under section 403(a) of the Social Security Act, not counting so much of such expenditure to any individual for any month as exceeds the limitations prescribed in such sections.'."

(b) Notwithstanding the provisions of section 301 of the Social Security Amendments of 1972 the Secretary of Health, Education, and Welfare shall make payments to the 50 States and the District of Columbia after December 31, 1973, in accordance with the provisions of the Social Security Act as in effect prior to January 1, 1974, for (1) activities carried out through the close of December 31, 1973, under State plans approved under title I, X, XIV, or XVI, of such Act, and (2) administrative activities carried out after December 31, 1973, which such Secretary determines are necessary to bring to a close activities carried out under such State plans.

PROVISIONS RELATING TO UNEMPLOYMENT COMPENSATION

SEC. 20. Section 203(2) of the Federal-State Extended Unemployment Compensation Act of 1970 is amended by adding at the end thereof the following new sentence: "Effective with respect to compensation for weeks of unemployment beginning before April 1, 1974, and beginning after December 31, 1973 (or, if later, the date established pursuant to State law), the State may by law provide that the determination of whether there has been a State 'on' or 'off' indicator beginning or ending any extended benefit period shall be made under this subsection as if paragraph (1) did not contain subparagraph (A) thereof.".

Mr. ULLMAN (during the reading). Mr. Speaker, I ask unanimous consent that the further reading of the Senate amendment be dispensed with, and that it be printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

The SPEAKER. Is there objection to the request of the gentleman from Oregon that the House concur in the Senate amendment?

Mr. BROYHILL of Virginia. Mr. Speaker, reserving the right to object, and it is not my intention to object, but I do so for the purpose of yielding to the gentleman from Oregon (Mr. ULLMAN) for a brief explanation of the Senate amendment.

Mr. ULLMAN. Mr. Speaker, last month this body passed H.R. 11333 providing increases in social security benefits and in the supplementary security income benefits. In order for these increases to become effective as quickly as possible, we urgently need to pass this bill before we adjourn. The time schedule set in the House bill providing a 7-percent increase in social security benefits in March and the remainder of an 11-percent benefit increase in June of next year cannot be maintained unless the bill becomes law this month.

The Senate amendment does not affect either the amount or time limit of these increases. They are changed in only one respect. You may recall that we provided for a "flat" 7-percent increase for March payable in April. This would not yield precisely the same amount of increase as the "refined" type of increase which has been made in the past and which the 11-percent increase in July would be. Since H.R. 11333 passed the House, the Social Security Administration has determined that a more refined benefit increase can be implemented in the April checks containing payments for March. This is provided for by a Senate amendment and it constitutes the only change in the benefit increase provision.

The provisions to increase benefits under the new supplemental security income program are the same as in the bill when it passed the House. The basic benefit is increased from $130 to $140 as of January 1 for an individual and from $195 to $210 for a couple. Further increases will occur in July to $146 for an individual and $219 for a couple. However, since it is now not possible for the supplemental security income benefits to be increased in the January 1 checks, a retroactive payment will be necessary.

Last April the House passed a technical amendments bill, H.R. 3153, making the technical amendments in Public Law 92–603, the Social Security Amendments of 1972. This covered omissions and incorrect cross references and similar changes. The Senate has recently passed H.R. 3153 and is now in conference but that conference will certainly have to carry over into the next session as many important substantive amendments were added by the Senate. The Senate has looked at the bill from the standpoint of those things which are related to different deadlines, most particularly, the establishment of the SSI program in January 1974. Many of the provisions, while technical in character are important to sound administration of that program. Provisions of this type which were included in H.R. 3153 have been added as Senate amendments to H.R. 11333. Insofar as the SSI program is concerned, they are primarily clarifications, corrections and items of the type included in the House version of that bill. Many of them are administration suggestions for more effective administration of the SSI program.

Under present law, individual determinations would have to be made in each State as to which of the new SSI recipients would be eligible for purchasing food stamps. The State welfare directors advise us that the provisions of the Agriculture bill are difficult, if not impossible to administer. The Senate accordingly added an amendment which provides that in those States which have specifically provided additional benefits to recipients to replace food stamps that the recipients will be ineligible as a group. In other States they will be eligible for a period of 6 months. This will give time to get the new program under way and for Congress to determine what it wishes to adopt with respect to food stamp eligibility among SSI recipients.

As you are aware, there is much controversy about the social service regulations which were issued by the Department of Health, Education, and Welfare and became effective on November 1, 1973. Since these are already causing a restriction of services and will do so increasingly in the months just ahead, the Senate amendment postpones the new regulations through the calendar year 1974.

In the medicare-medicaid area, also, only those amendments which had a time deadline and which are essentially noncontroversial are included in the Senate amendments. Some of them were in the original House-passed H.R. 3153 and were technical amendments to correct errors and facilitate the administration of the new supplemental security income program.

Let me summarize these amendments as follows:

First. The first amendment would coordinate the medicaid program with the new SSI program by permitting States to make eligible for medicaid those individuals eligible for SSI, requiring States to continue medicaid coverage of those individuals whose SSI benefits the States are now required to supplement to maintain December 1973 income levels, and permitting States to classify institutionalized individuals as eligible for medicaid even though the individual's income is above cash assistance levels, and the State does not have a medically needy program, provided that the individual's total income does not exceed 300 percent of the SSI benefit level.

Second. Present law provides that no Federal matching for adult assistance will be available where assistance is paid to a nursing home resident, where the nursing home care could be covered under medicaid. The amendment would extend this provision to the SSI program, which supersedes adult assistance beginning in January.

Third. Another amendment directs the Secretary of Health, Education, and Welfare to undertake a study covering all aspects related to payment for professional services in medical schools and teaching hospital settings. While the study is being undertaken by the Institute of Medicine in the National Academy of Sciences, certain provisions of section 227 of Public Law 92–603, limiting medicare reimbursements to medical centers for the services of teaching physicians on a fee-for-service basis, would be suspended until January 1975—with the Secretary permitted a further 6-month suspension. However, the suspension would not apply to those hospitals which are reimbursed on the more favorable cost basis under present law.

Fourth. Present law limits medicare reimbursement to the lesser of an institution's cost or charges to the general public effective January 1973. The amendment would postpone the effective date to January 1, 1974.

Fifth. Section 251 of Public Law 92–603, which details the approved means of reimbursing for the services of physical therapists under medicare, has an effective date of January 1, 1973. The amendment would postpone this effective date until the regulations have been issued.

Finally, the Senate added a temporary modification of the Federal-State Extended Unemployment Compensation Act which makes payments up to an additional 13 weeks to workers who have exhausted their entitlement to regular unemployment compensation. This amendment provides that States that have an insured unemployment rate of at least 4 percent may make payments under the extended unemployment compensation program without regard to a requirement in the permanent law that the insured unemployment rate in the State must be at least 20 percent higher than it was in a comparable period in the 2 prior years. This amendment would be effective for the first 3 months of 1974. It is expected that increasing unemployment will be a serious problem during this time and the Senate amendment will provide some relief in those States most seriously affected by increased unemployment.

Mr. BROYHILL of Virginia. Mr. Speaker, further reserving the right to object, it is my understanding that the bill as amended by the Senate, insofar as it relates to old age, survivors and disability insurance benefits, includes the House provisions relating to social security increases and increases in the new supplemental security income program that were the original provisions of H.R. 3153, as has been insisted, retains all of those provisions.

Second, the amendments that have been added by the Senate are—with a couple of unfortunate exceptions—technical amendments that will improve administration and have a favorable impact on costs. Most were requested or agreed to by the administration, and would be adopted by the House if they were offered as amendments.

Finally, the bill we have before us is the best compromise we could come up with if we expected to pass the social security increase bill before the end of this Congress, because the other body added many far-reaching controversial amendments, many of them hastily added on the floor, provisions that have not had any House consideration. In fact, we felt that the Senate was holding the social security increase bill as a hostage. This is repugnant to the Members of the House and is not good legislative procedure.

The members of the House Committee on Ways and Means requested the House conferees that we were not to agree to any significant amendment that had not been considered originally by the House Committee on Ways and Means, and to give the House Committee on Ways and Means an opportunity to consider those amendments.

We arrived at a compromise. I think it is the best compromise we could come up with. I believe that most of these amendments are good and reasonable amendments. My main concern relates to the supervision of the new regulations on social services.

Mr. Speaker, the provision requiring the former social service regulations to be made applicable for the period from November 1 of this year through December 31 of 1974—a 14-month period—is a mistake. The Department of Health, Education, and Welfare promulgated on November 1 of this year new regulations which were carefully worked out over a long period of time and with consultation with the Congress. These new regulations will now be inoperative for a period of at least 14 months.

The purpose of social services is to prevent people from going on welfare and to enable people who are currently on welfare to become self-sufficient. With our growing welfare costs, we should use the limited amount available for social services to achieve the goal of reducing welfare dependency—a goal which all Americans agree should have a high priority.

Under the old regulations, social services are loosely defined, and may be made available to individuals who may be likely to come on the welfare rolls within a 5-year period, without regard to an income test. Under these regulations, the States have utilized social services money for expenses that bear only the remotest relationship to keeping people off welfare or reducing the present rolls. The regulations now in effect, which will be suspended by this act, circumscribe this latitude by requiring that the individuals be likely to come on the welfare rolls within 6 months, and that their income not be more than 150 percent of the State standard for public assistance.

Additionally, the old regulations permit social services to continue 2 years after an individual leaves the public assistance rolls while the new regulations confine this period to 3 months. There are other features of the new regulations that marshal our limited resources for social services to meet the objective of the program of reducing welfare and dependency. The old regulations are much less appropriate to achieve this end.

The new regulations went through a long period of gestation during which significant changes were made by HEW to accommodate criticisms and the viewpoint of Congress on at least four different occasions. The regulations have now been in effect since November 1, or nearly a 2-month period. The action we are taking here represents a major change that will cause confusion in this program, and yet, no hearings have been held on this proposal, the Ways and Means Committee has not even considered it, nor has the House had an opportunity to evaluate it. This is not only poor policy, but poor procedure.

I do feel, however, that even under the old regulations, the Department of Health, Education, and Welfare has discretion to administer the program much more tightly than they have in the past, both in determining what constitutes a social service and in determining who is likely to be a welfare beneficiary. They have the authority to exercise their discretion to achieve the objectives of the social services program—to reduce welfare dependency. I believe it is perfectly consistent with the social services program and the legislative history in regard to this program in recent years to tighten up their administration under the old regulations as expeditiously as possible, and I urge them to do so.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

Mr. BRINKLEY. Mr. Speaker, reserving the right to object, and I shall not object, I should like to ask the chairman a couple of questions under our reservation pertaining to H.R. 1, adopted in the 92d Congress and which contained the supplemental security income provisions. There is a school of thought in my State of Georgia that there is a deficiency concerning future admittees into nursing homes. It is my further understanding that there is a Senate amendment which attempts to take care of certain of those problems relating to the nursing home industry.

While there is a grandfather clause which takes care of the nursing home patients presently in nursing homes, unless there are certain State supplements, future people who need to go into these homes might be penalized. I just wonder if the gentleman can tell me if that question is still in conference.

Mr. ULLMAN. If the gentleman will yield, let me explain that the conference is still very much alive on the other bill.

There are a number of matters that Members are interested in attached to that bill by the other body that we will be taking up in the next session. The matter the gentleman specifically refers to, however, was one of the amendments that we did accept and it is incorporated in this bill. It would coordinate the medicaid program with the new SSI program by permitting States to make eligible for medicaid those individuals eligible for SSI, requiring States to continue medicaid coverage of those individuals whose SSI benefits the States are now required to supplement to maintain December 1973 income levels, and permitting States to classify institutionalized individuals as eligible for medicaid even though the individual's income is above cash assistance levels, where the State does not have a medically needy program, provided that the individual's total income does not exceed 300 percent of the SSI benefit level.

Mr. BRINKLEY. Mr. Speaker, I thank the gentleman and I withdraw my reservation of objection.

Mr. KAZEN. Mr. Speaker, reserving the right to object, I wonder if I heard the acting chairman correctly awhile ago on the SSI program being deferred for 6 months. The gentleman did not mean to say that the program itself was being deferred but that the procedure that was required of the States would be deferred for 6 months; am I correct?

Mr. ULLMAN. If the gentleman will yield, this is only with reference to the food stamps, and I know that is what the gentleman is interested in, we merely delay for 6 months the implementation of the new requirements, and as I indicated this would have the effect of allowing SSI recipients to receive food stamps in those States that have not specifically provided for cashing out their food stamps.

Mr. KAZEN. Mr. Speaker, I thank the gentleman and I withdraw my reservation of objection.

Mr. DRINAN. Mr. Speaker, reserving the right to object, I wonder if the acting chairman could answer this question. Many of us have been deeply concerned over a long period of time with extension of the medicare benefits to prescription drugs. Will the gentleman tell us when that might be forthcoming for a vote in the House?

Mr. ULLMAN. Mr. Speaker, if the gentleman will yield, as I said H.R. 3153 is still actively in conference. That is one of the amendments the Senate put on H.R. 3153 and one of the amendments that obviously we did not have time to deal with under the format and under the time considerations of the conference yesterday. But it is one of the matters we are very seriously going to look at early next year. In our meeting with the Members of the other body we assured them that this would certainly be a matter of early consideration in the forthcoming year by the committee.

Mr. DRINAN. Mr. Speaker, with all due respect to the committee, we had a colloquy almost precisely like this last Christmas time when a number of Members pressed this point and a commitment was made that in 1973 the question of prescription drugs under medicare would be reached. At least 160 Members of this House have cosponsored a bill. The gentleman from Wisconsin (Mr. OBEY) has sponsored that originally. I just want to make legislative history here that a number of us are very concerned. I wonder if the gentleman would speak further to the question when in 1974 this very valuable and needed extension might become law.

Mr. ULLMAN. Mr. Speaker, if the gentleman will yield, let me say that during this past year I think the gentleman understands we have been beset by a great many difficult problems, and the illness of the chairman has also created additional problems, but it is the purpose certainly of this Member as acting chairman that the committee will go forward hopefully with a task group consideration of this matter early in the year. As the gentleman knows we have adopted some new procedures and I am sure that we can expect to look at this at the very earliest possible time.

Mr. DRINAN. Mr. Speaker, I thank the gentleman and I withdraw my reservation of objection.

Mr. BAUMAN. Mr. Speaker, reserving the right to object, I would just like to point out to the House that as I understand the explanation by the acting chairman of the Committee on Ways and Means, the conferees in concurring in the amendment of the other body which extends for 14 months the period during which the new and stricter HEW regulations on welfare cannot take effect, we are once again relaxing the welfare eligibility restrictions.

In a State such as mine, the State of Maryland, which now has the fourth highest welfare fraud and ineligibility rate in the United States, we badly need welfare reform. Now here in the House we are again caving in under pressure. I think the Members should understand that we are giving in to those who will not address themselves to welfare reform in this country.

Mr. BROYHILL of Virginia. Mr. Speaker, will the gentleman yield?

Mr. BAUMAN. Mr. Speaker, I yield to the gentleman from Virginia.

Mr. BROYHILL of Virginia. Mr. Speaker, I think the gentleman from Maryland has made a very good point. However, this was the only proposal included that is clearly objectionable. If the gentleman had seen the other Senate provisions pending which were going to jeopardize the social security bill, he would agree with me that the House came up with a pretty good compromise in this bill. Certainly, the implementation of the current regulations would make the act more efficient.

Mr. BAUMAN. Mr. Speaker, I will just say that this may be the lesser of two evils but it is still evil.

I withdraw my reservation of objection.

Mr. PICKLE. Mr. Speaker, reserving the right to object, I would like to ask the acting chairman of the committee a question about the benefits extension.

As I read it, we are extending the benefits for 3 additional months. Is that correct?

Mr. ULLMAN. Mr. Speaker, if the gentleman will yield to me, 3 months is correct.

Mr. PICKLE. And this would apply, from the charts, to approximately 29 to 30 States?

Mr. ULLMAN. That is about right. Yes.

Mr. PICKLE. Is this money coming from the General Treasury or the unemployment trust fund which has been built up by contributions of employers throughout the United States?

Mr. ULLMAN. Federal and State unemployment tax. That is right.

Mr. PICKLE. The regular FUTA tax?

Mr. ULLMAN That is right.

Mr. PICKLE. That means that all the States will be paying for the unemployment of these 30 States?

Mr. ULLMAN. That of course, is the principle of the whole Extended Unemployment Compensation Act. There are always some States in and some States not in under the operation of the State trigger mechanism.

Mr. PICKLE. Mr. Speaker, it would seem to me that at this hour every year many of the States come in and get these extensions. I do not want to question the need for some of these benefits, but this type of practice hurts the unemployment fund. If we are not careful and if we make this a general practice, we are going to get that fund in considerable difficulty.

Mr. Speaker, how much will this amendment cost that fund?

Mr. ULLMAN. Our best estimate is around $100 million.

Mr. PICKLE. This is $100 million extra in benefits?

Mr. ULLMAN. It could be considerably less depending, obviously, on the unemployment picture and the number of States that choose to participate. If we should go into more serious unemployment and all States that are eligible do participate, then we anticipate it.

Mr. BROYHILL of Virginia. Mr. Speaker, the gentleman from Oregon said that the best guess is that the cost of this amendment would be approximately $100 million. That depends upon how many of the States would legislate and adopt an amendment with respect to the Unemployment Benefits Act.

So there may not be that much cost, as far as the amendment is concerned.

Mr. PICKLE. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

Mr. PRICE of Texas. Mr. Speaker, I support the compromise package which would increase benefits for both social security recipients and beneficiaries of Federal assistance to the elderly, blind and disabled persons. The bill as proposed would increase social security benefits by 7 percent effective next March and an additional 4 percent in June.

Mr. Speaker, I support this compromise since it will mean added buying power in the hands of those who will put the money to good use and those who are deserving of a decent standard of living, namely our senior citizens who have given of a lifetime of work for their children and for our Nation. Since those on fixed retirement incomes generally live on a month to month basis, these benefit increases will be plowed back into our economy thereby stimulating additional jobs and income for the working sector of the population.

Of all the many schemes and programs which have been devised by the Congress to alleviate poverty and to solve problems in our Nation, many of them very costly, wasteful, and cumbersome to administer, I believe the social security system is the best equipped to do the job—it places the money in the hands of those who need it at the least cost and confusion, and it insures that each citizen shall be responsible to provide for his or her own retirement through the social security tax system.

I feel that these increases are deserving because through no fault of their own wasteful Government spending has caused runaway inflation which has eroded the elderly persons savings and purchasing power. This is only right and just for those citizens who have contributed so much to our heritage.

I had hope that my bill would have been included in the social security package which would have eliminated entirely the amount of money a person over 65 could earn without the penalty.

Mr. DORN. Mr. Speaker, the social security benefits increase has my full support. The increase is needed now by our citizens in the golden years. During the holiday season it is especially fitting and proper, Mr. Speaker, that the Nation remember those who have given to the Nation a life of productive hard work and who now live in retirement. We must not forget them, and by voting this increase in social security benefits we demonstrate our commitment. Our citizens have paid into social security and the system is financially secure to guarantee this increase. Mr. Speaker, I fully support this bill and urge the House to approve it by overwhelming vote.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. ULLMAN. Mr. Speaker, I ask unanimous consent that I may be permitted to revise and extend my remarks and that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate amendment just considered.

The SPEAKER. Is there objection to the request of the gentleman from Oregon?

There was no objection.

POINT OF ORDER

Mr. ANNUNZIO. Mr. Speaker, a point of order.

The SPEAKER. The gentleman will state his point of order.

Mr. ANNUNZIO. Mr. Speaker, was there not a vote taken on the last action?

The SPEAKER. No. The Chair will state to the gentleman that the action which was taken was to agree to the Senate amendment.

POINT OF ORDER

Mr. BAUMAN. Mr. Speaker, a point of order.

The SPEAKER. The gentleman will state his point of order.

Mr. BAUMAN. Mr. Speaker, it was my undertsanding the gentleman from Maryland made an objection to the reading of the statement in lieu of the conference report.

The SPEAKER. The Chair will state to the gentleman that there was a reservation of objection made to the unanimous consent request of the gentleman from Oregon (Mr. ULLMAN) to take from the Speaker's desk the House bill with a Senate amendment thereto, and concur in the Senate amendment.

The Chair will further state that the Senate amendment has now been concurred in.

POINT OF ORDER

Mr. CHARLES H. WILSON of California. Mr. Speaker, a point of order.

The SPEAKER. The gentleman will state his point of order.

Mr. CHARLES H. WILSON of California. Mr. Speaker, I wish to make a demand for a rollcall vote. If we are not going to get a rollcall vote, I will make the point of order that a quorum is not present.

The SPEAKER. The Chair will state to the gentleman that his demand for a recorded vote comes too late.

PARLIAMENTARY INQUIRY

Mr. ANNUNZIO. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. ANNUNZIO. Mr. Speaker, may I make a point of order, objecting to the last vote, on the ground that a quorum is not present?

The SPEAKER. The Chair will inform the gentleman that there has been much intervening business, as the gentleman knows, because the gentleman is an instructed and informed Member concerning the parliamentary rules of the House. The gentleman knows that there has been much business which has taken place.

CALL OF THE HOUSE

Mr. CHARLES H. WILSON of California. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

Mr. O'NEILL. Mr. Speaker, I move a call of the House.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

The SPEAKER. On this rollcall 306 Members have recorded their presence by electronic device, a quorum.

By unanimous consent, further proceedings under the call were dispensed with.

VACATING PROCEEDINGS WHEREBY SENATE AMENDMENTS WERE CONCURRED IN ON H.R. 11333

Mr. ANNUNZIO. Mr. Speaker, I ask unanimous consent to vacate the proceedings of the House whereby the Senate amendment to H.R. 11333 was concurred in and a motion to reconsider laid on the table and that there be a record vote on the motion to concur.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

RECORDED VOTE

The SPEAKER. The question is on the Senate amendment.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 301, noes 13, not voting 118, as follows:

So the Senate amendment was concurred in.

The Clerk announced the following pairs:

Mr. Hébert with Mr. Arends.

Mr. Hays with Mr. Peyser.

Mr. Rooney of New York with Mr. Nelsen.

Mr. Rostenkowski with Mr. Frelinghuysen.

Mrs. Boggs with Mr. Roncallo of New York.

Mr. Kluczynski with Mr. Esch.

Mr. Moorhead of Pennsylvania with Mr. Minshall of Ohio.

Mr. Murphy of New York with Mr. Anderson of Illinois.

Mr. Dulski with Mr. Martin of Nebraska.

Mr. Fulton with Mrs. Holt.

Mr. Nichols with Mr. Bafalis.

Mr. Stark with Mr. Price of Texas.

Mr. Reid with Mr. Frey.

Mr. Stubblefield with Mr. Clancy.

Mr. Vigorito with Mr. Michel.

Mr. Yates with Mr. Andrews of North Dakota.

Mr. Madden with Mr. Froehlich.

Mr. Burton with Mr. Madigan

Mr. Biaggi with Mr. Bell.

Mr. Addabbo with Mr. Lujan.

Mrs. Griffiths with Mr. Grover.

Mrs. Hansen of Washington with Mr. Mailliard.

Mr. Harrington with Mr. Cleveland.

Mr. Lehman with Mr. Quillen.

Mr. Moss with Mr. Hillis.

Mr. Podell with Mr. Collier

Mr. Fuqua with Mr. Butler.

Mr. Dent with Mr. Gubser.

Mr. Delaney with Mr. Camp.

Mr. Corman with Mr. Collins of Texas.

Mr. Conyers with Mr. Van Deerlin.

Mr. Sikes with Mr. Dellenback.

Mr. Sisk with Mr. Heinz.

Mrs. Collins of Illinois with Mr. Leggett.

Mr. Anderson of California with Mr. Lott.

Mr. Brooks with Mr. Devine.

Mr. Stephens with Mr. Rousselot.

Mr. Ryan with Mr. Ruppe.

Mr. Gettys with Mr. Taylor of Missouri.

Mr. Byron with Mr. Shoup.

Mr. Steed with Mr. Walsh.

Mr. Danielson with Mr. Sarasin.

Mr. Roybal with Mr. Whitehurst.

Mr. Smith of Iowa with Mr. Bob Wilson.

Mr. Evins of Tennessee with Mr. Scherle.

Mr. Jones of Alabama with Mr. Wydler.

Mr. Riegle with Mr. Steiger of Arizona.

Mr. Mills of Arkansas with Mr. Schneebeli

Mr. Rarick with Mr. Wyman.

Mr. Jarman with Mr. Sebelius.

Mr. Charles Wilson of Texas with Mr. Zwach.

Mr. White with Mr. Shriver.

Mr. Gibbons with Mr. Aspin.

Mr. Landrum with Mr. Snyder.

Mrs. Burke of California with Mr. Carney of Ohio.

Mr. Burgener with Mr. Keating.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

LEGISLATIVE PROGRAM FOR BALANCE OF TODAY, FRIDAY, DECEMBER 21

(Mr. RHODES asked and was given permission to address the House for 1 minute.)

Mr. RHODES. Mr. Speaker, I take this time to inquire of the distinguished majority leader as to the program for the rest of today and, hopefully, the adjournment sine die.

Mr. O'NEILL. Mr. Speaker, if the distinguished gentleman from Arizona will yield, I will be happy to respond. May I first wish all the Members of the House a "Merry Christmas" and a "Happy New Year." I hope we will adjourn sine die today.

I also congratulate the Speaker, because I believe this has been a historic session, one in which we have changed the rules and the regulations of the House in many instances and have improved the legislative process.

I am sure, as the Members analyze this session, that they will find that a tremendous amount of important legislation has been passed by the House and the Senate, and signed by the President.

Getting back to the question that the gentleman from Arizona asked me as to the balance of the program for today, may I say that we have only two items left. These are the energy bill, that has been reported by the conference committee and is currently pending in the other body. When the other body has completed its consideration of this matter then it will be returned to the House for action here.

The only other matter that is pending is the adjournment resolution. That is a Senate concurrent resolution. It has already been passed by the other body, and they are holding it over there until they have completed action on the energy bill. When they have done so they will send that item over to the House at that time.

So, I will repeat, we just have these two items, the energy bill and the adjournment resolution.

It is my understanding that the Chair is going to recess subject to the call of the Chair. As I analyze the rest of the afternoon, I would have to anticipate that there probably will be one or two rollcalls on matters of national import. In view of that, I would ask the membership to stay available until the bell rings announcing the end of the recess so that they may be available on the floor of the House and we will have a quorum.

Mr. RHODES. Mr. Speaker, if I have any time left I would like to echo the words of the distinguished majority leader in wishing all of the Members of the House of Representatives, the greatest deliberative body in the world, a very Merry, Merry Christmas, and a Happy New Year, and to congratulate the Speaker of the House in what I think is a very successful session.

PERSONAL EXPLANATION

(Mr. RANGEL asked and was given permission to address the House for 1 minute, revise and extend his remarks and to include extraneous material.)

Mr. RANGEL. Mr. Speaker, I have taken this time in order to read a statement from the gentleman from New York (Mr. Biaggi) which is as follows:

Mr. Speaker, on rollcall No. 686, I was recorded as voting for the amendment offered by the gentlewoman from New York (Ms. Holtzman) which prohibited petroleum exports from the United States to South Vietnam, Laos, and Cambodia. I was in error in voting for this amendment and ask unanimous consent that this explanation be printed.

As we all well know, Mr. Speaker, the hour was very late and the confusion in the House great. There were nearly 60 amendments introduced that day alone and this amendment came near the end of the day. We were in session until 1:30 a.m. Saturday morning. These are hardly the conditions under which to consider very important legislation.

On this amendment in particular, right before the recorded teller vote, there was a substitute amendment offered and a point of order raised.

Needless to say, it was very difficult to determine exactly what we were voting for. I was under the impression that by voting for the amendment that we would be restricting all but essential exports of oil—certainly a goal I am in agreement with. However, I find that the amendment actually calls for cutting off all oil exports to our allies in Southeast Asia.

This country fought a very long and tedious war with many Americans dying to help preserve the integrity and security of the free states of Southeast Asia. Now, in this time of great trouble, with mounting attacks by the North Vietnamese and the Viet Cong against South Vietnam, with increased acts of terrorism, including the killing of unarmed Americans we are cutting off their oil supplies with no assurance that they will be able to obtain supplies elsewhere.

In fact eliminating these supplies will also stop our efforts to identify the remaining missing in action and to determine whether any other prisoners of war are still being held.

I very much regret that I was recorded in favor of this amendment and wish the Record to show that I am opposed to it. I hope the conference committee in calmer wisdom will strike the amendment from the final report.

FOR THE RELIEF OF NICOLA LOMUSCIO

Mr. EILBERG. Mr. Speaker, I ask unanimous consent for the immediate consideration of the bill (H.R. 7684) for the relief of Nicola Lomuscio.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. SYMMS. Mr. Speaker, reserving the right to object, I would ask the gentleman from Pennsylvania whether this matter has been cleared on both sides of the aisle, and especially with the gentleman from Ohio (Mr. Devine)?

Mr. EILBERG. Mr. Speaker, if the gentleman would yield, I would say to the gentleman from Idaho that this measure has been cleared by the committee on both sides of the aisle, and the gentleman from Ohio who objected to this yesterday no longer has any objection to this matter.

I would be glad to explain the bill, but I do not want to take up too much of the time of the House.

Mr. SYMMS. I thank the gentleman from Pennsylvania for yielding. If he would assure me that the gentleman from Ohio has withdrawn his objections, I have no reservation.

Mr. EILBERG. I do so.

Mr. SYMMS. I withdraw my reservation of objection, Mr. Speaker.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. GOODLING. Mr. Speaker, reserving the right to object, I should like to ask the gentleman from Pennsylvania if he is absolutely certain that the gentleman from Ohio (Mr. Devine) withdrew his objection.

Mr. EILBERG. I say to the gentleman from Pennsylvania that the chairman, Mr. Rodino, spoke to Mr. Devine, and the chairman of the committee told me that that was the case. I have no reason to doubt his veracity.

Mr. GOODLING. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the bill as follows:

H.R. 7684

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That notwithstanding the provisions of section 212(a) (9) and (19) of the Immigration and Nationality Act, Nicola Lomusico may be issued a visa and admitted to the United States for permanent resident if he is found to be otherwise admissible under the provisions of that Act: *Provided,* That these exemptions shall apply only to grounds for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

C–5A PASSED WITH FLYING COLORS

(Mr. DAVIS of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. DAVIS of Georgia. Mr. Speaker, as I and a number of other Members of Congress have stated in the weeks since the end of the latest Middle East conflict, the C–5A has finally proven itself in a combat situation. The C–5's critics stand corrected. America has shown the ability to respond in a crisis, quickly, with massive shipments of arms and equipment. It is not often that members of the Fourth Estate admit former errors in print, but the Miami Herald had the courage to do so. I ask unanimous consent that the Miami Herald editorial of December 9, 1973, be placed in the Record at this point:

C–5A Passed With Flying Colors

Within nine hours after President Nixon decided on Oct. 13 to airlift military supplies to Israel the first U.S. Air Force cargo carrier arrived in Tel Aviv with a record 193,000 pounds of military supplies.

This was the beginning of a little noticed by truly historic operation dwarfing even the Berlin Airlift. "By Nov. 2," according to retired USAF Gen. Ira C. Eaker, "the United States had equalled the Soviet airlift to the Arabs, and by Nov. 22 it had doubled the Russian tonnage despite the fact that the U.S. supply line was 6,450 miles compared to 1,700 miles for the Soviets."

The airlift, which required only 566 missions to the Russians' 900 missions, doubtless saved an ally from extinction. "It restored Israel's weapons," Gen. Eaker goes on, averaging 1,000 tons per day for more than 30 days, "enabling her to regain the offensive, make decisive advances toward Damascus and Cairo, ultimately to achieve the ceasefire."

And how was this accomplished? Not only by superb pilots and crews but more to the point by a matchless airplane. We blush to report it was the much-maligned C–5A giant transport.

Along with many other newspapers, the Secretary of the Air Force itself, and countless congressmen, The Herald deplores the cost overruns and performance failures which appeared to make the C–5A the flying fraud of all time. In 1971 costs of the C–5A rose from $28.4 million per copy to $59 million, numerous wing and landing structure failures were reported, and the Air Force cut its order from 120 planes to 81.

But it worked. We wuz wrong.

INTERNATIONAL TEXTILE AGREEMENT

(Mr. DORN asked and was given permission to address the House for 1 minute, to revise and extend his remarks and include extraneous matter.)

Mr. DORN. Mr. Speaker, early this morning in Geneva our textile negotiators reached agreement on a 50-nation, 4-year agreement covering cotton, manmade fibers, and blends.

This is an historic achievement which should go a long way toward developing orderly trade in textiles. With some stability in textile trade assured, the textile industry can proceed with capital investment programs to keep abreast of consumer demand. Mr. Speaker, the textile industry is the very backbone of industrial employment in South Carolina. We welcome this agreement.

For the first time we now have an international textile agreement which takes into consideration not only the needs of underdeveloped countries but also the necessity of protecting the jobs of millions of Americans who depend on a healthy textile industry for their livelihood. If this agreement is administered diligently it can be a key factor in assuring a bright future for the textile industry.

Secretary of Commerce Fred Dent, officials of the State Department and Department of Labor are to be commended for their untiring efforts in concluding the agreement.

Mr. Speaker, this landmark agreement is a result of many months of diligent work on the part of many people, including the more than 140 members of the House Informal Textile Committee who have given bipartisan support to the efforts in Geneva. The textile industry itself has been extremely helpful to the administration and to the Congress in offering counsel for our negotiators.

PREOCCUPATION WITH WATERGATE

(Mr. LANDGREBE asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous matter.)

Mr. LANDGREBE. Mr. Speaker, this is the first time, the first Christmas, in many, many years that we do not have men in military combat on some foreign battlefield. I think it is just too bad that we have evaded coming to grips with the energy crisis that has been with us for well over a year; being instead preoccupied with Watergate and other matters of lesser importance, and simply playing politics a good bit of the time. Now here it is, Friday evening, just 3 days from our holiest of holidays, a snowstorm outside, and we cannot yet determine how this Congress shall accept its responsibility for changing the laws that have, in effect, created our energy crisis.

Everyone is anxious to go home; the airplanes are loaded and booked; there is no flexibility in getting passage out of Washington. My flight leaves at 6:30, and I am taking this opportunity to explain to my constituents exactly why I am leaving on that 6:30 flight.

Mr. KAZEN. Mr. Speaker, will the gentleman yield?

Mr. LANDGREBE. I yield to the gentleman from Texas.

Mr. KAZEN. I thank the gentleman for yielding. The gentleman made some kind of statement that I missed about being preoccupied with the Watergate affair in this House? Did he say that?

Mr. LANDGREBE. No. I said that this Congress, including the House and Senate, has long been preoccupied with the Watergate affair and its ramifications.

Mr. KAZEN. We are talking about Watergate. Has this House spent 1 single hour on the Watergate affair?

Mr. LANDGREBE. I am sure we have spent many hours of talking and discussing and waiting. The gentleman surely is aware that most of the business of this Congress is done in committees, and that committees, particularly the Committee on the Judiciary, have been absorbed by the Watergate affair.

Mr. KAZEN. Has there been any official committee or any body of this House actually working on the Watergate affair?

Mr. LANDGREBE. Yes. Certainly we would have to say that the impeachment program is directly related to Watergate.

Mr. KAZEN. How much time has this House taken up on that?

Mr. LANDGREBE. I have not kept a record of the hours spent debating the Watergate affair and closely related matters, but surely the gentleman is not unaware of the time used by committees on matters relating to Watergate and the impeachment of the President, or the time spent on the House floor appropriating money, and setting up the committees.

Mr. KAZEN. How much time on this floor have we spent on Watergate?

Mr. LANDGREBE. In reply, I suggest that if the gentleman is truly interested in the exact amount of time and effort spent on Watergate, he should research the CONGRESSIONAL RECORD for the past year. I suspect, however, that the gentleman is quibbling over the question of exact time in order to evade the issue that I raise—namely, that it is ridiculous and irresponsible to, at this late hour, be trying to somehow put together a package containing a hodgepodge of hastily drafted amendments on such a crucial and far-reaching issue as the energy crisis. Congress is largely responsible for the energy crisis and is now trying to pass more laws, the consequences of which are unknown, merely to be able to say to the public that it is "doing something."

The SPEAKER. The time of the gentleman has expired.

WATERGATE

(Mr. HOGAN asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous matter.)

Mr. HOGAN. Mr. Speaker, while I do not agree with everything the gentleman in the well Mr. LANDGREBE, has said, certainly our friend, the gentleman from Texas, remembers that we have had matters in the House relating to Watergate. We had legislation extending the Watergate grand jury; we had legislation calling for a Special Watergate Prosecutor; we have had legislation calling for a subpena for Gordon Liddy. We had a bill giving the Senate Watergate Committee authority to get the U.S. District Court to enforce its subpenas for Presidential tapes and papers, not to mention the $1 million we appropriated for the Committee on the Judiciary to finance its impeachment probe. So I think the gentleman from Texas should concede, in fairness to the gentleman from Indiana, that we have consumed some time in the House talking about Watergate matters.

WATERGATE

(Mr. KAZEN asked and was given permission to address the House for 1 minute, to revise and extend his remarks, and to include extraneous matter.)

Mr. KAZEN. Mr. Speaker, I, as many other Members, have been receiving correspondence from constituents and people all over the country telling this House to go ahead with the business of this country and quit spending its time on Watergate. I have answered them that this House has not been devoting its time to Watergate; we have not paid any attention to those matters by way of investigation. The investigations have been conducted by one small committee of the Senate and by the courts and grand juries of this country.

Mr. Speaker, I challenge any Member to disagree with this statement: outside of appropriation of $1 million for the Judiciary Committee, the extension of the grand jury term and discussion of a Special Prosecutor proposal that never reached the floor of this House, we have used no time on Watergate-related matters.

I submit, Mr. Speaker, to the Members and to the people of this country that the House of Representatives has instead devoted its energies, any and night, in committees and on the floor, to solving some of the most critical problems our country has faced in many years.

What the House may do on the impeachment matter, as we face our sworn duty to defend the Constitution, is another matter, but as far as time being diverted from the business of this Nation during this session, I say such a charge is absolutely not true.

PEOPLE DEMAND THAT THE CORRUPTION OF WATERGATE BE DEALT WITH

(Mr. WALDIE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WALDIE. Mr. Speaker, my correspondence is just the opposite from that described by the gentleman from Indiana. I am getting a great many more complaints from people who think that the House has not been devoting enough time to impeachment of the President who gave us the corruption of Watergate.

It is not the House that has been devoting too much time to Watergate and it is not the Senate that has been wasting its time on Watergate—it is the President who has brought the stain and blemish of Watergate to the country. Unless we deal with that problem we will not deserve to be here next year.

PRESIDENT SHOULD NOT OVERRIDE WILL OF PEOPLE

(Mr. CAREY of New York asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CAREY of New York. Mr. Speaker, we all ought to think in terms of compassion and benevolence and good human relations for next year in the spirit of this season. The President has given us an example in terms of offering a supreme sacrifice. He is willing to stay in the White House and freeze over there and endure the discomforts of the Office just to give us a good example.

I wish the President in the rest of 1974 a warm and happy enjoyment of the official residence of the President as long as he is there and I think that is the spirit in which we should express ourselves.

But if we are going to talk about what our House has achieved in this body in the year 1973, how much more time we could have spent on the people's business, expressing the will of the majority of the country through the House of Representatives if we had not had to spend so much time trying to override the vetoes that the President placed on good sound legislation that the people wanted through their Representatives.

I ask this: While the President is reviewing the year over in the frozen White House and enduring its discomforts, perhaps a little warmth, a little generosity will be stirred in the embers of the fireplace if he will join us in 1974 in putting forward the sound progressive programs to save this country and restore public confidence.

A very Happy New Year to you, Mr. President, as we gather around the fireplace. Please do not veto the will of the people in 1974. In return we will vote the will of the people.

IT FRIGHTENS ME

(Mr. DENNIS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DENNIS. Mr. Speaker, I want to observe that in contrast to my friend who just left the well, the type of legislation that we too often pass here reminds me of the story of the Duke of Wellington who had a council of war with his staff and he came out and shook his head afterward and said: "They may not frighten the enemy but by God, sir, they frighten me."

LAWYER PLAYS NIXON TAPE

The SPEAKER. Under a previous order of the House, the gentleman from Idaho (Mr. SYMMS) is recognized for 30 minutes.

Mr. SYMMS. Mr. Speaker, I think that the Watergate situation has hit a new low. The fact that one of the White House tapes was played by one of Ralph Nader's lawyers at a cocktail party is an outrage. It is interesting to note that such a flagrant disregard for the judicial system and for the law as a whole should come from someone who is representative of a group who is screaming the loudest about improprieties in government. Why does not Ralph Nader, Common Cause, and ACLU, and others direct some of their ire toward this kind of activity? The following articles in the Washington Post, and in the Washington Star-News should be read by everyone:

Play It Again, Sam

Who said social life in Washington is dull since the Nixon administration came to town? We now have the ultimate in entertainment on the cocktail circuit: Tape recordings, straight from the Oval Office.

They may be scratchy and hard to hear but, gads, what great fun! If you listen closely—and who's going to engage in the usual cocktail party chit-chat when a Watergate tape is on?—you can hear President Nixon telling jokes, and heaven knows what else. And all courtesy of Nader's raiders, that super-duper group of reformers who engage in rooting out injustice, malfeasance, misfeasance, wrongdoing, and bad judgment of all description, from the corporate board rooms of America to the highest councils of government.

It is hard to imagine an instance of poorer judgment than that of William Dobrovir when he played a copy of a White House tape the other night at a cocktail party. It is particularly irresponsible conduct for a lawyer, who is considered an officer of the court.

The White House turned the tape over to Dobrovir as a result of a court order in a suit filed by Nader and a number of consumer groups, who have charged that milk subsidies were raised by the Nixon administration in return for campaign contributions. The playing of the tape at a cocktail party lends weight to Mr. Nixon's argument that executive confidentiality is being breached by requiring him to turn over Watergate tapes to courts and investigators.

It seems to us that Dobrovir also used bad judgment in getting the help of a network television correspondent to make two copies of the tape. That plays squarely into the hands of those at the White House who accuse Watergate investigators and the press of being in cahoots to get the President.

Dobrovir has acknowledged his error and has told the court he is sorry. But that hardly seems sufficient amends for such serious misconduct. We would think that the local Bar Association would at least want to look into the matter.

If this is an example of how the tapes are being handled once they get out of the White House, we wouldn't be surprised if copies of Watergate tapes show up next week in Christmas stockings around town. Ho, ho, ho . . . play it again, Sam . . . er, Bill.

Attorney Apologizes for Playing Nixon Tape

(By George Lardner, Jr.)

One of President Nixon's tapes was played at a Georgetown party this week and caused reverberations yesterday in federal court.

U.S. District Court Judge William B. Jones heard about the extra-judicial playback via press and radio reports yesterday morning and quickly summoned the attorney responsible for it to his courtroom for an explanation.

The abashed lawyer, William A. Dobrovir, acknowledged playing the subpoenaed tape for what he described as an impulsive five minutes at a Georgetown home Monday evening.

He said it all started when he told his friends that he had "the hottest item in town" in his pocket.

"I made a very foolish mistake," Dobrovir admitted.

The tape recording, involving a March 23, 1971 meeting between President Nixon and dairy industry leaders, had been subpoenaed by Dobrovir for a civil suit challenging the administration's controversial increase in milk price supports.

Dobrovir, who filed the lawsuit on behalf of Ralph Nader and several consumer groups, promised not to treat potential evidence that comes into his hands so lightly again. The White House, waiving any claim of executive privilege for the recording, let Dobrovir have the tape last week.

Judge Jones accepted the 40-year-old lawyer's explanation and said he was satisfied the episode would not be repeated. At the request of Justice Department lawyers, he said he would sign a protective order covering milk suit documents and recordings produced under subpoena, but he ruled out a companion request for a broader order prohibiting Dobrovir from making public statements about the case.

At the White House and on Capitol Hill, there were sterner reactions. Presidential counselor Melvin R. Laird told a White House press conference, when his resignation was announced, that he thought the episode "disgusting."

"I just can't believe that kind of use would be made of confidential information," Laird said.

Laird said if he were the President, "I would be very careful" about surrendering any more tapes.

Senate Republican Leader Hugh Scott said he thought the District of Columbia Bar Association should "look into this matter of highly questionable ethics." Senate Democratic Leader Mike Mansfield said the incident was "most unfortunate."

Dobrovir said the tape was given him without any restrictions, but admitted that he should never have used it as a party favor. He said he told The Washington Post last Saturday that he had the recording and this resulted in a flurry of press inquiries on Monday about when it would be released.

The attorney said he borrowed a couple of tape recorders from Fred Graham, a CBS newsman, found the quality of the tape "quite poor," and made two casette copies at varying speeds in hopes one of these might be easier to hear at home on his own hi-fi equipment. Graham said he heard portions of the tapes on an "off the record" basis in Dobrovir's office Monday.

On the way home that evening with one of the cassettes in his pocket, Dobrovir said he stopped off at the home of a woman friend in Georgetown who had invited him over for a drink.

Dobrovir said there were seven guests including himself "sitting around the fireplace, eating salami and chopped liver, having a drink" when he foolishly announced, "Well, I've got in my pocket the hottest news item in town . . . It was suggested—it may have even been I who suggested it . . . 'Can we hear a little bit of it?' "

One of the guests was Kevin Delaney, assistant bureau chief in Washington for ABC News. Dobrovir said he told Delaney that the playing was off the record, but Delaney apparently understood that the restriction applied only to the contents, which Dobrovir said were still "very difficult to understand."

On Tuesday afternoon, Dobrovir said he got a telephone call from David Schoumacher of ABC News who asked to hear the tape. When Dobrovir refused, Schoumacher asked him: "Well, didn't you play it at this cocktail party?"

Schoumacher said Dobrovir told him, "Well, that was just for fun." ABC reported the episode on its Tuesday night broadcasts. Dobrovir said he couldn't remember saying "just for fun," but he said that he does have "a flip way of talking sometimes, which I certainly regret at this time."

Judge Jones said he thought it "only right and proper" that he conduct an inquiry. He satisfied himself at the outset that the tape Dobrovir played was not the one for which the White House has claimed executive privilege and turned over to Judge Jones for secret inspection.

Dobrovir assured him that it was not. The second recording is of a meeting that Mr. Nixon had with high administration officials in his Oval Office on March 23, 1971—following the meeting with dairy industry leaders—to discuss higher price supports.

After hearing out Dobrovir and Justice Department lawyers assigned to the case, the judge said he had no intention of prejudging "the Department of Justice or postjudging Dobrovir's conduct. Jones told Justice Department lawyers they should take any complaint to the court's committee on grievances if they felt strongly about it.

In asking for an order prohibiting public statements by Dobrovir, Justice Department attorney Irwin Goldbloom cited the American Bar Association's Code of Professional Responsibility for civil suits.

Judge Jones replied that "the Department of Justice has issued some statements that fly in the face of the canon at times."

The judge ended the hearing with the hope that the incident would not impede the progress of the suit itself, which has charged that the administration's increase of milk price supports in 1971 was a payoff for contributions to the Nixon campaign. Jones emphasized that he considers the allegations in the lawsuit "to be very serious."

ON THE OCCASION OF THE RETIREMENT OF ROBERT HOLLINGSWORTH FROM THE AEC

(Mr. PRICE of Illinois asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PRICE of Illinois. Mr. Speaker, in these days of turmoil in our Nation, and crisis in our Government, it is indeed unfortunate that we are losing one of the most distinguished men to have ever served in the Atomic Energy Commission. Mr. Robert Hollingsworth is retiring on December 31, 1973, from his position as general manager of the AEC after a Government career spanning more than three decades.

Bob Hollingsworth has served with distinction in the vitally important position of general manager of the AEC for almost a decade. He has seen the Commission through dynamic and difficult days as our civilian nuclear power program moves to fill its proper role as ultimately one of the major sources of power and energy for our country. In recognition of his outstanding performances through the years, he was awarded the Arthur S. Flemming Award for Outstanding Young Men in Government in 1958; the President's Award for Distinguished Federal Civilian Service in 1966; the AEC's Distinguished Service Award in 1969; and to cap his career, the National Civil Service League, a private organization, named him in 1973, one of the year's 10 outstanding Federal employees.

To comprehend the scope and magnitude of Mr. Hollingsworth's responsibilities, it should be realized that his management activities involved the efforts of almost 100,000 persons in Government and private industry doing business with the AEC. In 9 years as general manager, he has been responsible for programs which have totaled more than $20 billion. The physical plant supervised by him is now valued at nearly $10 billion.

Our Government is losing a fine, dedicated American and I want to take this opportunity to wish him well in his next endeavor.

MR. CHARLES H. WILSON OF CALIFORNIA ANNOUNCES INTENTION TO VOTE ON ENERGY BILL

(Mr. CHARLES H. WILSON of California asked and was given permission to address the House for 1 minute.)

Mr. CHARLES H. WILSON of California. Mr. Speaker, the gentleman from Indiana has indicated that he is going to leave at 6:30 this evening. I just want to serve notice that I will be here until we have completed deliberations on the energy bill.

Mr. Speaker, it is my intention to call for a rollcall at such time as that bill comes up, because I think that the people throughout the country want to know where the Members of this body stand on this energy bill which will be before us.

SAVE US FROM NADER

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. CRANE) is recognized for 5 minutes.

Mr. CRANE. Mr. Speaker, a very prominent citizen of West Virginia, Mr. Elmer Fike, regularly writes a column entitled "Elmer's Tune."

I have read many of these columns with a great deal of interest because Mr. Fike has a way of setting the record straight on many issues.

The following column, entitled "Save Us From Nader" is a classic which deserves the considered attention of all my colleagues and of the American public in general:

SAVE US FROM NADER

(By Elmer Fike)

If one person were to be considered responsible for the energy crisis, it would probably be Ralph Nader. Yet in a recent editorial he tries to put the blame on nearly everyone else but himself.

For instance, he blames the auto industry for failing to develop small cars. When General Motors did come out with a United States answer to the Volkswagen, it was Nader who was responsible for killing it with his book, "Unsafe at Any Speed." Now a decade later a congressional committee has repudiated Nader and declared the Corvair was reasonably safe and comparable to other cars of its time, but the damage was done. No manufacturer was willing to try so daring an experiment again, and the American small car was set back many years.

In his editorial Nader talks about the "gas guzzling behemoths" that are inefficient, yet it is the ecologists acclaimed and encouraged by Ralph Nader that have insisted on unreasonable pollution abatement devices that increase the fuel consumption 15 to 20 percent to achieve very slight benefit.

He complains that utility companies promote electrically heated homes stating that this is an inefficient heating method. This is true to some extent. At least, however, electrically heated homes are in effect using "coal by wire" to heat with, and coal is still readily available while gas and fuel oil are getting scarce.

Nearly everyone has come to recognize that the fixing of the price of gas and reducing the depletion reserve has discouraged drilling and exploration for new deposits of oil and gas. Yet Nader talks of the "profit-glutted oil and gas industry". If there is so much profit, why doesn't he drill a few wells? He could help the energy crisis and with all these profits finance his own movement instead of depending on contributions.

Nader refers to "Interstate Commerce Commission's crazy quilt regulations" that result in rail cars and trucks returning empty. Yet who, if not Nader himself, is demanding even more regulations to protect the consumer?

He attributes the Office of Management and Budget with holding up development of new hydroelectric capacity in the west, yet affiliates of his movement have held up development of hydroelectric power here in the east by their objections to the Blue Ridge power project.

Nader finds fault in the President for recommending increased nuclear power pointing out the "horrendous risks" involved. Undoubtedly it has been Nader and his movement that has held up this source of energy. There is little doubt that if another committee were to investigate they would find Nader as wrong about this as he was about the Corvair. Meanwhile he is contributing to the energy crisis.

He claims that the consumers use only 30 percent of the energy and that curtailment should be in industry that uses the most. Up to now the chemical industry has been the one that has been curtailed the most in order to keep cars running on the highway. If these same priorities continue, it may not be long until the motorists have a lot more gas than they can afford to buy if they are out of work due to material shortages.

One of the biggest causes of the energy crisis has been the failure to recognize that a problem was developing. This was largely the result of massive publicity which continually labeled the crisis merely a contrivance by the oil companies to get higher prices. It seems that just a few weeks ago Nader was still making this claim.

Savior Nader, when are you going to save us from yourself?

THE LATE J. HAROLD BRISLIN

The SPEAKER. Under a previous order of the House, the gentleman from Pennsylvania (Mr. McDADE) is recognized for 10 minutes.

Mr. McDADE. Mr. Speaker, I have been deeply saddened by the loss of an extraordinary American and one of the most outstanding newspapermen of this Nation, J. Harold Brislin, of the Scranton Tribune and the Scrantonian in northeast Pennsylvania.

He was a man of incisive talent. He became a definitive authority on every subject at which he looked, and he seemed to look everywhere. When he wrote on the environment, he was acclaimed immediately, and was honored by the American Oil Co. for environmental writing about pollution of air, land and water. When he wrote of the serious illness of arthritis and the medical efforts to combat this disease, he was awarded a first prize in newspaper writing by the Arthritis Foundation. When he wrote on the work of the March of Dimes Foundation, he was cited by the National Foundation for interpreting their work through a study of the Lackawanna County chapter.

On four occasions he received the "Award of the Middle Atlantic District

Council, the Newspaper Guild." In 1952, the award was for a series of articles on an attempted drastic revision of its system of local government. In 1953, the award was for a series on the health, welfare, and recreation agencies supported by the community chest. In 1958, the award was for a series of articles on a bizarre Yuletide escape plot at Lackawanna County jail. And the final prize was for a series of articles that helped raise more than $12,000 for a fingerless Olyphant tot.

But of all the awards he received, he will certainly be remembered for the award of the Pulitzer Prize in journalism, the highest award in journalism in America. He was cited by the trustees of Columbia University on that occasion for "courage, initiative, and resourcefulness," and these were eminently the qualities that you saw through all his life.

Were I to cite all the distinctions that filled his life—having one of his stories selected for "The Big Story" on radio and television, for example—the list would be almost endless. But his life was more than awards, more than just a man with a typewriter doing a tough reporting job well.

He was a man who had a deep and enduring concern over children. When he did a series of articles on child abuse, it was not for the award which came to him when the series was completed, but because he had a deep love for children, especially for handicapped children. You could not be with him long without knowing that whatever else occupied his mind, there was always one small part that worried about these children, and you knew he was always ready to come to their help, their defense with the words he used so well.

I shall miss Harold personally. Our whole community will miss him, and indeed the Nation has lost such a man as Jefferson must have been thinking of when he wrote:

> Were it left to me to decide whether we should have a government without newspapers, or newspapers without a government, I should not hesitate a moment to prefer the latter.

I extend to his family my deepest sympathy, to his beloved wife, Gene; to his son, Robert Bruce Brislin; to his brother, Tom Brislin; and to his sister, Mrs. Florence Howell. I know no words of mine can ease their sorrow at the loss of this splendid man, but I hope they will be consoled by the thought that in his life, in troubled times which called for all of us to give our best, he did indeed give his best, and his best was magnificent.

THE IMPACT OF THE EMBARGO ON NEW ENGLAND: REPORT OF A SPECIAL STUDY MISSION TO THE MIDEAST—PART III

The SPEAKER. Under a previous order of the House, the gentleman from Connecticut (Mr. STEELE) is recognized for 45 minutes.

Mr. STEELE. Mr. Speaker, New England is more dependent on petroleum production for its energy than any other section of the United States. Its environmental requirements and geographical location mitigate against the use of coal and natural gas, respectively; its energy sources include only a 2-percent reliance on coal and a 9.4-percent reliance on natural gas, as compared with 18.2 percent and 31.8 percent, respectively, for the United States. The reason has thus developed a petroleum-based economy, which in 1971 relied on petroleum products for 83.5 percent of its energy requirements, compared with 41.8 percent for the Nation as a whole. The region's reliance on petroleum is aggravated by the fact that it has no proven reserves of petroleum, coal, or natural gas.

ENERGY SOURCES COMPRISING GROSS CONSUMPTION, BY REGIONS, IN PERCENTAGES, 1971

Region	Anthracite	Bituminous and lignite	Petroleum	Natural gas	Hydro and nuclear	Total
New England	0.1	2.0	83.5	9.4	5.0	100
Middle Atlantic	1.4	19.6	55.5	19.6	3.9	100
East North Central	.1	34.3	32.8	31.8	1.0	100
West North Central	(1)	16.2	39.3	40.4	4.1	100
South Atlantic	(1)	26.4	51.6	19.6	2.4	100
East South Central	.1	38.4	28.8	27.4	5.3	100
West South Central	(1)	.2	39.3	70.8	.4	100
Mountain	(1)	15.9	35.5	39.2	9.4	100
Pacific	(1)	1.4	43.6	34.2	20.8	100
United States	.2	18.3	41.8	31.8	4.9	100

[1] Insignificant.

Another factor which points up the uniqueness of New England's energy situation is the use pattern of petroleum products. The region, which has longer and colder winters than most others in the United States, relies far more heavily on petroleum products for household heating and the production of electric power than the rest of the country. More than a third of New England's consumption of petroleum goes for home heating, compared with only 9 percent for the whole country, and 19 percent of the region's petroleum is used for the production of electric power, which is nearly five times the percentage used for that purpose for the United States as a whole. Industrial and transportation uses account for 7 percent and 24 percent, respectively, of New England's petroleum consumption, which is identical with the national averages for these uses.

In all, approximately 70 percent of the homes and buildings in New England are heated by oil, and slightly more than 70 percent of its electric power is generated from oil. These represent far greater percentages of reliance on petroleum products than is the case in any other region of the United States.

The question of the precise impact on New England's economy of the cutoff of Middle East oil rests on statistical information which to date has not been developed. A breakdown of the use by New England of oil from foreign sources is not possible, inasmuch as the importation, refining, and transshipment of the product within PAD I—Petroleum Administration for Defense District I, which includes all of the eastern seaboard States—clouds that statistical picture. Nevertheless, an examination of the data available suggests the basic dimension of New England's reliance on oil imported from the Middle East.

In 1971, oil consumed in the States comprising PAD I totaled 2.1 billion barrels; New England's share of this consumption was 403 million barrels—about 20 percent of the total. Of the total PAD I consumption, imported oil was reported at 967 million barrels, accounting for 46 percent of the oil used in the district. Applying the PAD I 1971 import rate of 46 percent to New England's total annual consumption of 403 million barrels results in a 189-million barrel consumption of imported oil for the region. This is admittedly a conservative estimate; in all probability, New England's consumption of imported oil is higher than the 46 percent that applies to the whole of PAD I. Furthermore, imports of Middle East oil probably accounted for a very large proportion of the oil imported into and consumed in New England.

It follows that a higher proportion of Middle East imports would end up in the New England region, since use of the most direct shipping routes would result in larger proportions of imports from Western Hemisphere Suppliers going into the southern part of PAD I than into the northern sector. Also traditional trade patterns result in a high rate of transshipment of Arab oil from European and Carribean refineries to New England. Thus, it can be assumed that New England's use of Middle East oil was at least 25 to 30 percent of the total consumption of Middle East oil in the eastern seaboard States of PAD I. This would put New England's dependence at more than 241 million barrels yearly as of 1971, or more than 60 percent of its yearly consumption of petroleum products.

Although incomplete data exists for 1973 import destinations and fuel use, there are several factors which would point to even higher dependence on Middle East oil in New England this year than in 1971 or 1972. First, in early 1973, extremely cold weather forced both major oil companies and independent terminal operators to import huge amounts of additional No. 2 home heating oil and residual oil. Second, import restrictions on imported crude oil and refined products were relaxed by President Nixon. Third, electric utilities bought additional amounts of imported oil for their generators. Fourth, scarcity of gasoline in the summer months forced jobbers and independent chain operators to import additional supplies. Fifth, the fear of shortages stimulated both major oil companies and independents to start stockpiling home heating oil during the late summer months. These increased purchases were mainly based on Arab crude.

In combination, the extra imports throughout the year greatly increased U.S. dependence on both Arab crude oil and on products refined abroad from Arab crude oil. In the months before the embargo, some Arab countries increased their exports to the United States by 300 percent. Since many of the refined products were shipped into New England, they contributed greatly to an even further dependence on Middle East oil by the region.

CUTOFF EFFECTS ON THE ECONOMY

The United States has had an encouraging year in 1973 for balance of payments, employment, and increasing gross national product, but all three of these factors will be seriously affected if the American economy is forced into a continuing oil shortage resulting from the Arab oil boycott.

Estimates of the effects of the oil shortages on the Nation's economy range from projections of no serious impact to forecasts of a mild recession, but most predict the latter. With a shortfall of 2.5 million barrels per day throughout 1974, it appears that the decline in the gross national product will be between 0.5 percent and 1 percent during 1974 and that unemployment will rise from the current 4.5 percent to between 4.8 and 6 percent on a national average.

It is reasonable to assume that the rise in unemployment will be felt first and hardest in areas of energy-intensive manufacturing and the areas most heavily affected by the boycott. I am particularly concerned about the New England States, which will be greatly affected by the boycott and are already experiencing unemployment of 6.5 percent, which is 2 percentage points over the national average. Unemployment in the region is now at 350,000 and could increase to 9 percent of our work force which means that another 150,000 individuals could lose their jobs in the next 6 months.

1974: THE ARAB OIL EMBARGO LOWERS MOST REAL GROWTH FORECASTS AND RAISES IN INFLATION

	Percent change 1974 from 1973				1974 current dollars, GNP (billions)	1974 unemployment rate (percent)

[5] Not more than 6 percent.

Note: Of the 18 forecasts tabulated last time, 15 revised real growth down, none up; 15 revised price inflation up, none down; 15 revised the unemployment rate up, none down.

Source: Published forecasts and personal communication. RCA Forecast: RCA Economic Forecasting Model.

These projections are particularly significant to New England which is experiencing as a region one of the slowest growth rates in the United States. Between January 1967 and January 1973, the decline of factory jobs was 2.6 percent, or 36,000 jobs. The overall factory job growth picture placed New England seventh out of the eight regions of the country. Only the mid-Atlantic States, held back by New York, were lower.

The stunted growth picture for New England is also reflected in the State growth rankings for the same 1967-73 period. By individual States, Vermont ranked 14th and New Hampshire 22d among the 50 States in terms of rate of growth. This is significant in that these States are more resort, recreation, and service oriented. The States with a high proportion of manufacturing—Connecticut and Rhode Island—were tied at 41st, and Massachusetts 47th. Maine was 44th among all States, its service jobs not yet having expanded as fast as its other northern neighboring States.

Because of New England's location and industrial structure, the oil embargo poses a grave threat to the region's economy. New England is on the tail end of the oil distribution system, depending on hundreds of small, independent fuel dealers who deliver 80 percent of its oil. The independent dealers, in turn, are largely dependent on the major oil companies for their supplies, and as we have seen during the past year, the major companies are inclined to fill their own retail needs before meeting the needs of the independents. While the mandatory oil allocation program now planned is designed to assure the independents a fair share of the available oil, there may be a number of technical as well as competitive reasons why it will not work perfectly to assure a fair distribution of the fuel.

Thus, in addition to New England being more dependent on oil—particularly Middle East oil—than other sections of the country, its location and distribution system require that its needs be given special consideration during the embargo.

There are also other factors which will serve to make the energy shortage more critical for New England. One is that New England lacks adequate forms of mass transit. A second is that the railroads are in poor condition in New England, meaning that there will be difficulty in moving adequate amounts of coal into the area to offset some of the loss of heating oil, even if additional coal becomes available. A third factor is that New England is colder than most of the United States and therefore requires great quantities of fuel just to survive the winter. For instance, while factories in certain parts of the country can remain open with no or little heat, New England uses fuel to heat factories as well as run certain industrial processes during the winter months.

Job losses are likely to be most heavily concentrated in such industrial areas as chemicals, plastics, glass, textiles, and screw machine products. But increased unemployment will certainly not be limited to these industries. One large Connecticut printing firm, for example, is facing the prospect of having to lay off most of its employees because it cannot get sufficient propane gas for its equipment.

Prospects for shorter working hours face still other, nonindustrial enterprises, such as gasoline service stations, automobile dealers, delivery services and retail stores. Additional layoffs are imminent in recreation-related industries and in basic service industries which depend on sports, such as boating and skiing, to bring in customers.

Estimates of the impact of the energy shortages on employment in New England has been provided by David Pinsky, a professor at the University of Connecticut. He estimates that by next June, unemployment in Connecticut will rise by 50,000, from 70,000 to 120,000; in Massachusetts by 70,000, from 205,000 to

275,000; in Rhode Island by 12,000, from 28,000 to 40,000; in Maine by 6,000, from 24,000 to 30,000; in Vermont by 5,000, from 12,000 to 17,000; and in New Hampshire by 5,000, from 13,000 to 18,000.

This totals 150,000 workers who are likely to be put out of work in New England because of energy shortages. About one-third of the increase will come from industrial cutbacks, one-third from the increasing number of youth who are entering the labor force and for whom jobs will be scarce, and the remaining third from direct and indirect layoffs in the service sector of the economy.

The result is clear. Not only will New England face greater heating problems this winter than other regions of the country, but it will also face more serious economic disruptions than most other areas unless major and unprecedented steps are taken by the Federal Government to distribute the Nation's fuel shortages as fairly as possible.

FINDINGS AND CONCLUSIONS

First. The administration slowed its response to the Arab embargoes because it underestimated the extent to which the United States was dependent on Arab oil. The United States' real dependence on Arab oil is between 14 and 18 percent.

Second. The Arab threats against nations like Canada may cause further reductions in the amounts of oil we are able to import from non-Arab countries.

Third. Existing domestic oil wells no longer have sufficient production capacity to meet peak domestic demand.

Fourth. Existing domestic refining capacity is no longer sufficient to meet the demand for many petroleum products.

Fifth. Even without the Arab embargo, the United States would not have been able to import enough refined distillate petroleum products to meet the demand during a cold winter.

Sixth. The United States will not be able to replace Arab oil losses with increased imports from other countries.

Seventh. The price of imported oil will remain at a relatively high level even with the lifting of the embargo.

Eighth. The dependence on imported petroleum products such as No. 2 home heating oil and residual oil have made the east coast of the United States particularly vulnerable to an oil embargo.

Ninth. New England is more vulnerable to the Arab oil embargo than any other section of the country. The region is 83 percent dependent on oil as a source of energy, while the average for the country is 41.8 percent.

Tenth. Even with a continuation of normal Arab oil shipments to all countries, the United States may not be able to import all of the distillate oil and residual oil it needs to meet domestic demand.

Eleventh. Increased foreign governmental control over major international oil companies operating in Europe will limit the companies ability to shift increased supplies to the United States even if American petroleum prices rise significantly.

Twelfth. It is clear that the oil producing countries will insist on determining the future price of their oil, rather than allowing the international oil companies to set the price, as in the past.

Thirteenth. There is significant additional doubt as to whether or not the oil producing countries will produce at maximum rates even with skyrocketing world prices.

Fourteenth. The Arab oil producing countries have the capability of effectively maintaining the boycott because of the very precise recordkeeping they have on oil shipments and destinations.

Fifteenth. Saudi Arabia, apart from historic and religious reasons, will play a prominent role in the future of Middle Eastern politics because of its rich oil deposits and its accumulation of extensive capital.

Sixteenth. Until such time as the United States is able to increase its own production of oil and coal, Saudi oil alone can fill much of the current gap between U.S. supplies and demand.

Any substantial increase in Saudi production, however, would probably have to be linked with an intensive reciprocal U.S. effort aimed at helping Saudi Arabia industrialize.

Seventeenth. Saudi Arabia may work to relax the oil embargo prior to a complete settlement of the Arab-Israeli dispute.

Eighteenth. Saudi Arabia will most likely accept whatever agreement is reached during the peace negotiations by the main combatants.

Nineteenth. It is of extreme importance for the United States to develop a long term energy strategy which both coordinates Federal programs and plots future energy development in relation to future energy needs. This long range policy, if properly planned and developed, would allow Congress to assess its legislative actions in relation to the overall goals of U.S. energy policies.

Twentieth. The organization of U.S. energy programs must be further centralized along the lines of the new Federal Energy Administration to include all the energy programs in one agency.

Twenty-first. The energy crisis and increasing dependence on Middle East oil are long term problems for Western nations and Japan. Stopgap solutions will not alleviate dependence on oil and the subsequent dependence on the Middle East.

Twenty-second. The United States must put equal emphasis on decreasing demand for oil products as it moves to expand supplies. In the last 3 decades the world has used up more energy than in all previous history. Furthermore, in the next 15 years man is expected to consume more energy than he has up to now.

Twenty-third. The U.S. response to the Arab oil boycott involves a much bigger question than simply U.S. support for Israel. The bigger question is whether the United States is to retain control of its own foreign policy, or if U.S. foreign policy is to become increasingly dependent on Middle East oil, and through oil, on not only the more moderate Arab oil-producing States, but on the more radical Arab States and the Soviet Union.

Twenty-fourth. If we give in to Arab demands this time, we may well face further demands in the future. One can envision, for example, demands relating to the U.S. Sixth Fleet in the Mediterranean, to the U.S. military presence in Turkey, to U.S. relations with such pro U.S. Mideastern countries as Iran and Jordan, or to demands affecting the stability of NATO. Giving in to current Arab demand also could be expected to encourage other raw-material producing nations to attempt to use their export products to gain political concessions from the United States.

RECOMMENDATIONS

First. The United States cannot permit its economic security to become dependent on foreign sources of energy to the point that we cannot replace that energy if it is withheld. Therefore, it is essential that every reasonable effort be made to insure that the United States has the ability to maintain energy self-sufficiency at the earliest possible time. To this end, a major commitment to long range Federal energy research must be made. The range of projects should include programs designed to expand use of fossil fuels through development of oil shales, tar sands, coal gasification and other projects. It should also concentrate on renewable forms of energy such as massive funding to the development of newer forms of energy such as fusion power.

Second. An informational program designed to give State governments up-to-date data on supply, demand and consumption of fuels must be established. This information is absolutely vital if State governments are to keep the public fully informed as to the status of energy supplies and recommend programs for conservation and public cooperation.

Third. As one immediate action, the United States could increase domestic production of oil slightly by raising the maximum efficient rates at which oil is pumped from the wells. U.S. oil wells have been producing at close to maximum capacity for the last 3 years and too great a jump in production could permanently damage the wells. But through carefully controlled increases, we could achieve added production of at least 200,000 barrels per day and possibly as much as 300,000 barrels per day.

Fourth. The Elk Hills—California—Naval Petroleum Reserve and Naval Petroleum Reserve No. 4 in Alaska should be opened to production. The Elk Hills Reserve is capable of producing, almost immediately, 160,000 barrels per day and, after some investment in pipelines and other facilities, as much as 300,000 barrels per day in 3 years.

Fifth. Natural gas should be deregulated at the wellhead, not only to assure the production of more gas, but to enable the industry to operate free of uncertainties about changes in future and perhaps retroactive Federal Power Commission policies. Without deregulation, natural gas will be consumed within the producing States and not transported in interstate shipments to such areas as New England because of higher intrastate prices.

Sixth. The price structure for consumption of natural gas and electricity should be reversed. Instead of lowering the price as more energy is consumed, the producers and distributors of energy should be forced to raise it. This action would stimulate conservation, end the present subsidy of larger users—like industry—by small users—like homeowners—and end the incentive for wasteful energy use.

Seventh. We must revise pricing regulations to discourage the switch from coal to oil by electric utilities and from natural gas to synthetic natural gas by the gas utilities.

For example, the electric utilities are presently able to pass on the added costs of using more expensive fuel and this has enabled them to buy higher priced oil for the production of electricity to meet environmental standards rather than developing environmentally clean ways to burn coal or higher sulfur oil. This factor has contributed significantly to the shortage of No. 2 home heating oil in New England.

Eighth. Air quality standards should be reviewed to determine whether some of the standards can be temporarily relaxed without serious consequences to health, safety, and the environment in an effort to conserve oil. This is particularly important if we are to substitute coal for unavailable oil over the short term.

Ninth. Environmentally safe offshore drilling should be accelerated. Our offshore reserves represent the only substantial sources of new oil that will be available to us for the rest of this decade.

Tenth. New England's oil allocation should be increased so that the region receives more oil on a percentage basis than warmer areas of the country and areas which can offset the loss with other forms of energy.

Eleventh. Arrangements should be made to funnel electricity from Southern generating plants to New England this winter.

Twelfth. Some of the electricity used in uranium enrichment should be temporarily transferred to the Northeast.

Thirteenth. An emergency hopper car plan should be instituted to increase coal shipments to New England.

Fourteenth. A nationally coordinated plan should be instituted for utilities to stockpile heavier fuel oils.

Fifteenth. New England must expand its facilities to supply its own oil needs. This expansion should include new refineries and additional pipelines and storage facilities.

Sixteenth. New England State governments must develop long-range energy conservation plans with a view toward greatly decreasing consumption of oil in the region.

Seventeenth. The Federal Government should require a temporary diversion of production from asphalt to residual oil in U.S. refineries. This diversion would provide incremental relief to the east coast of the United States.

Eighteenth. The United States should seek ways with Canada to assure that both countries can achieve their economic needs to the fullest extent possible. A move by Canada away from the United States-Canadian oil relationship could have further severe consequences for the New England States which depend on distillate imports from Canada's eastern provinces.

Nineteenth. In the event of an extreme shortage of oil this winter, the New England States should be prepared to process and burn peat, which is readily available throughout the region and is used widely as a fuel in Russia and Ireland.

Twentieth. Every effort should be made to give the New England electric utilities additional supplies of residual oil. New England generates more than 70 percent of its electricity from oil, whereas the Nation as a whole generates only 14 percent of its electricty from oil. Thus, a 25 percent oil cutback would reduce New England's electricity by 18 to 19 percent, whereas it would reduce the national power supply by only 3½ percent.

Twenty-first. The U.S. Department of Health, Education, and Welfare should begin an evaluation of the health-related aspects of energy shortages so that public health will not be endangered by such shortages.

Twenty-second. In planning building codes, greater emphasis should be placed on building design and insulation to conserve fuel.

Twenty-third. Manufacturers should be required to place labels on all home appliances and industrial machinery to indicate fuel consumption, so that items can be purchased according to energy use.

Twenty-fourth. Industry should be encouraged through incentives, tax or pricing policies to use energy more efficiently.

Twenty-fifth. The Federal Government should immediately initiate a study of the tax loss to municipalities and States caused by decreasing sales of fuels. This study should recommend actions by the Federal Government to help relieve the burdens of State and local revenue loss.

Twenty-sixth. Greater amounts of Federal money should be spent on developing and operating mass transit systems.

Twenty-seventh. Municipalities should adopt ordinances for municipal inspection of home heating plants, insulation, and cold weather construction. This program would help present homeowners save fuel and protect prospective owners from buying improperly insulated structures.

Twenty-eighth. A program should be developed which insures that the customers of independent fuel dealers do not bear an unfair share of the cost of the Nation's oil imports.

We cannot have a situation where some consumers are paying 45 cents per gallon for imported home heating oil while others are paying only 22 cents for domestic oil. Furthermore, the extremely high prices for imported oil should not be borne exclusively by one region of the country as is now the case with the Northeast.

Twenty-ninth. Despite the fine voluntary public response to current conservation programs, further emergency reductions in use should be sought through massive appeals via the media and paid advertising.

Thirtieth. The guidelines for reporting supplies and restricting supplies to consumers should be rewritten to enable proper monitoring without requiring small fuel dealers to expend inordinate and counter-productive amounts of time and resources on bureaucratic paperwork.

Thirty-first. Consideration should be given, on a monthly basis, to further altering refinery runs to maximize the production of fuel needed by industry and private homeowners in colder regions of the country.

Thirty-second. Immediate controls on the export of petrochemicals and scarce fuels should be instituted.

Thirty-third. An excess profits tax to prevent energy producers and distributors from reaping windfall profits directly as a result of the shortages should be instituted immediately.

Thirty-fourth. Consideration should be given to an emergency suspension of the Jones Act so that foreign ships can be used to import various fuels. Special consideration, in this regard, should be given to New England's gas utilities, so they can charter foreign liquified natural gas tankers.

Thirty-fifth. Immediate consultations with the Canadian Government should begin relating to the possibility of building a trans-Canada pipeline.

Thirty-sixth. Both tax and mandatory compliance programs should be instituted to encourage automobile manufacturers to build internal combustion engine vehicles which use fuel more efficiently.

Thirty-seventh. A new program of unemployment benefits and retraining for individuals that lose their jobs as a direct result of energy shortages should be formulated.

Thirty-eighth. One of the reasons which forces the United States to rely on so much imported refined oil is the shortage of domestic refineries. A major cause of the reluctance to build new refineries is the feared environmental danger inherent in such projects. Therefore, we must seek to develop technology which will minimize the environmental effect of new oil refineries.

Thirty-ninth. The United States should take the initiative in attempting to form an organization of petroleum-consuming nations to counterbalance the Organization of Arab Petroleum Exporting Countries which has been the chief mechanism for coordinating the Arab oil boycotts and cutbacks and for increasing petroleum prices. The purpose of such an international oil consumers group would be: To negotiate as a single body to try to keep prices as low as possible, and to cooperate in pooling its resources to develop new sources of fossil energy and cleaner, more exotic forms of energy, such as fusion power. This cooperation could help to reduce the extreme price and political competition for scarce energy sources.

The following is the Study Mission's schedule of meetings, interviews, and discussions in the Middle East and Europe:

STUDY MISSION SCHEDULE

BEIRUT, LEBANON—OCTOBER 24–26, 1973

Suheil Sadaawi, former Secretary General OAPEC.

Nadim Pachachi, former Secretary General, OPEC.

Fuad Itaym and Ian Seymour, Middle Eastern Economic Survey.

Sir John Rennie, Commissioner-General United Nations Relief and Works Agency for Palestine Refugees in the Near East.

Harvey T. Clew, Petroleum Officer, U.S. Embassy.

The study mission also attended a luncheon hosted by U.S. Ambassador William B. Buffum. Present at the luncheon were:

Pierre Helou, Deputy, Lebanese Parliament.

Muhieddine M. Ahdab, Mobil Oil Lebanon, Inc.

Bryan Jones, Esso Standard (Near East), Inc.

A. N. Pagnotta, Caltex (Middle East), Limited.

David S. Dodge, Trans-Arabian Pipe Line Co. (Tapline).

Raymond Hitti, Ministry of National Economy.

Dr. Zuhayr Mikashi, Professor at the American University in Beirut.

Ian Steele, Refinery Manager, Medreco.

James M. Templar, Vice President, Tapline.

Albert Lahm, Lawyer.

ROME, ITALY—OCTOBER 26, 1973

Matthew Quilter, Vice President of Esso/Italy.

David S. Wilson, Petroleum Officer, U.S. Embassy.

ISRAEL—OCTOBER 27–29, 1973

Israeli Officials

Abba Eban, Israeli Foreign Minister

Michael Elizur, Chief North American Division, Ministry of Foreign Affairs.

Dr. Zvi Dinstein, Deputy Minister of Finance in Charge of Petroleum Matters, and Chairman of the Board of the Israeli Institute of Petroleum.

U.S. Officials

Hon. Kenneth B. Keating, U.S. Ambassador.

Nicolas A. Veliotes, Deputy Chief of Mission.

Jack B. Button, Economic/Commercial Officer.

William A. Kirby, Jr., Economic/Commercial Officer.

Col. Billy B. Foresman, Defense Attaché.

Arthur R. Day, U.S. Consul General, Jerusalem.

The study mission visited Golan Heights with guide Major Dan Bawly, Israeli Army.

AMMAN, JORDAN—OCTOBER 30, 1973

Jordanian Officials

Audience with His Majesty, King Hussein.

H. E. Zaid Rifai, Prime Minister, Defense Minister, and Foreign Minister of Jordan.

H. E. Zaid Rifai, Prime Minister, Defense Court.

Lt. General Amer Kammash, Political Counselor to King Hussein.

H. E. Baha Ad-Din Toukan, Court Minister.

H. E. Dr. Khalil Salim, President National Planning Council.

H. E. Dr. Sa'id Nabulsi, Governor, Central Bank.

Maj. Gen. Sharif Zaid bin Shaker, Chief of Staff, Jordanian Armed Forces.

U.S. Officials

Hon. Lewis D. Brown, U.S. Ambassador.

Pierre R. Gram, Deputy Chief of Mission.

Charles E. Waterman, Political Officer.

Colonel Clarence C. Mann, Defense Attache.

KUWAIT—OCTOBER 30, 1973

Hon. William A. Stolzfus, U.S. Ambassador.

Walter M. McClelland, Deputy Chief of Mission.

Richard W. Bogosian, Economic/Commercial Officer.

Leslie M. Lisle, Public Affairs Officer.

SAUDI ARABIA—OCTOBER 31–NOVEMBER 1, 1973

In Dhahran

James M. Bahti, U.S. Consul General.

In Riyadh

Saudi Arabian Officials

Audience with His Majesty King Faisal.

H. E. Sheikh Hisham Nazir, President, Central Planning Organization.

H. E. Sheikh Ahmad Zaki Yamani, Minister of Petroleum and Mineral Wealth.

U.S. Officials

Charles O. Cecil, Political/Military Officer.

T. McAdams Deford, Political Officer.

James E. Smith, Information Center Director, USIA.

Col. William L. Durham, U.S. Army Engineer District, Saudi Arabia.

Lt. Col. F. Whiting III, U.S. Army Section, U.S. Military Training Mission.

In Jeddah

H. E. Sayyad Omar Saqqaf, Minister of State for Foreign Affairs.

Anwar Ali, Governor, Saudi Arabian Monetary Agency.

U.S. Officials

Hon. James E. Akins, U.S. Ambassador.

Hume A. Horan, Deputy Chief of Mission.

Eugene H. Bird, Political/Economic Officer.

Raymond H. Close, Political/Economic Officer.

Robert R. Ruggiero, Public Affairs Officer.

CAIRO, EGYPT—NOVEMBER 2, 1973

Edward T. Penney, Cultural Affairs Officer, U.S. Interests Section, Spanish Embassy.

Hafes Ghanem, First Secretary, Arab Socialist Union.

THE NETHERLANDS—NOVEMBER 2-3, 1973

Dutch Officials

L. G. Wansink, Director General for Energy Supply, Ministry of Economic Affairs.

A. T. van Rhyn, Deputy Director for Energy Supply.

U.S. Officials

Hon. Kingdom Gould, Jr., U.S. Ambassador.

Charles R. Tanguy, Deputy Chief of Mission.

John Q. Blodgett, Economic/Commercial Officer.

Carroll E. Cobb, Economic/Commercial Officer.

Private Industry

F. G. van Duivenbooden, President/Esso/Nederland.

D. J. Piliero, Managing Director, Chevron Petroleum/Nederland.

VOTING RECORD

The SPEAKER. Under a previous order of the House, the gentleman from Maryland (Mr. HOGAN) is recognized for 60 minutes.

Mr. HOGAN. Mr. Speaker, as has been my custom I am inserting herewith in the CONGRESSIONAL RECORD my voting record for the 1st session of the 93d Congress. Since the session began in January we cast 523 recorded votes. Of these I was unavoidably absent for 14 votes.

It has been my practice to insert my voting record into the CONGRESSIONAL RECORD so that my constituents have ready access to it and know whether I am voting as they would prefer to have me vote on the various issues coming before Congress.

I will reprint this insertion and make it available to any constituent who requests it.

In the compilation (D) means "Defeated" and (P) means "Passed".

VOTING RECORD FOR THE 93D CONGRESS, 1ST SESSION

For Gerald Ford to be Speaker of the House of Representatives (D).

Against a previous question to prevent presentation of amendments to H. Res. 6, a resolution to adopt the Rules of the House for the 93rd Congress (P).

Against a previous question on H. Res. 176, the rule for consideration of a House Committee study (H. Res. 132) (P).

Against a rule to consider H. Res. 132, a House committee study (P).

Against resolution to create a select committee to study jurisdiction of standing committees of the House (H. Res. 132) (P).

For extension for life of Highway Beautification Commission, and increased authorization to $450,000 (H.J. Res. 123) (P).

Against previous question which was to force the President to spend $210,000 million on rural environment assistance programs (REAP) (H. Res. 188) (P).

For amendment to provide $140 million for REAP programs (H.R. 2107) (D).

For restricting REAP payments to provide only those farmers with annual net incomes over $10,000 witth benefits (H.R. 2107) (D).

Against bill to require President Nixon to spend $210 million previously appropriated for REAP (H.R. 2107) (P).

For providing funds for the balance of fiscal 1973 for the labor and HEW departments and for foreign aid (H.J. Res. 345) (P).

Against amendment to provide a short period which farmers could apply for emergency disaster loans at 1% interest (H.R. 1975) (P).

For amendment legislation authorizing emergency farm loan programs (H.R. 1975) (P).

For extension until June 30, 1974, the interest equalization tax (H.R. 3577) (P).

Against temporary reconstitution until June 30, 1973 of the Select Committee on Crime with a future transfer of functions to the House Judiciary Committee (H. Res. 256) (P).

Against authorizing funds for the House D.C. Committee to conduct studies and investigations abroad (H. Res. 257) (D).

For requiring the Agriculture Secretary to spend all of the money appropriated by Congress for the rural water and sewer grant program under the Consolidated Farm & Rural Development Act. (H.R. 3298) (P).

Against previous question on rule considering H. Res. 159 for further opening of House Committee meetings. (H. Res. 272) (P).

For authorization of presence of departmental representatives at closed House committee meetings (H. Res. 259) (amendment) (P).

For opening of committee meetings to public, unless otherwise voted when national security or personal privacy is involved. (H. Res. 259) (P).

Against amendment substitute bill providing for a three-year extension of existing vocational rehabilitation programs with authorization of $600 million (H.R. 17) (D).

Against amendment to substitute $501 million for programs for older Americans for fiscal year 1973–1974, instead of $1.4 billion (H.R. 71) (D).

For expanded programs for senior citizens and carried price tag of $1.4 billion over three-year period (H.R. 71) (P).

For provision for additional time for Congressional consideration of proposed new rules of evidence for the federal courts (S. 583) (P).

Against one-year extension of the Public Works and Economic Development Act with authorization of $1.2 billion for fiscal 1974. (H.R. 2246) (P).

For one-year extension of Solid Waste Disposal Act with $238.5 million authorization for fiscal 1974 (H.R. 5446) (P).

For authorizing $475,000 for House Internal Security Committee expenses. (H. Res. 308) (P).

For Clean Air Act extension of one year with fiscal 1974 authorization of $475 million (H.R. 5445) (P).

For recommittal motion that proposed authorizations be limited to one-year and reduced by $17 million (H.R. 5293) (D).

For authorizations of $157 million for Peace Corps for fiscal 1974 and 1975 (H.R. 5293) (P).

For amending Social Security Act to make certain technical and conforming changes (H.R. 3153) (P).

For endorsing the President's ocean policy which would guide the U.S. delegation to an international Law of the Sea Conference. (H. Res. 330) (P).

For conference report on H.R. 3577 which extended the interest equalization tax until June 30, 1974 (H.R. 3577) (P).

For previous question for consideration of H.R. 5683 (H. Res. 337) (P).

For amendment in substitute bill form to tighten eligibility for two percent loans for rural electric and telephone systems (H.R. 5683) (D).

Against revising the rural electric and telephone systems loan program by substituting a revolving fund for such loans for the present program of direct appropriations (H.R. 5683) (P).

For incorporating the National Inconvenienced Sportsmen's Association. (H.R. 4586) (P).

For authorizing the District of Columbia to enter into the Interstate Agreement on Qualification of Educational Personnel. (H.R. 342) (P).

For sustaining veto requiring Agriculture Secretary to spend all of the money appropriated by Congress for the rural water and sewer grant program under the Consolidated Farm and Rural Development Act (H.R. 3298 (Sustained).

For vote on rule to adopt consideration of H.J. Res. 205 which proposed creation of Atlantic Union delegation for a convention of delegates from NATO treaty nations (H. Res. 348) (D).

For vote on rule for consideration of H.R. 3180 to clarify the proper use of the franking privilege by Members of Congress ((H. Res. 349) (P).

For clarifying the proper use of the franking privilege by Members of Congress (H. 3180) (P).

For appropriating $1,369 million for college student aid programs, the Veterans Administration, the CAB and GSA (H.J. Res. 496) (P).

Against previous question to consider H.R. 6168 to extend the Economic Stabilization Act (H. Res. 357) (D).

Against amendment to impose a ceiling on prices at levels no higher than those on April 16, 1973, except for agriculture prices (H.R. 6168) (D).

Against amendment providing opportunity for hearings in cases of proposed wage reduction orders, plus written explanations to involved parties (H.R. 6168) (P).

Against amendment to extend the Economic Stabilization Act for 60 days and directing the President to develop stabilizing program of interest rates, rents, prices and wage (H.R. 6168) (D).

Against amendment authorizing the President to stabilize rents at levels prevailing on January 10, 1973 (H.R. 6168) (D).

Against amendment authorizing President to stabilize rents, but allowing for a 2½% annual increase (H.R. 6168) (D).

Against amendment proposing a ceiling on food prices at levels no higher than those prevailing on march 16, 1973, plus a stabilization of rents at January 10, 1973 level (H. R. 6168) (D).

Against recommittal motion to recommit H.R. 6168 to the House Banking and Currency Committee (H.R. 6168) (D).

For providing one-year extension of Presidential authority to control wages and prices (H.R. 6168) (P).

Against amendment to strike out $58 million proposed for extension of the west front of the Capitol (H.R. 6169) (D).

Against recommittal motion on question of striking out the $58 million for extending the west front of the Capitol (H.R. 6169) (D).

Against previous question on rule to consider H.R. 4204 to extend funding for the Emergency Employment Act of 1971 (H. Res. 360) (D).

For previous question on amendment to the rule providing for the substitution of a substitute bill (H. Res. 360) (D).

For motion to table reconsideration motion on H. Res. 360, the rule for consideration of the Emergency Employment Act extension bill (H. Res. 360) (P).

For agreement to Senate amendment extending and expanding the Older Americans Act of 1965, clearing legislation for White House (S. 50) (P).

Against amendment to propose allowing urban areas to use federal aid highway program trust funds for mass transit projects (S. 502) (D).

For amendment deleting a provision in the bill earmarking federal aid highway funds to urban areas with population of 400,000 or more rather than have state allocation of funds (S. 502) (P).

Against conference report on S. 398 which provided for one-year extension of Presidential power to impose wage and price controls provided authority to the President to ration gasoline, etc. (S. 398) (P).

Against vote on rule to consider H.R. 3932, which proposed abolition and reestablishment of the Office of Management and Budget (OMB) (H. Res. 351) (P).

Against amendment proposing Senate confirmation of OMB directors and deputy directors appointed after enactment of this bill, but previous incumbents being excluded (H.R. 3932) (D).

Against abolition and reestablishment of the Office of Management and Budget with its director and deputy director subject to Senate confirmation (H.R. 3932) (P).

For vote on rule to consider H.R. 6388, to amend the Airport and Airway Development Act (H. Res. 370) (P).

For amending Airport and Airway Development Act of 1970 to continue authorizations for airport development grants for fiscal years 1974 and 1975 at the present $280 million per year level. (H.R. 6388) (P).

For carrying out provisions of the Railroad Safety and Hazardous Materials Transportation Acts. This bill authorized $20.6 million. (S. 2120) (P).

For a bill proposing a $5 million authorization for the Commission on Productivity and Work Quality (S. 1752) (D).

For a substitute amendment including provisions requiring Congress to specifically approve or disapprove the commitment of forces by the President in absence of a declaration of war within 90 days of such executive action (H.J. Res. 542) (D).

Against a substitute amendment seeking to prohibit the President from committing U.S. troops to hostilities or increasing the number of U.S. combat troops abroad (H.J. Res. 542) (D).

For an amendment seeking to require Congress to specifically approve or disapprove the commitment or enlargement in number of U.S. combat troops abroad within 120 days following a Presidential report of such action (H.J. Res. 542) (D).

Against a war powers resolution requiring a Presidential report to Congress within 72 hours following commitment or increase in the number of U.S. combat troops abroad (H.J. Res. 542) (P).

For an amendment to an amendment deleting language making recipients of supplemental security income payments eligible for food stamps (H.R. 8860) (P).

For an amendment to an amendment prohibiting strikers and their families from receiving food stamps (unless they were previously eligible) (H.R. 8860) (P).

For an amendment liberalizing eligibility for food stamps (H.R. 8860) (P).

Against an amendment which proposed prohibiting payment of farm subsidies to a farmer on any crop planted or harvested during a labor dispute involving the producer or his employees (H.R. 8860) (D).

For an amendment prohibiting strikers and their families from receiving food stamps (the second vote) (H.R. 8860) (P).

Against an amendment which proposed reinserting the cotton program into the bill but with the elimination of funds for Cotton, Inc. (H.R. 8860) (P).

Against a motion to strike the enacting clause from the bill (H.R. 8860) (D).

For an amendment to recommit with instructions to the committee to strike out the target-price escalator provisions for cotton (H.R. 8860) (P).

For a recommittal motion on the previous amendment (D).

For the Farm Bill continuing for four more years price support programs for wheat, cotton and feed grains, with price escalator provisions; and continuing food stamps and the food for peace programs (H.R. 8860) (P).

Against an amendment seeking to withhold grants for construction of public broadcasting facilities unless the recipient was found to be incompliance with all laws prohibiting discrimination in employment practices (H.R. 8538) (D).

For a bill containing authorizations of $80 million for fiscal 1974 and $95 million for fiscal 1975 for the Public Broadcasting Corporation (H.R. 8538) (P).

For the rule for consideration of H.R. 5356, the toxic substances bill (P).

Against an amendment directing the EPA administrator to use provisions of the Water Pollution Control Act, the Clean Air Act, etc. where appropriate to regulate chemical substances (H.R. 5356) (P).

For an amendment which proposed that no rule deriving from the bill should be put into effect until after a hearing with full opportunity for cross examination (H.R. 5356) (D).

Against the amendment which directed the EPA administrator (same as above) (H.R. 5356). (D).

For a bill to protect health and the environment against toxic chemical substances (H.R. 5356) (P).

Against a rule for consideration of H.R. 8929 which proposed relief from certain postal rate increases on publications, books, sound recordings, nonprofit rate mailings, etc. (H. Res. 495) (D).

Against the previous question to instruct House conferees on the farm bill to insist on a House amendment prohibiting bargain sales or gifts of farm products to North Vietnam under the food for peace program (S. 1888) (P).

For a motion to instruct the conferees to insist on an amendment to the farm bill prohibiting bargain sales. . . . (same as above) (S. 1888) (P).

For an amendment seeking to empower the Comptroller General to allow Presidential impoundments of funds which he determines to be in accordance with the Anti-Deficiency Act. (H.R. 8480) (D).

For an amendment that would take concurrent action by both the House and the Senate to overrule a Presidential impoundment of funds instead of an adverse resolution by one branch of Congress. (H.R. 8480) (D).

Against the conference report on the bill to allow employer contributions to jointly administered trust funds established by labor organizations to defray legal costs for employees (S. 1423) (P).

Against an amendment proposed that impoundment funds be released after 60 days. (D).

For an amendment proposing a $1 billion reduction to $260 billion in the proposed spending ceiling for fiscal year 1974 (H.R. 8480) (D).

For amendment proposing a $3.8 billion reduction to $263.3 billion in the proposed spending ceiling for fiscal year 1974 (H.R. 8480) (D).

For recommittal motion with instructions that the bill be reported back with an amendment that it would take concurrent action by both Houses of Congress to overrule a Presidential impoundment of funds (H.R. 8480) (D).

Against providing a veto of a Presidential impoundment of funds by either House of Congress (H.R. 8480) (P).

For amendment proposing reducing funds in the bill for population planning and health to $75 million for fiscal 1974 (H.R. 9360) (D).

For amendment to strike out the section of the bill authorizing $93 million for certain economic and social development programs (H.R. 9360) (D).

For amendment prohibiting foreign aid to any nation which seizes U.S. citizen property, etc. (H.R. 9360) (P).

For amendment to strike out the section which sought to establish a U.S. Development Credit Fund to lend money to undeveloped nations to buy U.S. exports (H.R. 9360) (P).

For recommittal motion with instructions that the proposed authorization be reduced by $68 million (H.R. 9360) (P).

Against authorizing $2.8 billion foreign aid (H.R. 9360) (P).

For appropriating $4,749 million for the Atomic Energy Commission, public works, power and flood control projects, etc. (H.R. 8947) (P).

For vote on rule for consideration of S. 1989 (H. Res. 512) (D).

For conditional adjournment from August 3 until September 5, 1973 (S. Con. Res. 42) (P).

For increasing the rates of disability and death pensions and dependency and indemnity compensation for benefiting veterans and their dependents (H.R. 9474) (P).

Against amendment proposing to cut the authorization for the CVN–70 nuclear aircraft carrier by $657 million (H.R. 9286) (D).

Against amendment to delete $473.5 million for research and development for the B–1 bomber (H.R. 9286) (D).

Against amendment to pull back U.S. troops from any nation paying a smaller portion of its gross national product for defense than does the U.S. with June 30, 1974 as deadline for pull-back (H.R. 9286) (D).

Against amendment to reduce the total of U.S. troops overseas by 322,000 and to place a ceiling for 300,000 on the number of troops to be assigned overseas after fiscal 1974 (H.R. 9286) (D).

For amendment substitute calling for an Armed Services Committee report concerning U.S. troops levels in Europe (H.R. 9286) (P).

Against amendment reducing the funds authorized in the bill by $950 million, by setting a ceiling equal to that for fiscal year 1973 plus a 4½% inflation factor increase (H.R. 9286) (P).

For authorization of $20.45 billion for defense procurement, research and development and for military aid to South Vietnam and Laos for fiscal year 1974 (H.R. 9286) (P).

For conference report on the $19.06 billion appropriations bill for the Housing and Urban Development Department, NASA, Veterans Administration and various independent agencies for the fiscal year 1974 (H.R. 8825) (P).

For disagreement to Senate amendment which severely restricts government auto service for top officials of the agencies covered by the bill (H.R. 8825) (P).

Against amendment that sought an $888,000, 5%, cut in funds proposed for the Office of Management and Budget (H.R. 9590) (D).

Against amendment proposing a $518,000, 25%, reduction in funds proposed for the Office of Telecommunications Policy. (H.R. 9590) (D).

For vote on rule to consideration of H.R. 9130, the Alaska Oil Pipeline bill (H. Res. 515) (P).

Against amendment prohibiting the granting of a right-of-way for the pipeline across National Park, Wildlife Refuge or Wilderness land unless the right-of-way meets environmental protections (H.R. 9130) (D).

Against amendment to delete language removing from judicial review under the National Environmental Policy Act the grant authorizations necessary for the construction of the Alaska Pipeline and to remove language expediting Federal Court proceedings with respect to pipeline right-of-way and permits, etc. (H.R. 9130) (D).

Against amendment to require the President to develop a plan to assure equitable allocations of crude oil and gasoline to all regions of the U.S. (H.R. 9130) (D).

For amendment requiring that all articles, materials, and supplies used for Alaska Pipeline be mined, produced or manufactured in U.S.A. (H.R. 9130) (P).

Against amendment authorizing the Interior Secretary to grant right-of-way and permits for the construction of the Alaska Pipeline, instead of for its construction, operation and maintenance (H.R. 9130) (D).

For authorizing the Interior Secretary to grant a right-of-way for the Alaska Pipeline, and steps to bar further judicial review of its environmental reasons (H.R. 9130) (P).

For adopting the conference report on S. 1636 which extended White House Council on International Economic Policy until 1977, with a $1.4 million one-year authorization (S. 1636) (P).

Against vote on rule for consideration of S. 1264 directing Eisenhower College and Samuel Rayburn Library to cut $1 from each sale of Eisenhower silver dollar proofs (H. Res. 518) (D).

For conference report authorizing $19.9 billion for federal aid highway programs, etc. for fiscal years 1974–1976, with authorizations for bus and rail transportation (S. 502) (P).

Against conference report providing a step-by-step increase in the minimum wage to $2.20 per hour and extension of minimum wage laws coverage (H.R. 7935) (P).

For previous question motion on acceptance of Senate amendments to Farm Bill (S. 1888) (P).

Against Motion to agree to Senate amendments to Farm Bill including an amendment eliminating a House proposed ban on food stamps for most strikers (S. 1888) (P).

For conference report on the $1,142 million D.C. appropriations bill for fiscal 1974, which included a $187,450,000 federal payment (H.R. 8658) (P).

For conference report on the $2.9 billion fiscal 1974 appropriations bill for the Transportation Department and related agencies (H.R. 8760) (P).

For conference report recommittal motion to recommit resolution to extend FHA's loan and mortgage insurance authority, and end administration's moratorium on new federal housing (H.J. Res. 512) (P).

For authorizing $105 million over two years for the anti-lead based paint poisoning program, including detection and treatment of lead paint poisoning of children (H.R. 8920) (P).

For increasing coverage on federal flood insurance (H.R. 8449) (P).

For conference report on H.R. 6912 to revalue the dollar (P).

For authorizing $107.3 million for Amtrak, the National Railroad Passenger Corporation for fiscal year 1974 (H.R. 8351) (P).

For vote on rule to consider H.R. 8547, concerning export controls (H. Res. 484) (P).

Against amendment requiring Commerce Secretary to report to Congress any decision he makes on prohibition of commodities exported and to permit either House of Congress to disapprove such decisions (H.R. 8547) (D).

For amending the Export Administration Act to require the Commerce Secretary to select items to be subject to export controls because they are in short supply or because of inflationary impact (H.R. 8547) (P).

For citing G. Gordon Liddy for contempt and turning the case over to the U.S. Attorney for the District of Columbia (H. Res. 536) (P).

For amending the Federal Cigarette Labeling and Advertising Act to extend its advertising restriction provisions to include little cigars (H.R. 7482) (P).

For deleting language halting funds for foreign affairs agencies who do not comply within 35 days with any request for information by the House Foreign Affairs Committee or the Senate Foreign Relations Committee (H.R. 7645) (P).

Against vote on rule to consider S. 1697 requiring predisaster assistance to attempt to avert a fire disaster in California eucalyptus forests killed by frost (H. Res. 511) (D).

For overriding President's veto of the emergency medical services bill (veto sustained).

For providing a $240 million five-year authorization for the establishment and expansion of health maintenance organizations (H.R. 7974) (P).

For new coin designs for quarters, halves and dollars, such designs to be emblematic of the American Revolution bicentennial (H.R. 8789) (P).

For motion to instruct conferees to insist on House language in the Agriculture Appropriations bill limiting the federal farm subsidy to $20,000 per farm in most cases (H.R. 8619) (P).

For authorizing the Interior Secretary to engage in feasibility investigations of certain potential water resource developments (H.R. 6576) (P).

For amendment to cut out a section which raised the reimbursement by the Federal Government for school lunches from 8 cents to 10 cents per lunch (H.R. 9639) (D).

For amending the National School Lunch and Child Nutrition Act to provide additional federal assistance to the school lunch and breakfast programs (H.R. 9639) (P).

For banning T.V. blackouts of sports events in cases where the tickets are sold out 72 hours before the event (H.R. 9553) (P).

For authorizing $88 million for ACTION domestic volunteer program (H.R. 7265) (P).

For conference report on vocational rehabilitation bill authorizing $1.55 billion and creating new programs (H.R. 8070) (P).

Against authorizing the Interior Secretary to buy property located within the San Carlos mineral strip (H.R. 7730) (failed to pass ⅔ vote due to rule suspension).

For the conservation, protection and propagation of species of fish and wildlife which are or may be threatened with extinction (H.R. 37) (P).

For establishing a special intern program in honor of Lyndon B. Johnson as part of the Congressional intern program (H. Res. 420) (P).

For overriding the President's veto of the minimum wage increase bill which the President attacked as inflationary (H.R. 7935) (sustained).

Against amendment providing for a withholding of funds from USIA if it failed to furnish information requested by certain Congressional Committees (H.R. 9715) (P).

For authorizing $224 million for fiscal year 1974 for the U.S. Information Agency (H.R. 9715) (P).

For vote on rule to consider H.R. 9256 to increase government contributions to federal employees' health benefits (H. Res. 546) (P).

For conference report on the Interior Appropriations bill which appropriated more than $2.4 billion for Interior and related agencies (H.R. 8917) (P).

For receding from disagreement with a Senate amendment and agreeing to an amendment appropriating $46,025,000 for the National Endowment for the Arts. (H.R. 8917) (P).

Against recommittal motion with instructions to substitute a guaranteed annuity for the retirement formula proposed in the bill and proposed Presidential authority to set retirement age (H.R. 9281) (D).

For increasing retirement benefits for federal police and firemen and establishing mandatory retirement at age 60 (H.R. 9281) (P).

For increasing federal contribution to federal workers' health insurance cost from 40% to 75% by 1977 (H.R. 9256) (P).

For conference report on bill appropriating more than $9.9 billion for agricultural, environmental, and consumer protection activities for fiscal year 1974 (H.R. 8619) (P).

Against amendment proposing that local school agencies receive fiscal 1974 educational aid for disadvantaged children at a per pupil basis rate no lower than in fiscal 1973 (H.J. Res. 727) (D).

For amendment providing that each local school agency receive in fiscal 1974 at least 8% of the funds it received in fiscal 1973 for aid for disadvantaged children (H.J. Res. 727) (P).

For amendment prohibiting funds for Cost of Living Council for any program discriminating among petroleum product marketers in the method of establishing their prices (H.J. Res. 727) (P).

For continuing appropriations for agencies where final action had not yet taken place on their regular appropriations bills (H.J. Res. 727) (P).

Against amendment raising from 20,000 to 35,000 each the maximum number of immigration visas per year from Canada and Mexico (H.R. 981) (D).

Against amendment proposing a five-year aggregate limit on the number of one-year visas for certain migrant workers (H.R. 981 D).

For setting immigration limits at not more than 20,000 visas per year for any one country (H.R. 891) (P).

For providing for the distribution of funds appropriated to satisfy certain judgments awarded to Indians by the Court of Claims and the Indian Claims Commission (H.R. 8029) (P).

For correcting typographical and clerical errors in the farm bill, Public Law 93–86 (S. 2419) (P).

For extending the authorization for appropriations for the Cabinet Committee on Opportunities for Spanish-speaking people. (H.R. 10397) (failed to pass, 2/3 vote required by rules).

For conference report on the arts and humanities authorization bill with a three-year authorization of $597 million (S. 795) (P).

For establishing a Board for International Broadcasting and authorized $50.2 million for Radio Free Europe and Radio Liberty for fiscal 1974 (S. 1914) (P).

For vote on rule to consider H.R. 6452, the mass transit authorization bill (H. Res. 372) (P).

For amendment cutting out $800 million opposed in the bill for urban mass transit operating subsidies (H.R. 6542) (P).

Against motion to strike the enacting clause in order to kill the urban transit bill (H.R. 6452) (D).

For amendment against federal operating subsidies for mass transit, (H.R. 6452) (D).

For increasing the federal share on aid to mass transit capital grant programs, and contained the controversial $800 million authorization for federal subsidies (H.R. 6452) (P).

For establishing the Big Cypress National Preserve in Southern Florida (H.R. 10088) (P).

Against reducing from $2.2 billion to $477 million the appropriation for special payments to international financial institutions to maintain the value of U.S. financial commitments (H.J. Res. 748) (D).

For appropriated $2.2 billion for special payments to international financial institutions to maintain the value of U.S. financial commitments (H.J. Res. 748) (P).

Against vote on rule to consider H.R. 9682, the D.C. Home Rule Bill (H. Res. 581) (P).

For amendment providing for retention of Presidential appointments to the D.C. Court of Appeals and the D.C. Superior Court, rather than having these judges appointed by the D.C. Mayor (H.R. 9682) (P).

For amendment proposing that the President or the House, or Senate, could veto any legislation passed by the D.C. City Council (H.R. 9682) (D).

For amendment providing a federal enclave within D.C., including principal federal building etc. to be supervised by a Presidentially appointed national service director (H.R. 9682) (P).

For amendment proposing that the D.C. Chief of Police be appointed by the President, rather than by the Mayor (H.R. 9682) (D).

For amendment excluding nearby parts of Virginia and Maryland from the National Capital Planning Commission's planning area (H.R. 9682) (D).

For amendment providing that the D.C. Mayor continue to be appointed by the President rather than be elected (H.R. 9682) (D).

Against providing for an elected D.C. mayor and Council and a reorganization of the D.C. government (H.R. 9682) (P).

For motion to recommit the conference report on the continuing appropriations resolution (H.J. Res. 727) (D).

For conference report on resolution to provide continuing appropriations for agencies where final action had not yet taken place on their regular appropriations bill (H.J. Res. 727) (P).

For authorizing $2,651 million for construction at military installations (H.R. 10614) (P).

For conference report on resolution limiting the war powers of the President, outlining circumstances under which the President could commit U.S. troops into hostile situations overseas (H.J. Res. 542) (P).

For authorizing $1,258 million for construction, repair and preservation of public works on rivers and harbors for navigation, flood control, etc. (H.R. 10203) (P).

Against authorizing a $150,000 federal contribution to the Arctic Winter Games to be held in Alaska in 1974 (S. 907) (P).

For setting up a National Institute of Building Standards (H.R. 8346) (failed to pass ⅔ rule).

For conference report on the Treasury-Postal appropriations bills for fiscal 1974 which carried a price tag of $5.2 billion (H.R. 9590) (P).

For agreement to Senate amendment allowing the President to determine salaries of White House employes, regardless of Civil Service requirements (H.R. 9590) (P).

For agreement to Senate amendment to permit President to make payments for official entertaining without a regular government accounting (H.R. 9590) (P).

For conference report on the $605 million fiscal 1974 legislative appropriations bill (H.R. 6691) (P).

For repealing the act which had terminated federal supervision over the property and members of the Menominee Indian Tribe of Wisconsin (H.R. 10717) (P).

For amendment providing that allocation of crude oil should not apply to producers unless the President found such allocation necessary to carry out the purposes of the bill (H.R. 9681) (D).

Against motion which proposed limiting debate on pending amendments to 15 minutes (H.R. 9681) (D).

For rule for consideration of conference report on H.R. 9286, the military procurement authorization bill (H. Res. 601) (D).

For amendment to transfer the monitoring of allocation programs from the Federal Trade Commission to the General Accounting Office (H.R. 9681) (D).

For requiring the President to allocate crude oil and refined petroleum products to deal with existing or imminent shortages (H.R. 9681) (P).

For authorizing $1.5 million for the Cabinet Committee on Opportunities for Spanish Speaking People (H.R. 10397) (P).

For motion to agree with a Senate amendment to the school lunch bill (H.R. 9639) (D).

For the Labor-HEW appropriations conference report on H.R. 8877 (P).

Against receding and concurring with amendment in Senate amendments No.'s 1, 11, 16, 32, 51, 57, 62, and 79 in regards to H.R. 8877 (P).

For an amendment that sought to prohibit consideration of authorizing legislation after July 1 in lieu of March 31 of each year (H.R. 7130) (D).

For an amendment that sought to require the pilot-testing of all Federal programs prior to the implementation unless the committee report on such legislation indicates why this is unnecessary (H.R. 7130) (D).

For an amendment that sought to provide for a maximum limitation on authorizations for appropriations to 3 years except those funded through user taxes (H.R. 7130) (D).

Against an amendment that sought to require all appropriations bills to be sent to the President at the same time with no exceptions (H.R. 7130) (D).

For an amendment that sought to delete the title on impoundment control (H.R. 7130) (D).

For an amendment that sought to require both Houses of Congress to take action before a Presidential impoundment is disapproved, and to allow selective disapproval of impoundments by Congress (H.R. 7130) (D).

For an amendment that sought to make title II (impoundment control) effective on October 1, 1975 (H.R. 7130) (D).

For the impoundment and budget control bill (H.R. 7130) (P).

For the rule under which the Vice-Presidential nomination could be considered (H. Res. 735) (P).

For confirming the nomination of Gerald R. Ford, of the State of Michigan, to be Vice President of the United States (H. Res. 735) (P).

For the conference report on H.R. 11459, making appropriations for military construction for the Department of Defense for fiscal year 1974 (P).

For the rule under which H.R. 9107 could be considered dealing with federal retirement annuities (P).

For H.R. 9107, to provide increases in certain annuities payable under chapter 83 of title 5, United States Code (P).

For an amendment to H.R. 10710 (Trade Reform) that adds a continued extension of Export-Import bank credits to the trade benefits which would not be granted to those Communist countries which restrict emigration (P).

Against an amendment that sought to strike title IV from the bill (H.R. 10710) (D).

For the Trade Reform Act (H.R. 10710) to promote the development of an open, nondiscriminatory, and fair world economic system, to stimulate the economic growth of the United States (P).

Against an amendment that sought to permit use of funds under the Israel Emergency Assistance bill to support implementation of U.N. Security Council resolutions calling for Israeli withdrawal from occupied territories and Arab recognition of Israeli sovereignty and territorial integrity (H.R. 11088) (D).

For H.R. 11088, Israel Emergency Assistance, to provide emergency security assistance authorizations for Israel (P).

Against an amendment that sought to strike $1 million for Chile from the Foreign Assistance Bill, H.R. 11771 (D).

Against an amendment that sought to reduce funds for emergency military assistance for Cambodia by $100 million (D) (H.R. 11771).

For an amendment that sought to prohibit the use of any Export-Import funds for any nonmarket economy country (H.R. 11771) (D).

For the Foreign Assistance Bill, H.R. 11771, making appropriations for Foreign Assistance and related programs for fiscal 1974 (P).

For the rule under which the National Energy Emergency Act could be considered (H.R. 11450) (P).

For an amendment that sought to restore language in the original bill giving Congress 15 days to disapprove any Presidential energy plan (H.R. 11450) (D).

For an amendment to the antitrust section that sought to prevent anticompetitive practices by providing for participation by the Justice Department and the Federal Trade Commission in the initial phases of any allocation plans that are made (H.R. 11450) (P).

For an amendment that eliminates coal as one of the items on which windfall profits will be restricted (H.R. 11450) (P).

For an amendment that bans the allocation of petroleum for busing of students to a school farther than the school nearest to their homes (H.R. 11450) (P).

Against a motion that all debate on the committee amendment in the nature of a substitute and all amendments thereto end at 10 p.m. (H.R. 11450) (D).

For an amendment that sought to insert a new section on the restriction of windfall profits requiring the President to exercise his authority under the Economic Stabilization Act to restrict unreasonable profits and to submit to Congress within 60 days legislation designed to provide additional incentives for the use of such profits for exploration and research to increase the Nation's domestic energy supplies (H.R. 11450) (D).

For an amendment that retains the vehicle emissions standards for 1975 but extends the date for those standards through 1977 (H.R. 11450) (P).

Against an amendment that sought to strike the section on voluntary energy conservation agreements among retail and service establishments (H.R. 11450) (D).

For an amendment that sought to rescind the requirement for emission control devices on vehicles throughout the Nation until January 1, 1977, except for certain areas which have significantly high pollution levels (H.R. 11450) (D).

Against an amendment that sought to allow for the allocation of petroleum for school busing where a busing plan has been ordered by the appropriate school board (H.R. 11450) (D).

Against a motion that sought to limit debate on the substitute amendment (H.R. 11882) and all amendments thereto (H.R. 11450) (P).

Against a motion that the committee rise and report the bill back to the House with the enacting clause stricken (H.R. 11450) (D.)

For an amendment that provides that the aggregate number of fuel-inefficient vehicles purchased by executive agencies shall not exceed 30 percent of the total in fiscal 1975 and 10 percent in 1976 (H.R. 11450) (P).

For an amendment that sought to exclude producers of less than 25,000 barrels of oil per day from the restriction on windfall profits (H.R. 11450) (D).

Against an amendment that provides for federally sponsored incentives for the use of public transportation (H.R. 11450) (P).

For an amendment that provides for Federal grants to States for those who are unemployed as a result of the administration bill (H.R. 11450) (P).

For an amendment that provides that energy conservation plans shall give consideration to the needs of late-night food stores (H.R. 11450) (D).

For an amendment that adds language to a section amending the National Petroleum Allocation Act of 1973 that strikes the word "Agricultural operation" as it is defined in paragraph 1(C) of subsection (B) of section 4 of the act (H.R. 11450) (P).

For an amendment that provides that the Administrator may restrict exports of coal and petrochemical feedstocks if such exports will result in unemployment in the United States (H.R. 11450) (P).

Against an amendment that sought to exempt the Navy's petroleum reserves from the provisions of the bill (H.R. 11450) (D).

Against an amendment that sought to exclude producers of less than 15,000 barrels of oil per day from the restrictions on windfall profits (H.R. 11450) (D).

For an amendment that eliminates discrimination against shipment of recycled materials (H.R. 11450) (P).

For a preferential motion that the Committee rise (H.R. 11450) (D).

For an amendment that sought to prohibit the exportation of crude oil, residual oil, and refined petroleum products unless the President orders the approval of the export (H.R. 11450) (D).

For an amendment that sought to rescind the requirement for emission control devices on vehicles throughout the nation until January 1, 1976 except for certain areas which have significantly high pollution levels (H.R. 11450) (D).

Against an amendment prohibiting the export of petroleum products for military use in Indochina (H.R. 11450) (P).

Against an amendment that sought to ban the export of petroleum products for military use in Israel (H.R. 11450) (D).

Against a motion to recommit the bill to the Committee on Interstate and Foreign Commerce (H.R. 11450) (D).

For the National Emergency Energy Act, H.R. 11450, to direct the President to take action to assure, through energy conservation, rationing, and other means, that the essential energy needs of the United States are met (P).

Against the conference report on S. 1435, the D.C. Home Rule Bill, providing for an elected Mayor and City Council for the District of Columbia (P).

For S.J. Res. 180, relative to the convening of the second session of the 93rd Congress (P).

For an amendment to the Small Business Ceiling Authority, S. 2482, to amend the Small Business Act (P).

For a motion to recommit the conference report to the committee of conference on the D.C. Home Rule Bill (S. 2482) (D).

For the Conference Report on H.R. 9256, Government Employees Health Benefits Act, increasing the contribution of the Government to the cost of health benefits for Federal employes (P).

Against a motion to suspend the rules on Wednesday, December 19th, for the balance of the week (H. Res. 746) (P).

For authorizing the disposal of opium from the national stockpile (S. 2166) (P).

For authorizing release of copper from the national stockpile and the supplemental stockpile (S. 2316) (P).

For H.R. 11714, to provide for the development of improved design, lighting, insulation, and architectural standards to promote efficient energy use in residential, commercial, and industrial buildings (P).

For H.R. 11763 to facilitate the construction of an intercity bus terminal (P).

For the Conference Report on H.R. 11576, making supplemental appropriations for the fiscal year ending June 30, 1974 (P).

Against an amendment to the Energy Research and Development Administration Act that would provide for the addition of another assistant administrator to work in the area of energy conservation (D).

For the Energy Reorganization Act of 1973, which calls for an administrator, six assistant administrators who shall be responsible for fossil energy, nuclear energy, environment, safety, and conservation, national security, and advanced energy systems (P).

Against the motion to recommit the Conference Report on S. 1559, the Comprehensive Employment and Training Act of 1973 (D).

For the Conference Report on S. 1559, the Comprehensive Employment and Training Act of 1973 (P).

Against the motion to recommit the Conference Report on H.R. 11575, the Department of Defense Appropriation for Fiscal Year 1974 (D).

For the Conference Report on H.R. 11575, the Department of Defense Appropriation for Fiscal Year 1974 (P).

For the Conference Report on H.R. 11771, the Foreign Assistance Appropriations, Fiscal Year 1974 (P).

For the Conference Report on S. 1983, Endangered Species Act of 1973 (P).

For a motion that the House suspend the rules and agree to the House Resolution 754, amending the District of Columbia Revenue Act of 1947 regarding taxability of dividends (P).

For the Conference Report on the Social Security Bill, H.R. 3153 (P).

For the Conference Report on the Emergency Act of 1973, S. 2589 (P).

RECESS NOT JUSTIFIED

The SPEAKER. Under a previous order of the House, the gentleman from Ohio (Mr. JAMES V. STANTON) is recognized for 5 minutes.

Mr. JAMES V. STANTON. Mr. Speaker, I rise to express my strong disagreement with the plan of this House to recess for a full month.

Every day now, as the energy crisis grows worse, important decisions are being made, decisions which affect the lives of our constituents in a very personal way. Administration officials have indicated that some of the most crucial ones will be made in this coming month, and our absence will substantially reduce our influence in these matters.

I might also point out that even if there were not an energy crisis, the amount of legislative work yet to be done is so great that such a recess would still not be justified.

ENERGY CRISIS: AMERICAN STYLE

Mr. SPEAKER. Under a previous order of the House, the gentleman from Arkansas (Mr. ALEXANDER) is recognized for 60 minutes.

Mr. ALEXANDER. Mr. Speaker, for several years, experts in the field have been warning Americans about the inevitability of an energy shortage. There were brownouts on the east coast in the midsixties which should have served as a warning of things to come. But, throughout history, this country has been blessed with an abundance of cheap energy. We are used to living in a land of plenty and because of our advanced technology have taken for granted many modern conveniences that annually consume great quantities of our limited energy resources.

Then, suddenly last summer, we began hearing stories and reading news articles about filling stations that were closing up or shortening their hours because their pumps were empty. But, the summer ended and few of us were stranded on an interstate because we could not get gas.

And, this fall, in the middle of harvesting the crops, farmers found that their combines came to a halt in the fields without fuel available to run them. The price of gas has risen and most service stations are closed on Sundays. Families are finding it harder to get together during the holiday season because of the cancellation of airline flights. Schools and businesses are altering their schedules. Homes dependent on fuel oil for heating are being warned that they can expect a colder winter than the last. Rationing has become a common word in our vocabulary.

The country now finds itself in the middle of a serious shortage of the energy resources which except during wartime have always been abundant. How did we get in this position?

MORE LUXURIES, MORE WASTE

A major factor has been the increasing total and per capita consumption of energy by all Americans. Between 1950 and 1960, for example, energy consumption grew by 32 percent, while between 1960 and 1970, it rose by 51 percent. Since 1920 per capita consumption of all energy has doubled, and our use of electricity has increased by an amazing 1,300 percent. Much of this increase, of course, is justified by the expansion of our production facilities.

However, we have failed to use our existing energy resources wisely and efficiently. In the home, office, and factory, we have never had to consider the more efficient use of energy. For example, improved insulation in homes could significantly decrease winter fuel and summer air-conditioning bills.

D. AMERICAN ENERGY DEMAND PATTERN

Energy demand almost doubled from 1950 to 1970.

Energy demand will double again in the next 15 years and more than triple in the next 30 years.

LESS OIL PRODUCTION

Second, there has been a failure, for a number of reasons for discovery of new domestic reserves of oil and gas to keep pace with demand. Domestic drilling for oil has dropped off precipitously since 1969 and our reserves of both oil and gas have dropped accordingly. Perhaps too much emphasis has been placed on merely stopping the exploitation of the environment and too little on developing the technology needed for using our resources without despoiling either Alaskan tundra or coastal waters.

MORE PUBLIC DEMAND FOR CLEAN ENERGY

The interrelationship of environmental goals and energy objectives seems to be a trade-off of sorts in the short-run. To meet environmental goals such as those imposed by the Clean Air Act, for example, many utilities and industries have had to switch from "dirty" fuels such as high sulfur coal to "clean" fuels such as fuel oil and natural gas. Unfortunately, we have greater quantities of the latter than the former.

NO ENERGY POLICY

Conflicting Government programs with respect to energy have also been a problem. For example, natural gas sold in interstate commerce is regulated from the well-head to the consumer by the Federal Government. However, petroleum production is regulated by the States, while coal, our most abundant energy resource, is now almost unregulated.

In short, this country has failed to develop any type of comprehensive energy policy which takes into consideration resources, demands, capabilities and the encouragement of development by the industries.

DEPENDENCE ON FOREIGN FUEL

Fifth, the changing international oil market will be an increasing problem. As domestic sources have dwindled, our need for imported fuels has increased. We have 6 percent of the world's population and use 33 percent of the world's total energy. Out of 12 million barrels of oil consumed in this country each day, approximately 3.5 million barrels are imported. The United States accounts for 6 percent of the total world petroleum reserves, 20 percent of the world production and 30 percent of the world oil consumption whereas the Middle East which consumes only 2 percent of the total amount of oil, accounts for 34 percent of the world oil production and holds 53 percent of the world's reserves.

Unfortunately imports are more expensive and less reliable. The cutoff of Arab oil supplies is not the cause of this shortage although it did bring the matter to a head. We have always known of the instability of the political climate of the Mideast and should have been much better prepared for a cutoff of this source than we are.

Sixth, our oil import quota program which discouraged entry of foreign oil amounted to a "drain America first" policy, which allows huge profits for oil companies, but squeezed American consumers' pocketbooks. While limiting these exports, we used up our own valuable supplies.

C. Normal (Pre-embargo) U.S. Sources of Crude Oil

(In percent)

United States	63
Canada	6
Middle East	9
Caribbean	12
Rest of World	10

E. Approximate Dimensions of Energy Shortages for Winter, 1973–74

[In percent]

	Before Arab embargo	After Arab embargo
Natural gas	7.4	7.4
Crude petroleum	0	10.0
Distillates	10.4	25.0
Residual oil	14.0	35.0

WHAT IS THE CURRENT SITUATION?

The Department of the Interior estimates the country will consume 19.7 million barrels a day—MBD—of petroleum products in the first quarter of 1974. Eleven MBD will come from domestic sources; 7.8 MBD would have to be imported to avert a shortage. Because of the Arab oil embargo, 3.5 MBD of that amount simply will not be available. That figure represents 17 percent of the total demand. Some of this shortrun deficit can and will be met by reducing stockpiles and industry inventories, but clearly not enough.

If demand for gasoline and private heating oil remains at projected levels, it will begin to outstrip supply by the first week in February. The Department notes that if there had not been a sudden shift back to coal as a fuel in electric generating plants, the crunch in that sector could have come as early as December 3, 1973. (See chart I.)

The National Petroleum Council estimates that the shortage in gasoline distillates and heavy fuel oil will average 20 percent during this first quarter in 1974. Heavy fuel oil shortages would average 38 percent on a U.S. basis and could reach 50 percent on the east coast according to NPC. It is estimated that the consequences of a 2 to 3 million barrel per day shortage could be an annual loss of $48 billion to the U.S. economy as measured by the gross national product and an increase in unemployment from the current 4.5 to 5 percent to over 6 percent with a 2 million barrel cutback and up to 7.5 to 8 percent with a 3 million barrel per day cutoff.

U.S. SUPPLY AND DEMAND FOR PETROLEUM PRODUCTS—FOURTH QUARTER 1974

[Thousands of barrels per day]

	Base level	Impact of restrictions	Current forecast
Demand	19,671	295	19,966
Supply:			
From domestic sources	11,216		11,216
From imports:			
Raw material	(3,840)	(1,370)	(2,470)
Refined products	(3,891)	(1,796)	(2,095)
Subtotal from imports	7,731	3,166	4,565
Change in product inventories	724		724
Total supply	19,671	3,166	16,505
Demand/supply deficit			3,461
As percent of total demand (percent)			17.3

Note. Restrictions-curtailment of imports.

TABLE 11.—BROAD STRATEGIES FOR 1ST QUARTER 1974 SHORTFALL

Product	Shortage		Refinery shift (MB/D)	Net shortage (MB/D)	Other actions to reduce shortfall	MB/D
	Percent of demand	(MB/D)				
Jet fuel	32.2	398	−225	173	Reduce airline schedules 19 percent	170
Gasoline	10.9	712	700	1,412	24 percent reduction in passenger car use	1,100
					15 percent reduction in business and Government use	300
Total						1,400
Distillate	17.5	898	−400	498	6° reduction in residential and 10° in commercial heating	490
					10 percent industrial cutback	40
					50 percent electric utility	150
Total						680
Residual	29.4	1,052	−200	852	Oil to coal switch	250
					15 percent heating reduction	90
					3 percent electricity use cut[1]	300
					10 percent industrial cut	60
Total						700
Total	19.1	3,060	−125	2,935		
Other	10.3	401	125	526		
Total	17.3	3,461		3,461		

[1] Net coal and oil switch.

WHY ARE WE IN THIS POSITION?

The President blames the Congress, some Members of Congress blame the President and everyone suspects the oil companies. In any case, it is imperative that we cut out the backbiting and bickering about who is to blame and get on with the work of adopting a strong energy policy to insure against a worse situation in the future.

LOOKING TO THE FUTURE: WHAT CAN AND IS BEING DONE ABOUT THE ENERGY SHORTAGE; ALLEVIATING THE SHORT-TERM PROBLEM

The Congress must and is asserting its leadership to adopt means of dealing with the short-term as well as the long-term effects of an energy shortage. Through such legislation as the Emergency Energy Act—which authorizes a variety of emergency measures to conserve and allocate energy resources—the Energy Research and Development Administration, the Federal Energy Administration to plan, direct, and conduct programs related to the production, conservation, use and control, distribution and allocation of all forms of energy, the High Seas Oil Port Act which will accommodate huge oil "supertankers" and various other measures designed to develop and conserve our existing resources, the Congress has proved itself concerned with the short-term problem and began looking ahead to the future.

The Congress has enacted year-round daylight savings time legislation which is estimated to conserve 2 to 3 percent of our energy. To put this figure in perspective, it might be noted that it is estimated that energy usage for agriculture amounts to only 3 percent of the energy consumed each year.

Cities must develop more efficient mass transit systems to serve the needs of their suburban commuters as well as those who reside in the cities. This may require additional funding from the Congress, but would be a valid investment saving thousands of gallons of fuel daily.

We are presently approving legislation which would relax or suspend clean air standards so that powerplants can burn coal even if they do not have special emission cleanup systems. This same bill would also temporarily suspend the requirement for emission control devices on new automobiles which have been shown to decrease the efficiency or the gas mileage. We are also giving the President the authority to establish 55-mile-per-hour speed limits on Federal highways.

In considering the new tax reform bill it is almost certain that the Ways and Means Committee will give some time to considering proposals to again raise the oil and gas depletion allowance which was reduced in the 1969 act and to allow other tax incentives for oil explorations. The President has proposed legislation to extend investment tax credit provisions to the oil and gas industries through a 7-percent credit on unsuccessful wells and a 12-percent credit on successful wells.

At this time, it should be noted that Congress has not taken any action to raise gasoline taxes, or ration gasoline, although the Emergency Energy Act does give the President the authority to set up a rationing program.

In April of this year, the Congress added a section to the Economic Stabilization Act which gave the President the discretionary authority to distribute petroleum products. Under these provisions, the President announced a voluntary allocation program which was in effect until November 1. He later judged this program ineffective and a mandatory system of allocations went into effect in November. Unfortunately, at this time there was insufficient staff to administer and carry out the allocations and it was predicted that it would take 60 to 90 days to establish such an operation.

Under this first mandatory program, no priorities were established—hospitals and merry-go-rounds were rated at the same level of importance.

Then, when farmers ran out of fuel trying to get their crops out of their field in the midst of the fall harvest, and buses necessary for mass transit could no longer get oil from their suppliers, revisions were made placing these industries into a top priority category. Farmers were allowed to borrow immediately against their next year's fuel allocation while waiting for requests for additional fuel to be processed.

The allocation program was received on November 27 and again on December 13. Under the new proposed regulations which are to go into effect on December 27, emergency services, fuel production, public passenger transportation and agriculture are in a first priority category for allocation of gasoline and are to receive 100 percent of their current requirements. Business uses, including nonprofit Government users, are allocated 100 percent of their 1972 use. All other users are allocated not more than 90 percent of their 1972 use.

For the purpose of allocating middle distillate fuels, including diesel fuels, fuel production and public passenger transportation are to receive 100 percent of their current requirements. Vital community services and medical, dental and nursing services are allocated 110 percent of their 1972 use.

In the second priority category, those involved in industrial and manufacturing, food production and processing and cargo, freight and mail hauling are to receive 110 percent of their 1972 use.

All other users, excluding aviation, are to receive 100 percent of their 1972 use.

THE ENERGY OUTLOOK

With a policy of equal sacrifice being practiced by all Americans, no one should go cold this winter or next. By giving up a little, we can save a lot. However, we must look beyond the present crisis to develop the energy resources of this country in order to insure energy self-sufficiency in the long term. With our resources and highly advanced technological know-how, I am sure that we can substantially increase our energy output in the years ahead as well as developing better methods of conserving and using the energy we already have.

What are some of these forms of energy that we need to develop?

COAL: OUR MOST ABUNDANT RESOURCE

Coal is our most abundant energy resource and supplies are adequate to last hundreds, even thousands of years. Coal is our most abundant fossil fuel accounting for 73 percent of the total recoverable fossil fuels in the Nation. It was coal we turned to over a century ago, when we began to fear we were exhausting our wood supply. However, coal cannot be used to burn in automobiles and airplanes, it is heavy and inconvenient and it is a "dirty fuel," some types of which are prohibited by environmental restrictions in some States.

We are now close to developing methods of gasifying and liquefying coal. The Russians have offered to share their method of obtaining natural gas from coal and the British have found a way of manufacturing a substitute natural gas to help fight the current fuel shortage.

As we have mentioned above, environmental restrictions are being temporarily suspended in order to allow powerplants to burn high sulfur coal without emission control devices. We must work to develop efficient, moderately priced pollution control mechanisms so that we can use this fuel without threatening our atmosphere.

OIL: LOOKING FOR NEW SOURCES

This country uses 18 million barrels of oil per day. Increasing at its present rate, we could require as much as 50 percent more by 1980. It is this increase that we are going to have trouble finding.

However, this country has a great untapped wealth of oil and natural gas lying under its costal waters. It is estimated that under the Atlantic Continental Shelf from Cape Hatteras to Canada within 100 miles of the shoreline and 600 feet of the surface, there are 46 billion barrels of oil and 228 trillion cubic feet of natural gas. And, this is just one small portion of our coastline. Of America's total Continental Shelf of 1.9 million square miles, only about 1 percent has been tested for gas and oil to date.

Admittedly, it costs more to drill offshore for gas and oil than onshore, but experts tell us that the U.S. continental shelf is the most viable area for meeting U.S. energy needs in the next 5 to 10 years.

Another big boost to our oil supply which is obtainable within the next 5 years, is the 2 million barrels of oil a day which we expect to flow through the Alaskan pipeline from Alaska's North Slope to the port of Valdez on the Gulf of Alaska. From this port it will be shipped by tanker to other States. Authorization of this pipeline was held up for several years because of environmental arguments, but these were resolved this summer and the pipeline should be operational by 1977.

SHALE OIL: CONVERTING ROCKS TO FUEL

In 1971, the Congress began to look seriously at the possibilities of obtaining oil from the shale deposits in Colorado, Utah, and Wyoming. It is estimated that with existing technology and appropriate investment funds available, we could be producing an output of 2 million barrels a day from this source within the next 4 or 5 years. Strict environmental regulations should be put on this process which requires the stripping of rock layers to extract the oil which can be converted into a form of synthetic oil low in sulphur content called kerogen. In late 1973, the Department of Interior began a program offering leases of these lands for sale and development.

NATURAL GAS: UNDERTAPPED AND OVERREGULATED

In 1920, natural gas consumption was less than a trillion cubic feet. In 1970, it was 22 trillion and is expected to rise to 32 trillion in 1980. Gas is the cleanest of all our fossil fuels and its use has skyrocketed with the passage of the Environmental Protection Act.

As is mentioned above, trillions of cubic feet of natural gas lies untapped below our Continental Shelfs. However, regulation of the price of natural gas at the wellhead has discouraged production of it in this country. The Federal Power Commission regulates the price of interstate gas, but not intrastate gas. This has resulted in a large price difference in interstate and intrastate gas and consequently, a drying up of gas supplies in the interstate market. If this price differential is abolished, more gas would flow into interstate sales. And, although prices in some places might rise, it would still be cheaper than importing gas.

ELECTRICAL POWER: A SECONDARY SOURCE OF ENERGY

Electricity is not a primary source of energy, but is produced from other energy sources. About one-third of the electricity used in the United States is for residential purposes and the other two-thirds for industrial use.

The discovery and harnessing of electricity has been responsible for the creation of many of our modern conveniences and appliances. However, since it is not a primary source of energy, it is not as efficient as direct use of gas, for example, to heat a home.

Electricity is produced from all of the primary sources of energy—coal, oil, natural gas, hydro, geothermal, and nuclear. By increasing production of any one of these elements, increase in the output of electricity can result. Hydroelectric power provides 5 percent of our current energy needs and about 15 percent of our electricity. It is our cleanest and cheapest source of energy and research for development and further use of hydroelectric power should be intensified.

GEOTHERMAL: ENERGY FROM THE EARTH'S CORE

In 1970, Congress passed the Geothermal Steam Act of 1970 which allows the U.S. Department of the Interior to grant leases for the drilling of geothermal energy. This energy is essential heat from the Earth's core which may be recovered either as steam or hot water and which may prove to be one of the cheapest, cleanest, and most lasting supplies of energy in the future. Although we have not paid much attention to this source in the United States, in Italy it has been used for 70 years.

NUCLEAR: ANOTHER PEACEFUL USE OF THE ATOM

Although we have known almost from its birth that nuclear energy could be used for production of electricity, nuclear energy production still accounts for only about 1 percent of our energy demands.

We think of nuclear energy in connection with the making of bombs, but its power has been harnessed and applied in medicine, agriculture, desalting sea water, oceanographic exploration, nuclear ship propulsion, and development of nuclear explosives for massive earth moving projects.

The main force holding us back in all-out development of this abundant source is a timidity of this country to accept this type of power. Some questions still do exist in the minds of many as to the safety of this source and of its effects on our environment.

The Atomic Energy Commission must concentrate its study on the safety of the production of this energy. We must know for certain whether or not production of this source of electricity can result in harmful side effects of leaks. If it is safe, we should move headlong into this field.

Currently there are two nuclear powerplants under construction in the State of Arkansas, with the first one scheduled for completion in 1974. As of June 30, 1973, there were only 34 operable plants in this country and 57 under construction, only 17 of which are west of the Mississippi.

SOLAR ENERGY: POWER FROM 93 MILLION MILES AWAY

In the use of energy from the sun lies one of our most exciting new sources of power. Some societies have known for ages that by using its reflections, the sun can be an effective hot water heater or by careful architectural techniques, the sun's energy can be drawn into the walls of buildings and concentrated to preserve the heat. Our technological society should have the knowledge to develop this source efficiently. Legislation and funding to encourage development in this field has been little up to this point. However, there is a move on to speed up our research and development of this virtually limitless source.

CONCLUSION

The prospect for the near future, then, is one of very tight supply. And for a Nation which has become accustomed to cheap, plentiful fuel of all types, the change will not be easy. We must stop wasting our limited energy resources; the light in the empty room will have to be turned off. But for the crisis merely trimming the fat will not be enough. The effects on the individual citizen and consumer will range from inconvenience for all, to loss of income jobs for some.

There is a strong relationship between these two effects because in a very concrete sense when we take some of the burden ourselves, we are lessening it for everybody else. The energy saved by dialing down the heat can help assure adequate heat for all. The automobile trip taken in a carpool, or by bus, or not taken at all, will leave that much more gasoline for the necessary transportation of people and goods.

The voluntary reduction of energy consumption by the American people has resulted in a 50-percent drop in the use of petroleum. But because the market operates inefficiently in a shortage situation, some sort of Government intervention will be necessary. The extent of that intervention depends upon the extent of the crisis and this in turn is determined by how much gasoline and fuel oil is saved voluntarily. Government control of the energy market by allocation, or regulated price, or rationing, is not an initial tool for solving the problem; it is simply a last resort. For when it becomes necessary the Federal Government cannot shirk its responsibility to keep the economy productive and to equalize the burden on every citizen.

What will be required throughout the country is cooperation with the voluntary cutbacks and cooperation and patience with the regulatory apparatus that is eventually set up. I believe it will be forthcoming. In the thirties and forties the American people faced the problem of severe economic dislocations with a singlemindedness of purpose, and the Nation recovered. I do not think we need a war or already formed breadlines in order to find the necessary national will. The crisis is real, but the solution at this point is only one of sharing. The crisis will be met.

A PERFECT ATTENDANCE AND VOTING RECORD

The SPEAKER. Under a previous order of the House, the gentleman from Mississippi (Mr. Whitten) is recognized for 10 minutes.

Mr. WHITTEN. Mr. Speaker, the records of the Clerk of the House of Representatives disclose that our colleague, the gentleman from Kentucky, Representative William H. Natcher, still holds a perfect attendance and voting record. During the first session of this Congress so far we have had 717 rollcalls in the House of Representatives.

We all recognize that Bill Natcher is without peer as a presiding officer. One of the ablest Members of Congress, he not only renders outstanding service to the people of his district, State, and Nation, but his consistent attendance to his job is perhaps not equaled in the history of our Nation.

Representative Natcher has never missed a day since he has been a Member of Congress, and he has never missed a rollcall vote since he has been a Member. He was sworn in as a Member of Congress on January 6, 1954, and during the first 19-year period of his service which was concluded on December 31, 1972, 3,033 rollcall votes on legislation were held and, Mr. Speaker, when you add 534 rollcall votes on legislation up to this date you have a total of 3,567. During this period of time if the quorum calls were added, you would find that he was present and answered to his name well over 4,900 times.

As a Member of Congress, Bill Natcher knows full well that the fact that he has not missed a day in Congress or a rollcall vote is not the sole test of a good Representative, but, Mr. Speaker, I know that he definitely is of the opinion that each Member should stand up and be counted on each issue. I have always believed this myself and I know that this is the main reason why Bill Natcher is proud of the record that he has established.

Mr. Speaker, according to information submitted to me, if the Clerk of the House were to check the records back to March 4, 1789, which was the opening day of the first session of the First Congress, which met in the city of New York, he would find that no Member has served in either the House of Representatives or in the Senate of the United States who has had a comparable record. We have a great many Members of the House of Representatives who have excellent records and the same applies to a number of Members in the U.S. Senate but Mr. Speaker, Bill Natcher's record is a perfect record since he has never missed a vote or a day since he was sworn in as a Member of Congress.

Since I have been a Member of Congress I have maintained an excellent attendance and voting record all down through the years.

As a member of the Committee on Appropriations serving on three subcommittees—chairman of the Subcommittee on Agriculture, Environmental and Consumer Protection, Defense Appropriations Subcommittee and Public Works Appropriations Subcommittee, I know that it makes it exceedingly difficult for a Member to have the kind of a voting record that Bill Natcher has established. He and I have served together on the Subcommittee on Agriculture, Environmental and Consumer Protection now for a period of 19 years. Mr. Natcher was elected a member of the subcommittee that I am chairman of 19 years ago. He also serves on three subcommittees on the Committee on Appropriations, chairman of the District of Columbia Budget Subcommittee, Agriculture-Environmental and Consumer Protection Subcommittee, and Labor-Health, Education and Welfare Subcommittee.

Mr. Speaker, Bill Natcher and I have been close friends all down through the years and we have worked on a great many matters together. He has worked with me at all times on all agricultural programs and programs that produce benefits to the American farmer. Mr. Natcher and I agree that the American farmer knows how to produce and in every emergency when called upon has produced the food and fiber to take care of our people, and in many instances has produced adequate supplies for assistance programs to free countries around the world who were in need. Mr. Speaker, I know that Bill Natcher agrees with me when I say that each year it becomes more difficult to maintain a sound agricultural economy due to increased costs in labor, equipment, and the high cost per acre of good farmland. We have always agreed that the American farmer is entitled to a fair share of our national income.

Mr. Speaker, the record established by my friend, Bill Natcher, is one that he and his people can be proud of and it is a privilege for me to call this record to the attention of the Members of Congress.

CONSERVATION OF ENERGY

The SPEAKER. Under a previous order of the House, the gentleman from Massachusetts (Mr. Cronin) is recognized for 5 minutes.

Mr. CRONIN. Mr. Speaker, Mr. Leon Bablouzian of Newtonville, Mass., recently wrote to me about the urgent need to conserve energy by reducing the oil waste. His letter began:

> I thank you for devoting your valuable time to a valuable cause. I hope we will achieve our goal by working together.
>
> One oil expert said one-third of all fuel oil we use is wasted, but he did not elaborate how to reduce the one-third to one-quarter waste or less.

Mr. Bablouzian does offer suggestions to cut the inefficiency, which I feel are worthy of consideration and implementation by all of us. They are:

1. Seal all secondary leaks into the furnace and stack pipe;

2. Clean furnace surface from soot and smoke to increase the heat absorption efficiency;

3. Change the nozzle and oil filter every year;

4 Oil pump must have its specified PSI for a fine atomization of the fuel oil;

5. Stack temperature should not be over 550–700° F net (If less better);

6. Smoke rating must be 0–1 or 0–2 on the filter indicator;

7. Negative draft or updraft at the breeching must be 0.05″ to 0.07″ and over the fire 0.01″ of H_2O column; and

8. Carbon dioxide (CO_2) analyzer must read or indicate 8–12% CO_2.

Example: A burner with a 2GPH capacity nozzle and 6% CO_2 at 700° F net stack temperature will have 60% combustion efficiency and 40% heat loss.

If we increase CO_2 to 10% and reduce the stack temperature to 550° F net by adjusting the above mentioned conditions the combustion efficiency will increase to 77% and heat loss will decrease to 23%: a saving of 17% in fuel consumption. It is possible to increase the combustion efficiency to 80–85%.

Mr. Bablouzian's suggestions are extremely appropriate as New Englanders—and the rest of the Nation—face the current fuel shortage this winter. It is estimated that oil burners burn at 40 to 50 percent efficiency; if we can increase that efficiency to just 80 percent, we can save as much as 40 percent of the energy burned.

I hope we can all work together to conserve as much energy as we possibly can to lessen the severity of this winter.

RECESS

The SPEAKER. The Chair declares the House in recess subject to the call of the Chair. The bells will be rung 15 minutes prior to the reconvening of the House.

Accordingly (at 3 o'clock and 33 minutes p.m.) the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 9 o'clock and 13 minutes p.m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate agrees to the amendments of the House to the amendments of the Senate numbered 6, 10, 13, 14, and 16 and that the Senate recedes from its amendment numbered 15 to a bill of the House of the following title:

H.R. 11372. An act to conserve energy on the Nation's highways.

The message also announced that the Senate agrees to the amendments of the House to the amendment of the Senate to the text of the bill of the following title:

H.R. 10511. An act to amend section 164 of the Federal-Aid Highway Act of 1973 relating to financial assistance agreements.

The message also announced that the Senate agrees to the amendments of the House with an amendment to a bill of the Senate of the following title:

S. 921. An act to amend the Wild and Scenic Rivers Act.

PROVIDING FOR AGREEING TO SENATE AMENDMENT TO HOUSE AMENDMENT WITH AN AMENDMENT TO AMEND S. 921, WILD AND SCENIC RIVERS ACT

Mr. STAGGERS. Mr. Speaker, I move to suspend the rules and agree to the House resolution (H. Res. 759) to take from the Speaker's table the Senate bill S. 921, to amend the Wild and Scenic Rivers Act, with a Senate amendment to the House amendment thereto, and agree to the Senate amendment to the House amendment with an amendment.

The Clerk read as follows:

H. Res. 759

Resolved, That immediately upon the adoption of this resolution the bill S. 921, with the Senate amendment to the House amendment thereto, be, and the same is hereby, taken from the Speaker's table to the end that the Senate amendment to the House amendment be, and the same is hereby, agreed to with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the text of the bill H.R. 12128.

(The text of H.R. 12128 follows:)

TITLE I—ENERGY EMERGENCY AUTHORITIES

Sec. 100. Short Title.

Titles I, II, and III of this Act may be cited as the "Energy Emergency Act".

Sec. 101. Findings and Purposes.

(a)(1) The Congress hereby determines that—

(A) shortages of crude oil, residual fuel oil, and refined petroleum products caused by insufficient domestic refining capacity, inadequate domestic production, environmental constraints, and the unavailability of imports sufficient to satisfy domestic demand, now exist;

(B) such shortages have created or will create severe economic dislocations and hardships;

(C) such shortages and dislocations jeopardize the normal flow of interstate and foreign commerce and constitute an energy emergency which can be averted or minimized most efficiently and effectively through prompt action by the executive branch of Government;

(D) disruptions in the availability of imported energy supplies, particularly crude oil and petroleum products, pose a serious risk to national security, economic well-being, and health and welfare of the American people;

(E) because of the diversity of conditions, climate, and available fuel mix in different areas of the Nation, a primary governmental responsibility for developing and enforcing energy emergency measures lies with the States and with the local governments of major metropolitan areas acting in accord with the provisions of this Act; and

(F) the protection and fostering of competition and the prevention of anticompetitive practices and effects are vital during the energy emergency.

(2) On the basis of the determinations specified in subparagraphs (A) through (F) of paragraph (1) of this subsection, the Congress hereby finds that current and imminent fuel shortages have created a nationwide energy emergency.

(b) The purposes of this Act are to call for proposals for energy emergency rationing and conservation measures and to authorize specific temporary emergency actions to be exercised, subject to congressional review and right of approval or disapproval, to assure that the essential needs of the United States for fuels will be met in a manner which, to the fullest extent practicable: (1) is consistent with existing national commitments to protect and improve the environment; (2) minimizes any adverse impact on employment; (3) provides for equitable treatment of all sectors of the economy; (4) maintains vital services necessary to health, safety, and public welfare; and (5) insures against anticompetitive practices and effects and preserves, enhances, and facilitates competition in the development, production, transportation, distribution, and marketing of energy resources.

Sec. 102. Definitions.

For purposes of this Act:

(1) The term "State" means a State, the District of Columbia, Puerto Rico, or any territory or possession of the United States.

(2) The term "petroleum product" means crude oil, residual fuel oil, or any refined petroleum product (as defined in the Emergency Petroleum Allocation Act of 1973).

(3) The term "United States" when used in the geographical sense means the States, the District of Columbia, Puerto Rico, and the territories and possessions of the United States.

(4) The term "Administrator" means the Administrator of the Federal Energy Emergency Administration.

Sec. 103. Federal Energy Emergency Administration.

(a) There is hereby established until May 15, 1975, unless superseded prior to that date by law, a Federal Energy Emergency Administration which shall be temporary and shall be headed by a Federal Energy Emergency Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate. Vacancies in the office of Administrator shall be filled in the same manner as the original appointment.

(b) The Administrator shall be compensated at the rate provided for level II of the Executive Schedule. Subject to the Civil Service and Classification provisions of title 5, United States Code, the Administrator may employ such personnel as he deems necessary to carry out his functions.

(c) Effective on the date on which the Administrator first takes office (or, if later, on January 1, 1974), all functions, powers, and duties of the President under sections 4, 5, 6, and 9 of the Emergency Petroleum Allocation Act of 1973 (as amended by this Act), and of any officer, department, agency, or State (or officer thereof) under such sections (other than functions vested by section 6 of such Act in the Federal Trade Commission, the Attorney General, or the Antitrust Division of the Department of Justice), are transferred to the Administrator. All personnel, property, records, obligations, and commitments used primarily with respect to functions transferred under the preceding sentence shall be transferred to the Administrator.

Sec. 104. End-Use Rationing.

Section 4 of the Emergency Petroleum Allocation Act of 1973 is amended by adding at the end thereof the following new subsection:

"(h)(1) The President may promulgate a rule which shall be deemed a part of the regulation under subsection (a) and which shall provide consistent with the objectives of subsection (b), for the establishment of a program for the rationing and ordering of priorities among classes of end-users of crude oil, residual fuel oil, or any refined petroleum product, and for the assignment to end-users of such products of rights, and evidence of such rights, entitling them to obtain such products in precedence to other classes of end-users not similarly entitled.

"(2) The rule under this subsection shall take effect only if the President finds that, without such rule, all other practicable and authorized methods to limit energy demand will not achieve the objectives of section 4(b) of this Act and of the Energy Emergency Act.

"(3) The President shall, by order, in furtherance of the rule authorized pursuant to paragraph (1) of this subsection and consistent with the attainment of the objectives in subsection (b) of this section, cause such adjustments in the allocations made pursuant to the regulation under subsection (a) as may be necessary to carry out the purposes of this subsection.

"(4) The President shall provide for procedures by which any end-user of crude oil, residual fuel oil or refined petroleum products for which priorities and entitlements are established under paragraph (1) of this subsection may petition for review and reclassification or modification of any determination made under such paragraph with respect to his rationing priority or entitlement. Such procedures may include procedures with respect to such local boards as may be authorized to carry out functions under this subsection pursuant to section 122 of the Energy Emergency Act.

"(5) No rule or order under this section may impose any tax or user fee, or provide for a credit or deduction in computing any tax."

Sec. 105. Energy Conservation Plans.

(a) (1) (A) Pursuant to the provisions of this section, the Administrator is authorized to promulgate by regulation one or more energy conservation plans in accord with this section which shall be designed (together with actions taken and proposed to be taken under other authority of this or other Acts) to result in a reduction of energy consumption to a level which can be supplied by available energy resources. For purposes of this section, the term "energy conservation plan" means a plan for transportation controls (including but not limited to highway speed limits) or such other reasonable restrictions on the public or private use of energy (including limitations on energy consumption of businesses) which are necessary to reduce energy consumption and which are authorized by this Act.

(B) No energy conservation plan promulgated by regulation under this section may impose rationing or any tax or user fee, or provide for a credit or deduction in computing any tax.

(2) An energy conservation plan shall become effective as provided for in subsection (b). Such a plan shall apply in each State, except as otherwise provided in an exemption granted pursuant to the plan in cases where a comparable State or local program is in effect, or where the Administrator finds special circumstances exist.

(3) An energy conservation plan may not deal with more than one logically consistent subject matter.

(4) An amendment to an energy conservation plan, if it has significant substantive effect, shall be transmitted to Congress and shall be effective only in accordance with subsection (b). Any amendment which does not have significant substantive effect and any rescission of a plan may be made effective in accordance with section 553 of title 5, United States Code.

(5) Subject to subsection (b) (3), provision of an energy conservation plan shall remain in effect for a period specified in the plan unless earlier rescinded by the Administrator, but shall terminate in any event no later than April 1, 1974.

(b) (1) For purposes of this subsection, the term "energy conservation plan" means a plan promulgated by regulation proposed under subsection (a) of this section or an amendment thereto which has significant substantive effect.

(2) The Administrator shall transmit any energy conservation plan (bearing an identification number) to each House of Congress on the date on which it is promulgated.

(3) (A) If an energy conservation plan is transmitted to Congress before March 1, 1974, and provides for an effective date earlier than March 1, 1974, such plan shall take effect on the date provided in the plan; but if either House of the Congress, before the end of the first period of 15 calendar days of continuous session of Congress after the date on which such plan is transmitted to it, passes a resolution stating in substance that such House does not favor such plan, such plan shall cease to be effective on the date of passage of such resolution.

(B) If an energy conservation plan is transmitted to the Congress and provides for an effective date on or after March 1, 1974 and before April 1, 1974, such plan shall take effect at the end of the first period of 15 calendar days of continuous session of Congress after the date on which such plan is transmitted and the end of the 15-day period, either House passes a resolution stating in substance that such House does not favor such plan.

(C) An energy conservation plan proposed to be made effective on or after April 1, 1974, shall take effect only if approved by Act of Congress.

(4) For the purpose of paragraph (3) of this subsection—

(A) continuity of session is broken only by an adjournment of Congress sine die; and

(B) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the 15-day period.

(5) Under provisions contained in an energy conservation plan, a provision of the plan may take effect at a time later than the date on which such plan otherwise is effective.

(c) (1) This subsection is enacted by Congress—

(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described by paragraph (2) of this subsection; and it supersedes other rules only to the extent that it is inconsistent therewith; and

(B) with full recognition of the constitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

(2) For the purpose of this subsection "resolution" means only a resolution of either House of Congress, the matter after the resolving clause of which is as follows: That the ——— does not favor the energy conservation plan numbered ——— transmitted to Congress by the Administrator of the Federal Energy Emergency Administration on ———, 19—. The first blank space therein being filled with the name of the resolving House and the other blank spaces therein being appropriately filled; but does not include a resolution which specifies more than one energy conservation plan.

(3) A resolution with respect to an energy conservation plan shall be referred to a committee (and all resolutions with respect to the same plan shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

(4) (A) If the committee to which a resolution with respect to an energy conservation plan has been referred has not reported it at the end of 5 calendar days after its introduction, it is in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution with respect to such energy conservation plan which has been referred to the committee.

(B) A motion to discharge may be made only by an individual favoring the resolution, is highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same energy conservation plan), and debate thereon shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(C) If the motion to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same plan.

(5) (A) When the committee has reported, or has been discharged from further consideration of, a resolution with respect to an energy conservation plan, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(B) Debate on the resolution shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

(6) (A) Motions to postpone, made with respect to the discharge from committee, or the consideration of a resolution with respect to an energy conservation plan, and motions to proceed to the consideration of other business, shall be decided without debate.

(B) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution with respect to an energy conservation plan shall be decided without debate.

(d) (1) In carrying out the provisions of this Act, the Administrator shall, to the greatest extent practicable, evaluate the potential economic impacts of proposed regulatory and other actions including but not limited to the preparation of an analysis of the effect of such actions on—

(A) the fiscal integrity of State and local government;

(B) vital industrial sectors of the economy;

(C) employment, by industrial and trade sector, as well as on a national, regional, State, and local basis;

(D) the economic vitality of regional, State, and local areas;

(E) the availability and price of consumer goods and services;

(F) the gross national product;

(G) competition in all sectors of industry; and

(H) small business.

(2) The Administrator shall develop analyses of the economic impact of any energy conservation plan on States or significant sectors thereof, considering the impact on energy resources as fuel and as feedstock for industry.

(3) Such analysis shall, wherever possible, be made explicit and, to the extent practicable, other Federal agencies and agencies of State and local governments which have special knowledge and expertise relevant to the impact of proposed regulatory or other actions shall be consulted in making the analysis, and all Federal agencies shall cooperate with the Administrator in preparing such analyses except that the Administrator's actions pursuant to this subsection shall not create any right of review or cause of action except as otherwise exist under other provisions of law.

(4) The Administrator, together with the Secretaries of Labor and Commerce, shall monitor the economic impact of any energy actions taken by the Administrator, and shall provide the Congress with separate reports every thirty days on the impact of the energy shortage and such emergency actions on employment and the economy.

(e) Any energy conservation plan which the Administrator submits to the Congress pursuant to subsection (b) of this section shall include findings of fact and a specific statement explaining the rationale for each provision contained in such plan.

SEC. 106. COAL CONVERSION AND ALLOCATION.

(a) The Administrator shall, to the extent practicable and consistent with the objectives of this Act, by order, after balancing on a plant-by-plant basis the environmental effects of use of coal against the need to fulfill the purposes of this Act, prohibit, as its primary energy source, the burning of natural gas or petroleum products by any major fuel-burning installation (including any existing electric powerplant) which, on the date of enactment of this Act, has the capability and necessary plant equipment to burn coal. Any installation to which such an order applies shall be permitted to continue to use coal as provided in section 119(b) of the Clean Air Act. To the extent coal supplies are limited to less than the aggregate amount of coal supplies which may be necessary to satisfy the requirements of those installations which can be expected to use coal (including installations to which orders may apply under this subsection), the Administrator shall prohibit the use of natural gas and petroleum products for those installations where the use of coal will have the least adverse environmental impact. A prohibition on use of natural gas and petroleum products under this subsection shall be contingent upon the availability of coal, coal transportation facilities, and the maintenance of reliability of service in a given service area. The Administrator shall require that fossil-fuel-fired electric powerplants in the early planning process, other than combustion gas turbine and combined cycle units, be designed and constructed so as to be capable of using coal as a primary energy source instead of or in addition to other fossil fuels. No fossil-fuel-fired electric powerplant may be required under this section to be so designed and constructed, if (1) to do so would result in an impairment of reliability or adequacy of service, or (2) if an adequate and reliable supply of coal is not available and is not expected to be available. In considering whether to impose a design and construction requirement under this subsection, the Administrator shall consider the existence and effects of any contractual commitment for the construction of such facilities and the capability of the owner or operator to recover any capital investment made as a result of the conversion requirements of this section.

(b) The Administrator may by rule prescribe a system for allocation of coal to users thereof in order to attain the objectives specified in this section.

SEC. 107. MATERIALS ALLOCATION.

(a) The Administrator shall, within 30 days after the date of enactment of this Act, propose (in the nature of a proposed rule affording an opportunity for the presentation of views) and publish (and may from time to time amend) a contingency plan for allocation of supplies of materials and equipment necessary for exploration, production, refining, and required transportation of energy supplies and for the construction and maintenance of energy facilities. At such time as he finds that it is necessary to put all or part of such plan into effect, he shall transmit such plan or portion thereof to each House of Congress and such plan or portion thereof shall take effect in the same manner as an energy conservation plan prescribed under section 105 and to which section 105(b)(3)(B) applies (except that such plan may be submitted at any time after the date of enactment of this Act and before May 15, 1975).

(b) Section 4(b)(1)(G) of the Emergency Petroleum Allocation Act of 1973 is amended to read as follows:

"(G) allocation of residual fuel oil and refined petroleum products in such amounts and in such manner as may be necessary for the maintenance of exploration for, and production or extraction of—

"(i) fuels, and

"(ii) minerals essential to the requirements of the Unitd States,

and for required transportation related thereto,"

SEC. 108. FEDERAL ACTIONS TO INCREASE AVAILABLE DOMESTIC PETROLEUM SUPPLIES.

(a) The Administrator may initiate the following measures to supplement domestic energy supplies for the duration of the emergency:

(1) require, by order or rule, the production of desiganted existing domestic oilfields, at their maximum efficient rate of production, which is the maximum rate at which production may be sustained without detriment to the ultimate recovery of oil and gas under sound engineering and economic principles. Such fields are to be designated by the Secretary of the Interior, after consultation with the appropriate State regulatory agency. Data to determine the maximum efficient rate of production shall be supplied to the Secretary of the Interior by the State regulatory agency which determines the maximum efficient rate of production and by the operators who have drilled wells in, or are producing oil and gas from such fields;

(2) require, if necessary to meet essential energy needs, production of certain designated existing domestic oilfields at rates in excess of their currently assigned maximum efficient rates. Fields to be so designated, by the Secretary of the Interior or the Secretary of the Navy as to the Federal lands or as to Federal interests in lands under their respective jurisdiction, shall be those fields where the types and quality of reservoirs are such as to permit production at rates in excess of the currently assigned sustainable maximum efficient rate for period of ninety days or more without excessive risk of losses in recovery;

(3) require the adjustment of processing operations of domestic refineries to produce refined products in proportions commensurate with national needs and consistent with the objectives of section 4(b) of the Emergency Petroleum Allocation Act of 1973.

(b) Nothing in this section shall be construed to authorize the production of any Naval Petroleum Reserve now subject to the provisions of chapter 641 of title 10 of the United States Code.

SEC. 109. OTHER AMENDMENTS TO THE EMERGENCY PETROLEUM ALLOCATION ACT OF 1973.

(a) Section 4 of the Emergency Petroleum Allocation Act of 1973 as amended by section 104 of this Act is amended by adding at the end of such section the following new subsection:

"(i) If any provision of the regulation under subsection (a) provides that any allocation of residual fuel oil or refined petroleum products is to be based on use of such a product or amounts of such product supplied during a historical period, the regulation shall contain provisions designed to assure that the historical period can be adjusted (or other adjustments in allocations can be made) in order to reflect regional disparities in use, population growth or unusual factors influencing use (including unusual changes in climatic conditions), of such oil or product in the historical period. This subsection shall take effect 30 days after the date of enactment of the Energy Emergency Act. Adjustments for such purposes shall take effect no later than 6 months after the date of enactment of this subsection. Adjustments to reflect population growth shall be based upon the most current figures available from the United States Bureau of the Census."

(b) Section 4(g)(1) of the Emergency Petroleum Allocation Act of 1973 is amended by striking out "February 28, 1975" in each case the term appears and inserting in each case "May 15, 1975".

SEC. 110. PROHIBITION ON WINDFALL PROFITS—PRICE GOUGING.

(a)(1) The President shall exercise his authority under the Emergency Petroleum Allocation Act of 1973 and under the Economic Stabilization Act of 1970 so as to specify prices for sales of petroleum products produced in or imported into the United States, which avoid windfall profits by sellers.

(2) Any interested person, who has reason to believe that any price (specified under any of the authorities referred to in paragraph (1) of this subsection) of petroleum products permits a seller thereof any windfall profits, may petition the Attorney General for a determination under subparagraph (A) or (B) of paragraph (3).

(3)(A) Upon petition of any interested person, the Attorney General may by rule determine, after opportunity for oral presentation of views, data, and arguments, whether the price (specified under any of the authorities referred to in paragraph (1)) of petroleum product permits sellers thereof to receive windfall profits. Upon a final determination of the Attorney General that such price permits windfall profits to be so received, it shall specify a price for such sales which will not permit such profits to be received by such sellers. After such a final determination, no higher price may be specified (under any of the authorities specified in paragraph (1)) except with the approval of the Attorney General.

(B) Upon petition of any interested person and notwithstanding any proceeding or determination under subparagraph (A), the Attorney General may determine whether the price charged by a particular seller of any petroleum product permitted such seller to receive windfall profits. If, on the basis of such petition, the Attorney General has reason to believe that such price has permitted such seller to receive windfall profits, it may order such seller to take such actions (including the escrowing of funds) as it may deem appropriate to assure that sufficient funds will be available for the refund of windfall profits in the event there is a final determination by the Attorney General under this subparagraph that such seller has received windfall profits. Prior to a final determination under this subparagraph, such seller shall be afforded a hearing in accordance with the procedures required by section 554 of title 5, United States Code. Upon a final determination of the Attorney General that such price permitted such seller to receive windfall profits, the Attorney General shall order such seller to refund an amount equal to such windfall profits to the persons who have purchased from such seller at prices which resulted in such windfall profits. If such persons are not reasonably ascertainable, the Attorney General shall order the sellers for the purpose of refunding such profits, to reduce the price for future sales, to create a fund against which previous purchasers of such item may file a claim under rules which shall be prescribed by the Attorney General, or to take such other action as the Attorney General may deem appropriate.

(C) Any final determination under subparagraph (A) or (B) shall be subject to judicial review in accordance with sections 701 through 706 of title 5, United States Code.

(4) (A) The Attorney General may provide, in its discretion under regulations prescribed by the Attorney General, for such consolidation as may be necessary or appropriate to carry out the purposes of this subsection.

(B) The Attorney General may make such rules, regulations, and orders as it deems necessary or appropriate to carry out its functions under this subsection.

(6) For the purposes of this section, the term "windfall profits" means profits which are unreasonable or excessive, taking into consideration normal profits.

(7) For the purposes of this subsection, the term "interested person" includes the United States, any State, and the District of Columbia.

(8) This subsection shall not apply to the first sale of crude oil described in section 4(e) (2) of Emergency Petroleum Allocation Act of 1973 (relating to stripper wells).

(9) This section shall take effect on January 1, 1975, and shall apply to profits attributable to any price (specified under any of the authorities referred to in paragraph (1) of this subsection) of crude oil, residual fuel oil, and refined petroleum products in effect after December 31, 1973.

(b) Notwithstanding any other provision of law, administrative proceedings before the Attorney General under this section shall be governed by subchapter II of chapter 5 of title 5, United States Code, and such proceedings shall be reviewed in accordance with chapter 7 of such title.

SEC. 111. PROTECTION OF FRANCHISED DEALERS.

(a) As used in this section:

(1) The term "distributor" means a person engaged in the sale, consignment, or distribution of petroleum products to wholesale or retail outlets whether or not it owns, leases, or in any way controls such outlets.

(2) The term "franchise" means any agreement or contract between a refiner or a distributor and a retailer or between a refiner and a distributor, under which such retailer or distributor is granted authority to use a trademark, trade name, service mark, or other identifying symbol or name owned by such refiner or distributor, or any agreement or contract between such parties under which such retailer or distributor is granted authority to occupy premises owned, leased, or in any way controlled by a party to such agreement or contract, for the purpose of engaging in the distribution or sale of petroleum products for purposes other than resale.

(3) The term "notice of intent" means a written statement of the alleged facts which, if true, constitute a violation of subsection (b) of this section.

(4) The term "refiner" means a person engaged in the refining or importing of petroleum products.

(5) The term "retailer" means a person engaged in the sale of any refined petroleum product for purposes other than resale within any State, either under a franchise or independent of any franchise, or who was so engaged at any time after the start of the base period.

(b) (1) A refiner or distributor shall not cancel, fail to renew, or otherwise terminate a franchise unless he furnishes prior notification pursuant to this paragraph to each distributor or retailer affected thereby. Such notification shall be in writing and sent to such distributor or retailer by certified mail not less than ninety days prior to the date on which such franchise will be canceled, not renewed, or otherwise terminated. Such notification shall contain a statement of intention to cancel, not renew, or to terminate together with the reasons therefor, the date on which such action shall take effect, and a statement of the remedy or remedies available to such distributor or retailer under this section together with a summary of the applicable provisions of this section.

(2) A refiner or distributor shall not cancel, fail to renew, or otherwise terminate a franchise unless the retailer or distributor whose franchise is terminated failed to comply substantially with any essential and reasonable requirement of such franchise or failed to act in good faith in carrying out the terms of such franchise, or unless such refiner or distributor withdraws entirely from the sale of refined petroleum products in commerce for sale other than resale in the United States.

(c) (1) If a refiner or distributor engages in conduct prohibited under subsection (b) of this section, a retailer or a distributor may maintain a suit against such refiner or distributor. A retailer may maintain such suit against a distributor or a refiner whose actions affect commerce and whose products with respect to conduct prohibited under paragraph (1) or (2) of subsection (b) of this section, he sells or has sold, directly or indirectly, under a franchise. A distributor may maintain such suit against a refiner whose actions affect commerce and whose products he purchases or has purchased or whose products he distributes or has distributed to retailers.

(2) The court shall grant such equitable relief as is necessary to remedy the effects of conduct prohibited under subsection (b) of this section which it finds to exist including declaratory judgment and mandatory or prohibitive injunctive relief. The court may grant interim equitable relief, and actual and punitive damages (except for actions for a failure to renew) where indicated, in suits under this section, and may, unless such suit is frivolous, direct that costs, including reasonable attorney and expert witness fees, be paid by the defendant. In the case of actions for a failure to renew damages shall be limited to actual damages including the value of the dealer's equity.

(3) A suit under this section may be brought in the district court of the United States for any judicial district in which the distributor or the refiner against whom such suit is maintained resides, is found, or is doing business, without regard to the amount in controversy. No such suit shall be maintained unless commenced within three years after the cancellation, failure to renew, or termination of such franchise or the modification thereof.

SEC. 112. PROHIBITIONS ON UNREASONABLE ACTIONS.

(a) Action taken under authority of this Act, the Emergency Petroleum Allocation Act of 1973, or other Federal law resulting in the allocation of petroleum products and electrical energy among classes of users or resulting in restrictions on use of petroleum products and electrical energy, shall be equitable, shall not be arbitrary or capricious, and shall not unreasonably discriminate among classes of users: *Provided*, That with respect to allocations of petroleum products applicable to the foreign trade and commerce of the United States, no foreign corporation or entity shall receive more favorable treatment in the allocation of petroleum products than that which is accorded by its home country to United States citizens engaged in the same line of commerce, and allocations shall contain provisions designed to foster reciprocal and non-discriminatory treatment by foreign countries of United States citizens engaged in foreign commerce.

(b) To the maximum extent practicable, any restriction on the use of energy shall be designed to be carried out in such manner so as to be fair and to create a reasonable distribution of the burden of such restriction on all sectors of the economy, without imposing an unreasonably disproportionate share of such burden on any specific industry, business or commercial enterprise, or on any individual segment thereof and shall give due consideration to the needs of commercial, retail, and service establishments whose normal function is to supply goods and services of an essential convenience nature during times of day other than conventional daytime working hours.

SEC. 113. REGULATED CARRIERS.

(a) The Interstate Commerce Commission (with respect to common or contract carriers subject to economic regulation under the Interstate Commerce Act), the Civil Aeronautics Board, and the Federal Maritime Commission shall, for the duration of the period beginning on the date of enactment of this Act and ending on May 15, 1975, have authority to take any action for the purpose of conserving energy consumption in a manner found by such Commission or Board to be consistent with the objectives and purposes of the Acts administered by such Commission or Board on its own motion or on the petition of the Administrator which existing law permits such Commission or Board to take upon the motion or petition of any regulated common or contract carrier or other person.

(b) The Interstate Commerce Commission shall, by expedited proceedings, adopt appropriate rules under the Interstate Commerce Act which eliminate restrictions on the operating authority of any motor common carrier of property which require excessive travel between points with respect to which such motor common carrier has regularly performed service under authority issued by the Commission. Such rules shall assure continuation of essential service to communities served by any such motor common carrier.

(c) Within 45 days after the date of enactment of this Act, the Civil Aeronautics Board, the Federal Maritime Commission, and the Interstate Commerce Commission shall report separately to the appropriate committees of the Congress on the need for additional regulatory authority in order to conserve fuel during the period beginning on the date of enactment of this Act and ending on May 15, 1975 while continuing to provide for the public convenience and necessity. Each such report shall identify with specificity—

(1) the type of regulatory authority needed;

(2) the reasons why such authority is needed;

(3) the probable impact on fuel conservation of such authority;

(4) the probable effect on the public convenience and necessity of such authority; and

(5) the competitive impact, if any, of such authority.

Each such report shall further make recommendations with respect to changes in any existing fuel allocation programs which are deemed necessary to provide for the public convenience and necessity during such period.

SEC. 114. ANTITRUST PROVISIONS.

(a) Except as specifically provided in subsection (i), no provision of this Act shall be deemed to convey to any person subject to this Act any immunity from civil and criminal liability or to create defenses to actions, under the antitrust laws.

(b) As used in this section, the term "antitrust laws" means—

(1) the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies", approved July 2, 1890 (15 U.S.C. 1 et seq.), as amended;

(2) the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914 (15 U.S.C. 12 et seq.), as amended;

(3) the Federal Trade Commission Act (15 U.S.C. 41 et seq.), as amended;

(4) sections 73 and 74 of the Act entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes", approved August 27, 1894 (15 U.S.C. 8 and 9), as amended; and

(5) the Act of June 19, 1936, chapter 592 (15 U.S.C. 13, 13a, 13b, and 21a).

(c)(1) To achieve the purposes of this Act, the Administrator may provide for the establishment of such advisory committees as he determines are necessary. Any such advisory committees shall be subject to the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C. App. 1), whether or not such Act or any of its provisions expires or terminates during the term of this Act or of such committees, and in all cases shall be chaired by a regular full-time Federal employee and shall include representatives of the public. The meetings of such committees shall be open to the public.

(2) A representative of the Federal Government shall be in attendance at all meetings of any advisory committee established pursuant to this section. The Attorney General and the Federal Trade Commission shall have adequate advance notice of any meeting and may have an official representative attend and participate in any such meeting.

(3) A full and complete verbatim transcript shall be kept of all advisory committee meetings, and shall be taken and deposited, together with any agreement resulting therefrom, with the Attorney General and the Federal Trade Commission. Such transcript and agreement shall be made available for public inspection and copying, subject to the provisions of sections 552(b)(1) and (b)(3) of title 5, United States Code.

(d) The Administrator, subject to the approval of the Attorney General and the Federal Trade Commission, shall promulgate, by rule, standards and procedures by which persons engaged in the business of producing, refining, marketing, or distributing crude oil, residual fuel oil or any refined petroleum product may develop and implement voluntary agreements and plans of action to carry out such agreements which the Administrator determines are necessary to accomplish the objectives stated in section 4(b) of the Emergency Petroleum Allocation Act of 1973.

(e) The standards and procedures under subsection (d) shall be promulgated pursuant to section 553 of title 5, United States Code. They shall provide, among other things, that—

(1) Such agreements and plans of action shall be developed by meetings of committees, councils, or other groups which include representatives of the public, of interested segments of the petroleum industry and of industrial, municipal and private consumers, and shall in all cases be chaired by a regular full-time Federal employee.

(2) Meetings held to develop a voluntary agreement or a plan of action under this subsection shall permit attendance by interested persons and shall be preceded by timely and adequate notice with identification of the agenda of such meeting to the Attorney General, the Federal Trade Commission and to the public in the affected community;

(3) Interested persons shall be afforded an opportunity to present, in writing and orally, data, views and arguments at such meetings;

(4) A full and complete verbatim transcript shall be kept of any meeting, conference or communication held to develop, implement or carry out a voluntary agreement or a plan of action under this subsection and shall be taken and deposited, together with any agreement resulting therefrom, with the Attorney General and the Federal Trade Commission. Such transcript and agreement shall be available for public inspection and copying subject to provisions of section 552(b)(1) and (b)(3) of title 5, United States Code.

(f) The Federal Trade Commission may exempt types or classes of meetings, conferences or communications from the requirements of subsection (c)(3) and (e)(4) provided such meetings, conferences, or communications are ministerial in nature and are for the sole purpose of implementing or carrying out a voluntary agreement or plan of action authorized pursuant to this section. Such ministerial meetings, conference or communication may take place in accordance with such requirements as the Federal Trade Commission may prescribe by rule. Such persons participating in such meeting, conference or communication shall cause a record to be made specifying the date such meeting, conference, or communication took place and the persons involved, and summarizing the subject matter discussed. Such record shall be filed with the Federal Trade Commission and the Attorney General, where it shall be made available for public inspection and copying.

(g)(1) The Attorney General and the Federal Trade Commission shall participate from the beginning in the development, implementation and carrying out of voluntary agreements and plans of action authorized under this section. Each may propose any alternative which would avoid or overcome, to the greatest extent practicable, possible anticompetitive effects while achieving substantially the purposes of this Act. Each shall have the right to review, amend, modify, disapprove, or prospectively revoke, on its own motion or upon the request of any interested person, any plan of action or voluntary agreement at any time, and, if revoked, thereby withdraw prospectively the immunity conferred by subsection (i) of this section.

(2) Any voluntary agreement or plan of action entered into pursuant to this section shall be submitted in writing to the Attorney General and the Federal Trade Commission 20 days before being implemented, where it shall be made available for public inspection and copying.

(h)(1) The Attorney General and the Federal Trade Commission shall monitor the development, implementation and carrying out of plans of action and voluntary agreements authorized under this section to assure the protection and fostering of competition and the prevention of anticompetitive practices and effects.

(2) The Attorney General and the Federal Trade Commission shall promulgate joint regulations concerning the maintenance of necessary and appropriate documents, minutes, transcripts and other records related to the development, implementation or carrying out of plans of action or voluntary agreements authorized pursuant to this Act.

(3) Persons developing, implementing or carrying out plans of action or voluntary agreements authorized pursuant to this Act shall maintain those records required by such joint regulations. The Attorney General and the Federal Trade Commission shall have access to and the right to copy such records at reasonable times and upon reasonable notice.

(4) The Federal Trade Commission and the Attorney General may each prescribe such rules and regulations as may be necessary or appropriate to carry out their responsibilities under this Act. They may both utilize for such purposes and for purposes of enforcement, any and all powers conferred upon the Federal Trade Commission or the Department of Justice, or both, by any other provision of law, including the antitrust laws; and wherever such provision of law refers to "the purposes of this Act" or like terms, the reference shall be understood to be this Act.

(i) There shall be available as a defense to any civil or criminal action brought under the antitrust laws in respect of actions taken in good faith to develop and implement a voluntary agreement or plan of action to carry out a voluntary agreement by persons engaged in the business of producing, refining, marketing or distributing crude oil, residual fuel oil, or any refined petroleum product that—

(1) such action was—

(A) authorized and approved pursuant to this section, and

(B) undertaken and carried out solely to achieve the purposes of this section and in compliance with the terms and conditions of this section, and the rules promulgated hereunder; and

(2) such persons fully complied with the requirements of this section and the rules and regulations promulgated hereunder.

(j) No provision of this Act shall be construed as granting immunity for, nor as limiting or in any way affecting any remedy or penalty which may result from any legal or proceeding arising from, any acts or practices which occurred: (1) prior to the enactment of this Act, (2) outside the scope and purpose or not in compliance with the terms and conditions of this Act and this section, or (3) subsequent to its expiration or repeal.

(k) Effective on the date of enactment of this Act, this section shall apply in lieu of section 6(c) of the Emergency Petroleum Allocation Act of 1973. All actions taken and any authority or immunity granted under such section 6(c) shall be hereafter taken or granted, as the case may be, pursuant to this section.

(l) The provisions of section 708 of the Defense Production Act of 1950, as amended, shall not apply to any action authorized to be taken under this Act or the Emergency Petroleum Allocation Act of 1973.

(m) The Attorney General and the Federal Trade Commission shall each submit to the Congress and to the President, at least once every six months, a report on the impact on competition and on small business of actions authorized by this section.

(n) The authority granted by this section (including any immunity under subsection (i)) shall terminate on May 15, 1975.

(o) The exercise of the authority provided in section 113 shall not have as a principal purpose or effect the substantial lessening of competition among carriers affected. Accharge of the Antitrust Division, who shall be taken only after providing from the beginning an adequate opportunity for participation by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division, who shall propose any alternative which would avoid or overcome, to the greatest extent practicable, any anticompetitive effects while achieving the purposes of this Act.

SEC. 115. EXPORTS.

To the extent necessary to carry out the purpose of this Act, the Administrator may under authority of this Act, by rule, restrict exports of coal, petroleum products, and petrochemical feedstocks, under such terms as he deems appropriate: *Provided*, That, the Administrator shall restrict exports of coal, petroleum products, or petrochemical feedstocks if either the Secretary of Commerce or the Secretary of Labor certifies that such exports would contribute to unemployment in the United States. The Secretary of Commerce, pursuant to the Export Administration Act of 1969 (but without regard to the phrase "and to reduce the serious inflationary impact of abnormal foreign demand" in section 3(2)(A) of such Act), may restrict the exports of coal, petroleum products, and petrochemical feedstocks, and of materials and equipment essential to the production, transport, or processing of fuels to the extent necessary to carry out the purpose of this Act and section 4(b) and 4(d) of the Emergency Petroleum Allocation Act of 1973: *Provided*, That in the event that the Administrator certifies to the Secretary of Commerce that export restrictions of products enumerated in this section are necessary to carry out the purpose of this Act, the Secretary of Commerce shall impose such export restrictions. Rules under this section by the Administrator and actions by the Secretary of Commerce under the Export Administration Act of 1969 shall take into account the historical trading relations of the United States with Canada and Mexico and shall not be inconsistent with subsections (b) and (d) of section 4 of the Emergency Petroleum Allocation Act of 1973.

Sec. 116. Employment Impact and Unemployment Assistance.

(a) The President shall take into consideration and shall minimize, to the fullest extent practicable, any adverse impact of actions taken pursuant to this Act upon employment. All agencies of government shall cooperate fully under their existing statutory authority to minimize any such adverse impact.

(b) The President shall make grants to States to provide to any individual unemployed, if such unemployment resulted from the administration and enforcement of this Act and was in no way due to the fault of such individual, such assistance as the President deems appropriate while such individual is unemployed. Such assistance as a State shall provide under such a grant shall be available to individuals not otherwise eligible for unemployment compensation and individuals who have otherwise exhausted their eligibility for such unemployment compensation, and shall continue as long as unemployment in the area caused by such administration and enforcement continues (but not less than six months) or until the individual is reemployed in a suitable position, but not longer than two years after the individual becomes eligible for such assistance. Such assistance shall not exceed the maximum weekly amount under the unemployment compensation program of the State in which the employment loss occurred.

(c) On or before the sixtieth day following the date of enactment of this Act, the President shall report to the Congress concerning the present and prospective impact of energy shortages upon employment. Such report shall contain an assessment of the adequacy of existing programs in meeting the needs of adversely affected workers and shall include legislative recommendations which the President deems appropriate to meet such needs, including revisions in the unemployment insurance laws.

Sec. 117. Use of Carpools.

(a) The Secretary of Transportation shall encourage the creation and expansion of the use of carpools as a viable component of our nationwide transportation system. It is the intent of this section to maximize the level of carpool participation in the United States.

(b) The Secretary of Transportation is directed to establish within the Department of Transportation an "Office of Carpool Promotion" whose purpose and responsibilities shall include—

(1) responding to any and all requests for information and technical assistance on carpooling and carpooling systems from units of State and local governments and private groups and employees;

(2) promoting greater participation in carpooling through public information and the preparation of such materials for use by State and local governments;

(3) encouraging and promoting private organizations to organize and operate carpool systems for employees;

(4) promoting the cooperation and sharing of responsibilities between separate, yet proximately close, units of government in coordinating the operations of carpool systems; and

(5) promoting other such measures that the Secretary determines appropriate to achieve the goal of this subsection.

(c) The Secretary of Transportation shall encourage and promote the use of incentives such as special parking privileges, special roadway lanes, toll adjustments, and other incentives as may be found beneficial and administratively feasible to the furtherance of carpool ridership, and consistent with the obligations of the State and local agencies which provide transportation services.

(d) The Secretary of Transportation shall allocate the funds appropriated pursuant to the authorization of subsection (f) according to the following distribution between the Federal and State or local units of government:

(1) The initial planning process—up to 100 percent Federal.

(2) The systems design process—up 100 percent Federal.

(3) The initial startup and operation of a given system—60 percent Federal and 40 percent State or local with the Federal portion not to exceed 1 year.

(e) Within 12 months of the date of enactment of this Act, the Secretary of Transportation shall make a report to Congress of all his activities and expenditures pursuant to this section. Such report shall include any recommendations as to future legislation concerning carpooling.

(f) The sum of $5,000,000 is authorized to be appropriated for the conduct of programs designed to achieve the goals of this section, such authorization to remain available for 2 years.

(g) For purposes of this section, the terms "local governments" and "local units of government" include any metropolitan transportation organization designated as being responsible for carrying out section 134 of title 23, United States Code.

(h) As an example to the rest of our Nation's automobile users, the President of the United States shall take such action as is necessary to require all agencies of Government, where practical, to use economy model motor vehicles.

(i)(1) The President shall take action to require that no Federal official or employee in the executive branch below the level of Cabinet officer be furnished a limousine for individual use. The provisions of this subsection shall not apply to limousines furnished for use by officers or employees of the Federal Bureau of Investigation, or to those persons whose assignments necessitate transportation by limousines because of diplomatic assignment by the Secretary of State.

(2) For purposes of this subsection, the term "limousine" means a type 6 vehicle as defined in the Interim Federal Specifications issued by the General Services Administration, December 1, 1973.

Sec. 118. Administrative Procedure and Judicial Review.

(a)(1) Subject to paragraphs (2), (3), and (4) of this subsection, the provisions of subchapter II of chapter 5 of title 5, United States Code, shall apply to any rule or order (including a rule or order issued by a State or officer thereof) under this title (except with respect to any rule or order pursuant to sections 108 and 113 of this Act, section 205 (a), (b), and (c), of this Act, or section 4(h) of the Emergency Petroleum Allocation Act of 1973) or under the authority of any energy conservation plan.

(2) Notice of any proposed rule or order described in paragraph (1) shall be given by publication of such proposed rule or order in the Federal Register. In each case, a minimum of ten days following such publication shall be provided for opportunity to commit; except that the requirements of this paragraph as to time of notice and opportunity to comment may be waived where strict compliance is found to cause serious impairment of the operation of the program to which such rule or order relates and such findings are set out in detail in such rule or order. In addition, publication of all rules or orders promulgated by officers of a State or political subdivision thereof or to State or local boards pursuant to this Act shall to the maximum extent practicable be achieved by publication of such rules or orders in a sufficient number of newspapers of statewide circulation calculated to receive widest possible notice.

(3) In addition to the requirements of paragraph (2), if any rule or order described in paragraph (1) is likely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses, an opportunity for oral presentation of views, data, and arguments shall be afforded. To the maximum extent practicable, such opportunity shall be afforded prior to the implementation of such rule or order, but in all cases such opportunity shall be afforded no later than 45 days after the implementation of any such rule or order. A transcript shall be kept of any oral presentation.

(4) Any officer or agency authorized to issue rules or orders described in paragraph (1) shall provide for the making of such adjustments, consistent with the other purposes of this Act or the Emergency Petroleum Allocation Act of 1973 (as the case may be), as may be necessary to prevent special hardships, inequity, or an unfair distribution of burdens and shall in rules prescribed by it establish procedures which are available to any person for the purpose of seeking an interpretation, modification, or rescission of, or an exception to or exemption from, such rules and orders. If such person is aggrieved or adversely affected by the denial of a request for such action under the preceding sentence, he may request a review of such denial by the officer or agency and may obtain judicial review in accordance with subsection (b) when such denial becomes final. The officer or agency shall, in rules prescribed by it, establish appropriate procedures, including a hearing where deemed advisable, for considering such requests for action under this paragraph.

(5) In addition to the requirements of section 552 of title 5, United States Code, any agency authorized by this Act or the Emergency Petroleum Allocation Act of 1973 to issue rules or orders shall make available to the public all internal rules and guidelines which may form the basis, in whole or in part, for any rule or order with such modifications as are necessary to insure confidentiality protected under such section 552. Such agency shall, upon written request of a petitioner filed after any grant or denial of a request for exception or exemption from rules or orders furnish the petitioner with a written opinion setting forth applicable facts and the legal basis in support of such grant or denial. Such opinions shall be made available to the petitioner and the public within thirty days of such request and with such modifications as are necessary to insure confidentiality of information protected under such section 552.

(b)(1) Judicial review of administrative rulemaking of general and national applicability done under this Act may be obtained only by filing a petition for review in the

United States Court of Appeals for the District of Columbia within thirty days from the date of promulgation of any such rule or regulation, and judicial review of administrative rulemaking of general, but less than national, applicability done under this Act may be obtained only by filing a petition for review in the United States Court of Appeals for the appropriate circuit within thirty days from the date of promulgation of any such rule or regulation, the appropriate circuit being defined as the circuit which contains the area or the greater part of the area within which the rule or regulation is to have effect.

(2) Notwithstanding the amount in controversy, the district courts of the United States shall have exclusive original jurisdiction of all other cases or controversies arising under this Act, or under regulations or orders issued thereunder, except any actions taken by the Civil Aeronautics Board, the Interstate Commerce Commission, Federal Power Commission, or the Federal Maritime Commission, or any actions taken to implement or enforce any rule or order by any officer of a State or political subdivision thereof or State or local board which has been delegated authority under section 122 of this Act except that nothing in this section affects the power of any court of competent jurisdiction to consider, hear, and determine in any proceeding before it any issue raised by way of defense (other than a defense based on the constitutionality of this title or the validity of action taken by any agency under this Act. If in any such proceeding an issue by way of defense is raised based on the constitutionality of this Act or the validity of agency action under this Act, the case shall be subject to removal by either party to a district court of the United States in accordance with the applicable provisions of chapter 889 of title 28, United States Code. Cases or controversies arising under any rule or order of any officer of a State or political subdivision thereof or a State or local board may be heard in either (1) any appropriate State court, and (2) without regard to the amount in controversy, the district courts of the United States.

(c) The Administrator may by rule presscribe procedures for State or local boards which carry out functions under this Act or the Emergency Petroleum Allocation Act of 1973. Such procedures shall apply to such boards in lieu of subsection (a), and shall require that prior to taking any action, such boards shall take steps reasonably calculated to provide notice to persons who may be affected by the action, and shall afford an opportunity for presentation of views (including oral presentation of views where practicable) at least 10 days before taking the action. Such boards shall be of balanced composition reflecting the makeup of the community as a whole.

Sec. 119. Prohibited Acts.

It shall be unlawful for any person to violate any provision of title I of this Act (other than provisions of this Act which make amendments to the Emergency Petroleum Allocation Act of 1973 and section 113) or to violate any rule, regulation (including an energy conservation plan) or order issued pursuant to any such provision.

Sec. 120. Enforcement.

(a) Whoever violates any provision of section 119 shall be subject to a civil penalty of not more than $2,500 for each violation.

(b) Whoever willfully violates any provision of section 119 shall be fined not more than $5,000 for each violation.

(c) It shall be unlawful for any person to offer for sale or distribute in commerce any product or commodity in violation of an applicable order or regulation issued pursuant to this Act. Any person who knowingly and willfully violates this subsection after having been subjected to a civil penalty for a prior violation of the same provision of any order or regulation issued pursuant to this Act shall be fined not more than $50,000 or imprisoned not more than six months, or both.

(d) Whenever it appears to any person authorized by the Administrator to exercise authority under this Act that any individual or organization has engaged, is engaged, or is about to engage in acts or practices constituting a violation of section 119, such person may request the Attorney General to bring an action in the appropriate district court of the United States to enjoin such acts or practices, and upon a proper showing a temporary restraining order or a preliminary or permanent injunction shall be granted without bond. Any such court may also issue mandatory injunctions commanding any person to comply with any provision, the violation of which is prohibited by section 119.

(e) Any person suffering legal wrong because of any actor or practice arising out of any violation of section 119 may bring an action in a district court of the United States, without regard to the amount in controversy, for appropriate relief, including an action for a declaratory judgment or writ of injunction. Nothing in this subsection shall authorize any person to recover damages.

Sec. 121. Use of Federal Facilities.

Whenever practicable, and for the purpose of facilitating the transportation and storage of fuel, agencies or departments of the United States are authorized, during the period beginning on the date of enactment of this Act and ending May 15, 1975, to enter into arrangements for the acquisition or use by domestic public entities and private industries of equipment or facilities which are surplus to the needs of such agency or department and appropriate to the transportation and storage of fuel, except that such arrangements may be made (1) only after the Administrator finds that such equipment or facilities are not available from private sources and (2) only on the basis of compensation for the acquisition or use of such equipment or facilities at fair market value prices or rentals.

Sec. 122. Delegation of Authority and Effect on State Law

(a) The Administrator may delegate any of his functions under the Emergency Petroleum Allocation Act of 1973 or this Act to any officer or employee of the Federal Energy Emergency Administration as he deems appropriate. The Administrator may delegate any of his functions relative to implementation and enforcement of the Emergency Petroleum Allocation Act of 1973 or this Act to officers of a State or political subdivision thereof or to State or local boards of balanced composition reflecting the make-up of the community as a whole. Such officers or boards shall be designated and established in accordance with regulations as the Administration shall promulgate under this Act. Section 5(b) of the Emergency Petroleum Allocation Act of 1973 is repealed effective on the effective date of the transfer of functions under such Act to the Administrator pursuant to section 103 of this Act.

(b) No State law or State program in effect on the date of enactment of this Act, or which may become effective thereafter, shall be superseded by any provision of this Act or any regulation, order, or energy conservation plan issued pursuant to this Act except insofar as such State law or State program is inconsistent with the provisions of this Act, or such a regulation, order, or plan.

Sec. 123. Grants to States.

Any funds authorized to be appropriated under section 127(b) shall be available for the purpose of making grants to States to which the Administrator has delegated authority under section 122 of this Act, or for the administration of appropriate State or local energy conservation programs which are the basis of an exemption made pursuant to section 105(a)(2) of this Act from a Federal energy conservation plan which has taken effect under section 105 of this Act. The Administrator shall make such grants upon such terms and conditions as he may prescribe by rule.

Sec. 124. Reports on National Energy Resources.

(a) For the purpose of providing to the Congress, and the Departments of Interior and Justice, the States, and the public, to the maximum extent possible, reliable data on reserves, production, distribution, and use of petroleum products, natural gas, and coal, the Attorney General or the Secretary of the Interior, or both, shall promptly publish for public comment a regulation requiring that persons doing business in the United States, who, on the effective date of this Act, are engaged in exploring, developing, processing, refining, or transporting by pipeline, any petroleum product, natural gas, or coal, shall * * * days. Such reports shall show for the preceding sixty calendar days such person's (1) reserves of crude oil, natural gas, and coal; (2) production and destination of any petroleum product, natural gas, and coal; (3) refinery runs byproduct; and (4) other data required by the Attorney General or the Secretary of the Interior for such purpose. Such regulation shall also require that such persons provide to the Attorney General or the Secretary of the Interior such reports for the period from January 1, 1970, to the date of such person's first sixty day report. Such regulation shall be promulgated 30 days after such publication. The Attorney General or the Secretary of the Interior shall publish quarterly in the Federal Register a meaningful summary analysis of the data provided by such reports.

(b) The reporting requirements of this section shall not apply to the retail operations of persons required to file such reports. Where a person shows that all or part of the data required by this section is being reported by such person to another Federal agency, the Attorney General or the Secretary of the Interior may exempt such person from reporting all or part of such data directly to him, and upon such exemption, such agency shall, notwithstanding any other provision of law, provide such data to the Attorney General or the Secretary of the Interior. The districts courts of the United States are authorized, upon application of the Attorney General or the Secretary of the Interior, to require enforcement of such reporting requirements.

(c) Upon a showing satisfactory to the Attorney General or the Secretary of the Interior, by any person that any report or part thereof obtained under this section from such person or from a Federal agency would, if made public, divulge methods or processes entitled to protection as trade secrets or other proprietry information of such person, such report, or portion thereof, shall be confidential in accordance with the provisions of section 1905 of title 18 of the United States Code, except that such report or part thereof shall not be deemed confidential for purposes of disclosure to (1) any delegate of the Federal Energy Emergency Administration for the purpose of carrying out this Act, (2) the Attorney General or the Secretary of the Interior or both when necessary to carry out those agencies' duties and responsibilities under this and other statutes, and (3) the Congress or any Committee of Congress upon request of the Chairman. The provisions of this section shall expire on May 15, 1975.

Sec. 125. Intrastate Gas.

Nothing in this Act shall expand the authority of the Federal Power Commission with respect to sales of non-jurisdictional natural gas.

SEC. 126. EXPIRATION.

The authority under this title to presribe any rule or order or take other action under this title, or to enforce any such rule or order, shall expire at midnight, May 15, 1975, (April 1, 1974, in the case of section 105), but such expiration shall not affect any action or pending proceedings, civil or criminal, not finally determined on such date, nor any action or proceeding based upon any act committed prior to midnight, May 15, 1975 (April 1, 1974, in the case of section 105).

SEC. 127. AUTHORIZATION OF APPROPRIATIONS.

(a) There are authorized to be appropriated to the Federal Energy Emergency Agency to carry out its functions under this Act and under other laws, and to make grants to States under section 123, $75,000,000 for the fiscal year ending June 30, 1974, and $75,000,000 for the fiscal year ending June 30, 1975.

(b) For the purpose of making payments under grants to States under section 123, there are authorized to be appropriated $50,000,000 for the fiscal year ending June 30, 1974, and $75,000,000 for the fiscal year ending June 30, 1975.

(c) For the purpose of making payments under grants to States under section 116, there is authorized to be appropriated $500,000,000 for the fiscal year ending June 30, 1974.

SEC. 128. SEVERABILITY.

If any provision of this Act, or the application of any such provision to any person or circumstance, shall be held invalid, the remainder of this Act, or the application of such provision to persons or circumstances, shall be held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

SEC. 129. PRICE AUTHORITY.

The President shall exercise his authority under the Economic Stabilization Act of 1970, as amended, and the Emergency Petroleum Allocation Act of 1973 to specify prices for sales of crude oil, residual fuel oil or refined petroleum products in or imported into the United States which avoid windfall profits by sellers. For purposes of this section, windfall profits shall be defined as those profits which are excessive or unreasonable, taking into consideration normal profit levels. This section shall be effective only until December 31, 1974.

SEC. 130. IMPORTATION OF LIQUEFIED NATURAL GAS.

The Emergency Petroleum Allocation Act of 1973 is amended by adding at the end thereof the following new section:

"SEC. 8. Notwithstanding the provisions of section 3 of the Natural Gas Act (or any other provisions of law) the President may by order, on a finding that such action would be consistent to the public interest, authorize on a shipment-by-shipment basis the importation of liquefied natural gas from a foreign country: *Provided, however,* That the authority to act under this section shall not permit the importation of liquefied natural gas which had not been authorized prior to the date of expiration of this Act and which is in transit on such date."

TITLE II—COORDINATION WITH ENVIRONMENTAL PROTECTION REQUIREMENTS

SEC. 201. SUSPENSION AUTHORITY.

Title I of the Clean Air Act (42 U.S.C. 1857 et seq.) is amended by adding at the end thereof the following new section:

"ENERGY EMERGENCY AUTHORITY

"SEC. 119. (a) (1) (A) The Administrator may, for any period beginning on or after the date of enactment of this section and ending on or before November 1, 1974, temporarily suspend any stationary source fuel or emission limitation as it applies to any person, if the Administrator finds that such person will be unable to comply with such limitation during such period solely because of unavailability of types or amounts of fuels. Any suspension under this paragraph and any interim requirement on which such suspension is conditioned under paragraph (3) shall be exempted from any procedural requirements set forth in this Act or in any other provision of local, State, or Federal law; except as provided in subparagraph (B).

"(B) The Administrator shall give notice to the public of a suspension and afford the public an opportunity for written and oral presentation of views prior to granting such suspension unless otherwise provided by the Administrator for good cause found and published in the Federal Register. In any case, before granting such a suspension he shall give actual notice to the Governor of the State, and to the chief executive officer of the local government entity in which the affected source or sources are located. The granting or denial of such suspension and the imposition of an interim requirement shall be subject to judicial review only on the grounds specified in paragraphs (2) (B) and (2) (C) of section 706 of title 5, United States Code, and shall not be subject to any proceeding under section 304(a) (2) or 307 (b) and (c) of this Act.

"(2) In issuing any suspension under paragraph (1) the Administrator is authorized to act on his own motion without application of any source or State.

"(3) Any suspension under paragraph (1) shall be conditioned upon compliance with such interim requirements as the Administrator determines are reasonable and practicable. Such interim requirements shall include, but need not be limited to, (A) a requirement that the source receiving the suspension comply with such reporting requirements as the Administrator determines may be necessary, (B) such measures as the Administrator determines are necessary to avoid an imminent and substantial endangerment to health of persons, and (C) requirements that the suspension shall be inapplicable during any period during which fuels wh'ch would enable compliance with the suspended stationary source fuel or emission limitations are in fact reasonably available to that person (as determined by the Administrator). For purposes of clause (C) of this paragraph availability of natural gas or petroleum products which enable compliance shall not make a suspension inapplicable to a source described in subsection (b) (1) of this section.

"(4) For purposes of this section:

"(A) The term 'stationary source fuel or emission limitation' means any emission limitation, schedule, or timetable for compliance, or other requirement, which is prescribed under this Act (other than section 303, 111 (b), or 112) or contained in an applicable implementation plan and which is designed to limit stationary source emissions resulting from combustion of fuels, including a prohibition on, or specification of, the use of any fuel of any type or grade or pollution characteristic thereof.

"(B) The term 'stationary source' has the same meaning as such term has under section 111(a) (3).

"(b) (1) Except as provided in paragraph (2) of this subsection, any fuel-burning stationary source (A) which is prohibited from using petroleum products or natural gas as fuel by reason of an order issued under section 106(a) of the Energy Emergency Act or which the Administrator determines began conversion to the use of coal as fuel during the 90-day period ending on December 15, 1973, and (B) which converts to the use of coal as fuel, shall not, until January 1, 1979, be prohibited, by reason of the application of any air pollution requirement, from burning coal which is available to such source.

"(2) (A) Paragraph (1) of this subsection shall apply to a source, only if the Administrator finds that omissions from the source will not materially contribute to a significant risk to public health and if the source has submitted to the Administrator a plan for compliance for such source which the Administrator has approved, after notice to interested persons and opportunity for presentation of views (including oral presentations of views). A plan submitted under the preceding sentence shall be approved only if it provides (i) for compliance by the means, and in accordance with a schedule which meets the requirements of subparagraph (B); and (ii) that such source will comply with requirements which the Administartor shall prescribe to assure that emissions from such source will not materially contribute to a significant risk to public health. The Administrator shall approve or disapprove any such plan within 60 days after such plan is submitted.

"(B) The Administrator shall prescribe regulations requiring that any source to which this subsection applies submit and obtain approval of its means for and schedule of compliance. Such regulations shall include requirements that such schedules shall include dates by which such source must (i) enter into contracts or other enforceable obligations for obtaining a long-term supply of coal or coal by-products (which contracts or obligations must have received prior approval of the Administrator), and (ii) take steps to obtain continuous emission reduction systems necessary to permit such source to burn such coal or coal by-products and to achieve the degree of emission reduction required by the following sentence (which steps and systems must have received prior approval of the Administrator). Such regulations shall also require that the source achieve as expeditiously as practicable considering the type of coal to be used (but not later than January 1, 1979) the same degree of emission reduction as it was required to achieve by the applicable implementation plan in effect on the date of enactment of this section. Such regulations shall also include such interim requirements as the Administrator determines are reasonable and practicable including requirements described in clauses (A) and (B) of subsection (a) (3).

"(C) The Administrator (after notice to interested persons and opportunity for presentation of views, including oral presentations of views, to the extent practicable) (i) may, prior to November 1, 1974, and shall thereafter, prohibit the use of coal by a source to which paragraph (1) applies if he determines that the use of coal by such source is likely to materially contribute to a significant risk to public health; and (ii) may require such source to use coal of any particular type, grade, or pollution characteristic if such coal is available to such source. Nothing in this subsection (b) shall prohibit a State or local agency from taking action which the Administrator is authorized to take under this paragraph.

"(3) For purposes of this subsection, the term "air pollution requirement" means any emission limitation, schedule, or timetable for compliance, or other requirement, which is prescribed under any Federal, State, or local law or regulation, including this Act (except for any requirement prescribed under this subsection, or section 303), and which is designed to limit stationary source emissions resulting from combustion of fuels (including a restriction on the use or content of fuels). A conversion to coal to which this subsection applies, shall not be deemed to be a modification for purposes of section 111(a) (2) and (4) of this Act.

"(4) A source to which this subsection applies may, upon the expiration of the exemption under paragraph (1), obtain a one year postponement of the application of any requirement of an applicable implementation plan under the conditions and in the manner provided in section 110(f).

"(c) The Administrator may by rule establish priorities under which manufacturers of continuous emission reduction systems shall provide such sytsems to users thereof, if he finds that priorities must be imposed in order to assure that such systems are first provided to users in air quality control regions with the most severe air pollution. No rule under this subsection may impair the obligation of any contract entered into before enactment of this section. No State or political subdivision may require any person to use a continuous emission reduction system for which priorities have been established under this subsection except in accordance with such priorities.

"(d) The Administrator shall study, and report to Congress not later than May 31, 1974, with respect to—

"(1) the present and projected impact on the program under this Act of fuel shortages and of allocation and end-use allocation programs;

"(2) availability of continuous emission reduction technology (including projections respecting the time, cost, and number of units available) and the effects that continuous emission reduction systems would have on the total environment and on supplies of fuel and electricity;

"(3) the number of sources and locations which must use such technology based on projected fuel availability data;

"(4) priority schedule for implementation of continuous emission reduction technology, based on public health or air quality;

"(5) evaluation of availability of technology to burn municipal solid waste in these sources; including time schedules, priorities analysis of unregulated pollutants which will be emitted and balancing of health benefits and detriments from burning solid waste and of economic costs;

"(6) projections of air quality impact of fuel shortages and allocations;

"(7) evaluation of alternative control strategies for the attainment and maintenance of national ambient air quality standards for sulfur oxides within the time frames prescribed in the Act, including associated considerations of cost, time frames, feasibility, and effectiveness of such alternative control strategies as compared to stationary source fuel and emission regulations;

"(8) proposed allocations of continuous emission reduction technology for nonsolid waste producing systems to sources which are least able to handle solid waste byproduct, technologically, economically, and without hazard to public health, safety, and welfare; and

"(9) plans for monitoring or requiring sources to which this section applies to monitor the impact of actions under this section on concentration of sulfur dioxide in the ambient air.

"(e) No State or political subdivision may require any person to whom a suspension has been granted under subsection (a) to use any fuel the unavailability of which is the basis of such person's suspension (except that this preemption shall not apply to requirements identical to Federal interim requirements under subsection (a)(1).

"(f)(1) It shall be unlawful for any person to whom a suspension has been granted under subsection (a)(1) to violate any requirement on which the suspension is conditioned pursuant to subsection (a)(3).

"(2) It shall be unlawful for any person to violate any rule under subsection (c).

"(3) It shall be unlawful for the owner or operator of any source to fail to comply with any requirement under subsection (b) or any regulation, plan, or schedule thereunder.

"(4) It shall be unlawful for any person to fail to comply with an interim requirement under subsection (i)(3).

"Beginning January 1, 1975, the Administrator shall publish at no less than 180-day intervals, in the Federal Register the following:

"(1) A concise summary of progress reports which are required to be filed by any person or source owner or operator to which subsection (b) applies. Such progress reports shall report on the status of compliance with all requirements which have been imposed by the Administrator under such subsections.

"(2) Up-to-date findings on the impact of this section upon—

"(A) applicable implementation plans, and

"(B) ambient air quality.

"(h) Nothing in this section shall affect the power of the Administrator to deal with air pollution presenting an imminent and substantial endangerment to the health of persons under section 303 of this Act.

"(i)(1) In order to reduce the likelihood of early phaseout of existing electric generating facilities during the energy emergency, any electric generating power plant (A) which, because of the age and condition of the plant, is to be taken out of service permanently no later than January 1, 1980, according to the power supply plan (in existence on the date of enactment of the Energy Emergency Act) of the operator of such plant, (B) for which a certification to that effect has been filed by the operator of the plant with the Environmental Protection Agency and the Federal Power Commission, and (C) for which the Commission has determined that the certification has been made in good faith and that the plan to cease operations no later than January 1, 1980, will be carried out as planned in light of existing and prospective power supply requirements, shall be eligible for a single one-year postponement as provided in paragraph (2).

"(2) Prior to the date on which any plant eligible under paragraph (1) is required to comply with any requirement of an applicable implementation plan, such source may apply (with the concurrence of the Governor of the State in which the plant is located) to the Administrator to postpone the applicability of such requirement to such source for not more than one year. If the Administrator determines, after balancing the risk to public health and welfare which may be associated with a postponement, that compliance with any such requirement is not reasonable in light of the projected useful life of the plant, the availability of rate base increases to pay for such costs, and other appropriate factors, then the Administrator shall grant a postponement of any such requirements.

"(3) The Administrator shall, as a condition of any postponement under paragraph (2), prescribe such interim requirements as are practicable and reasonable in light of the criteria in paragraph (2).

"(j)(1) The Administator may, after public notice and opportunity for presentation of views in accordance with section 553 of title 5, United States Code, and after consultation with the Federal Energy Emergency Administration designate persons to whom fuel exchange orders should be issued. The purpose of such designation shall be to avoid or minimize the adverse impact on public health and welfare of any suspension under subsection (a) of this section or conversion to coal to which subsection (b) applies or of any allocation under the Energy Emergency Act or the Emergency Petroleum Allocation Act.

"(2) The Administrator of the Federal Energy Administration shall issue exchange orders to such persons as are designated by the Administrator under paragraph (1) requiring the exchange of any fuel subject to allocation under the preceding Acts effective no later than 45 days after the date of the designation under paragraph (1), unless the Administrator of the Federal Energy Administration determines, after consultation with the Administrator, that the costs or consumption of fuel, resulting from such exchange order will be excessive.

"(3) Violation of any exchange order issued under paragraph (2) shall be a prohibited act and shall be subject to enforcement action and sanctions in the same manner and to the same extent as a violation of any requirement of the regulation under section 4 of the Emergency Petroleum Allocation Act of 1973."

SEC. 202. IMPLEMENTATION PLAN REVISIONS

(a) Section 110(a) of the Clean Air Act is amended in paragraph (3) by inserting "(A)" after "(3)" and by adding at the end thereof the following new subparagraph:

"(B)(1) For any air quality control region in which there has been a conversion to coal under section 119(b), the Administrator shall review the applicable implementation plan and no later than one year after the date of such conversion determine whether such plan must be revised in order to achieve the national primary standard which the plan implements. If the Administrator determines that any such plan is inadequate, he shall require that a plan revision be submitted by the State within three months after the date of notice to the State of such determination. Any plan revision which is submitted by the State after notice and public hearing shall be approved or disapproved by the Administrator, after public notice and opportunity for public hearing, but no later than three months after the date required for submission of the revised plan. If a plan provision (or portion thereof) is disapproved (or if a State fails to submit a plan revision), the Administrator shall, after public notice and opportunity for a public hearing, promulgate a revised plan (or portion thereof) not later than three months after the date required for approval or disapproval.

"(2) Any requirement for a plan revision under paragraph (1) and any plan requirement promulgated by the Administrator under such paragraph shall include reasonable and practicable measures to minimize the effect on the public health of any conversion to which section 119(b) applies."

(b) Subsection (c) of section 110 of the Clean Air Act (42 U.S.C. 1857 C–5) is amended by inserting "(1)" after "(c)"; by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (C), respectively; and by adding the following new paragraph:

"(2)(A) The Administrator shall conduct a study and shall submit a report to the Committee on Interstate and Foreign Commerce of the United States House of Representatives and the Committee on Public Works of the United States Senate not later than May 1, 1974, on the necessity of parking surcharge, management of parking supply, and preferential bus/carpool lane regulations as part of the applicable implementation plans required under this section to achieve and maintain national primary ambient air quality standards. The study shall include an assessment of the economic impact of such regulations, consideration of alternative means of reducing total vehicle miles traveled, and an assessment of the impact of such regulations on other Federal and State programs dealing with energy or transportation. In the course of such study, the Administrator shall consult with other Federal officials including, but not limited to, the Secretary of Transportation, the Administrator of the Federal Energy Administration, and the Chairman of the Council on Environmental Quality.

"(B) No parking surcharge regulation may be required by the Administrator under paragraph (1) of this subsection as a part of an applicable implementation plan. All parking surcharge regulations previously required by the Administrator shall be void upon the date of enactment of this subsection. This subparagraph shall not prevent the Administrator from approving parking surcharges if they are adopted and submitted by a State as part of an applicable implementation plan. The Administrator may not condition approval of any applicable implementation plan submitted by a State on such plan's including a parking surcharge regulation.

"(C) The Administrator is authorized to suspend until January 1, 1975, the effective date of applicability of any regulations for the management of parking supply or any requirement that such regulations be a part of an applicable implementation plan approved or promulgated under this section. The exercise of the authority under this subparagraph shall not prevent the Administrator from approving such regulations if they are adopted and submitted by a State as part of an applicable implementation plan. If the Administrator exercises the authority under this subparagraph, regulations requiring a review or analysis of the impact of proposed parking facilities before construction which take effect on or after January 1, 1975, shall not apply to parking facilities on which construction has been initiated before January 1, 1975.

"(D) For purposes of this paragraph, the term 'parking surcharge regulation' means a regulation imposing or requiring the imposition of any tax, surcharge, fee, or other charge on parking spaces, or any other area used for the temporary storage of motor vehicles. The term 'management of parking supply' shall include any requirement providing that any new facility containing a given number of parking spaces shall receive a permit or other prior approval, issuance of which is to be conditioned on air quality considerations. The term 'preferential bus/carpool lane' shall include any requirement for the setting aside of one or more lanes of a street or highway on a permanent or temporary basis for the exclusive use of buses and/or carpools."

Sec. 203. Motor Vehicle Emissions.

(a) Section 202(b)(1)(A) of the Clean Air Act is amended by striking out "1975" and inserting in lieu thereof "1977"; and by inserting after "(A)" the following: "The regulations under subsection (a) applicable to emissions of carbon monoxide and hydrocarbons from light-duty vehicles and engines manufactured during model years 1975 and 1976 shall contain standards which are identical to the interim standards which were prescribed (as of December 1, 1973) under paragraph (5)(A) of this subsection for light-duty vehicles and engines manufactured during model years 1975."

(b) Section 202(b)(1)(B) of such Act is amended by striking out "1976" and inserting in lieu thereof "1978"; and by inserting after "(B)" the following: "The regulations under subsection (a) applicable to emissions of oxides of nitrogen from light-duty vehicles and engines manufactured during model years 1975 and 1976 shall contain standards which are identical to the standards which were prescribed (as of December 1, 1973) under subsection (a) for light-duty vehicles and engines manufactured during model year 1975. The regulations under subsection (a) applicable to emissions of oxides of nitrogen from light-duty vehicles and engines manufactured during model year 1977 shall contain standards which provide that emissions of such vehicles and engines may not exceed 2.0 grams per vehicle mile."

(c) Section 202(b)(5)(A) of such Act is amended to read as follows:

"(5)(A) At any time after January 1, 1975, any manufacturer may file with the Administrator an application requesting the suspension for one year only of the effective date of any emission standard required by paragraph (1)(A) with respect to such manufacturer for light-duty vehicles and engines manufactured in model year 1977. The Administrator shall make his determination with respect to any such application within 60 days. If he determines, in accordance with the provisions of this subsection, that such suspension should be granted, he shall simultaneously with such determination prescribe by regulation interim emission standards which shall apply (in lieu of the standards required to be prescribed by paragraph (1)(A) of this subsection) to emissions of carbon monoxide or hydrocarbons (or both) from such vehicles and engines manufactured during model year 1977."

(d) Section 202(b)(5)(B) of the Clean Air Act is repealed and the following subparagraphs redesignated accordingly.

Sec. 204. Conforming Amendments.

(a)(1) Section 113(a)(3) of the Clean Air Act is amended by striking out "or" before "112(c)", by inserting a comma in lieu thereof, and by inserting after "hazardous emissions)" the following: ", or 119(f) (relating to priorities and certain other requirements)".

(2) Section 113(b)(3) of such Act is amended by striking out "or 112(c)" and inserting in lieu thereof ", 112(c), or 119(f)".

(3) Section 113(c)(1)(C) of such Act is amended by striking out "or section 112(c)" and inserting in lieu thereof ", section 112(c), or section 119(f)".

(4) Section 114(a) of such Act is amended by inserting "119 or" before "303".

(b) Section 116 of the Clean Air Act is amended by inserting "119(b), (c) and (e)," before "209".

Sec. 205. Protection of Public Health and Environment.

(a) Any allocation program provided for in title I of this Act or in the Emergency Petroleum Allocation Act of 1973, to the maximum extent practicable, include measures to assure that available low sulfur fuel will be distributed on a priority basis to those areas of the country designated by the Administrator of the Environmental Protection Agency as requiring low sulfur fuel to avoid or minimize adverse impact on public health.

(b) In order to determine the health effects of emissions of sulfur oxides to the air resulting from conversions to burning coal pursuant to section 106, the Department of Health, Education, and Welfare shall, through the National Institute of Environmental Health Sciences and in cooperation with the Environmental Protection Agency, conduct a study of chronic effects among exposed populations. The sum of $3,500,000 is authorized to be appropriated for such a study. In order to assure that long-term studies can be conducted without interruption, such sums as are appropriated shall be available until expended.

(c) No action taken under this Act shall, for a period of 1 year after initiation of such action, be deemed a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (83 Stat. 856). However, before any action under this Act that has a significant impact on the environment is taken, if practicable, or in any event within 60 days after such action is taken, an environmental evaluation with analysis equivalent to that required under section 102(2)(C) of the National Environmental Policy Act, to the greatest extent practicable within this time constraint, shall be prepared and circulated to appropriate Federal, State, and local government agencies and to the public for a 30-day comment period after which a public hearing shall be held upon request to review outstanding environmental issues. Such an evaluation shall not be required where the action in question has been preceded by compliance with the National Environmental Policy Act by the appropriate Federal agency. Any action taken under this Act which will be in effect for more than a one year period (other than action taken pursuant to subsection (d) of this section) or any action to extend an action taken under this Act to a total period of more than 1 year shall be subject to the full provisions of the National Environmental Policy Act notwithstanding any other provision of this Act.

(d) Notwithstanding subsection (c) of this section, in order to expedite the prompt construction of facilities for the importation of hydroelectric energy thereby helping to reduce the shortage of petroleum products in the United States, the Federal Power Commission is hereby authorized and directed to issue a Presidential permit pursuant to Executive Order 10485 of September 3, 1953, for the construction, operation, maintenance, and connection of facilities for the transmission of electric energy at the borders of the United States without preparing an environmental impact statement pursuant to section 102 of the National Environmental Policy Act of 1969 (83 Stat. 856) for facilities for the transmission of electric energy between Canada and the United States in the vicinity of Fort Covington, New York.

Sec. 206. Energy Conservation Study.

(a) The Administrator of the Federal Energy Administration shall conduct a study on potential methods of energy conservation and, not later than 6 months after the date of enactment of this Act, shall submit to Congress a report on the results of such study. The study shall include, but not be limited to, the following:

(1) the energy conservation potential of restricting exports of fuels or energy-intensive products or goods, including an analysis of balance of payments and foreign relations implications of any such restrictions;

(2) federally sponsored incentives for the use of public transit, including the need for authority to require additional production of buses or other means of public transit and Federal subsidies for the duration of the energy emergency for reduced fares and additional expenses incurred because of increased service;

(3) alternative requirements, incentives, or disincentives for increasing industrial recycling and resource recovery in order to reduce energy demand, including the economic costs and fuel consumption trade-off which may be associated with such recycling and resource recovery in lieu of transportation and use of virgin materials;

(4) the costs and benefits of electrifying rail lines in the United States with a high density of traffic; including (A) the capital costs of such electrification, the oil fuel economies derived from such electrification, the ability of existing power facilities to supply the additional power load, and the amount of coal or other fossil fuels required to generate the power required for railroad electrification, and (B) the advantages to the environment of electrification of railroads in terms of reduced fuel consumption and air pollution and disadvantages to the environment from increased use of fossil fuel such as coal; and

(5) means for incentives or disincentives to increase efficiency of industrial use of energy.

(b) Within 90 days of the date of enactment of this Act, the Secretary of Transportation, after consultation with the Federal Energy Administrator, shall submit to the Congress for appropriate action an "Emergency Mass Transportation Assistance Plan" for the purpose of conserving energy by expanding and improving public mass transportation systems and encouraging increased ridership as alternatives to automobile travel.

(c) Such plan shall include, but shall not be limited to—

(1) recommendations for emergency temporary grants to assist States and local public bodies and agencies thereof in the payment of operating expenses incurred in con-

nection with the provision of expanded mass transportation service in urban areas;

(2) recommendations for additional emergency assistance for the purchase of buses and rolling stock for fixed rail, including the feasibility of accelerating the timetable for such assistance under section 142(a)(2) of title 23, United States Code (the "Federal Aid Highway Act of 1973"), for the purpose of providing additional capacity for and encouraging increased use of public mass transportation systems;

(3) recommendations for a program of demonstration projects to determine the feasibility of fare-free and low-fare urban mass transportation systems, including reduced rates for elderly and handicapped persons during nonpeak hours of transportation;

(4) recommendations for additional emergency assistance for the construction of fringe and transportation corridor parking facilities to serve bus and other mass transportation passengers;

(5) recommendations on the feasibility of providing tax incentives for persons who use public mass transportation systems.

(d) In consultation with the Federal Energy Administrator, the Secretary of Transportation shall make an investigation and study for the purpose of conserving energy and assuring that the essential fuel needs of the United States will be met by developing a high-speed ground transportation system between the cities of Tijuana in the State of Baja California, Mexico, and Vancouver in the Province of British Columbia, Canada, by way of the cities of Seattle in the State of Washington, Portland in the State of Oregon, and Sacramento, San Francisco, Fresno, Los Angeles and San Diego in the State of California. In carrying out such investigation and study the Secretary shall consider, but shall not be limited to—

(1) the efficiency of energy utilization and impact on energy resources of such a system, including the future impact of existing transportation systems on energy resources if such a system is not established;

(2) coordination with other studies undertaken on the State and local level; and

(3) such other matters as he deems appropriate.

The Secretary of Transportation shall report the results of the study and investigation pursuant to this Act, together with his recommendations, to the Congress and the President no later than December 31, 1974.

SEC. 207. REPORTS.

The Administrator of the Environmental Protection Agency shall report to Congress not later than January 31, 1975, on the implementation of sections 201 through 205 of this title.

SEC. 203. FUEL ECONOMY STUDY.

Title II of the Clean Air Act is amended by redesignating section 213 as section 214 and by adding the following new section:

"FUEL ECONOMY IMPROVEMENT FROM NEW MOTOR VEHICLES

"SEC. 213. (a)(1) The Administrator and the Secretary of Transportation shall conduct a joint study, and shall report to the Committee on Interstate and Foreign Commerce of the United States House of Representatives and the Committees on Public Works and Commerce of the United States Senate within 120 days following the date of enactment of this section, concerning the practicability of establishing a fuel economy improvement standard of 20 percent for new motor vehicles manufactured during and after model year 1980. Such study and report shall include, but not be limited to, the technological problems of meeting any such standard, including the leadtime involved; the test procedures required to determine compliance; the economic costs associated with such standard, including any beneficial economic impact; the various means of enforcing such standard; the effect on consumption of natural resources, including energy consumed; and the impact of applicable safety and emission standards. In the course of performing such study, the Administrator and the Secretary of Transportation shall utilize the research previously performed in the Department of Transportation, and the Administrator and the Secretary shall consult with the Administrator of the Federal Energy Administration, the Chairman of the Council on Environmental Quality, and the Secretary of the Treasury. The Office of Management and Budget may review such report before its submission to Congress but the Office may not revise the report or delay its submission beyond the date prescribed for its submission, and may submit to Congress its comments respecting such report. In connection with such study, the Administrator may utilize the authority provided in section 307(a) of this Act to obtain necessary information.

"(2) For the purpose of this section, the term 'fuel economy improvement standard' means a requirement of a percentage increase in the number of miles of transportation provided by a manufacturer's entire annual production of new motor vehicles per unit of fuel consumed, as determined for each manufacturer in accordance with test procedures established by the Administrator pursuant to this Act. Such term shall not include any requirement for any design standard or any other requirement specifying or otherwise limiting the manufacturer's discretion in deciding how to comply with the fuel economy improvement standard by any lawful means."

TITLE III—STUDIES AND REPORTS

SEC. 301. AGENCY STUDIES

The following studies shall be conducted, with reports on their results submitted to the Congress:

(1) Within 30 days after the date of enactment of this Act:

(A) The Administrator of the Federal Energy Emergency Administration shall conduct a review of all rulings and regulations issued pursuant to the Economic Stabilization Act to determine if such rulings and regulations are contributing to the shortage of fuels and of materials associated with the production of energy supplies.

(B) All Federal departments and agencies, including the Federal regulatory agencies, are directed to undertake a survey of all activities over which they have special expertise or jurisdiction and identify and recommend to the Congress and to the President specific proposals to significantly increase energy supply or to reduce energy demand through conservation programs.

(C) The Secretary of the Treasury and the Director of the Cost of Living Council shall recommend to the Congress specific incentives to increase energy supply, reduce demand, to encourage private industry and individual persons to subscribe to the goals of this Act. This study shall also include an analysis of the price-elasticity of demand for gasoline.

(D) The Administrator shall report to the Congress concerning the present and prospective impact of energy shortages upon employment. Such report shall contain an assessment of the adequacy of existing programs in meeting the needs of adversely affected workers, together with legislative recommendations appropriate to meet such needs, including revisions in the unemployment insurance laws.

The SPEAKER. Is a second demanded?

TELLER VOTE

Mr. HOSMER. Mr. Speaker, under rule XXVIII, clause 2, I demand a second by a majority by tellers.

The SPEAKER. The gentleman from California, (Mr. HOSMER) demands a second, and the Chair appoints as tellers the gentleman from West Virginia (Mr. STAGGERS) and the gentleman from California (Mr. HOSMER).

PARLIAMENTARY INQUIRY

Mr. BAUMAN. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. BAUMAN. Mr. Speaker, my parliamentary inquiry is this: If this second fails, then this resolution cannot be considered; is that correct?

The SPEAKER. The Chair will state that the gentleman is correct.

Will the gentleman from West Virginia and the gentleman from California please take their places as tellers.

PARLIAMENTARY INQUIRY

Mr. LONG of Maryland. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. LONG of Maryland. Mr. Speaker, could we have an explanation of just what we are voting on?

The SPEAKER. The Chair will state that this is a second that has been demanded, and tellers have been demanded on the second.

The Chair will further state that it takes a majority vote to consider the motion.

Mr. LONG of Maryland. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. LONG of Maryland. Mr. Speaker, my parliamentary inquiry is this: Do we know what the motion is?

The SPEAKER. The Chair will state that the gentleman from West Virginia has moved to suspend the rules, the motion is to suspend the rules.

PARLIAMENTARY INQUIRY

Mr. WHITTEN. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. WHITTEN. Mr. Speaker, is it in order to ask that the resolution be re-reported so that it can be understood?

The SPEAKER. The Chair will state that that can only be done by unanimous consent.

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the motion be re-reported.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

Mr. STEIGER of Wisconsin. Mr. Speaker, I reserve the right to object.

The SPEAKER. The gentleman from Mississippi has asked that the resolution be reread.

Mr. BAUMAN. Mr. Speaker, reserving the right to object, if any intervening motion or unanimous-consent agreement occurs such as the gentleman from Mississippi has suggested, do we then lose the right to vote on the second that has been demanded by the gentleman from California?

The SPEAKER. The vote by tellers will come on the second as soon as the request is granted.

Is there objection to the request of the gentleman from Mississippi?

Mr. STEIGER of Wisconsin. Mr.

Speaker, reserving the right to object, under my reservation would it be possible to inquire whether or not a record vote could be demanded on the demand for a second?

The SPEAKER. The rule provides for tellers, under the provisions of clause 5, rule I.

Mr. STEIGER of Wisconsin. Mr. Speaker, further reserving the right to object, is a recorded teller vote in order under that procedure?

The SPEAKER. The answer to the gentleman is that under the rules this would not be in order.

Is there objection to the request of the gentleman from Mississippi?

PARLIAMENTARY INQUIRY

Mr. RHODES. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. RHODES. What would be the effect, Mr. Speaker, if the motion of the gentleman from West Virginia were not agreed to?

The SPEAKER. Then the motion could not be considered.

Is there objection to the request of the gentleman from Mississippi?

Mr. BAUMAN. Mr. Speaker, reserving the right to object further, the Chair has just ruled that no electronic vote can be taken on a demand for a second, but if a quorum fails to vote by tellers, cannot then a yea and nay vote be demanded?

The SPEAKER. If a quorum fails to vote by tellers, an objection can be made to the result of the vote, and when the objection is made or a point of order is made, an automatic rollcall can be had based upon the absence of a quorum.

Is there objection to the request of the gentleman from Mississippi?

Mr. ST GERMAIN. Further reserving the right to object, Mr. Speaker, we have been given the number of a bill, and we do not know what this is all about. Before we start to vote, I think it is certainly in order to get some slight explanation of what we are being asked to vote on.

The SPEAKER. The gentleman knows that if a second is ordered, there will be 40 minutes of debate on the motion of the gentleman from West Virginia.

Mr. ST GERMAIN. Mr. Speaker, the question is, Should we not know or have a slight inkling of what we are being asked to suspend the rules for and consider? I realize we have 40 minutes, but we do not have the slightest idea of what is going on here. There are rumors, and that is all.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

A second has been demanded.

PARLIAMENTARY INQUIRY

Mr. WHITTEN. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. WHITTEN. May I respectfully ask that the Speaker advise us as to what we are voting on, if that is in order?

The SPEAKER. We are voting on the second on the motion to suspend the rules.

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the motion be reread. There was no objection that I heard.

The SPEAKER. There was objection. Regular order has been demanded, and the regular order does require the Chair to proceed with the business.

Mr. WHITTEN. Mr. Speaker, I renew my request by unanimous consent that the motion be reread.

Mr. GIAIMO. Mr. Speaker, I make a point of order that the House is not in order and we cannot hear anything.

The SPEAKER. The regular order is that those in favor of the second will pass between the tellers.

Mr. WHITTEN. Mr. Speaker, I object on the ground that the motion was not read so the Members could hear it.

Mr. WAGGONNER. Mr. Speaker, a point of order.

The SPEAKER. The gentleman will state it.

Mr. WAGGONNER. Mr. Speaker, there is not a Member of this Chamber who knows what is being voted on. None of the Speaker's last statements were heard by the Members of the House, and the House is entitled to know what the vote is being cast upon and what the issue is.

Mr. WHITTEN. Mr. Speaker, I further state that the motion was not read.

The SPEAKER. The motion was read.

The Chair will state again to the gentleman that a second was demanded, and tellers were demanded.

Those in favor of a second on the motion will pass between the tellers.

Mr. WAGGONNER. Mr. Speaker, what is the motion?

The SPEAKER. The motion is to suspend the rules and agree to House Resolution 759.

Mr. WAGGONNER. Then, Mr. Speaker, what is that resolution?

The SPEAKER. The resolution has been reported.

Mr. WAGGONNER. Mr. Speaker, the House does not understand the resolution as reported and I ask unanimous consent that it be reported again.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. BAUMAN. Mr. Speaker, I object. A vote is in process.

The SPEAKER. Objection is heard.

Mr. WAGGONNER. Mr. Speaker, I ask unanimous consent that the resolution be re-reported.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. ROBINSON of Virginia. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

On this vote all those in favor of ordering the second will continue to pass through the tellers.

The committee divided, and the tellers reported that there were—ayes 109, noes 20.

Mr. HOSMER. Mr. Speaker, under the provisions of rule XXVII, clause 2, I demand the regular order that the Chamber be closed and that the roll be called.

The SPEAKER. Does the gentleman object to the vote on the ground that a quorum is not present?

Mr. HOSMER. Mr. Speaker, I object to the vote on the ground that a quorum is not present.

The SPEAKER. The Chair will count. The Chair will count all Members. (After counting) 182 Members are present, not a quorum. A rollcall is automatic. So many as are in favor of ordering the second will vote "aye"; those opposed, "no."

Members will record their vote by electronic device.

POINT OF ORDER

Mr. WAGGONNER. Mr. Speaker, a point of order.

The SPEAKER. The gentleman will state his point of order.

Mr. WAGGONNER. Mr. Speaker, what are we voting on?

The SPEAKER. On seconding the motion of the gentleman from West Virginia to suspend the rules.

Mr. WAGGONNER. To suspend what rules?

The SPEAKER. To suspend under rule XXVII, all the rules inconsistent with immediate agreement to House Resolution 759.

Mr. WAGGONNER. Mr. Speaker, for the edification of the House, what does rule XXVII say?

Mr. PASSMAN. Regular order.

The SPEAKER. "When a motion to suspend the rules has been seconded, it shall be in order, before the final vote is taken thereon, to debate the proposition to be voted upon for 40 minutes, one-half of such time to be given to debate in favor of, and one-half to debate in opposition to, such proposition; and the same right of debate shall be allowed whenever the previous question has been ordered on any proposition on which there has been no debate."

PARLIAMENTARY INQUIRY

Mr. WAGGONNER. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The Chair is being as tolerant as he can be. The Chair is not obligated to recognize Members except for a point of order.

The Chair will recognize the gentleman for a parliamentary inquiry.

Mr. WAGGONNER. Mr. Speaker, if the rules are suspended, will then amendments be in order to the bill on which it is proposed to suspend the rules and consider?

The SPEAKER. The suspension of the rules, as the gentleman knows, means that all rules are suspended. The resolution itself orders the action which the House will take.

PARLIAMENTARY INQUIRY

Mr. RHODES. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. RHODES. Mr. Speaker, my inquiry is this: If the proposal which has come before the House is voted down, does this mean that the request of the gentleman from West Virginia to suspend the rules will have failed?

The SPEAKER. The gentleman is correct.

PARLIAMENTARY INQUIRY

Mr. HOSMER. Mr. Speaker, a further parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. HOSMER. Mr. Speaker, in that event, would it be in order for the gentleman who has requested a suspension of the rules at this point to re-request a suspension of the rules in another form?

The SPEAKER. The gentleman is correct, in the discretion of the Chair.

PARLIAMENTARY INQUIRY

Mr. RANGEL. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. RANGEL. Mr. Speaker, on the legislation that comes before the House, will a two-thirds vote be necessary before it is passed?

The SPEAKER. If a second is ordered by a majority of the Members voting, a two-thirds vote will be required to suspend the rules and agree to the resolution.

The vote was taken by electronic device, and there were—yeas 148, nays 113, answered "present" 1, not voting 170, as follows:

So a second was ordered.

The result of the vote was announced as above recorded.

The SPEAKER. The gentleman from West Virginia (Mr. STAGGERS) is recognized for 20 minutes, and the gentleman from California (Mr. HOSMER) is recognized for 20 minutes.

PARLIAMENTARY INQUIRY

Mr. BROWN of Ohio. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. BROWN of Ohio. Mr. Speaker, if the subject now before us passes the House will it then require a conference with the Senate or a return of the subject matter to the Senate for a vote in the Senate?

The SPEAKER. The bill would be messaged, of course, to the Senate, but it would be up to the Senate to decide what they want to do.

Mr. BROWN of Ohio. Would it require a conference, Mr. Speaker?

The SPEAKER. The Chair cannot anticipate what the Senate might do.

Mr. BROWN of Ohio. It would require in any event, Mr. Speaker, further Senate action?

The SPEAKER. It would, before it was finally enacted, yes.

Mr. WHITTEN. Mr. Speaker, I renew my unanimous consent request that the resolution be reread.

The SPEAKER. The Chair really wants to accommodate the distinguished gentleman from Mississippi, and he hopes the House will be in order.

The Clerk will reread the resolution, if there is no objection.

There was no objection.

The Clerk re-reported the resolution.

PARLIAMENTARY INQUIRY

Mr. DERWINSKI. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. DERWINSKI. Mr. Speaker, my parliamentary inquiry is, Do I understand that the bill before us must be approved by a two-thirds vote?

The SPEAKER. The resolution must be approved by a two-thirds vote.

Mr. DERWINSKI. And it is not subject after the 40 minutes of debate to any amendment.

The SPEAKER. The gentleman is correct.

Mr. YOUNG of Illinois. Mr. Speaker, is there a copy of the bill available for us to read?

The SPEAKER. The gentleman from West Virginia I am sure has copies available.

Mr. YOUNG of Illinois. I thank the Chair.

The SPEAKER. The Chair recognizes the gentleman from West Virginia for 20 minutes.

Mr. STAGGERS. Mr. Speaker, I am in a rather difficult position tonight and I realize this, the mood of the House being what it is. But I would like for the Members to listen, if they will, for a few minutes to what the conferees and the committee has been through in the last month.

We have tried as diligently as any committee I know of in this House to try to respond to the wishes of this administration and the people of America. We have worked hard into the night many nights in our committee and the Members know we have worked hard on this, trying to get something worked out. We went into a conference with the Senate and spent 3 days, and on two of those we worked into the night late, one of the nights until about 11 o'clock.

Counsel on both sides started marking up the bill. The Senators said there was some mistake in what had been said and they did not like it and they thought we ought to go back into session again. I agreed to call all the conferees back into session, and the gentleman who offered the amendment was the gentleman from Maine, and he said what we had was identical to the amendment he proposed, and we did work out a little compromise with this on the Senate and I thought it was completely satisfactory.

The Senate took a different bill today, a wild rivers bill, I believe it is called, and sent it back over here with the conference substitute substantially amended.

A number of changes were made that I thought were very unacceptable that we had agreed to in the conference, and this after all the time we had spent on it.

The bill I have brought before the House is essentially the conference report that was adopted by the House and Senate conferees, and there are copies of it on the minority table and here on the desk, and there are plenty of copies of the conference report available in the rear of the Chamber.

We have made a number of changes in the hope of getting a bill acceptable to the Senate. There was an exception in the Senate to the words "Renegotiation Board" on referring these windfall profits to a Renegotiation Board, and all we did is to change that so it goes to the Attorney General of the United States.

We knocked out all of the complex formula in determining windfall profits, and said instead of that we would define windfall profits to be profits which are excessive or unreasonable taking into consideration normal profits. That is the change. And these profits only pertain to profits that will be attained next year.

I would like to go a little further into this.

First, we have section 103 which has been amended to eliminate provisions which freed the Administrator of the Federal Energy Emergency Administration from various OMB controls. We thought we were freeing him from those controls, but it seems others wanted to put him back, and we have said all right, we will put him back.

Then another change is in section 105 relating to energy conservation regulations, which has been changed to limit the duration of any regulation under this to April 1, 1974. This is not a long time, I point out to the Members. I will say that certainly we will know by April 1974, what is being done. The Senate agreed.

On section 124, which proposed to give administration authority for energy reserves, it has been amended to give this authority instead to the Department of Justice and Department of the Interior.

I think these are the main changes that have been made in what was proposed by the conferees and was brought out and agreed to by the conferees of the House and Senate. I believe this is a reasonable compromise. I think it is something necessary to this Nation now if we are to act as responsible Representatives of the people to give the administration authority to do the things they need to do in this emergency.

Mr. Speaker, I notice a lot of emotions running here tonight. I think there are questions we can try to answer and will answer them in any and every way we can, because we have nothing to hide.

Someone said, "What have you got back of this? There is nothing back of this except the truth so far as I know it.

Mr. Speaker, I would like to call upon the gentleman from New York (Mr. HASTINGS) a member of the conference, for any statement he may have.

Mr. HASTINGS. Mr. Speaker, I would like to address a word to the chairman as to whether there were any changes in the conference report as it related to title III, which is the amendment to the Clean Air Act for stationary emissions and automobile emissions.

Mr. STAGGERS. None whatsoever.

Mr. HASTINGS. As it relates to automobile emissions, the 1975 standards will be held in place for 1976, with the exception of postponement of the additional 1 year by the administrator, which are then permanent and not subject to the 4 months provisions under title I?

Mr. STAGGERS. This is true.

Mr. Speaker, I would like to say to the House that the gentleman was a conferee not only on the committee but on the Clean Air Act. I have enough confidence in those who served on that committee to say that I accept them and the report. We explained all of it, and they were good issues.

I want to congratulate him and all the rest of the members of the committee who took part in the separate conference, because they came back with a good report.

Mr. ROGERS. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. Mr. Speaker, I yield to the gentleman from Florida.

Mr. ROGERS. Mr. Speaker, I am not going to take long, because there is not much time.

As the gentleman from New York has stated, what was done for the Clean Air Act, as amended here in the conference, is as set forth in title II. The conference report is here and is available for the Members.

The chairman has just explained the few differences that this bill has brought up out of this conference report, so it is very clearly set forth for the Members.

Also, a point I think everyone should know is that in the conservation plans for energy which the President wants, asks authority for, this bill that we are bringing to the Members, that the chairman is bringing to the Members, permits authority only until April 1, 1974; only until April, and all of those are subject to review and veto by this House.

So the prerogatives of the House are protected. I think all of us should face up to the responsibility we have. The President has asked for this authority; the people of this Nation expect this Congress to do something before it goes home. This is a hard worked-on bill. I think it is reasonable, and the few differences have just been outlined for the Members by the chairman of the committee.

Mr. Speaker, I thank the gentleman for yielding.

Mr. HOSMER. Mr. Speaker, I yield myself 3 minutes.

Mr. Speaker, in this proceeding this evening I am somewhat in the category of an innocent bystander. The Senate sent us a bill, S. 921, on the subject of scenic rivers. When it was referred to the Committee on Interior and Insular Affairs, we tacked on a House amendment which improved it considerably, and it was agreed to in the House.

We then passed the amended bill back over to the Senate, still as the scenic rivers bill. Late tonight, when this emergency energy bill appeared to be in gross trouble, some compromise was made, or at least in the other body they decided that they could take a stripped-down version of the emergency energy bill, instead of that thing we voted on night after night here and did not know what was in it by the time we got through.

They put a few essential things in the Senate rider that are needed during the period while we are away on recess. They put them in S. 921 as a nongermane amendment and sent it back over here tonight to us.

Now, as I understand it, the request has been made by the gentleman from West Virginia to take up that bill and pass it with a further amendment, which would add the text of something called H.R. 12128 onto everything else in the bill.

As I understand, H.R. 12128—and I will yield to the gentleman from West Virginia if I am wrong—is creation that was introduced within the last hour or two, and nobody knows really what it is. We do not have any copies of it around. As a consequence, we are kind of in a bind as to what it is.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. HOSMER. Mr. Speaker, I yield to the distinguished minority leader.

Mr. RHODES. Mr. Speaker, as I understand the bill introduced by the gentleman from West Virginia, it is a substitute for the Senate bill. If the act of the gentleman from West Virginia which the gentleman has given were actually agreed to by the House, it would have the effect of nullifying the Senate bill and substituting therefor.

Mr. HOSMER. Mr. Speaker, I am grateful for the correction.

Mr. Speaker, in any event, this H.R. 12128, which would be substituted, is according to information I have received from the White House, highly objectionable to the President on the grounds it will introduce language on the energy issue and, particularly, relative to the windfall profits, which is loose, ambiguous, ineffective, and would impede the Nation's energy effort by curtailing energy and discouraging investment in energy areas; further, that proper legislation will be sought in this windfall area immediately on the return of Congress, and that the windfall subject will then be dealt with carefully with language drawn not to retain these various disadvantages, but actually to accomplish the purposes and objectives desired.

Mr. STAGGERS. Mr. Speaker, will the gentleman yield?

Mr. HOSMER. I yield to the gentleman from West Virginia.

Mr. STAGGERS. Mr. Speaker, I would like to just briefly say to the House that the Senate considers the House of Representatives its doormat, and I for one am tired of their saying, "You take this or else." I believe that as Members of the House of Representatives we are a responsible body.

Mr. HOSMER. Mr. Speaker, I feel I should decline to yield to the gentleman further. He is dealing with his views of the other body which are comparable to my own, but I think we are up against a specific situation here where we find ourselves somewhat in diasgreement.

I had to use dilatory tactics in order to get time for some understanding of what is going on. We finally have received some understanding of what is going on. We also have an understanding, based on the last vote, that the gentleman does not have two-thirds support.

Mr. Speaker, there is an answer. If this is voted down, the gentleman can simply in the next moment request that the Senate bill be brought up with everything but the amendment that he wants in it and passed by two-thirds vote under suspension of the rules. Then we can get out of here.

Mr. STAGGERS. Mr. Speaker, will the gentleman yield on that point?

Mr. HOSMER. I will yield to the gentleman.

Mr. STAGGERS. Mr. Speaker, I would just like to say this to the gentleman: That I think every Member in this conference tried to do what they thought the House of Representatives wanted and what the Members of the House of Representatives would have us do.

The Senate put this onto another bill which is not germane to this issue, they sent it over here to us, and they expected us to take it.

Mr. HOSMER. Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina (Mr. BROYHILL).

Mr. BROYHILL of North Carolina. Mr. Speaker, I know that the parliamentary situation is quite confused here tonight. I know that there were doubts about the amendments that passed in the House last week. I know there were considerable doubts as to what was in the bill that actually passed in this House last week.

The conference committee, as the chairman of the committee has said, has worked hard, and all day long Members have been asking me, "What is in the conference report?"

The Members do not even know what is in that conference report. They do not know what is in this bill that the chairman of the committee brings to us tonight. But we do know that the other body had one of its extended discussions, and there were such strong objections to the conference report that finally a compromise was worked out. A compromise was worked out and was passed by the other body by a vote of 52 to 8. It was sent over here.

Mr. Speaker, the chairman of the committee said that he is in a difficult position. Well, so am I.

Petroleum and fuel shortages are real, and we need to take some action here. I know the Members are hearing from people back home, and they are asking us to take some leadership here.

However, I am confused. I do not know exactly what is in this bill that is brought to us here by the chairman of the committee. He asks us to pass it.

I do know, from what I understand, that the so-called windfall profits section is back in here, and that section was deleted by the other body. Of course, I think all of us remember that I did make an effort to delete that in the House bill. I felt then, and I still feel, that these sections are unworkable. They are ill-defined and impossible to administer.

I also recognize that legislation in this area is badly needed. On Wednesday, of course, President Nixon announced that he will be recommending to the Congress new legislation to control excessive profits. I applaud this initiative. It is going to be up to the Congress of the United States to begin to work as soon as possible, and expeditiously, to pass new legislation like this.

Now, what position are we in? We can pass this bill that the chairman of the committee offers to us. We have not had a chance to see it.

However, we do know this: That the other body, for whatever reason, refused to accept the conference report. We do need some legislation now.

This puts me in a very difficult position. But I think that legislation is the art of compromise. I do not like to be held up. I do not like the procedure, but I do not want to be cold this winter either.

If we do pass the bill that was sent to us by the other body tonight, it could be signed by the President and we could begin immediately to implement the programs that are in that bill, the bill sent to us by the other body. We do not know what might happen, we do not know how long it could be held up, and possibly we might even be debating this issue again in January in freezing weather if we just send the chairman's bill back to the Senate. Let us have a vote on the Senate passed bill so we can get some fast action and no further delay.

Mr. STAGGERS. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL of North Carolina. I will be glad to yield to the gentleman from West Virginia.

Mr. STAGGERS. Mr. Speaker, the gentleman from North Carolina has made a statement that I think is fairly reasonable. There is only one thing I would not agree with. The gentleman took part in all of the debate and all of the conference, and the gentleman signed the conference when it came out. I though the gentleman was fairly well in agreement with what was in the bill when he signed the statement of managers.

Mr. BROYHILL of North Carolina. I also recognize, Mr. Speaker, that we are at an impasse; unless we take some action tonight we are not going to have any legislation.

Mr. STAGGERS. I am not sure that the gentleman from North Carolina does know what is in the Senate bill. We are trying to tell the Members what is in our bill.

Mr. FLOWERS. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL of North Carolina. I yield to the gentleman from Alabama.

Mr. FLOWERS. Mr. Speaker, I thank the gentleman for yielding, and I wonder if the gentleman from North Carolina could explain to the general membership of the House, some of us who are just poor clods, and who are especially those of us not on the Committee on Interstate and Foreign Commerce, could you tell us what would happen if we do not have an energy bill?

Mr. BROYHILL of North Carolina. What does the gentleman mean, if we do not have an energy bill?

Mr. FLOWERS. If we do not pass the bill tonight?

Mr. BROYHILL of North Carolina. There are certain authorities——

The SPEAKER. The time of the gentleman has expired.

Mr. HOSMER. Mr. Speaker, I yield 2 additional minutes to the gentleman from North Carolina.

Mr. BROYHILL of North Carolina. Mr. Speaker, the energy crisis is real. I know there are some who would think that it is contrived. The President has certain authorities. He has authority to ration. Rationing is in this bill.

Mr. FLOWERS. He already has that authority.

Mr. BROYHILL of North Carolina. Yes, under mandatory fuel allocations; but there are certain things that he does need in the area of energy conservation.

Mr. FLOWERS. Mr. Speaker, if the gentleman will excuse me, then the answer is he does have authority to ration now?

Mr. BROYHILL of North Carolina. That is correct. But no one wants rationing. There are certain authorities in this bill to reduce our demand, not to have to control the supplies. Why do we have to put the burden of rationing on the American people when through energy conservation we can avoid rationing?

Mr. FLOWERS. Mr. Speaker, I think, if the gentleman will give me one second to respond, everybody is for believing the shortages, reducing demand and increasing supplies, but I am not convinced that a bill that none of us seem to know anything about is the answer to it.

The SPEAKER. The time of the gentleman from North Carolina has again expired.

Mr. STAGGERS. Mr. Speaker, I wonder if the other side would care to use some more of their time?

Mr. HOSMER. Mr. Speaker, how much time do I have remaining?

The SPEAKER. The Chair will state that the gentleman has 9 minutes remaining.

Mr. HOSMER. How much time does the gentleman from West Virginia have remaining?

The SPEAKER. The Chair will state that the gentleman from West Virginia has 11 minutes remaining.

Mr. STAGGERS. Mr. Speaker, I yield such time as he may consume to the gentleman from Massachusetts (Mr. MACDONALD) who is chairman of the Subcommittee on Communications and Power.

Mr. MACDONALD. Mr. Speaker, I shall not take very long. I simply do not blame the gentleman from North Carolina for not understanding exactly what is in the bill to which he refers because every time we had a conference and came to a decision, and it seemed to be final, the gavel would bang, but it would not be 30 seconds before we would be back discussing the very same subject as we'd just put behind us.

I would like to point out how far backwards we bent to be fair to the administration, and to others whom were sent to testify. We took time out of our conference, and in a very unusual step, in my mind, in order to listen to Mr. Simon, who came in with a laundry list, as he described it, of about 20 things, all of which he already either had or which we gave him.

The net result of our giving in to him was that the Senate accepted that in lieu of going back to their description of what a windfall profit is. And I am going to leave that to the gentleman from Kansas (Mr. Roy) to discuss that, because the gentleman is an expert on that subject.

But I want everyone in the House to be very clear indeed that when this is voted upon and we send it back to the Senate, we are not sending back a bill to them for passage; we are showing them that we have worked longer and harder, and in my judgment—for what it is worth—have worked more intelligently and with more cohesion than the other body. And I urge us not to back down at this point and once again become the whipping boy for everything that goes wrong here in the U.S. Government.

Mr. HOSMER. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio (Mr. Brown).

Mr. BROWN of Ohio. Mr. Speaker, let me observe first for the gentleman from Alabama who inquired about the need for this legislation that I understand the bill that would be considered under the amendment the gentleman from West Virginia proposes or the one that came back from the Senate whichever bill we might be considering, would terminate the first of April, 1974. They both have the same termination date. To the question of whether or not there is authority for the President to go ahead and act, I think there is authority for the President to go ahead and act under the mandatory fuel allocation legislation in the case of rationing. There is authority for him to act under the Defense Production Act in terms of certain conservation procedures; and there is authority for him to act under the War Powers Act, although that is debated as to whether or not it is appropriate to this domestic crisis during peacetime.

I assume our failure to act would open the whole question up to endless lawsuits, but I would also submit that this legislation is going to open up the Government to endless lawsuits because, among other things, rationing under this legislation could be imposed only as a last resort if everything else has been tried.

The other things that could be tried are the energy conservation plans, but the energy conservation plans under the legislation we have before us can be imposed only if they are not arbitrary, capricious, inequitable, disproportionate or unreasonable and that legislative language should raise many questions, as should the prospect of congressional veto up until sometime in March. If that veto is going to come, how many industries are going to implement those energy consercation plans now? After the first of March we have the opportunity for 15 days to veto energy conservation plans before they can take effect. If we veto them, then we ought to come up with some kind of an alternative. If we do not veto them, we do not have much right to criticize.

Then after the first of July, 4 months before the election next year, we will have the opportunity to start imposing our own plans on the country. Is not that going to be lovely?

I would suggest, Mr. Speaker, that the administration can now go ahead and do some of those things. We have considered this 37 page bill under these circumstances for 40 minutes. I look at that bill, and there is a correction on every page but three of that bill. I am not sure I know at this point what we would be voting on.

I know that there were many of my colleagues who voted reluctantly for the Emergency Energy Act when it passed the House last week. They voted in the hope that the conference committee would clean up the bill and make it into a workable mechanism. Unfortunately the conference did what conferences sometimes do the last few days before adjournment—it was more anxious to complete its task by compromising than it was to fully consider the impact of all of its compromises. As a result, this bill purports to do things which it does not do.

Are you for or against rationing?

If you are for it, then this bill gives the authority to the President or his Administrator to impose rationing, but it provides that he must have exhausted all other remedies first. Thus, whenever imposed, any rationing would be open to endless lawsuits. But does it give the Congress the right to veto rationing? No, it does not.

Would the House rather have the administration impose energy conservation plans than rationing?

This bill purports to do that by conveying to the Administrator the authority to impose energy conservation plans immediately. But it reserves to Congress the right to veto those plans after the fact—as much as 2 months after the conservation plan is imposed. Is it likely that any plan which imposes any substantial hardship, then, will get the support or the substantial investment of anyone until he knows whether Congress is going to go along.

If the crisis is real and swift emergency action is needed, then Congress should be able to identify the areas where such action must be taken and assign that authority to some part of the executive branch for administration—or devise plans of action itself and promptly. But giving the authority with one hand while taking it away with the other does not seem to be the best way to administer a pressing problem. Unfortunately this legislation is replete with such dichotomies.

Would you rather have the Congress responsible for the plans for dealing with the energy crisis?

Well, Members of Congress are going to get that opportunity. As I noted, as soon as Congress returns for the second session, this legislation provides Members with the chance to vote approval or disapproval of all the actions the administration takes up until the 1st of March. Actually, that is a veto or a concurrence after the fact. Then, on March 1, the rules change and the administration can only announce plans that will go into effect within 15 days if Congress does not disapprove the proposals—a veto before the fact. And after July 1—4 months before the 1974 election—the administration can only propose plans, but the plans cannot take effect until Congress positively enacts them. Such a shifting responsibility is a plan for inaction.

If the administration wants to act promptly to ration or to impose energy conservation plans, it would be better advised to use its authority under the Mandatory Fuel Allocation Act of 1973 or the Defense Production Act of 1950. There would probably be some risk of lawsuits questioning executive branch authority under those laws as written for wartime situations, but perhaps no more risk than exists under this legislation.

If this bill equivocates on who has the authority for imposing energy conserving plans, then perhaps it makes it easier for citizens to get together to deal with the energy crisis voluntarily?

Combined voluntary action in the face of crisis has long tradition in our Nation going back to the first barn raisings and joint efforts to clear the land. But the energy business—both the production of energy and the distribution and consumption of it—is big business in America today. This bill says that industries which produce petroleum can combine to solve the energy crisis only at their own legal peril and those who consume energy should not be allowed to combine to save energy at all. The retail antitrust exemption, supported in the House, was removed on a straight party line vote in the conference. The language of the Rodino amendment on the petroleum industry was left in, of course, because it purports to give an exemption without really doing so. The result is that voluntary action to help resolve the energy crisis can be taken only at the risk of later antitrust prosecution or other lawsuits—in addition to a good case of the sniffles.

If the bill doesn't really make the reduction of energy consumption easier, perhaps it attempts to stimulate the supply of energy in some way.

No, this bill is brought to you by those same wonderful people who brought you the natural gas shortage even before other sources of energy were in short supply. So the conference gave the authority to the administration to set price ceilings on oil. Never mind the economic fact that prices held artificially low tend to stimulate consumption and reduce supply which is the prime cause of the shortage in the first place. This bill is designed to assure that, the consumer will not have to pay much for petroleum products—if he can find any of them. Such proposals seem like good politics, but they make very poor energy economics. Here again is an example of the bill purporting to do something to help with the energy crisis, but really hurting. It is another example of how the bill is designed for no action, rather than positive action.

The section of the bill which is designed to deal with windfall profits actually does not take effect until next year in the admitted hope that Congress will take the time to look at the complex question of oil economies. It says to producers of petroleum, "If you make more money than usual during the energy crisis, the Government is going to come back later and do something about it." The bill purports to encourage the oil industry to reinvest any unusual profits in exploration for new supplies but the language also admonishes any company with higher than usual profits that it must maintain cash in hand so that it can pay any claims lodged against it under this law. Such a section is hardly going to encourage a company to reinvest its profits in greater production.

So, if the bill doesn't really provide for swift and sure methods of reducing energy consumption; and if it doesn't really encourage the increase of energy supply, does it do anything about taking care of those people who will be out of jobs because there isn't enough fuel to go around?

Here is one bright spot in the bill. The conferees authorized $500 million for attention to the unemployment caused by people thrown out of work as a result of this legislation. But I would predict that there will not be a lawyer on those unemployment roles because even the unemployment section leaves vague the method of determining what "unemployment resulted from administration and enforcement of this act."

Similarly irresistable for attorneys will be the language in the legislation which deals with the priorities to be considered in establishing rationing or energy conservation plans. While the bill provides the same priorities as now exist in the mandatory fuel allocation act, the Congress then says such priorities cannot be "arbitrary and capricious or inequitable, unreasonable or disproportionate." A law which mandates the administration to observe priorities and then prohibits inequities will be easier to challenge in the courts than it will be to administer.

The bill does many things that will help meet the challenges of the energy crisis. Included in that list are such things as the authority to suspend until November 1, 1974, clean air standards for the use of coal in stationary energy sources and leave them relaxed until January 1, 1979, if compliance can be obtained by then even with the use of coal.

Similarly, temporary freezing of 1975 standards of vehicle emissions through 1976 is also helpful in conserving energy in light of the present technology. Carpooling is to be encouraged through use of fast lanes and other methods and Federal actions are mandated to be sure the Government is buying or using fuel-efficient automobiles.

The legislation also makes a limited provision for establishing a temporary Federal Emergency Energy Administration, which can be more carefully done in legislation already underway in other congressional committees.

Many other matters are also covered or attempted in this legislation, including treatment of regulated carriers and an attempt to provide for allocation of materials now in shortage which are vital to production and distribution of energy. The importation of liquid natural gas is made easier, as is the restriction of export of fuels. Most of these provisions are, or were meant to be, innocuous.

But, something which is usually innocuous in legislation, is anything but that in this bill: the study section. The Congress in this bill urges a study of so many facets of the energy problem that the administration may be able to do very little else. The bill calls for approximately 25 studies and reports due within every possible time frame from 30 days to 1 year—an average of a report or study of the energy problem every 2 weeks. With every major committee in Congress now having an energy subcommittee, one wonders if some energy might not be saved by reducing the number of studies and followup testimony which will be triggered by this bill.

The legislative response in this bill is ambivalent and tentative. If contemplation and reconsideration will solve the energy crisis, this bill should do it. But it is my conclusion that the time for such delay is past. The time for action is here. If Congress is not confident in the President's ability to take effective action, then Congress should legislate its own methods of dealing with the issues involved. But this bill does not do that.

It gives the administration only tentative authority and reaffirms congressional mistrust of the private sector. Such reservations could have merit if some other alternative in the present crisis is offered, but this legislation offers none. This bill is a plan for inaction, political second guessing and lawsuits. The administration would be better advised to ignore this legislative effort and start over with Congress next year after the holiday recess. In the meantime, it can use existing authority just as effectively as that presented here and will probably do better even asking voluntary cooperation from the public at large. The people already appear to have responded with more enthusiasm to the call for voluntary action on the energy crisis than this particular legislation indicates Congress is ready to do.

The SPEAKER. The time of the gentleman has expired.

Mr. STAGGERS. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. ROY).

Mr. ROY. Mr. Speaker, the conferees did not disagree. It is my understanding that 6 out of 7 House conferees signed the conference report, and I believe 13 out of 15 Members of the Senate signed the conference report. It so happened that when the conference report got to the Senate, it was suddenly discovered by a number of Senators that there was a windfall profit section in the bill, and they objected absolutely to the windfall profit section. This occurred even after the conferees had modified the windfall profit section to take care of many of the objections of the House Members, some 180 or so, who voted for a substitute section. They modified, old section 117 of the House bill, section 110 of the conference bill, to say that would not become effective until January 1, 1975. That section had three subsections. One specified that the President should specify profits to avoid windfall profits. The second provided a remedy, and the third defined windfall profits.

In addition, the conferees adopted a pricing section which simply stated the President shall specify profits to avoid windfall profits, and such profits are defined as excessive or unreasonable profits based on normal profits. This is a very reasonable section, but provides no remedy and is unenforcable.

The choice we have here tonight is to vote for the substitute bill, H.R. 12128, which is a vote which says simply that we shall not permit windfall profits. But, in addition, it permits the tax-writing committees of the House 1 year to substitute for the remedy of the original House bill. It thus makes it possible for both bodies to express their will whether to require reinvestment of such profits or levy an excess profits tax, or any other remedy they may provide in their wisdom.

But the Members of the other body who today denied, by parliamentary maneuver, their colleagues a vote on excess profits, will not even permit this.

I urge you to vote "yes" on the resolution before you.

The SPEAKER. The time of the gentleman has expired.

Mr. STAGGERS. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, I was appointed late a conferee on this matter after all questions other than the windfall profits section were disposed of. Let me begin by saying, first of all, that every House conferee except the gentleman from Ohio (Mr. BROWN) signed the conference report twice. The Senate agreed to the conference report twice. Once they found that ambiguities and the conferees were compelled to reconvene, then the conference report was rejected by the device of a filibuster. The House is expected to finally lie down and take the Senate's action inflicted upon the House by a filibuster, and that filibuster is in the interest of big oil.

The rules of the House forbid me to speak in a derogatory fashion of the Senate, but all of the Members know me well enough to know what my thoughts are on the conduct of the other body, even though I do not choose to utter them at this time.

The fact of the matter is we are proceeding under about the same amount of time we would have if we had presented a conference report, 40 minutes in each instance. The question before my colleagues is whether or not they will be stomped on by the other body or whether or not they will support their conferees in their actions on this body.

The bill before us substantially implements the intent of the House as was previously indicated. The reason we are before the Members with the procedure we are now engaged in, is this is the only way the House could present the Members with a chance to vote on whether or not they want unjust enrichment or a limitation on windfall profits to the bloated oil companies who will have the highest level of profits in their history. That is the queston before the Members.

If the Members want to lie down before the Senate, if the Members want to lie down before the oil companies, if the Members want to have excess profits by the oil companies, if they do not want to vote to support their conferees, they will vote "no." If they want to have a good program, the best program that could be worked out, given that we were working with the U.S. Senate, then vote "aye" tonight.

The question tonight is, and there are no games being played, are the Members willing to take substantially the House version or the Senate version? I urge my colleagues to vote "aye."

Mr. HOSMER. Mr. Speaker, I yield 5 minutes to the gentleman from Arizona, the distinguished minority leader (Mr. RHODES).

Mr. HASTINGS. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the gentleman from New York.

Mr. HASTINGS. Mr. Speaker, there was a question asked by the gentleman from Alabama (Mr. FLOWERS) as to what difference it makes whether we had this legislation or did not.

I want to speak just to one title of the bill, which is title II. That deals with, as most Members know, the changes made in the Clean Air Act. I will tell the House what this does. There cannot be any coal conversion of any electrical powerplant or any other stationary emission plant in this country unless we change title II. Unless we amend the Clean Air Act as we agreed to in the House version there can be absolutely no conversion from liquid petroleum fuel to coal. That is one of the reasons why this bill under one form or another must be approved.

I thank the gentleman for yielding.

Mr. RHODES. Mr. Speaker, I thank the gentleman from New York for his contribution.

Mr. Speaker, I have great admiration for my good friend, the gentleman from West Virginia, and I know his committee has worked hard and long on this bill. I also know he wants an energy bill as I want an energy bill. I think the only thing we differ on is the best way to get the bill.

The energy crisis is upon us. The country expects us to enact a bill and to do it tonight.

Mr. Speaker, the gentleman from West Virginia has asked us to suspend the rules and pass a bill which he has just recently introduced. Frankly I do not know exactly what is in the bill. I do know there are provisions in the bill which have been not acceptable to the U.S. Senate. I also know they have been not acceptable to the administration. I say to the Speaker that if the gentleman from West Virginia is successful in his attempt tonight, we will be passing a bill which will go absolutely nowhere. There would then be no bill passed by the Congress and signed into law by the President of the United States on energy in this session of the Congress. The people expect that to be done.

I would also like to make it very clear, Mr. Speaker, that after the bill offered by the gentleman from West Virginia is voted down, if it is, it will then be in order for him to move to take the Senate bill from the Speaker's table and pass it under suspension. And if this is done the bill may then go directly to the White House and be signed by the President and the actions which are necessary—some of them pointed out very eloquently by the gentleman from New York—to deal with this energy crisis will then be taken.

It has been said by the gentleman from Michigan as by others that one of the matters which we are concerned with, and we are, is windfall profits. I am worried about that and I am sure the rest of the Members are also. However, the windfall provision which is in the bill offered by the gentleman from West Virginia I am told is about the same windfall provision which was in the bill that originally passed the House. That provision is not acceptable and the reason it is not is because it will absolutely negate the purpose of the bill.

The purpose of the bill is to produce more energy. We want to get people to build more refineries, we want to get more production of gas and oil. If the windfall profits section as now written is part of the law, there will not be capital available to make the investments which are necessary to do this. So, the bill offered by the gentleman from West Virginia will be self-defeating, and it must not be in the energy bill as it is passed.

If indeed excess profits are made, I think everybody knows that the President has already stated that he intends to send a message to the Congress asking for excess profits tax legislation in January. Also, the original bill which this House passed and which the Senate passed will still be available.

It is still in conference, and if indeed it becomes necessary for us to enact some part of that bill, the conference can reassemble after January 21 and they can take applicable provisions of that bill, which is still alive, bring them back to this House and pass them if they desire to do so.

Mr. STAGGERS. Mr. Speaker, will the gentleman yield briefly?

Mr. RHODES. I yield to the gentleman from West Virginia.

Mr. STAGGERS. Mr. Speaker, does the gentleman know that the Senate bill prohibits this Congress from obtaining necessary information about oil reserves or any reserves in America?

Mr. RHODES. Mr. Speaker, I realize that the Senate bill is not perfect any more than the bill which he has just introduced is perfect.

Mr. STAGGERS. Mr. Speaker, I wanted to know if the gentleman knew this.

Mr. RHODES. Certainly. And I agree with the gentleman that both bills are far from perfect, but we have had to enact this legislation under pressure, and I think the gentleman has done a fine job. I think the bill which I hope the gentleman will bring up, which the Senate has passed and which will be signed, is also as good a bill as could possibly be produced under the circumstances.

Mr. Speaker, I ask for a "no" vote on the proposal of the gentleman from West Virginia, then a vote to pass the Senate bill.

Mr. STAGGERS. Mr. Speaker, I yield 2 minutes to the gentleman from Texas (Mr. ECKHARDT).

Mr. ECKHARDT. Mr. Speaker, the choice is between three views. The one would be the Senate bill, which is really a copout. It is a bill that ends on April 1, 1974; really an April Fool's joke.

The other thing that it does is that it eliminates substantially everything that has been put in our bill on the House side with respect to windfall profits.

A second choice would be the committee's report, if we ever get that. It appears that the Senate will not permit us to vote on that, but I submit to the Members that the bill we have before us as a substitute, the one in this resolution, H.R. 12128, is closer to the action of the House on Friday night than either of these two bills.

I shall support the chairman's motion.

Mr. Speaker, the main reason I support it is, because it narrows Executive authority with respect to energy plans more than either of the other two approaches. I should amend that with this qualification: I suppose one could say that the Senate bill is as narrow, but the Senate bill completely ends on April 1.

If we pass this bill, we have narrowly constricted the power of the Executive to put into effect energy conservation plans until April 1, at which time they altogether cease, and any plans which are to have any effect after that date must be enacted as law, as we provided in our bill on last Friday. I think that is good.

In addition to that, between the time the plan goes into effect and April 1 we can disallow or veto any Executive plan within 15 days.

Mr. STAGGERS. Mr. Speaker, I yield 1½ minutes to the distinguished majority leader, the gentleman from Massachusetts (Mr. O'NEILL).

Mr. O'NEILL. Mr. Speaker, may I say to the gentlemen and particularly to the gentlemen on the other side of the aisle, the vote the other night on this bill, practically the same bill, was 265 ayes to 112 nays.

There has been very little change in this bill. So that the Members will not think they are voting on a final passage, this is a matter that has been substituted in the Senate, with an amendment which will go back to the Senate. There is no guarantee, that it will be voted in the Senate, but it will go back there.

Mr. Speaker, the minority has said that the President will veto this matter, just as he has vetoed some 20-odd bills in the last couple of years. Let us see if he wants to veto this one or not. I doubt very, very much, if this reaches his desk, that he would ever veto it.

Mr. Speaker, I believe we have done our part. As the gentleman from Texas has so ably spoken, there have been two parts of this bill that have been stricken. We bound and we are bound by a vote of this House, and bound by a vote of this House so many times the other day on the amendments offered in the conservation matter and on the windfall profits matter that I think the sensible, decent, fair thing is to follow the vote we had the other day and return this bill to the Senate. Then it is up to the Senate to ask whether or not it wants a conference on the matter.

Mr. STAGGERS. Mr. Speaker, in closing debate, I would like the House to just remember this: During the conference the other night the President called me from the conference and talked to me about different provisions of the bill. He asked if I would see Mr. Simon with some of the others. I said that we could afford that courtesy.

We adjourned the committee meeting and went out and listened to Mr. Simon. We reviewed several issues with him. Two of them he was especially concerned with we have taken care of. The others I told him we were in the process of taking care of right then.

Therefore, I have every reason to believe that the President of the United States will sign this bill, and I am sure Mr. Simon will recommend that he sign it.

Now, Mr. Speaker, the people are looking to this Congress for leadership, and I do not believe that we can go home and say that we have not accepted our responsibility. I hope that every Member here will vote "aye" when each of us thinks about what is in the bill.

Mr. Speaker, I have reason to believe this, too: after consultation with the Senate, I feel certain they will accept what we pass right here, because we have worked to accommodate their concerns. So I have reason to believe they will accept it tonight, and we can go home tonight.

Mr. Speaker, I am not trying to pull any shenanigans on the Members of this House. I am only trying to tell the Members the truth.

The SPEAKER. The question is on the motion offered by the gentleman from West Virginia (Mr. STAGGERS) that the House suspend the rules and agree to the House resolution (H. Res. 759).

The question was taken.

Mr. HOSMER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 169, nays 95, not voting 168, as follows:

The Clerk announced the following pairs:

On this vote:

Mr. Dent and Mr. Rostenkowski for, with Mr. Hays against.

Mr. Rooney of New York and Mr. Carney of Ohio for, with Mr. Hébert against.

Mr. Moorhead of Pennsylvania and Mr. Kluczynski for, with Mr. Rarick against.

Mr. Biaggi and Mr. Bingham for, with Mr. Butler against.

Mr. Brasco and Mr. Burton for, with Mr. Snyder against.

Mrs. Chisholm and Mr. Corman for, with Mrs. Holt against.

Mr. Cotter and Mr. Dominick V. Daniels for, with Mr. Price of Texas against.

Mr. Evins of Tennessee and Mrs. Grasso for, with Mr. Collins of Texas against.

Mr. Hanna and Mr. Harrington for, with Mr. Heinz against.

Mr. Lehman and Mr. Madden for, with Mr. Madigan against.

Mr. Moss and Mr. Murphy of New York for, with Mr. Zion against.

Mr. Nix and Mr. Podell for, with Mr. Camp against.

Ms. Abzug and Mr. Stark for, with Mr. Martin of Nebraska against.

Mr. Yates and Mr. Conyers for, with Mr. Taylor of Missouri against.

Mr. Steed and Mr. Wolff for, with Mr. Sarasin against.

Mr. Diggs and Mr. Dulski for, with Mr. Landgrebe against.

Mr. Anderson of California and Mr. Murphy of Illinois for, with Mr. Devine against.

Mr. Sisk and Mr. Ryan for, with Mr. Scherle against.

Mr. Delaney and Mr. Danielson for, with Mr. Steiger of Arizona against.

Mr. Addabbo and Mr. Van Deerlin for, with Mr. Rousselot against.

Until further notice:

Mr. Bevill with Mr. Arends.

Mrs. Boggs with Mr. Harvey.

Mr. Brooks with Mr. Keating.

Mrs. Burke of California with Mr. Roncallo of New York.

Mr. Byron with Mr. Anderson of Illinois.

Mr. Aspin with Mr. Gubser.

Mrs. Collins of Illinois with Mr. McClory.

Mr. Flynt with Mr. Andrews of North Dakota.
Mr. Fulton with Mr. Frey.
Mr. Haley with Mr. Cleveland.
Mrs. Hanson of Washington with Mr. Frelinghuysen.
Mr. Landrum with Mr. Grover.
Mr. Gettys with Mr. Ashbrook.

Mr. Jarman with Mr. Collier.
Mr. Leggett with Mr. Bafalis.
Mr. Gibbons with Mr. Goldwater.
Mr. Nichols with Mr. Hutchinson.
Mr. Rees with Mr. Dellenback.
Mrs. Green of Oregon with Mr. Baker.
Mr. Jones of Alabama with Mr. Hillis.
Mr. Reid with Mr. Bell.
Mr. Riegle with Mr. Lent.
Mr. Roncalio of Wyoming with Mr. Hinshaw.
Mr. Roybal with Mr. Blackburn.
Mr. Sikes with Mr. Dickinson.
Mr. Stubblefield with Mr. Hunt.
Mr. Runnels with Mr. Brotzman.
Mr. Smith of Iowa with Mr. du Pont.
Mr. Teague of Texas with Mr. Chamberlain.
Mr. Shipley with Mr. Edwards of Alabama.
Mrs. Griffiths with Mr. Eshleman.
Mr. Vigorito with Mr. Fish.
Mr. Wright with Mr. Kuykendall.
Mr. Mailliard with Mr. Lott.
Mr. Mills of Arkansas with Mr. McEwen.
Mr. Minshall of Ohio with Mr. Nelsen.
Mr. Peyser with Mr. O'Brien.
Mr. Railsback with Mr. Quillen.
Mr. Ruppe with Mr. Schneebeli.
Mr. Sebelius with Mr. Shoup.
Mr. Shriver with Mr. Smith of New York.

So (two-thirds not having voted in favor there), the motion was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

(By unanimous consent, Mr. STAGGERS was allowed to proceed for 5 minutes.)

Mr. STAGGERS. Mr. Speaker, I am very sorry that the House has taken the action that they have tonight. We have in this bill the fact that the EPA cannot effect parking surcharges all over America.

And when the Members vote this down EPA will have the right to levy parking surcharges in their little towns.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Did the gentleman see the conference report that was adopted yesterday or the day before? When the gentleman says the Environmental Protection Agency has authority, he overlooks the restriction in the supplemental report of yesterday, where Congress made clear that funds have not been appropriated for that purpose. Of course, there is a real question of constitutionality involved, too.

I may say if the gentleman will yield further, that we a few moments ago had to vote without knowing what was in the gentleman's bill, without having it explained. Perhaps now that he lost on that vote and his resolution is dead, he will explain it.

Mr. STAGGERS. I will say by killing this bill as we did, we did vote to go backward, instead of trying to conserve energy and do many things to move this Nation forward in the energy field.

I would like to introduce a resolution, and the number of the resolution is House Resolution 760. I have taken this time to tell the House what is in that resolution. It is the same thing that was in the previous resolution with one item taken out, windfall profits.

I would say to the Members that if they vote for this resolution and it will take a two-thirds vote, I believe the Senate will take it and I have every reason to believe the President will take it gladly.

I have no reason to believe otherwise. The windfall profits provision is the only item I know of that the President opposes. When Mr. Simon came, he had three items.

We took care of two of those, and I think this is the last one.

The bill does many things that I do not have the time to go into now, but we talked about them when it was on the floor. We debated it for 3 days, starting at 10 o'clock in the morning and going far into the night. For me to try to repeat all those things would take several hours. I am merely going to ask for this resolution to be brought up with the windfall profits provision removed.

Mr. WAGGONNER. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Louisiana.

Mr. WAGGONNER. Mr. Speaker, I thank the gentleman for yielding.

The gentleman from West Virginia just stated he has just introduced a resolution, a House resolution numbered 760. The gentleman has described House Resolution 760 as having everything in it but windfall profits. The question is: Compared to what?

Mr. STAGGERS. Compared to the one we just voted down.

Mr. WAGGONNER. Then, Mr. Speaker, if the gentleman will yield further, I would be happy for the gentleman to tell me and the rest of the Members of the House what we just voted down, because that is the reason it was voted down, because nobody knew what was in it.

Mr. STAGGERS. The gentleman was here for the 3 days we debated it.

Mr. WAGGONNER. Yes, sir, for every minute.

Mr. STAGGERS. And I am sure he did pay attention and knew what was in it.

Mr. WAGGONNER. Is the gentleman saying that the resolution he has introduced is the bill which passed the House except for windfall profits?

Mr. STAGGERS. No. This is the same as the conference substitute which was brought out by both the House and the Senate with several exceptions that I mentioned awhile ago. In addition, the windfall profits amendment is now out of the bill.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Arizona.

Mr. RHODES. Mr. Speaker, I thank the gentleman for yielding.

If the resolution which the gentleman now offers is accepted, would it not still be necessary to take some action upon this measure before it could go to the White House? Would we not again be in the position of depending upon a quorum of the Senate and the desire of the Senate to take up this bill?

Mr. STAGGERS. Of course, and I am sure the Senate will accept it.

Mr. RHODES. But if a quorum is not present, we will end up with no energy bill at all.

Why does not the gentleman from West Virginia take the Senate bill and bring it to the floor of the House?

Mr. STAGGERS. I have told the gentleman and I have told the House why: because they cut out all the things—I believe the EPA amendments were cut out; I am not sure.

It has in there a termination date so that virtualy everything in the bill will have to be reconsidered within 2 months. We will have to do this whole thing all over again. I think that is wrong. I will not do it.

Mr. Speaker, I have said this: I think one of the most objectionable things which many people have said is that I have taken windfall profits out and introduced the bill.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. Mr. Speaker, I yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, for several days we considered his original bill and adopted quite a number of amendments. I ask are those amendments eliminated from the resolution presented by the gentleman from West Virginia at this time?

I ask the same question another way. Has the gentleman introduced this bill as it originally came from his committee without the amendments adopted by the House? He either did or he did not.

Mr. STAGGERS. It is the conference substitute. I tried to explain that.

Mr. WHITTEN. So the House amendments are out. We understand that much.

Mr. STAGGERS. No. Nearly all of the House amendments are in.

Mr. WHITTEN. Will the gentleman give us some examples of what amendments remain in and what ones he has eliminated.

The SPEAKER. The time of the gentleman from West Virginia has expired.

(By unanimous consent, Mr. STAGGERS was allowed to proceed for 1 additional minute.)

Mr. STAGGERS. Mr. Speaker, I could not in 1 hour, as I told the gentleman and this House awhile ago, explain what we had taken out.

Mr. BROWN of Ohio. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. Mr. Speaker, I yield to the gentleman from Ohio.

Mr. BROWN of Ohio. Mr. Speaker, I do not want the House to be under a misapprehension. I think the gentleman from West Virginia misspoke himself.

Mr. STAGGERS. Mr. Speaker, I corrected that.

Mr. BROWN of Ohio. Mr. Speaker, I assume that the environmental measures in this legislation which the gentleman now proposes are the same in the bill that the Senate agreed to, which, if we passed, we could go home.

Mr. STAGGERS. Does the gentleman know what is in the Senate bill?

Mr. BROWN of Ohio. They are the same as what the gentleman is proposing, are they not?

Mr. STAGGERS. Does the gentleman know?

Mr. BROWN of Ohio. I am asking the gentleman.

Mr. STAGGERS. The gentleman is trying to tell me what is in the Senate bill. I do not know everything that is in the Senate bill. I have not had time to study it carefully.

The SPEAKER. The time of the gentleman from West Virginia has again expired.

Mr. WAGGONNER. Mr. Speaker, I simply ask unanimous consent that the gentleman from West Virginia (Mr. STAGGERS) the chairman of the committee, be given 5 uninterrupted minutes without questions to explain to the House what is in his House Resolution 760.

The SPEAKER. Is there objection to the request of the gentleman from Louisiana?

Mr. DINGELL. Mr. Speaker, I object.

The SPEAKER. Objection is heard.

PROVIDING FOR AGREEING TO SENATE AMENDMENT TO HOUSE AMENDMENT WITH AN AMENDMENT TO AMEND S. 921, WILD AND SCENIC RIVERS ACT

Mr. STAGGERS. Mr. Speaker, I move to suspend the rules and agree to the House Resolution (H. Res. 760) to take from the Speaker's table the Senate bill S. 921, to amend the Wild and Scenic Rivers Act, with a Senate amendment to the House amendment thereto, and agree to the Senate amendment to the House amendment with an amendment.

The Clerk read as follows:

H. Res. 760

Resolved, That immediately upon the adoption of this resolution the bill S. 921, with the Senate amendment to the House amendment thereto, be, and the same is hereby, taken from the Speaker's table to the end that the Senate amendment to the House amendment be, and the same is hereby, agreed to with an amendment as follows:

In lieu of the matter proposed to be inserted by the Senate amendment, insert the text of the bill H.R. 12129.

(The text of H.R. 12129 follows:)

A bill to assure, through energy conservation, end-use rationing of fuels, and other means, that the essential energy needs of the United States are met, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

Titles I, II, and III of this Act may be cited as the "Energy Emergency Act".

SEC. 101. FINDINGS AND PURPOSES.

(a) (1) The Congress hereby determines that—

(A) shortages of crude oil, residual fuel oil, and refined petroleum products caused by insufficient domestic refining capacity, inadequate domestic production, environmental constraints, and the unavailability of imports sufficient to satisfy domestic demand, now exist;

(B) such shortages have created or will create severe economic dislocations and hardships;

(C) such shortages and dislocations jeopardize the normal flow of interstate and foreign commerce and constitute an energy emergency which can be averted or minimized most efficiently and effectively through prompt action by the executive branch of Government;

(D) disruptions in the availability of imported energy supplies, particularly crude oil and petroleum products, pose a serious risk to national security, economic well-being, and health and welfare of the American people;

(E) because of the diversity of conditions, climate, and available fuel mix in different areas of the Nation, a primary governmental responsibility for developing and enforcing energy emergency measures lies with the States and with the local governments of major metropolitan areas acting in accord with the provisions of this Act; and

(F) the protection and fostering of competition and the prevention of anticompetitive practices and effects are vital during the energy emergency.

(2) On the basis of the determinations specified in subparagraphs (A) through (F) of paragraph (1) of this subsection, the Congress hereby finds that current and imminent fuel shortages have created a nationwide energy emergency.

(b) The purposes of this Act are to call for proposals for energy emergency rationing and conservation measures and to authorize specific temporary emergency actions to be exercised, subject to congressional review and right of approval or disapproval, to assure that the essential needs of the United States for fuels will be met in a manner which, to the fullest extent practicable: (1) is consistent with existing national commitments to protect and improve the environment; (2) minimizes any adverse impact on employment; (3) provides for equitable treatment of all sectors of the economy; (4) maintains vital services necessary to health, safety, and public welfare; and (5) insures against anticompetitive practices and effects and preserves, enhances, and facilitates competition in the development, production, transportation, distribution, and marketing of energy resources.

SEC. 102. DEFINITIONS.

For purposes of this Act:

(1) The term "State" means a State, the District of Columbia, Puerto Rico, or any territory or possession of the United States.

(2) The term "petroleum product" means crude oil, residual fuel oil, or any refined petroleum product (as defined in the Emergency Petroleum Allocation Act of 1973).

(3) The term "United States" when used in the geographical sense means the States, the District of Columbia, Puerto Rico, and the territories and possessions of the United States.

(4) The term "Administrator" means the Administrator of the Federal Energy Emergency Administration.

SEC. 103. FEDERAL ENERGY EMERGENCY ADMINISTRATION

(a) There is hereby established until May 15, 1975, unless superseded prior to that date by law, a Federal Energy Emergency Administration which shall be temporary and shall be headed by a Federal Energy Emergency Administrator, who shall be appointed by the President, by and with the advice and consent of the Senate. Vacancies in the office of Administrator shall be filled in the same manner as the original appointment.

(b) The Administrator shall be compensated at the rate provided for level II of the Executive Schedule. Subject to the Civil Service and Classification provisions of title 5, United States Code, the Administrator may employ such personnel as he deems necessary to carry out his functions.

(c) Effective on the date on which the Administrator first takes office (or, if later, on January 1, 1974), all functions, powers, and duties of the President under sections 4, 5, 6, and 9 of the Emergency Petroleum Allocation Act of 1973 (as amended by this Act), and of any officer, department, agency, or State (or officer thereof) under such sections (other than functions vested by section 6 of such Act in the Federal Trade Commission, the Attorney General, or the Antitrust Division of the Department of Justice), are transferred to the Administrator. All personnel, property, records, obligations, and commitments used primarily with respect to functions transferred under the preceding sentence shall be transferred to the Administrator.

SEC. 104. END-USE RATIONING.

Section 4 of the Emergency Petroleum Allocation Act of 1973 is amended by adding at the end thereof the following new subsection:

"(h) (1) The President may promulgate a rule which shall be deemed a part of the regulation under subsection (a) and which shall provide, consistent with the objectives of subsection (b), for the establishment of a program for the rationing and ordering of priorities among classes of end users of crude oil, residual fuel oil, or any refined petroleum product, and for the assignment to end-users of such products of rights, and evidence of such rights, entitling them to obtain such products in precedence to other classes of end-users not similarly entitled.

"(2) The rule under this subsection shall take effect only if the President finds that without such rule, all other practicable and authorized methods to limit energy demand will not achieve the objectives of section 4(b) of this Act and of the Energy Emergency Act.

"(3) The President shall, by order, in furtherance of the rule authorized pursuant to paragraph (1) of this subsection and consistent with the attainment of the objectives in subsection (b) of this section, cause such adjustments in the allocations made pursuant to the regulation under subsection (a) as may be necessary to carry out the purposes of this subsection.

"(4) The President shall provide for procedures by which any end-user of crude oil, residual fuel oil or refined petroleum products for which priorities and entitlements are established under paragraph (1) of this subsection may petition for review and reclassification or modification of any determination made under such paragraph with respect to his rationing priority or entitlement. Such procedures may include procedures with respect to such local boards as may be authorized to carry out functions under this subsection pursuant to section 122 of the Energy Emergency Act.

"(5) No rule or order under this section may impose any tax or user fee, or provide for a credit or deduction in computing any tax."

SEC. 105. ENERGY CONSERVATION PLANS.

(a) (1) (A) Pursuant to the provisions of this section, the Administrator is authorized to promulgate by regulation one or more energy conservation plans in accord with this section which shall be designed (together with actions taken and proposed to be taken under other authority of this or other Acts) to result in a reduction of energy consumption to a level which can be supplied by available energy resources. For purposes of this section, the term "energy conservation plan" means a plan for transportation controls (including but not limited to highway speed limits) or such other reasonable restrictions on the public or private use of energy (including limitations on energy consumption of businesses) which are necessary to reduce energy consumption and which are authorized by this Act.

(B) No energy conservation plan promulgated by regulation under this section may impose rationing or any tax or user fee, or provide for credit or deduction in computing any tax.

(2) An energy conservation plan shall become effective as provided for in subsection (b). Such a plan shall apply in each State, except as otherwise provided in an exemption granted pursuant to the plan in cases where a comparable State or local program is in effect, or where the Administrator finds special circumstances exist.

(3) An energy conservation plan may not deal with more than one logically consistent subject matter.

(4) An amendment to an energy conservation plan, if it has significant substantive effect, shall be transmitted to Congress and shall be effective only in accordance with subsecion (b). Any amendment which does not have significant substantive effect and any rescission of a plan may be made effective in accordance with section 553 of title 5, United States Code.

(5) Subject to subsection (b)(3), provision of an energy conservation plan shall remain in effect for a period specified in the plan unless earlier rescinded by the Administrator, but shall terminate in any event no later than April 1, 1974.

(b)(1) For purposes of this subsection, the term "energy conservation plan" means a plan promulgated by regulation proposed under subsection (a) of this section or an amendment thereto which has significant substantive effect.

(2) The Administrator shall transmit any energy conservation plan (bearing an identification number) to each House of Congress on the date on which it is promulgated.

(3)(A) If an energy conservation plan is transmitted to Congress before March 1, 1974, and provides for an effective date earlier than March 1, 1974, such plan shall take effect on the date provided in the plan; but if either House of the Congress, before the end of the first period of 15 calendar days of continuous session of Congress after the date on which such plan is transmitted to it, passes a resolution stating in substance that such House does not favor such plan, such plan shall cease to be effective on the date of passage of such resolution.

(B) If an energy conservation plan is transmitted to the Congress and provides for an effective date on or after March 1, 1974, and before April 1, 1974, such plan shall take effect at the end of the first period of 15 calendar days of continuous session of Congress after the date on which such plan is transmitted to it unless, between the date of transmittal and the end of the 15-day period, either House passes a resolution stating in substance that such House does not favor such plan.

(C) An energy conservation plan proposed to be made effective on or after April 1, 1974, shall take effect only if approved by Act of Congress.

(4) For the purpose of paragraph (3) of this subsection—

(A) continuity of session is broken only by an adjournment of Congress sine die; and

(B) the days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the 15-day period.

(5) Under provisions contained in an energy conservation plan, a provision of the plan may take effect at a time later than the date on which such plan otherwise is effective.

(c)(1) This subsection is enacted by Congress—

(A) as an exercise of the rulemaking power of the Senate and the House of Representatives, respectively, and as such it is deemed a part of the rules of each House, respectively, but applicable only with respect to the procedure to be followed in that House in the case of resolutions described by paragraph (2) of this subsection; and it supersedes other rules only to the extent that it is inconsistent therewith; and

(B) with full recognition of the contitutional right of either House to change the rules (so far as relating to the procedure of that House) at any time, in the same manner and to the same extent as in the case of any other rule of that House.

(2) For the purpose of this subsection, "resolution" means only a resolution of either House of Congress, the matter after the resolving clause of which is as follows: "That the ——— does not favor the energy conservation plan numbered ——— transmitted to Congress by the Administrator of the Federal Energy Emergency Administration on ———, 19—.", the first blank space therein being filled with the name of the resolving House and the other blank spaces therein being appropriately filled; but does not include a resolution which specifies more than one energy conservation plan.

(3) A resolution with respect to an energy conservation plan shall be referred to a committee (and all resolutions with respect to the same plan shall be referred to the same committee) by the President of the Senate or the Speaker of the House of Representatives, as the case may be.

(4)(A) If the committee to which a resolution with respect to an energy conservation plan has been referred has not reported it at the end of 5 calendar days after its introduction, it is in order to move either to discharge the committee from further consideration of the resolution or to discharge the committee from further consideration of any other resolution with respect to such energy conservation plan which has been referred to the committee.

(B) A motion to discharge may be made only by an individual favoring the resolution, is highly privileged (except that it may not be made after the committee has reported a resolution with respect to the same energy conservation plan), and debate thereon shall be limited to not more than 1 hour, to be divided equally between those favoring and those opposing the resolution. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(C) If the motion, to discharge is agreed to or disagreed to, the motion may not be renewed, nor may another motion to discharge the committee be made with respect to any other resolution with respect to the same plan.

(5)(A) When the committee has reported, or has been discharged from further consideration of, a resolution with respect to an energy conservation plan, it is at any time thereafter in order (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(B) Debate on the resolution shall be limited to not more than 10 hours, which shall be divided equally between those favoring and those opposing the resolution. A motion further to limit debate is not debatable. An amendment to, or motion to recommit, the resolution is not in order, and it is not in order to move to reconsider the vote by which the resolution is agreed to or disagreed to.

(6)(A) Motions to postpone, made with respect to the discharge from committee, or the consideration of a resolution with respect to an energy conservation plan, and motions to proceed to the consideration of other business, shall be decided without debate.

(B) Appeals from the decisions of the Chair relating to the application of the rules of the Senate or the House of Representatives, as the case may be, to the procedure relating to a resolution with respect to an energy conservation plan shall be decided without debate.

(d)(1) In carrying out the provisions of this Act, the Administrator shall, to the greatest extent practicable, evaluate the potential economic impacts of proposed regulatory and other actions including but not limited to the preparation of an analysis of the effect of such actions on—

(A) the fiscal integrity of State and local government;

(B) vital industrial sectors of the economy;

(C) employment, by industrial and trade sector, as well as on a national, regional, State, and local basis;

(D) the economic vitality of regional, State, and local areas;

(E) the availability and price of consumer goods and services;

(F) the gross national product;

(G) competition in all sectors of industry; and

(H) small business.

(2) The Administrator shall develop analyses of the economic impact of any energy conservation plan on States or significant sectors thereof, considering the impact on energy as fuel and resources as feedstock for industry.

(3) Such analysis shall, wherever possible, be made explicit and, to the extent practicable, other Federal agencies and agencies of State and local governments which have special knowledge and expertise relevant to the impact of proposed regulatory or other actions shall be consulted in making the analysis, and all Federal agencies shall cooperate with the Administrator in preparing such analyses except that the Administrator's actions pursuant to this subsection shall not create any right of reviews or cause of action except as otherwise exist under other provisions of law.

(4) The Administrator, together with the Secretaries of Labor and Commerce, shall monitor the economic impact of any energy actions taken by the Administrator, and shall provide the Congress with separate reports every thirty days on the impact of the energy shortage and such emergency actions on employment and the economy.

(e) Any energy conservation plan which the Administrator submits to the Congress pursuant to subsection (b) of this section shall include findings of fact and a specific statement explaining the rationale for each provision contained in such plan.

SEC. 106. COAL CONVERSION AND ALLOCATION.

(a) The Administrator shall, to the extent practicable and consistent with the objectives of this Act, by order, after balancing on a plant-by-plant basis the environmental effects of use of coal against the need to fulfill the purposes of this Act, prohibit, as its primary energy source, the burning of natural gas or petroleum products by any major fuel-burning installation (including any existing electric powerplant) which, on the date of enactment of this Act, has the capability and necessary plant equipment to burn coal. Any installation to which such an order applies shall be permitted to continue to use coal as provided in section 119 (b) of the Clean Air Act. To the extent coal supplies are limited to less than the aggregate amount of coal supplies which may be necessary to satisfy the requirements of those installations which can be expected to use coal (including installations to which orders may apply under this subsection), the Administrator shall prohibit the use of natural gas and petroleum products for those installations where the use of coal will have the least adverse environmental impact. A prohibition on use of natural gas and petroleum products under this subsection shall be contingent upon the availability of coal, coal transportation facilities, and the maintenance of reliability of service in a given service area. The Administrator shall require that fossil-fuel-fired electric powerplants in the early planning process, other than combustion gas turbine and combined cycle units, be designed and constructed so as to be capable of using coal as a primary energy source instead of or in addition to other fossil fuels. No fossil-fuel-fired electric powerplant may be required under this section to be so designed and constructed, if (1) to do so would result in an impairment of reliability or adequacy of service, or (2) if an adequate and reliable supply of coal is not available and is not expected to be available. In considering whether to impose a design and construction requirement under this subsection, the Administrator shall consider the existence and effects of any contractual commitment for the construction of such facilities and the capability of the owner or operator to recover any capital investment made as a result of the conversion requirements of this section.

(b) The Administrator may by rule prescribe a system for allocation of coal to users thereof in order to attain the objectives specified in this section.

SEC. 107. MATERIALS ALLOCATION.

(a) The Administrator shall, within 30 days after the date of enactment of this Act, propose (in the nature of a proposed rule affording an opportunity for the presentation of views) and publish (and may from time to time amend) a contingency plan for allocation of supplies of materials and equipment necessary for exploration, production, refining, and required transportation of energy supplies and for the construction and maintenance of energy facilities. At such time as he finds that it is necessary to put all or part of such plan into effect, he shall transmit such plan or portion thereof to each House of Congress and such plan or portion thereof shall take effect in the same manner as an energy conservation plan prescribed under section 105 and to which section 105 (b)(3)(B) applies (except that such plan may be submitted at any time after the date of enactment of this Act and before May 15, 1975).

(b) Section 4(b)(1)(G) of the Emergency Petroleum Allocation Act of 1973 is amended to read as follows:

"(G) allocation of residual fuel oil and refined petroleum products in such amounts and in such manner as may be necessary for the maintenance of exploration for, and production or extraction of—

"(i) fuels, and

"(ii) minerals essential to the requirements of the United States,

and for required transportation related thereto."

SEC. 108. FEDERAL ACTIONS TO INCREASE AVAILABLE DOMESTIC PETROLEUM SUPPLIES.

(a) The Administrator may initiate the following measures to supplement domestic energy supplies for the duration of the emergency:

(1) require, by order or rule, the production of designated existing domestic oilfields, at their maximum efficient rate of production, which is the maximum rate at which production may be sustained without detriment to the ultimate recovery of oil and gas under sound engineering and economic principles. Such fields are to be designated by the Secretary of the Interior, after consultation with the appropriate State regulatory agency. Data to determine the maximum efficient rate of production shall be supplied to the Secretary of the Interior by the State regulatory agency which determines the maximum efficient rate of production and by the operators who have drilled wells in, or are producing oil and gas from such fields;

(2) require, if necessary to meet essential energy needs, production of certain designated existing domestic oilfields at rates in excess of their currently assigned maximum efficient rates. Fields to be so designated, by the Secretary of the Interior or the Secretary of the Navy as to the Federal lands or as to Federal interests in lands under their respective jurisdiction, shall be those fields where the types and quality of reservoirs are such as to permit production at rates in excess of the currently assigned sustainable maximum efficient rate for periods of ninety days or more without excessive risk of losses in recovery;

(3) require the adjustment of processing operations of domestic refineries to produce refined products in proportions commensurate with national needs and consistent with the objectives of section 4(b) of the Emergency Petroleum Allocation Act of 1973.

(b) Nothing in this section shall be construed to authorize the production of any Naval Petroleum Reserve now subject to the provisions of chapter 641 of title 10 of the United States Code.

SEC. 109. OTHER AMENDMENTS TO THE EMERGENCY PETROLEUM ACT OF 1973.

(a) Section 4 of the Emergency Petroleum Allocation Act of 1973 as amended by section 104 of this Act is amended by adding at the end of such section the following new subsection:

"(i) If any provision of the regulation under subsection (a) provides that any allocation of residual fuel oil or refined petroleum products is to be based on use of such a product or amounts of such product supplied during a historical period, the regulation shall contain provisions designed to assure that the historical period can be adjusted (or other adjustments in allocations can be made) in order to reflect regional disparities in use, population growth or unusual factors influencing use (including unusual changes in climatic conditions), of such oil or product in the historical period. This subsection shall take effect thirty days after the date of enactment of the Energy Emergency Act. Adjustments for such purposes shall take effect no later than six months after the date of enactment of this subsection. Adjustments to reflect population growth shall be based upon the most current figures available from the United States Bureau of the Census."

(b) Section 4(g)(1) of the Emergency Petroleum Allocation Act of 1973 is amended by striking out "February 28, 1975" in each case the term appears and inserting in each case "May 15, 1975".

SEC. 111. PROTECTION OF FRANCHISED DEALERS.

(a) As used in this section:

(1) The term "distributor" means a person engaged in the sale, consignment, or distribution of petroleum products to wholesale or retail outlets whether or not it owns, leases, or in any way controls such outlets.

(2) The term "franchise" means any agreement or contract between a refiner or a distributor and a retailer or between a refiner and a distributor, under which such retailer or distributor is granted authority to use a trademark, trade name, service mark, or other identifying symbol or name owned by such refiner or distributor, or any agreement or contract between such parties under which such retailer or distributor is granted authority to occupy premises owned, leased, or in any way controlled by a party to such agreement or contract, for the purpose of engaging in the distribution or sale of petroleum products for purposes other than resale.

(3) The term "notice of intent" means a written statement of the alleged facts which, if true, constitute a violation of subsection (b) of this section.

(4) The term "refiner" means a person engaged in the refinering or importing of petroleum products.

(5) The term "retailer" means a person engaged in the sale of any refined petroleum product for purposes other than resale within any State, either under a franchise or independent of any franchise, or who was so engaged at any time after the start of the base period.

(b)(1) A refiner or distributor shall not cancel, fail to renew, or otherwise terminate a franchise unless he furnishes prior notification pursuant to this paragraph to each distributor or retailer affected thereby. Such notification shall be in writing and sent to such distributor or retailer by certified mail not less than ninety days prior to the date on which such franchise will be canceled, not renewed, or otherwise terminated. Such notification shall contain a statement of intention to cancel, not renew, or to terminate together with the reasons therefor, the date on which such action shall take effect, and a statement of the remedy or remedies available to such distributor or retailer under this section together with a summary of the applicable provisions of this section.

(2) A refiner or distributor shall not cancel, fail to renew, or otherwise terminate a franchise unless the retailer or distributor whose franchise is terminated failed to comply substantially with any essential and reasonable requirement of such franchise or failed to act in good faith in carrying out the terms of such franchise, or unless such refiner or distributor withdraws entirely from the sale of refined petroleum products in commerce for sale other than resale in the United States.

(c)(1) If a refiner or distributor engages in conduct prohibited under subsection (b) of this section, a retailer or a distributor may maintain a suit against such refiner or distributor. A retailer may maintain such suit against a distributor or a refiner whose actions affect commerce and whose products with respect to conduct prohibited under paragraphs (1) or (2) of subsection (b) of this section, he sells or has sold, directly or indirectly, under a franchise. A distributor may maintain such suit against a refiner whose actions affect commerce and whose products he purchases or has purchased or whose products he distributes or has distributed to retailers.

(2) The court shall grant such equitable relief as is necessary to remedy the effects of conduct prohibited under subsection (b) of this section which it finds to exist including declaratory judgment and mandatory or prohibitive injunctive relief. The court may grant interim equitable relief, and actual and punitive damages (except for actions for a failure to renew) where indicated, in suits under this section, and may, unless such suit is frivilous, direct that costs, including reasonable attorney and expert witness fees, be paid by the defendant. In the case of actions for a failure to renew damages shall be limited to actual damages including the value of the dealer's equity.

(3) A suit under this section may be brought in the district court of the United States for any judicial district in which the distributor or the refiner against whom such suit is maintained resides, is found, or is doing business, without regard to the amount in controversy. No such suit shall be maintained unless commenced within three years after the cancellation, failure to renew, or termination of such franchise or the modification thereof.

SEC. 112. PROHIBITIONS ON UNREASONABLE ACTIONS.

(a) Action taken under authority of this Act, the Emergency Petroleum Allocation Act of 1973, or other Federal law resulting in the allocation of petroleum products and electrical energy among classes of users is resulting in restrictions on use of petroleum products and electrical energy, shall be equitable, shall not be arbitrary or capricious, and shall not unreasonably discriminate among classes of users: *Provided*, That with respect to allocations of petroleum products applicable to the foreign trade and commerce of the United States, no foreign corporation or entity shall receive more favorable treatment in the allocation of petroleum products than that which is accorded by its home country to United States citizens engaged in the same line of commerce, and allocations shall contain provisions designed to foster reciprocal and non-discriminatory treatment by foreign countries of United States citizens engaged in foreign commerce.

(b) To the maximum extent practicable, any restriction on the use of energy shall be designed to be carried out in such manner so as to be fair and to create a reasonable distribution of the burden of such restriction on all sectors of the economy, without imposing an unreasonably disproportionate share of such burden on any specific industry, business or commercial enterprise, or on any individual segment thereof and shall give due consideration to the needs of commercial, retail, and service establishments whose normal function is to supply goods and services of an essential convenience nature during times of day other than conventional daytime working hours.

Sec. 113. Regulated Carriers.

(a) The Interstate Commerce Commission (with respect to common or contract carriers subject to economic regulation under the Interstate Commerce Act), the Civil Aeronautics Board, and the Federal Maritime Commission shall, for the duration of the period beginning on the date of enactment of this Act and ending on May 15, 1975, have authority to take any action for the purpose of conserving energy consumption in a manner found by such Commission or Board to be consistent with the objectives and purposes of the Acts administered by such Commission or Board on its own motion or on the petition of the Administrator which existing law permits such Commission or Board to take upon the motion or petition of any regulated common or contract carrier or other person.

(b) The Interstate Commerce Commission shall, by expedited proceedings, adopt appropriate rules under the Interstate Commerce Act which eliminate restrictions on the operating authority of any motor common carrier of property which require excessive travel between points with respect to which such motor common carrier has regularly performed service under authority issued by the Commission. Such rules shall assure continuation of essential service to communities served by any such motor common carrier.

(c) Within 45 days after the date of enactment of this Act, the Civil Aeronautics Board, the Federal Maritime Commission, and the Interstate Commerce Commission shall report separately to the appropriate committees of the Congress on the need for additional regulatory authority in order to conserve fuel during the period beginning on the date of enactment of this Act and ending on May 15, 1975 while continuing to provide for the public convenience and necessity. Each such report shall identify with specificity—

(1) the type of regulatory authority needed;

(2) the reasons why such authority is needed;

(3) the probable impact on fuel conservation of such authority;

(4) the probable effect on the public convenience and necessity of such authority; and

(5) the competitive impact, if any, of such authority.

Each such report shall further make recommendations with respect to changes in any existing fuel allocation programs which are deemed necessary to provide for the public convenience and necessity during such period.

Sec. 114. Antitrust Provisions.

(a) Except as specifically provided in subsection (i), no provision of this Act shall be deemed to convey to any person subject to this Act any immunity from civil and criminal liability or to create defenses to actions, under the antitrust laws.

(b) As used in this section, the term "antitrust laws" means—

(1) the Act entitled "An Act to protect trade and commerce against unlawful restraints and monopolies", approved July 2, 1890 (15 U.S.C. 1 et seq.), as amended;

(2) the Act entitled "An Act to supplement existing laws against unlawful restraints and monopolies, and for other purposes", approved October 15, 1914 (15 U.S.C. 12 et seq.), as amended;

(3) the Federal Trade Commission Act (15 U.S.C. 41 et seq.), as amended;

(4) sections 73 and 74 of the Act entitled "An Act to reduce taxation, to provide revenue for the Government, and for other purposes", approved August 27, 1894 (15 U.S.C. 8 and 9), as amended; and

(5) the Act of June 19, 1936, chapter 592 (15 U.S.C. 13, 13a, 13b, and 21a).

(c) (1) To achieve the purposes of this Act, the Administrator may provide for the establishment of such advisory committees as he determines are necessary. Any such advisory committees shall be subject to the provisions of the Federal Advisory Committee Act of 1972 (5 U.S.C. App. I), whether or not such Act or any of its provisions expires or terminates during the term of this Act of such committees and in all cases shall be chaired by a regular full-time Federal employee and shall include representatives of the public. The meetings of such committees shall be open to the public.

(2) A representative of the Federal Government shall be in attendance at all meetings of any advisory committee established pursuant to this section. The Attorney General and the Federal Trade Commission shall have adequate advance notice of any meeting and may have an official representative attend and participate in any such meeting.

(3) A full and complete verbatim transcript shall be kept of all advisory committee meetings, and shall be taken and deposited, together with any agreement resulting therefrom, with the Attorney General and the Federal Trade Commission. Such transcript and agreement shall be made available for public inspection and copying, subject to the provisions of sections 552 (b) (1) and (b) (3) of title 5, United States Code.

(d) The Administrator, subject to the approval of the Attorney General and the Federal Trade Commission, shall promulgate, by rule, standards and procedures by which persons engaged in the business of producing, refining, marketing, or distributing crude oil, residual fuel oil or any refined petroleum product may develop and implement voluntary agreements and plans of action to carry out such agreements which the Administrator determines are necessary to accomplish the objectives stated in section 4(b) of the Emergency Petroleum Allocation Act of 1973.

(e) The standards and procedures under subsection (d) shall be promulgated pursuant to section 553 of title 5, United States Code. They shall provide, among other things, that—

(1) Such agreements and plans of action shall be developed by meetings of committees, councils, or other groups which include representatives of the public, of interested segments of the petroleum industry and of industrial, municipal and private consumers, and shall in all cases be chaired by a regular full-time Federal employee.

(2) Meetings held to develop a voluntary agreement or a plan of action under this subsection shall permit attendance by interested persons and shall be preceded by timely and adequate notice with identification of the agenda of such meeting to the Attorney General, the Federal Trade Commission and to the public in the affected community;

(3) Interested persons shall be afforded an opportunity to present, in writing and orally, data, views and arguments at such meetings;

(4) A full and complete verbatim transcript shall be kept of any meeting, conference or communication held to develop, implement or carry out a voluntary agreement or a plan of action under this subsection and shall be taken and deposited, together with any agreement resulting therefrom, with the Attorney General and the Federal Trade Commission. Such transcript and agreement shall be available for public inspection and copying, subject to provisions of section 552(b) (1) and (b) (3) of title 5, United States Code.

(f) The Federal Trade Commission may exempt types or classes of meetings, conferences, or communications from the requirements of subsection (c) (3) and (e) (4) provided such meetings, conferences, or communications are ministerial in nature and are for the sole purpose of implementing or carrying out a voluntary agreement or plan of action authorized pursuant to this section. Such ministerial meeting, conference or communication may take place in accordance with such requirements as the Federal Trade Commission may prescribe by rule. Such persons participating in such meeting, conference or communication shall cause a record to be made specifying the date such meeting, conference, or communication took place and the persons involved, and summarizing the subject matter discussed. Such record shall be filed with the Federal Trade Commission and the Attorney General, where it shall be made available for public inspection and copying.

(g) (1) The Attorney General and the Federal Trade Commission shall participate from the beginning in the development, implementation and carrying out of voluntary agreements and plans of action authorized under this section. Each may propose any alternative which would avoid or overcome, to the greatest extent practicable, possible anticompetitive effects while achieving substantially the purposes of this Act. Each shall have the right to review, amend, modify, disapprove, or prospectively revoke, on its own motion or upon the request of any interested person, any plan of action or voluntary agreement at any time, and, if revoked, thereby withdraw prospectively the immunity conferred by subsection (i) of this section.

(2) Any voluntary agreement or plan of action entered into pursuant to this section shall be submitted in writing to the Attorney General and the Federal Trade Commission 20 days before being implemented, where it shall be made available for public inspection and copying.

(h) (1) The Attorney General and the Federal Trade Commission shall monitor the development, implementation and carrying out of plans of action and voluntary agreements authorized under this section to assure the protection and fostering of competition and the prevention of anticompetitive practices and effects.

(2) The Attorney General and the Federal Trade Commission shall promulgate joint regulations concerning the maintenance of necessary and appropriate documents, minutes, transcripts and other records related to the development, implementation or carrying out of plans of action or voluntary agreements authorized pursuant to this Act.

(3) Persons developing, implementing or carrying out plans of action or voluntary agreements authorized pursuant to this Act shall maintain those records required by such joint regulations. The Attorney General and the Federal Trade Commission shall have access to and the right to copy such records at reasonable times and upon reasonable notice.

(4) The Federal Trade Commission and the Attorney General may each prescribe such rules and regulations as may be necessary or appropriate to carry out their responsibilities under this Act. They may both utilize for such purposes and for purposes of enforcement, any and all powers conferred upon the Federal Trade Commission or the Department of Justice, or both, by any other provision of law, including the antitrust laws; and wherever such provision of law refers to "the purposes of this Act" or like terms, the reference shall be understood to be this Act.

(i) There shall be available as a defense to any civil or criminal action brought under the antitrust laws in respect of actions taken in good faith to develop and implement a voluntary agreement or plan of action to carry out a voluntary agreement by persons engaged in the business of producing, refining, marketing or distributing crude oil, residual fuel oil, or any refined petroleum product that—

(1) such action was—

(A) authorized and approved pursuant to this section, and

(B) undertaken and carried out solely to achieve the purposes of this section and in compliance with the terms and conditions of this section, and the rules promulgated hereunder; and

(2) such persons fully complied with the requirements of this section and the rules and regulations promulgated hereunder.

(j) No provision of this Act shall be construed as granting immunity for, nor as limiting or in any way affecting any remedy or penalty which may result from any legal action or proceeding arising from, any acts or practices which occurred: (1) prior to the enactment of this Act, (2) outside the scope and purpose or not in compliance with the terms and conditions of this Act and this section, or (3) subsequent to its expiration or repeal.

(k) Effective on the date of enactment of this Act, this section shall apply in lieu of section 6(c) of the Emergency Petroleum Allocation Act of 1973. All actions taken and any authority or immunity granted under such section 6(c) shall be hereafter taken or granted, as the case may be, pursuant to this section.

(l) The provisions of section 708 of the Defense Production Act of 1950, as amended, shall not apply to any action authorized to be taken under this Act or the Emergency Petroleum Allocation Act of 1973.

(m) The Attorney General and the Federal Trade Commission shall each submit to the Congress and to the President, at least once every six months, a report on the impact on competition and on small business of actions authorized by this section.

(n) The authority granted by this section (including any immunity under subsection (i)) shall terminate on May 15, 1975.

(o) The exercise of the authority provided in section 113 shall not have as a principal purpose or effect the substantial lessening of competition among carriers affected. Actions taken pursuant to that subsection shall be taken only after providing from the beginning an adequate opportunity for participation by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division, who shall propose any alternative which would avoid or overcome, to the greatest extent practicable, any anticompetitive effects while achieving the purposes of this Act.

Sec. 115. Exports.

To the extent necessary to carry out the purpose of this Act, the Administrator may under authority of this Act, by rule, restrict exports of coal, petroleum products, and petrochemical feedstocks, under such terms as he deems appropriate: Provided, That, the Administrator shall restrict exports of coal, petroleum products, or petrochemical feedstocks if either the Secretary of Commerce or the Secretary of Labor certifies that such exports would contribute to unemployment in the United States. The Secretary of Commerce, pursuant to the Export Administration Act of 1969 (but without regard to the phrase "and to reduce the serious inflationary impact of abnormal foreign demand" in section 3(2)(A) of such Act, may restrict the exports of coal, petroleum products, and petrochemical feedstocks, and of materials and equipment essential to the production, transport, or processing of fuels to the extent necessary to carry out the purpose of this Act and sections 4(b) and 4(d) of the Emergency Petroleum Allocation Act of 1973: Provided, That in the event that the Administrator certifies to the Secretary of Commerce that export restrictions of products enumerated in this section are necessary to carry out the purpose of this Act, the Secretary of Commerce shall impose such export restrictions. Rules under this section by the Administrator and actions by the Secretary of Commerce under the Export Administration Act of 1969 shall take into account the historical trading relations of the United States with Canada and Mexico and shall not be inconsistent with subsections (b) and (d) of section 4 of the Emergency Petroleum Allocation Act of 1973.

Sec. 116. Employment Impact and Unemployment Assistance.

(a) The President shall take into consideration and shall minimize, to the fullest extent practicable, any adverse impact of actions taken pursuant to this Act upon employment. All agencies of government shall cooperate fully under their existing statutory authority to minimize any such adverse impact.

(b) The President shall make grants to States to provide to any individual unemployed, if such unemployment resulted from the administration and enforcement of this Act and was in no way due to the fault of such individual, such assistance as the President deems appropriate while such individual is unemployed. Such assistance as a State shall provide under such a grant shall be available to individuals not otherwise eligible for unemployment compensation and individuals who have otherwise exhausted their eligibility for such unemployment compensation, and shall continue as long as unemployment in the area caused by such administration and enforcement continues (but not less than six months) or until the individual is reemployed in a suitable position, but not longer than two years after the individual becomes eligible for such assistance. Such assistance shall not exceed the maximum weekly amount under the unemployment compensation program of the State in which the employment loss occurred.

(c) On or before the sixtieth day following the date of enactment of this Act, the President shall report to the Congress concerning the present and prospective impact of energy shortages upon employment. Such report shall contain an assessment of the adequacy of existing programs in meeting the needs of adversely affected workers and shall include legislative recommendations which the President deems appropriate to meet such needs, including revisions in the unemployment insurance laws.

Sec. 117. Use of Carpools.

(a) The Secretary of Transportation shall encourage the creation and expansion of the use of carpools as a viable component of our nationwide transportation system. It is the intent of this section to maximize the level of carpool participation in the United States.

(b) The Secretary of Transportation is directed to establish within the Department of Transportation an "Office of Carpool Promotion" whose purpose and responsibilities shall include—

(1) responding to any and all requests for information and technical assistance on carpooling and carpooling systems from units of State and local governments and private groups and employees;

(2) promoting greater participation in carpooling through public information and the preparation of such materials for use by State and local governments;

(3) encouraging and promoting private organizations to organize and operate carpool systems for employees;

(4) promoting the cooperation and sharing of responsibilities between separate, yet proximately close, units of government in coordinating the operations of carpool systems; and

(5) promoting other such measures that the Secretary determines appropriate to achieve the goal of this subsection.

(c) The Secretary of Transportation shall encourage and promote the use of incentives such as special parking privileges, special roadway lanes, toll adjustments, and other incentives as may be found beneficial and administratively feasible to the furtherance of carpool ridership, and consistent with the obligations of the State and local agencies which provide transportation services.

(d) The Secretary of Transportation shall allocate the funds appropriated pursuant to the authorization of subsection (f) according to the following distribution between the Federal and State or local units of government:

(1) The initial planning process—up to 100 percent Federal.

(2) The systems design process—up 100 percent Federal.

(3) The initial startup and operation of a given system—60 percent Federal and 40 percent State or local with the Federal portion not to exceed 1 year.

(e) Within 12 months of the date of enactment of this Act, the Secretary of the Transportation shall make a report to Congress of all his activities and expenditures pursuant to this section. Such report shall include any recommendations as to future legislation concerning carpooling.

(f) The sum of $5,000,000 is authorized to be appropriated for the conduct of programs designed to achieve the goals of this section, such authorization to remain available for 2 years.

(g) For purposes of this section, the terms "local governments" and "local units of government" include any metropolitan transportation organization designated as being responsible for carrying out section 134 of title 23, United States Code.

(h) As an example to the rest of our Nation's automobile users, the President of the United States shall take such action as is necessary to require all agencies of Government, where practical, to use economy model motor vehicles.

(i)(1) The President shall take action to require that no Federal official or employee in the executive branch below the level of Cabinet officer be furnished a limousine for individual Use. The provisions of this subsection shall not apply to limousines furnished for use by officers or employees of the Federal Bureau of Investigation, or to those persons whose assignments necessitate transportation by limousines because of diplomatic assignment by the Secretary of State.

(2) For purposes of this subsection, the term "limousine" means a type 6 vehicle as defined in the Interim Federal Specifications issued by the General Services Administration, December 1, 1973.

Sec. 118. Administrative Procedure and Judicial Review.

(a)(1) Subject to paragraphs (2), (3), and (4) of this subsection, the provisions of subchapter II of chapter 5 of title 5, United States Code, shall apply to any rule or order (including a rule or order issued by a State or officer thereof) under this title (except with respect to any rule or order pursuant to sections 108 and 113 of this Act, section 205 (a), (b), and (c), of this Act, or section 4(h) of the Emergency Petroleum Allocation Act of 1973) or under the authority of any energy conservation plan.

(2) Notice of any proposed rule or order described in paragraph (1) shall be given by publication of such proposed rule or order in the Federal Register. In each case, a minimum of ten days following such publication shall be provided for opportunity to comment; except that the requirements of this paragraph as to time of notice and opportunity to comment may be waived where strict compliance is found to cause serious impairment to the operation of the program to which such rule or order relates and such findings are set out in detail in such rule or order. In addition, public notice of all rules or orders promulgated by officers of a State or political subdivision thereof or to State or local boards pursuant to this Act shall to the maximum extent practicable be achieved by publication of such rules or orders in a sufficient number of newspapers of statewide circulation calculated to receive widest possible notice.

(3) In addition to the requirements of paragraph (2), if any rule or order described in paragraph (1) is likely to have a substantial impact on the Nation's economy or large numbers of individuals or businesses, on opportunity for oral presentation of views, data, and arguments shall be afforded. To the maximum extent practicable, such opportunity shall be afforded prior to the implementation of such rule or order, but in all cases such opportunity shall be afforded no later than 45 days after the implementation of any such rule or order. A transcript shall be kept of any oral presentation.

(4) Any officer or agency authorized to issue rules or orders described in paragraph (1) shall provide for the making of such adjustments, consistent with the other purposes of this Act or the Emergency Petroleum Allocation Act of 1973 (as the case may be) as may be necessary to prevent special hardships, inequity, or an unfair distribution of burdens and shall in rules prescribed by it establish procedures which are available to any person for the purpose of seeking an interpretation, modification, or rescission of, or an exception to or exemption from, such rules and orders. If such person is aggrieved or adversely affected by the denial of a request for such action under the preceding sentence, he may request a review of such denial by the officer or agency and may obtain judicial review in accordance with subsection (b) when such denial becomes final. The officer or agency shall, in rules prescribed by it, establish appropriate procedures, including a hearing where deemed advisable, for considering such requests for action under this paragraph.

(5) In addition to the requirements of section 552 of title 5, United States Code, any agency authorized by this Act or the Emergency Petroleum Allocation Act of 1973 to issue rules or orders shall make available to the public all internal rules and guidelines which may form the basis, in whole or in part, for any rule or order with such modifications as are necessary to insure confidentiality protected under such section 552. Such agency shall, upon written request of a petitioner filed after any grant or denial of a request for exception or exemption from rules or orders furnish the petitioner with a written opinion setting forth applicable facts and the legal basis in support of such grant or denial. Such opinions shall be made available to the petitioner and the public within thirty days of such request and with such modifications as are necessary to insure confidentiality of information protected under such section 552.

(b)(1) Judicial review of administrative rulemaking of general and national applicability done under this Act may be obtained only by filing a petition for review in the United States Court of Appeals for the District of Columbia within thirty days from the date of promulgation of any such rule or regulation, and judicial review of administrative rulemaking of general, but less than national, applicability done under this Act may be obtained only by filing a petition for review in the United States Court of Appeals for the appropriate circuit within thirty days from the date of promulgation of any such rule or regulation, the appropriate circuit being defined as the circuit which contains the area or the greater part of the area within which the rule or regulation is to have effect.

(2) Nothwithstanding the amount in controversy, the district courts of the United States shall have exclusive original jurisdiction of all other cases or controversies arising under this Act, or under regulations or orders issued thereunder, except any actions taken by the Civil Aeronautics Board, the Interstate Commerce Commission, Federal Power Commission, or the Federal Maritime Commission, or any actions taken to implement or enforce any rule or order by any officer of a State or political subdivision thereof or State or local board which has been delegated authority under section 122 of this Act except that nothing in this section affects the power of any court of competent jurisdiction to consider, hear, and determine in any proceeding before it any issue raised by way of defense (other than a defense based on the constitutionality of this title or the validity of action taken by any agency under this Act. If in any such proceeding an issue by way of defense is raised based on the constitutionality of this Act or the validity of agency action under this Act, the case shall be subject to removal by either party to a district court of the United States in accordance with the applicable provisions of Chapter 89 of title 28, United States Code. Cases or controversies arising under any rule or order of any officer of a State or political subdivision thereof or a State or local board may be heard in either (1) any appropriate State court, and (2) without regard to the amount in controversy, the district courts of the United States.

(c) The Administrator may by rule prescribe procedures for State or local boards which carry out functions under this Act or the Emergency Petroleum Allocation Act of 1973. Such procedures shall apply to such boards in lieu of subsection (a), and shall require that prior to taking any action, such boards shall take steps reasonably calculated to provide notice to persons who may be affected by the action, and shall afford an opportunity for presentation of views (including oral presentation of views where practicable) at least 10 days before taking the action. Such boards shall be of balanced composition reflecting the makeup of the community as a whole.

SEC. 119. PROHIBITED ACTS.

It shall be unlawful for any person to violate any provision of title I of this Act (other than provisions of this Act which make amendments to the Emergency Petroleum Allocation Act of 1973 and section 113) or to violate any rule, regulation (including an energy conservation plan) or order issued pursuant to any such provision.

SEC. 120. ENFORCEMENT.

(a) Whoever violates any provision of section 119 shall be subject to a civil penalty of not more than $2,500 for each violation.

(b) Whoever willfully violates any provision of section 119 shall be fined not more than $5,000 for each violation.

(c) It shall be unlawful for any person to offer for sale or distribute in commerce any product or commodity in violation of an applicable order or regulation issued pursuant to this Act. Any person who knowingly and willfully violates this subsection after having been subjected to a civil penalty for a prior violation of the same provision of any order or regulation issued pursuant to this Act shall be fined not more than $50,000 or imprisoned not more than six months, or both.

(d) Whenever it appears to any person authorized by the Administrator to exercise authority under this Act that any individual or organization has engaged, is engaged, or is about to engage in acts or practices constituting a violation of section 119, such person may request the Attorney General to bring an action in the appropriate district court of the United States to enjoin such acts or practices, and upon a proper showing a temporary restraining order or a preliminary or permanent injunction shall be granted without bond. Any such court may also issue mandatory injunctions commanding any person to comply with any provision, the violation of which is prohibited by section 119.

(e) Any person suffering legal wrong because of any act or practice arising out of any violation of section 119 may bring an action in a district court of the United States, without regard to the amount in controversy, for appropriate relief, including an action for a declaratory judgment or writ of injunction. Nothing in this subsection shall authorize any person to recover damages.

SEC. 121. USE OF FEDERAL FACILITIES.

Whenever practicable, and for the purpose of facilitating the transportation and storage of fuel, agencies or departments of the United States are authorized, during the period beginning on the date of enactment of this Act and ending May 15, 1975, to enter into arrangements for the acquisition or use by domestic public entities and private industries of equipment or facilities which are surplus to the needs of such agency or department and appropriate to the transportation and storage of fuel, except that such arrangements may be made (1) only after the Administrator finds that such equipment or facilities are not available from private sources and (2) only on the basis of compensation for the acquisition or use of such equipment or facilities at fair market value prices or rentals.

SEC. 122. DELEGATION OF AUTHORITY AND EFFECT ON STATE LAW.

(a) The Administrator may delegate any of his functions under the Emergency Petroleum Allocation Act of 1973 or this Act to any officer or employee of the Federal Energy Emergency Administration as he deems appropriate. The Administrator may delegate any of his functions relative to implementation and enforcement of the Emergency Petroleum Allocation Act of 1973 or this Act to officers of a State or political subdivision thereof or to State or local boards of balanced composition reflecting the make-up of the community as a whole. Such officers or boards shall be designated and established in accordance with regulations as the Administration shall promulgate under this Act. Section 5(b) of the Emergency Petroleum Allocation Act of 1973 is repealed effective on the effective date of the transfer of functions under such Act to the Administrator pursuant to section 103 of this Act.

(b) No State law or State program in effect on the date of enactment of this Act, or which may become effective thereafter, shall be superseded by any provision of this Act or any regulation, order, or energy conservation plan issued pursuant to this Act except insofar as such State law or State program is inconsistent with the provisions of this Act, or such a regulation, order, or plan.

SEC. 123. GRANTS TO STATES.

Any funds authorized to be appropriated under section 127(b) shall be available for the purpose of making grants to States to which the Administrator has delegated authority under section 122 of this Act, or for the administration of appropriate State or local energy conservation programs which are the basis of an exemption made pursuant to section 105(a)(2) of this Act from a Federal energy conservation plan which has taken effect under section 105 of this Act. The Administrator shall make such grants upon such terms and conditions as he may prescribe by rule.

Sec. 124. Reports on National Energy Resources.

(a) For the purpose of providing to the Congress and the Departments of Interior and Justice, the States, and the public, to the maximum extent possible, reliable data on reserves, production, distribution, and use of petroleum products, natural gas, and coal, the Attorney General or the Secretary of the Interior, or both, shall promptly publish for public comment a regulation requiring that persons doing business in the United States, who, on the effective date of this Act, are engaged in exploring, developing, processing, refining, or transporting by pipeline, any petroleum product, natural gas, or coal, shall provide detailed reports to the Administrator every sixty calendar days. Such reports shall show for the preceding sixty calendar days such person's (1) reserves of crude oil, natural gas, and coal; (2) production and destination of any petroleum product, natural gas, and coal; (3) refinery runs byproduct; and (4) other data required by the Attorney General or the Secretary of the Interior for such purpose. Such regulation shall also require that such persons provide to the Attorney General or the Secretary of the Interior such reports for the period from January 1, 1970, to the date of such person's first sixty day report. Such regulation shall be promulgated 30 days after such publication. The Attorney General or the Secretary of the Interior shall publish guarterly in the Federal Register a meaningful summary analysis of the data provided by such reports.

(b) The reporting requirements of this section shall not apply to the retail operations of persons required to file such reports. Where a person shows that all or part of the data required by this section is being reported by such person to another Federal agency, the Attorney General or the Secretary of the Interior may exempt such person from reporting all or part of such data directly to him, and upon such exemption, such agency shall, notwithstanding any other provision of law, provide such data to the Attorney General or the Secretary of the Interior. The district courts of the United States are authorized, upon application of the Attorney General or the Secretary of Interior, to require enforcement of such reporting requirements.

(c) Upon a showing satisfactory to the Attorney General or the Secretary of the Interior by any person that any report or part thereof obtained under this section from such person or from a Federal agency would, if made public, divulge methods or processes entitled to protection as trade secrets or other proprietary information of such person, such report, or portion thereof, shall be confidential in accordance with the provisions of section 1905 of title 18 of the United States Code, except that such report or part thereof shall not be deemed confidential for purposes of disclosure to (1) any delegate of the Federal Energy Emergency Administration for the purpose of carrying out this Act, (2) the Attorney General or the Secretary of the Interior (or both) when necessary to carry out those agencies' duties and responsibilities under this and other statutes, and (3) the Congress or any Committee of Congress upon request of the Chairman. The provisions of this section shall expire on May 15, 1975.

Sec. 125. Intrastate Gas.

Nothing in this Act shall expand the authority of the Federal Power Commission with respect to sales of non-jurisdictional natural gas.

Sec. 126. Expiration.

The authority under this title to prescribe any rule or order or take other action under this title, or to enforce any such rule or order, shall expire at midnight May 15, 1975 (April 1, 1974, in the case of section 105), but such expiration shall not affect any action or pending proceedings, civil or criminal, not finally determined on such date, nor any action or proceeding based upon any act committed prior to midnight, May 15, 1975 (April 1, 1974, in the case of section 105).

Sec. 127. Authorization of Appropriations.

(a) There are authorized to be appropriated to the Federal Energy Emergency Agency to carry out its functions under this Act and under other laws, and to make grants to States under section 123, $75,000,000 for the fiscal year ending June 30, 1974, and $75,000,000 for the fiscal year ending June 30, 1975.

(b) For the purpose of making payments under grants to States under section 123, there are authorized to be appropriated $50,000,000 for the fiscal year ending June 30, 1974 and $75,000,000 for the fiscal year ending June 30, 1975.

(c) For the purpose of making payments under grants to States under section 116, there is authorized to be appropriated $500,000,000 for the fiscal year ending June 30, 1974.

Sec. 128. Severability.

If any provision of this Act, or the application of any such provision to any person or circumstance, shall be held invalid, the remainder of this Act, or the application of such provision to persons or circumstances other than those as to which it is held invalid, shall not be affected thereby.

Sec. 129. Price Authority.

The President shall exercise his authority under the Economic Stabilization Act of 1970, as amended, and the Emergency Petroleum Allocation Act of 1973 to specify prices for sales of crude oil, residual fuel oil or refined petroleum products in or imported into the United States which avoid windfall profits by sellers. For purposes of this section, windfall profits shall be defined as those profits which are excessive or unreasonable, taking into consideration normal profit levels. This section shall be effective only until December 31, 1974.

Sec. 130. Importation of Liquefied Natural Gas.

The Emergency Petroleum Allocation Act of 1973 is amended by adding at the end thereof the following new section:

"Sec. 8. Notwithstanding the provisions of section 3 of the Natural Gas Act (or any other provisions of law) the President may by order, on a finding that such action would be consistent to the public interest, authorize on a shipment-by-shipment basis the importation of liquefied natural gas from a foreign country: *Provided, however,* That the authority to act under this section shall not permit the importation of liquefied natural gas which had not been authorized prior to the date of expiration of this Act and which is in transit on such date."

TITLE II—COORDINATION WITH ENVIRONMENTAL PROTECTION REQUIREMENTS

Sec. 201. Suspension Authority

Title I of the Clean Air Act (42 U.S.C. 1857 et seq.) is amended by adding at the end thereof the following new section:

"ENERGY EMERGENCY AUTHORITY

"Sec. 119. (a)(1)(A) The Administrator may, for any period beginning on or after the date of enactment of this section and ending on or before November 1, 1974, temporarily suspend any stationary source fuel or emission limitation as it applies to any person, if the Administrator finds that such person will be unable to comply with such limitation during such period solely because of unavailability of types or amounts of fuels. Any suspension under this paragraph and any interim requirement on which such suspension is conditioned under paragraph (3) shall be exempted from any procedural requirements set forth in this Act or in any other provision of local, State, or Federal law; except as provided in subparagraph (B).

"(B) The Administrator shall give notice to the public of a suspension and afford the public an opportunity for written and oral presentation of views prior to granting such suspension unless otherwise provided by the Administrator for good cause found and published in the Federal Register. In any case, before granting such a suspension he shall give actual notice to the Governor of the State, and to the chief executive officer of the local government entity in which the affected source or sources are located. The granting or denial of such suspension and the imposition of an interim requirement shall be subject to judicial review only on the grounds specified in paragraphs (2)(B) and (2)(C) of section 706 of title 5, United States Code, and shall not be subject to any proceeding under section 304(a)(2) or 307 (b) and (c) of this Act.

"(2) In issuing any suspension under paragraph (1) the Administrator is authorized to act on his own motion without application by any source or State.

"(3) Any suspension under paragraph (1) shall be conditioned upon compliance with such interim requirements as the Administrator determines are reasonable and practicable. Such interim requirements shall include, but need not be limited to, (A) a requirement that the source receiving the suspension comply with such reporting requirements as the Administrator determines may be necessary, (B) such measures as the Administrator determines are necessary to avoid an imminent and substantial endangerment to health of persons, and (C) requirements that the suspension shall be inapplicable during any period during which fuels which would enable compliance with the suspended stationary source fuel or emission limitations are in fact reasonably available to that person (as determined by the Administrator). For purposes of clause (C) of this paragraph, availability of natural gas or petroleum products which enable compliance shall not make a suspension inapplicable to a source described in subsection (b)(1) of this section.

"(4) For purposes of this section:

"(A) The term 'stationary source' fuel or emission limitation' means any emission limitation, schedule, or timetable for compliance, or other requirement, which is prescribed under this Act (other than section 303, 111(b), or 112) or contained in an applicable implementation plan and which is designed to limit stationary source emissions resulting from combustion of fuels, including a prohibition on, or specification of, the use of any fuel of any type or grade or pollution characteristic thereof.

"(B) The term 'stationary source' has the same meaning as such term has under section 111(a)(3).

"(b)(1) Except as provided in paragraph (2) of this subsection, any fuel-burning stationary source (A) which is prohibited from using petroleum products or natural gas as fuel by reason of an order issued under section 106(a) of the Energy Emergency Act, or which the Administrator determines began conversion to the use of coal as fuel during the 90-day period ending on December 15, 1973, and (B) which converts to the use of coal as fuel, shall not, until January 1, 1979, be prohibited, by reason of the application of any air pollution requirement, from burning coal which is available to such source.

"(2)(A) Paragraph (1) of this subsection shall apply to a source, only if the Administrator finds that omissions from the source will not materially contribute to a significant risk to public health and if the source has submitted to the Administrator a plan for compliance for such source which the Administrator has approved, after notice to interested persons and opportunity for presentation of views (including oral presentations of views). A plan submitted under the preceding sentence shall be approved only if it provides (i) for compliance by the means, and in accordance with a schedule, which meets the requirements of subparagraph (B) and (ii) that such source will comply with requirements which the Administrator shall prescribe to assure that emissions from such source will not materially contribute to a significant risk to public health. The Administrator shall approve or disapprove any such plan within 60 days after such plan is submitted.

"(B) The Administrator shall prescribe regulations requiring that any source to which this subsection applies submit and obtain approval of its means for and schedule of compliance. Such regulations shall include requirements that such schedules shall include dates by which such source must (i) enter into contracts or other enforceable obligations for obtaining a long-term supply of coal or coal by-products (which contracts or obligations must have received prior approval of the Administrator), and (ii) take steps to obtain continuous emission reduction systems necessary to permit such source to burn such coal or coal by-products and to achieve the degree of emission reduction required by the following sentence (which steps and systems must have received prior approval of the Administrator). Such regulations shall also require that the source achieve as expeditiously as practicable considering the type of coal to be used (but not later than January 1, 1979) the same degree of emission reduction as if it was required to achieve by the applicable implementation plan in effect on the date of enactment of this section. Such regulations shall also include such interim requirements as the Administrator determines are reasonable and practicable including requirements described in clauses (A) and (B) of subsection (a)(3).

"(C) The Administrator (after notice to interested persons and opportunity for presentation of views, including oral presentations of views, to the extent practicable) (i) may, prior to November 1, 1974, and shall thereafter, prohibit the use of coal by a source to which paragraph (1) applies if he determines that the use of coal by such source is likely to materially contribute to a significant risk to public health; and (ii) may require such source to use coal of any particular type, grade, or pollution characteristic if such coal is available to such source. Nothing in this subsection (b) shall prohibit a State or local agency from taking action which the Administrator is authorized to take under this paragraph.

"(3) For purposes of this subsection, the "air pollution requirement" means any emission limitation, schedule, or timetable for compliance, or other requirement, which is prescribed under any Federal, State, or local law or regulation, including this Act (except for any requirement prescribed under this subsection or section 303), and which is designed to limit stationary source emissions resulting from combustion of fuels (including a restriction on the use or content of fuels). A conversion to coal to which this subsection applies shall not be deemed to be a modification for purposes of section 111(a)(2) and (4) of this Act.

"(4) A source to which this subsection applies may, upon the expiration of the exemption under paragraph (1), obtain a one year postponement of the application of any requirement of an applicable implementation plan under the conditions and in the manner provided in section 110(f).

"(c) The Administrator may by rule establish priorities under which manufacturers of continuous emission reduction systems shall provide such systems to users thereof, if he finds that priorities must be imposed in order to assure that such systems are first provided to users in air quality control regions with the most severe air pollution. No rule under this subsection may impair the obligation of any contract entered into before enactment of this section. No State or political subdivision may require any person to use a continuous emission reduction system for which priorities have been established under this subsection except in accordance with such priorities.

"(d) The Administrator shall study, and report to Congress not later than May 31, 1974, with respect to—

"(1) the present and projected impact on the program under this Act of fuel shortages and end-use allocation programs;

"(2) availability of continuous emission reduction technology (including projections respecting the time, cost, and number of units available) and the effects that continuous emission reduction systems would have on the total environment and on supplies of fuel and electricity;

"(3) the number of sources and locations which must use such technology based on projected fuel availability data;

"(4) priority schedule for implementation of continuous emission reduction technology, based on public health or air quality;

"(5) evaluation of availability of technology to burn municipal solid waste in these sources; including time schedules, priorities analysis of unregulated pollutants which will be emitted and balancing of health benefits and detriments from burning solid waste and of economic costs;

"(6) projections of air quality impact of fuel shortages and allocations;

"(7) evaluation of alternative control strategies for the attainment and maintenance of national ambient air quality standards for sulfur oxides within the time frames prescribed in the Act, including associated considerations of costs, time frames, feasibility, and effectiveness of such alternative control strategies as compared to stationary source fuel and emission regulations;

"(8) proposed allocations of continuous emission reduction technology for nonsolid waste producing systems to sources which are least able to handle solid waste byproduct, technologically, economicaly, and without hazard to public health, safety, and welfare; and

"(9) plans for monitoring or requiring sources to which this section applies to monitor the impact of actions under this section on concentration of sulfur dioxide in the ambient air.

"(e) No State or political subdivision may require any person to whom a suspension has been granted under subsection (a) to use any fuel the unavailability of which is the basis of such person's suspension (except that this preemption shall not apply to requirements identical to Federal interim requirements under subsection (a)(1)).

"(f)(1) It shall be unlawful for any person to whom a suspension has been granted under subsection (a)(1) to violate any requirement on which the suspension is conditioned pursuant to subsection (a)(3).

"(2) It shall be unlawful for any person to violate any rule under subsection (c).

"(3) It shall be unlawful for the owner or operator of any sources to fail to comply with any requirement under subsection (b) or any regulation, plan, or schedule thereunder.

"(4) It shall be unlawful for any person to fail to comply with an interim requirement under subsection (i)(3).

"(g) Beginning January 1, 1975, the Administrator shall publish at no less than 180-day intervals, in the Federal Register the following:

"(1) A concise summary of progress reports which are required to be filed by any person or source owner or operator to which subsection (b) applies. Such progress reports shall report on the status of compliance with all requirements which have been imposed by the Administrator under such subsections.

"(2) Up-to-date findings on the impact of this section upon—

"(A) applicable implementation plans, and

"(B) ambient air quality.

"(h) Nothing in this section shall affect the power of the Administrator to deal with air pollution presenting an imminent and substantial endangerment to the health of persons under section 303 of this Act.

"(i)(1) In order to reduce the likelihood of early phaseout of existing electric generating facilities during the energy emergency, any electric generating power plant (A) which, because of the age and condition of the plant, is to be taken out of service permanently no later than January 1, 1980, according to the power supply plan (in existence on the date of enactment of the Energy Emergency Act) of the operator of such plant, (B) for which a certification to that effect has been filed by the operator of the plant with the Environmental Protection Agency and the Federal Power Commission, and (C) for which the Commission has determined that the certification has been made in good faith and that the plan to cease operations no later than January 1, 1980, will be carried out as planned in light of existing and prospective power supply requirements, shall be eligible for a single one-year postponement as provided in paragraph (2).

"(2) Prior to the date on which any plant eligible under paragraph (1) is required to comply with any requirement of an applicable implementation plan, such source may apply (with the concurrence of the Governor of the State in which the plant is located) to the Administrator to postpone the applicability of such requirement to such source for not more than one year. If the Administrator determines, after balancing the risk to public health and welfare which may be associated with a postponement, that compliance with any such requirement is not reasonable in light of the projected useful life of the plant, the availability of rate base increases to pay for such costs, and other appropriate factors, then the Administrator shall grant a postponement of any such requirements.

"(3) The Administrator shall, as a condition of any postponement under paragraph (2), prescribe such interim requirements as are practicable and reasonable in light of the criteria in paragraph (2).

"(j)(1) The Administrator may, after public notice and opportunity for presentation of views in accordance with section 553 of title 5, United States Code, and after consultation with the Federal Energy Emergency Administration designate persons to whom fuel exchange orders should be issued. The purpose of such designation shall be to avoid or minimize the adverse impact on public health and welfare of any suspension under subsection (a) of this section or conversion to coal to which subsection (b) applies or of any allocation under the Energy Emergency Act or the Emergency Petroleum Allocation Act.

"(2) The Administrator of the Federal Energy Administration shall issue exchange orders to such persons as are designated by the Administrator under paragraph (1) requiring the exchange of any fuel subject to allocation under the preceding Acts effective no later than 45 days after the date of the designation under paragraph (1), unless the Administrator of the Federal Energy Administration determines, after consultation with the Administrator, that the costs or consumption of fuel, resulting from such exchange order will be excessive.

"(3) Violation of any exchange order issued under paragraph (2) shall be a prohibited act and shall be subject to enforcement action and sanctions in the same manner and to the same extent as a violation of any requirement of the regulation under section 4 of the Emergency Petroleum Allocation Act of 1973."

Sec. 202. Implementation Plan Revisions.

(a) Section 110(a) of the Clean Air Act is amended in paragraph (3) by inserting "(A)" after "(3)" and by adding at the end thereof the following new subparagraph:

"(B) (1) For any air quality control region in which there has been a conversion to coal under section 119(b), the Administrator shall review the applicable implementation plan and no later than one year after the date of such conversion determine whether such plan must be revised in order to achieve the national primary standard which the plan implements. If the Administrator determines that any such plan is inadequate, he shall require that a plan revision be submitted by the State within three months after the date of notice to the State of such determination. Any plan revision which is submitted by the State after notice and public hearing shall be approved or disapproved by the Administrator, after public notice and opportunity for public hearing, but no later than three months after the date required for submission of the revised plan. If a plan provision (or portion thereof) is disapproved (or if a State fails to submit a plan revision), the Administrator shall, after public notice and opportunity for a public hearing, promulgate a revised plan (or portion thereof) not later than three months after the date required for approval or disapproval.

"(2) Any requirement for a plan revision under paragraph (1) and any plan requirement promulgated by the Administrator under such paragraph shall include reasonable and practicable measures to minimize the effect on the public health of any conversion to which section 119(b) applies."

(b) Subsection (c) of section 110 of the Clean Air Act (42 U.S.C. 1857 C–5) is amended by inserting "(1)" after "(c)"; by redesignating paragraphs (1), (2), and (3) as subparagraphs (A), (B), and (C), respectively; and by adding the following new paragraph:

"(2) (A) The Administrator shall conduct a study and shall submit a report to the Committee on Interstate and Foreign Commerce of the United States House of Representatives and the Committee on Public Works of the United States Senate not later than May 1, 1974, on the necessity of parking surcharge, management of parking supply, and preferential bus/carpool lane regulations as part of the applicable implementation plans required under this section to achieve and maintain national primary ambient air quality standards. The study shall include an assessment of the economic impact of such regulations, consideration of alternative means of reducing total vehicle miles traveled, and an assessment of the impact of such regulations on other Federal and State programs dealing with energy or transportation. In the course of such study, the Administrator shall consult with other Federal officials including, but not limited to, the Secretary of Transportation, the Administrator of the Federal Energy Administration, and the Chairman of the Council on Environmental Quality.

"(B) No parking surcharge regulation may be required by the Administrator under paragraph (1) of this subsection as a part of an applicable implementation plan. All parking surcharge regulations previously required by the Administrator shall be void upon the date of enactment of this subsection. This subparagraph shall not prevent the Administrator from approving parking surcharges if they are adopted and submitted by a State as part of an applicable implementation plan. The Administrator may not condition approval of any applicable implementation plan submitted by a State on such plan's including a parking surcharge regulation.

"(C) The Administrator is authorized to suspend until January 1, 1975, the effective date or applicability of any regulations for the management of parking supply or any requirement that such regulations be a part of an applicable implementation plan approved or promulgated under this section. The exercise of the authority under this subparagraph shall not prevent the Administrator from approving such regulations if they are adopted and submitted by a State as part of an applicable implementation plan. If the Administrator exercises the authority under this subparagraph, regulations requiring a review or analysis of the impact of proposed parking facilities before construction which take effect on or after January 1, 1975, shall not apply to parking facilities on which construction has been initiated before January 1, 1975.

"(D) For purposes of this paragraph, the term 'parking surcharge regulation' means a regulation imposing or requiring the imposition of any tax, surcharge, fee, or other charge on parking spaces, or any other area used for the temporary storage of motor vehicles. The term 'management of parking supply' shall include any requirement providing that any new facility containing a given number of parking spaces shall receive a permit or other prior approval, issuance of which is to be conditioned on air quality considerations. The term 'preferential bus/carpool lane' shall include any requirement for the setting aside of one or more lanes of a street or highway on a permanent or temporary basis for the exclusive use of buses and/or carpools."

Sec. 203. Motor Vehicle Emissions.

(a) Section 202(b) (1) (A) of the Clean Air Act is amended by striking out "1975" and inserting in lieu thereof "1977"; and by inserting after "(A)" the following: "The regulations under subsection (a) applicable to emissions of carbon monoxide and hydrocarbons from light-duty vehicles and engines manufactured during model years 1975 and 1976 shall contain standards which are identical to the interim standards which were prescribed (as of December 1, 1973) under paragraph (5) (A) of this subsection for light-duty vehicles and engines manufactured during model year 1975."

(b) Section 202(b) (1) (B) of such Act is amended by striking out "1976" and inserting in lieu thereof "1978"; and by inserting after "(B)" the following: "The regulations under subsection (a) applicable to emissions of oxides of nitrogen from light-duty vehicles and engines manufactured during model years 1975 and 1976 shall contain standards which are identical to the standards which were prescribed (as of December 1, 1973) under subsection (a) for light-duty vehicles and engines manufactured during model year 1975. The regulations under subsection (a) applicable to emissions of oxides of nitrogen from light-duty vehicles and engines manufactured during model year 1977 shall contain standards which provide that emissions of such vehicles and engines may not exceed 2.0 grams per vehicle mile."

(c) Section 202(b) (5) (A) of such Act is amended to read as follows:

"(5) (A) At any time after January 1, 1975, any manufacturer may file with the Administrator an application requesting the suspension for one year only of the effective date of any emission standard required by paragraph (1) (A) with respect to such manufacturer for light-duty vehicles and engines manufactured in model year 1977. The Administrator shall make his determination with respect to any such application within 60 days. If he determines, in accordance with the provisions of this subsection, that such suspension should be granted, he shall simultaneously with such determination prescribe by regulation interim emission standards which shall apply (in lieu of the standards required to be prescribed by paragraph (1) (A) of this subsection) to emissions of carbon monoxide or hydrocarbons (or both) from such vehicles and engines manufactured during model year 1977."

(d) Section 202(b) (5) (B) of the Clean Air Act is repealed and the following subparagraphs redesignated accordingly.

Sec. 204. Conforming Amendments.

(a) (1) Section 113(a) (3) of the Clean Air Acts amended by striking out "or" before "112(c)", by inserting a comma in lieu thereof, and by inserting after "hazardous emissions)" the following: ". or 119(f) (relating to priorities and certain other requirements)".

(2) Section 113(b) (3) of such Act is amended by striking out "or 112(c)" and inserting in lieu thereof ", 112(c), or 119(f)".

(3) Section 113(c) (1) (C) of such Act is amended by striking out "or section 112(c)" and inserting in lieu thereof ", section 112(c), or section 119(f)".

(4) Section 114(a) of such Act is amended by inserting "119 or" before "303".

(b) Section 116 of the Clean Air Act is amended by inserting "119 (b), (c) and (e)," before "209".

Sec. 205. Protection of Public Health and Environment.

(a) Any allocation program provided for in title I of this Act or in the Emergency Petroleum Allocation Act of 1973, shall, to the maximum extent practicable, include measures to assure that available low sulfur fuel will be distributed on a priority basis to those areas of the country designated by the Administrator of the Environmental Protection Agency as requiring low sulfur fuel to avoid or minimize adverse impact on public health.

(b) In order to determine the health effects of emissions of sulfur oxides to the air resulting from any conversions to burning coal pursuant to section 106, the Department of Health, Education, and Welfare shall, through the National Institute of Environmental Health Sciences and in cooperation with the Environmental Protection Agency, conduct a study of chronic effects among exposed populations. The sum of $3,500,000 is authorized to be appropriated for such a study. In order to assure that long-term studies can be conducted without interruption, such sums as are appropriated shall be available until expended.

(c) No action taken under this Act shall, for a period of 1 year after initiation of such action, be deemed a major Federal action significantly affecting the quality of the human environment within the meaning of the National Environmental Policy Act of 1969 (83 Stat. 856). However, before any action under this Act that has a significant impact on the environment is taken, if practicable, or in any event within 60 days after such action is taken, an environmental evaluation with analysis equivalent to that required under section 102(2) (C) of the National Environmental Policy Act, to the greatest extent practicable within this time constraint, shall be prepared and circulated to appropriate Federal, State, and local government agencies and to the public for a 30-day comment period after which a public hearing shall be held upon request to review outstanding environmental issues. Such an evaluation shall not be required where the action in question has been preceded by compliance with the National Environmental Policy Act by the appropriate Federal agency. Any action taken under this act which will be in effect for more than a one year period (other than action taken pursuant to subsection (d) of this section) or any action to extend an action taken under this Act to a total period of more than 1 year shall be subject to the full provisions of the National Environmental Policy Act notwithstanding any other provision of this Act.

(d) Notwithstanding subsection (c) of this section, in order to expedite the prompt construction of facilities for the importation of hydroelectric energy thereby helping to reduce the shortage of petroleum products in the United States, the Federal Power Commission is hereby authorized and directed to issue a Presidential permit pursuant to Executive Order 10485 of September 3, 1953, for the construction, operation, maintenance, and connection of facilities for the transmission of electric energy at the borders of the United States without preparing an environmental impact statement pursuant to section 102 of the National Environmental Policy Act of 1969 (83 Stat. 856) for facilities for the transmission of electric energy between Canada and the United States in the vicinity of Fort Covington, New York.

SEC. 206. ENERGY CONSERVATION STUDY.

(a) The Administrator of the Federal Energy Administration shall conduct a study on potential methods of energy conservation and, not later than 6 months after the date of enactment of this Act, shall submit to Congress a report on the results of such study. The study shall include, but not be limited to, the following:

(1) the energy conservation potential of restricting exports of fuels or energy-intensive products or goods, including an analysis of balance of payments and foreign relations implications of any such restrictions;

(2) federally sponsored incentives for the use of public transit, including the need for authority to require additional production of buses or other means of public transit and Federal subsidies for the duration of the energy emergency for reduced fares and additional expenses incurred because of increased service;

(3) alternative requirements, incentives, or disincentives for increasing industrial recycling and resource recovery in order to reduce energy demand, including the economic costs and fuel consumption tradeoff which may be associated with such recycling and resource recovery in lieu of transportation and use of virgin materials;

(4) the costs and benefits of electrifying rail lines in the United States with a high density of traffic; including (A) the capital costs of such electrification, the oil fuel economies derived from such electrification, the ability of existing power facilities to supply the additional power load, and the amount of coal or other fossil fuels required to generate the power required for railroad electrification, and (B) the advantages to the environment of electrification of railroads in terms of reduced fuel consumption and air pollution and disadvantages to the environment from increased use of fossil fuel such as coal; and

(5) means for incentives or disincentives to increase efficiency of industrial use of energy.

(b) Within 90 days of the date of enactment of this Act, the Secretary of Transportation, after consultation with the Federal Energy Administrator, shall submit to the Congress for appropriate action an "Emergency Mass Transportation Assistance Plan" for the purpose of conserving energy by expanding and improving public mass transportation systems and encouraging increased ridership as alternatives to automobile travel.

(c) Such plan shall include, but shall not be limited to—

(1) recommendations for emergency temporary grants to assist States and local public bodies and agencies thereof in the payment of operating expenses incurred in connection with the provision of expanded mass transportation service in urban areas;

(2) recommendations for additional emergency assistance for the purchase of buses, and rolling stock for fixed rail, including the feasibility of accelerating the timetable for such assistance under section 142(a) (2) of title 23, United States Code (the "Federal Aid Highway Act of 1973"), for the purpose of providing additional capacity for and encouraging increased use of public mass transportation systems;

(3) recommendations for a program of demonstration projects to determine the feasibility of fare-free and low-fare urban mass transportation systems, including reduced rates for elderly and handicapped persons during nonpeak hours of transportation;

(4) recommendations for additional emergency assistance for the construction of fringe and transportation corridor parking facilities to serve bus and other mass transportation passengers;

(5) recommendations on the feasibility of providing tax incentives for persons who use public mass transportation systems.

(d) In consultation with the Federal Energy Administrator, the Secretary of Transportation shall make an investigation and study for the purpose of conserving energy and assuring that the essential fuel needs of the United States will be met by developing a high-speed ground transportation system between the cities of Tijuana in the State of Baja California, Mexico, and Vancouver in the Province of British Columbia, Canada, by way of the cities of Seattle in the State of Washington, Portland in the State of Oregon, and Sacramento, San Francisco, Fresno, Los Angeles and San Diego in the State of California. In carrying out such investigation and study the Secretary shall consider, but shall not be limited to—

(1) the efficiency of energy utilization and impact on energy resources of such a system, including the future impact of existing transportation systems on energy resources if such a system is not established;

(2) coordination with other studies undertaken on the State and local level; and

(3) such other matters as he deems appropriate.

The Secretary of Transportation shall report the results of the study and investigation pursuant to this Act, together with his recommendations, to the Congress and the President no later than December 31, 1974.

SEC. 207. REPORTS.

The Administrator of the Environmental Protection Agency shall report to Congress not later than January 31, 1975, on the implementation of sections 201 through 205 of this title.

SEC. 208. FUEL ECONOMY STUDY.

Title II of the Clean Air Act is amended by redesignating section 213 as section 214 and by adding the following new section:

"FUEL ECONOMY IMPROVEMENT FROM NEW MOTOR VEHICLES

"SEC. 213. (a)(1) The Administrator and the Secretary of Transportation shall conduct a joint study, and shall report to the Committee on Interstate and Foreign Commerce of the United States House of Representatives and the Committees on Public Works and Commerce of the United States Senate within 120 days following the date of enactment of this section, concerning the practicability of establishing a fuel economy improvement standard of 20 percent for new motor vehicles manufactured during and after model year 1980. Such study and report shall include, but not be limited to, the technological problems of meeting any such standard, including the leadtime involved; the test procedures required to determine compliance; the economic costs associated with such standard, including any beneficial economic impact; the various means of enforcing such standard; the effect on consumption of natural resources, including energy consumed; and the impact of applicable safety and emission standards. In the course of performing such study, the Administrator and the Secretary of Transportation shall utilize the research previously performed in the Department of Transportation, and the Administrator and the Secretary shall consult with the Administrator of the Federal Energy Administration, the Chairman of the Council on Environmental Quality, and the Secretary of the Treasury. The Office of Management and Budget may review such report before its submission to Congress but the Office may not revise the report or delay its submission beyond the date prescribed for its submission, and may submit to Congress its comments respecting such report. In connection with such study, the Administrator may utilize the authority provided in section 307(a) of this Act to obtain necessary information.

"(2) For the purpose of this section, the term 'fuel economy improvement standard' means a requirement of a percentage increase in the number of miles of transportation provided by a manufacturer's entire annual production of new motor vehicles per unit of fuel consumed, as determined for each manufacturer in accordance with test procedures established by the Administrator pursuant to this Act. Such term shall not include any requirement for any design standard or any other requirement specifying or otherwise limiting the manufacturer's discretion in deciding how to comply with the fuel economy improvement standard by any lawful means."

TITLE III—STUDIES AND REPORTS

SEC. 301. AGENCY STUDIES.

The following studies shall be conducted, with reports on their results submitted to the Congress:

(1) Within 30 days after the date of enactment of this Act:

(A) The Administrator of the Federal Energy Emergency Administration shall conduct a review of all rulings and regulations issued pursuant to the Economic Stabilization Act to determine if such rulings and regulations are contributing to the shortage of fuels and of materials associated with the production of energy supplies.

(B) All Federal departments and agencies including the Federal regulatory agencies, are directed to undertake a survey of all activities over which they have special expertise or jurisdiction and identify and recommend to the Congress and to the President specific proposals to significantly increase energy supply or to reduce energy demand through conservation programs.

(C) The Secretary of the Treasury and the Director of the Cost of Living Council shall recommend to the Congress specific incentives to increase energy supply, reduce demand, to encourage private industry and individual persons to subscribe to the goals of this Act. This study shall also include an analysis of the price-elasticity of demand for gasoline.

(D) The Administrator shall report to the Congress concerning the present and prospective impact of energy shortages upon employment. Such report shall contain an assessment of the adequacy of existing programs in meeting the needs of adversely affected workers, together with legislative recommendations appropriate to meet such needs, including revisions in the unemployment insurance laws.

The SPEAKER. Is a second demanded?

Mr. HOSMER. Mr. Speaker, I am opposed to the bill and demand a second.

The SPEAKER. Without objection, a second will be considered as ordered.

PARLIAMENTARY INQUIRY

Mr. DINGELL. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. DINGELL. Mr. Speaker, is the gentleman from California opposed to the bill?

Mr. HOSMER. Mr. Speaker, I just said that I was opposed to the bill.

Mr. DINGELL. Mr. Speaker, I just wanted to hear the gentleman say it.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

POINT OF ORDER

Mr. BAUMAN. Mr. Speaker, a point of order.

The SPEAKER. The gentleman will state it.

Mr. BAUMAN. Mr. Speaker, I make a point of order against this resolution because it, in effect, does nothing more than call up a matter that has already been voted on within the last half hour by this House.

Anyone who says it is not to the contrary has no authority, because no one has read it and we do not know the substance.

The SPEAKER. The Chair has read the resolutions, they have been read to the House, and the Chair has authority to recognize for motions to suspend the rules.

There are substantial differences, and the Chair has recognized the gentleman from West Virginia.

Mr. BAUMAN. Mr. Speaker, then I would like to request under the rules that it be read to the House.

The SPEAKER. It has been read. It has been read. If the gentleman wants the resolution rereported, the Chair will put the request.

The gentleman from West Virginia will be recognized for 20 minutes; the gentleman from California will be recognized for 20 minutes.

The Chair recognizes the gentleman from West Virginia, (Mr. STAGGERS).

Mr. STAGGERS. Mr. Speaker, we have copies of this report. There are plenty of them here, and every Member can get one, I am sure, and take a look at what is in the bill.

We made two changes as to what is in the conference report.

Mr. Speaker, I think that the bill has been discussed enough, but I will take just a minute or so to say that this is the conference report, with some deletions, that we are familiar with. Some things have been taken out, and I will go over them again, and then I will point out that we have further deleted one other section of the bill: windfall profits.

Mr. McKINNEY. Mr. Speaker, will the gentleman yield for just a moment?

Mr. STAGGERS. I yield to the gentleman from Connecticut.

Mr. McKINNEY. Mr. Speaker, I will ask the chairman of the committee; is it true that the conference report was available this morning for any Member who wanted to make the effort to get it sometime today?

Mr. STAGGERS. Sometime during the day, yes, sir.

Mr. McKINNEY. Right.

Mr. STAGGERS. Probably sometime this morning.

Mr. McKINNEY. Well, I had a copy of most of it by, I believe, as it was received from the committee.

Mr. STAGGERS. Yes, sir.

Mr. McKINNEY. Mr. Speaker, it is also true, is it not, as the gentleman explained at the time of the first vote we took which failed, that his motion was relative to that conference report, minus a few changes, which he outlined?

Mr. STAGGERS. The gentleman is correct.

Mr. McKINNEY. And at this particular time the gentleman is making one more change, which would allow the oil companies to make the profits which they have been making?

Mr. STAGGERS. The gentleman is correct.

Mr. McKINNEY. Mr. Speaker, is it also true, I will ask the chairman of the committee, that nobody has seen the Senate bill, and that the Senate came out with a bill that did not come from the House or from the conference committee, and the basic bill gives the President the power, with information locked away from the Congress?

Mr. STAGGERS. The gentleman is correct.

Mr. MILFORD. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. I yield to the gentleman from Texas.

Mr. MILFORD. Mr. Speaker, I am forced to rise in protest and vote "no" on this measure. I must vote in this manner because I simply do not know what is in this bill.

My total input of information, concerning the contents of this conference report and this bill, has been obtained by reading the Washington Post. Even the Washington Post does not know the entire contents of the bill.

My constituents did not send me to the Congress to vote "blind" on bills that come before the House, nor did they send me here to make important legislative decisions according to what is printed in the Washington Post.

My remarks are not made for the purpose of chastising any of my House colleagues, nor the Commerce Committee, nor my former colleagues in the press. I am simply and honestly addressing myself to the situation, concerning this bill, and the past events that have actually occurred.

Mr. Speaker, surely everyone recognizes that this is a very important and far-reaching measure. It is probably the most important bill to come on to this floor since World War II. This measure will directly affect every individual American, every business and every institution in this Nation. A vast new government bureaucracy is being created with unprecedented powers. This is a very complex bill.

Other than about a half-dozen joint conferees, there is not a single Member of this House that knows the contents of the bill that is before us. I cannot possibly vote for any bill under these circumstances. Furthermore, I protest the procedures and tactics under which this legislation was written and moved on to the floor.

The history of this piece of legislation reveals that we started with a deadline—Christmas adjournment. The House leadership classified this bill as "emergency legislation." Many Members did not agree with that classification, pointing out that the President had already been given authority to allocate fuel and to impose rationing, along with other powers necessary to conserve energy. We simply ask, "What is the emergency?"

Nonetheless, the Energy Emergency Act was introduced on November 13, 1973 and was reported out by the Commerce Committee in less than 1 month. It was very apparent to every Member that the imposed deadline, rather than careful consideration, was the determinate factor in getting the bill out of the Commerce Committee. In private conversations with committee members, I was shocked to learn the details of the committee's work.

During committee markup, I learned that over 100 amendments were offered. Well over half of these amendments were debated under a 10-minute time limitation. Over 30 amendments were debated with a 1-minute limitation. Obviously, under such circumstances, the committee had not given full consideration to all factors.

Immediately following Commerce Committee consideration, the bill was rushed to the Rules Committee. A rule was obtained wherein the required 3-day rule was waived and the bill was brought directly to the floor. Most important, no Member was able to see a copy of the bill until floor debate was started.

Mr. Speaker, as you well know, it is impossible for anyone to read a complicated legal bill while also listening to debate. Therefore, no Member was able to study and analyze the bill prior to debate. No Member could intelligently debate the bill.

Furthermore, the bill was brought on to the floor with a procedure that severely limited floor amendments by any member other than those who were on the Interstate and Foreign Commerce Committee. The fact that a very large number of amendments were introduced by committee members, while the bill was on the floor, provided evidence that the committee work had been incomplete.

During floor debate, over 100 amendments were offered. Only a very few were accompanied by meaningful debate. Over half of the amendments were read without any debate, without members having copies to study, without any discussion or explanation of the amendments, and with little or no understanding on the part of Members.

In the Joint Senate-House conference committee, according to the Washington Post, the bill was completely rewritten. It saddens me to have to use a daily newspaper as my only source of information, but that is the only source that I have. Even now as we consider the conference report, no Member has a copy of the bill nor the conference report, nor the Senate amendments. No member has the slightest idea about what he is voting on.

Mr. Speaker, I cannot vote in this manner. Furthermore, I protest this kind of procedure and I refuse to be a part of it.

As a freshman Member, I am willing to be guided by our experienced House leadership. If the leadership classifies this bill as "emergency legislation", I will be glad to give it full consideration. However, when I say "full consideration," I mean just that. I am not willing to vote blind on any bill just because a few senior Members say that it is important, even though I respect them very highly. To vote in such a manner would be a violation of the trust placed in me by my constituents.

I am willing to return to the House immediately after the Christmas holiday and work on this legislation. Or for that matter, I am willing to stay here during the holiday.

But, Mr. Speaker, I am totally unwilling to vote for this bill without having read a single word of its contents and without having an opportunity to carefully study the ramifications that it might have on my constituents.

Mr. RHODES. Mr. Speaker, will the gentleman yield for what I think will be a correction?

Mr. STAGGERS. Yes, I yield to the gentleman from Arizona.

Mr. RHODES. Mr. Speaker, as I understand the gentleman's bill and the Senate bill, the Senate bill provides for a veto on the part of the House and the Senate for conservation measures. It is not like the Gulf of Tonkin resolution which the gentleman from Connecticut mentioned. There are provisions for vetoes in the Senate bill.

Mr. STAGGERS. The gentleman is correct.

But I might say, Mr. Speaker, that is true, with the exception of the one thing, that there is no veto on the rationing in the bill at all.

As far as the other sections are concerned. I will go over them once more.

Section 103 has been amended to eliminate provisions which freed the Administrator of the Federal Emergency Energy Administration from various OMB controls.

Section 105, relating to emergency conservation regulations, has been changed to limit the duration of any regulation to April 1, 1974.

Section 124, which proposed to give the Administrator authority to call for reports on emergency reserves, has been amended to give this authority instead to the Department of Justice and the Department of the Interior of the United States.

Then section 110, dealing with windfall profits, has now been deleted.

There are no other changes from the conference report.

Mr. HOSMER. Mr. Speaker, I am going to yield time to two speakers.

I wish now to yield 6 minutes to the gentleman from North Carolina (Mr. RUTH).

Mr. RUTH. Mr. Speaker, I would like to explain to my colleagues why it would be a mistake to adopt this resolution or any other resolution or the conference report.

I recall a story about a baseball player who was playing third base, and he made three errors in a row, one on a fly ball, one on a ground ball, and another on a throw.

So the manager took him out and played third base himself. Then the manager made two errors, and he came to the dugout and said, "You have got third base so messed up that nobody can play it."

I do not know what is in this resolution, and I do not think I am alone in that.

With all respect to the chairman of the committee, he just made a remark that he did not know whether EPA was in this, and if he does not know what is in it, then who does?

Let us take a look, Mr. Speaker, at how this baseball game parallels this bill. We agreed that the bill was prepared hurriedly. We were not sure what would be best for the country, but our primary propelling force was that something was expected of us, so we are going to give them something whether we know what it is or not.

We tried to write the bill on the floor. I have always told my constituents that bills were prepared in the committee, and I found out I was right. We prepared it in the Committee of the Whole House, so I am considering putting on my stationery that I am on the Committee of the Whole House on the State of the Union.

Then we wanted to make sure we never got any glimpse of our objective.

So we started voting on the amendments without having them explained. We stayed in the dark.

Now we are being asked again to vote on something without any knowledge of what it is. Now, I voted "present" on most of the amendments, and there was a whole group of Members who did likewise because we did not know what was going on. I had never voted "present" before, but I had to do so this time.

I voted "aye" on final passage so that the Members of the conference could clean up the bill. Well, they really cleaned it up. They took the antibusing amendment clean out of it. Of course, this had passed the House twice, and only failed in the Senate by one vote.

The bill has no accommodation from ecology, none at all. We are going to have the prettiest, cleanest, cold, and broke country in this world, with few jobs, but all of them safe—and no way to get to them.

Now, more importantly than our overreaction to ecology and safety in bringing this energy crunch to the place we now have it, is our interference with the free enterprise system. We became the land of plenty through free enterprise. Controls have helped put us where we are today. Also we get duped by titles. We call this an energy bill. We might just as well call it a nonenergy bill. It guarantees scarcities and it encourages strikes, which we have been seeing develop all over the country.

The biggest problem that I have seen us face in this House is to eradicate bad legislation, and I have not seen it in the 5 years I have been present here.

So if you have any doubts about what is in the bill, I encourage you to vote against it.

I would like to close with just one other little story—not because it is new, but because it is so apropos:

There was an individual who was extremely successful, so successful that a young man went up to him and said, "To what do you attribute your success?" And he said, "Young man, I cannot give you the formula for success, but I can tell you the formula for failure, and that is to try to please everybody."

Mr. STAGGERS. Mr. Speaker, I yield 3 minutes to the gentleman from Michigan (Mr. DINGELL).

Mr. DINGELL. Mr. Speaker, I rise to pay tribute to my friend and colleague, the gentleman from West Virginia, the Honorable HARLEY STAGGERS. The gentleman has proceeded with great patience and great caution through great difficulty. He has worked night and day, in committee and in conference and on the floor, and this body owes him a vote of confidence in sincere tribute for his earnest, able, and honorable efforts on behalf of this body. He has been a man of not only patience and great integrity, but he has worked hard and he has done his best. The House, I think, has done its best, and I think that the other body—I must say with regret—has done its worst.

The question before us now, tonight, is simply whether we are going to write a bill that is going to carry out the agreements honorably made between this body and the other body, or whether we will supinely let a small group of willful men over there dictate to the country, to the Senate, and to the House, by the utilization of the filibuster, alone, as to what shall go into this legislation.

The question is not what the issue is, because the issue is a very simple one. We brought this legislation to you. We explained it clearly in the conference report. We brought the legislation to you, and it was explained clearly in other papers presented to the body. And this legislation has been rather clearly explained in the discussion before us.

But the fact of the matter is that what is involved here is really very simple, and that is whether or not this body is going to lay down, roll over and play dead for the other body and for the oil companies.

As I say, what is at issue here is a very simple thing: Profits for the oil companies, windfall profits, if you please—not the ordinary level of profits, but whether they should be able to continue to double, redouble, and double again their profits in the forthcoming years, as they have been doing in the time of this crisis. That is what is at stake.

And, in the case of the oil companies, we will find that, while everybody else is asked to tighten their belts, to conserve, give up driving, and other luxuries and necessities, the oil companies are making a killing.

Now, it should be understood that there is an abundance of legislation on the books.

Affording the President authority to allocate, to ration and to meet the crisis in the energy field.

If we forego the opportunity here, all we will have is a vote on special interest, oil industry, dictated legislation.

Let us legislate indefinitely and put forward worthwhile legislation meeting the public need.

I have loyally supported this legislation, partly out of respect for my chairman, partly out of the fact that there were good things in it, and partly out of an awareness that politically we are going to be denounced by the man in the White House if we do not go for this legislation.

But the hard fact of the matter is that the President right now has authority to control prices and profits. The President right now has authority fully to allocate fuels. The President has authority right now to ration. The other things in this bill are mostly only vague in character and can be considered when we return.

What I would suggest to my colleagues is to vote "no" on this legislation at this time, as I intend to do. Let us go home. Let us see what the people think. Let us have a time to consider this legislation before us with more care. Let us adjourn, and let us vote this legislation down and come back and get worthwhile legislation that will control windfall profits. Let us legislate under conditions more productive of the public interest and less of special interest service.

The SPEAKER. The time of the gentleman has expired.

Mr. STAGGERS. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. Roe).

Mr. ROE. Mr. Speaker, I have listened intently to the hearts and the minds and the souls of the people who have spoken here tonight. I do not believe there is anyone in this House, man or woman, who has spoken against his country. But would it be so wrong to call upon the Members' attention to remember one thing. Who is the master and who is the governed? There is one thing that is important to all of us tonight, and that is what about the people of America? We have spoken loudly and clearly about vested interests, and who hurts whom. But the important thing that the American people are talking about is not windfall profits or who is going to get what out of this bill. The American people are asking us to do one thing on Christmas Eve: "For God's sake, do something for us," the 230 million people strong who look to our eyes and our hearts to be human beings and fulfill the responsibility that we accepted when we ran for public office.

We said to them, "Come vote for us because we want to go to the House of Representatives and we want to go to the Senate, and we want to speak for our people, because we believe in our country and we believe we can help our people."

All of this debate has been about can we or can we not? Are we capable? There are 435 people strong in this House who can speak and say it as it ought to be said. The American people are saying one thing to us. They are not talking about whose ox is gored. They are asking us to do one simple, basic thing: Give us equity; give us fair play; give us an opportunity to be part of this country; yes, speak for us. Yes, go home. Yes, tell us what you did on Christmas Eve for your country.

Merry Christmas, Mr. Speaker, what we ought to do is sit down, with reasonable, decent people who want to help to resolve this critical problem. I want to go home to my people and not talk about oil, not talk about who failed or who won or lost. I want to vote for a bill, but I want to vote for a bill that is fair to John Q. Public Citizen, the decent people who are making this country run and not politicians.

The SPEAKER. The time of the gentleman has expired.

Mr. STAGGERS. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. Carey).

Mr. CAREY of New York. Mr. Speaker, I served on the Interior Committee of this House for 10 years, during which time I joined with the gentleman from Massachusetts (Mr. Conte) and many others to warn of the dangers of the oil import program. I wrote a minority report back in 1968 indicating we were getting into this fix. It had to happen because of the oil import quota system. No one listened then. Please listen now.

Mr. Simon, who has undertaken the responsibility of controlling the energy shortage, needs some legislative enactment to conduct the program. This is our last chance to act before that shortage becomes more severe and unmanageable. It is later than we think.

Mr. Speaker, I served for most of my adult life after I graduated from law school in the energy field. I know how serious this situation has become. We have already lost the opportunity to cope with the shortage through more than 20 percent of the heating season. If we drag on, the worst season will be upon us. The heating and lighting and power shortage will hit harder in January and February and March. The people will blame the Congress that went home in December without doing something about it.

Mr. Speaker, this is our last chance to meet the light, heat, and power shortage that is bound to occur.

If we are worrying about excess profits, I sit now on the Committee on Ways and Means. Chairman Mills of that committee has said he is going to bring forth a tax measure that will cope in a proper way with excess profits. That can only be done by an exact accounting system conducted by the IRS, and that is not in any bill. Product shortage and profit shortage are separate problems and should be handled that way.

Give the Committee on Ways and Means a chance when it sits in January to look at the profits structure and come out with a bill that we can pass on both sides to allow that there is a reasonable profit but no excess profits. That is when we can do that but tonight is the night to cope with the shortage that is going to occur in the first quarter of 1974. If we do not do this, Congress will have failed to meet the duty that we have to do to cope with the shortage. Give Mr. Simon a chance to conduct this program.

If you defeat this bill the only alternative is the Senate bill and that I fear is an unknown quantity and probably unacceptable.

The next vote is our last chance to get a temporary bill to carry us through this winter. Let us not miss that chance.

Mr. HOSMER. Mr. Speaker, I yield 3 minutes to the gentleman from Arizona, the minority leader (Mr. Rhodes).

Mr. RHODES. Mr. Speaker, I dislike opposing the latest proposal offered by the gentleman from West Virginia. He has certainly tried and tried very diligently to get a bill and I am going to help him get a bill. But I cannot help him this way for one very simple reason.

I just called the distinguished minority whip of the Senate. He tells me that there is no chance there is a quorum of the Senate in this city tonight. He says there is a chance that there might be one tomorrow but he is not sure at all that there will be one.

Let us understand this. This bill is just about the same as the bill which we voted down previously. We voted it down because we wanted a law, and I think most of us understood that the only way we can be sure of getting a law and getting one tonight in a form which deals effectively with the energy crisis is to take the Senate-passed bill, pass it, and send it to the President.

So Mr. Speaker, I ask that once again there be a "No" vote on this proposal and that we then if the gentleman from West Virginia is willing to give us a vote on the Senate bill, see whether we want to take it or whether we do not. I think it is time to do that.

Mr. STAGGERS. Mr. Speaker, I want to say to the gentleman again if we take this Senate bill, which I cannot do, it denies this Congress from knowing what is going on in this legislation, and how can we legislate when we do not know?

Mr. RHODES. Mr. Speaker, I respectfully have to differ with the gentleman from West Virginia. I do not know what there is about this bill which shuts off our right to know. Will the gentleman explain?

Mr. STAGGERS. Yes. In our bill we ask for certain things to be revealed so we can legislate in the area with knowledge. If we do not know, we cannot.

Mr. RHODES. But the gentleman from West Virginia knows full well that the bill which passed the House and passed the Senate is still in conference, and if the gentleman desires to take it out of conference after January 21 he can do so and provide for these reports.

Mr. STAGGERS. Let me say I am not going to take up the Senate bill which will deny to this House knowledge which we need to have to legislate in an area where we do not know what we are doing.

Mr. RHODES. I just cannot lend credence to the proposition that the gentleman from West Virginia would deny this House the only chance it has to pass an adequate bill before we go home. The country needs it, our constituents are entitled to it.

Mr. O'NEILL. Mr. Speaker, will the gentleman yield?

Mr. RHODES. I yield to the majority leader.

Mr. O'NEILL. Mr. Speaker, has the time come when we accept the statement of the minority leader that we should act on the basis of what is the feeling of the minority whip of the Senate? In other words, this House should act tonight because the Senate minority leader says something?

Mr. RHODES. I did not say that. I said the minority whip of the Senate said there is no doubt there is no quorum tonight and there is a doubt there will be one tomorrow.

Mr. O'NEILL. I have been told in the Senate that there is a quorum available.

Mr. RHODES. If the gentleman wants to spend Christmas in this Chamber I will spend it with him.

Mr. STAGGERS. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. ROY).

Mr. ROY. Mr. Speaker, I want to thank the chairman for making this resolution available to the House to vote upon because I think it gives each of us a chance to say clearly how we feel about windfall profits, because this is the only difference between the previous one and this one.

We cannot wait for the Senate Finance and the Ways and Means Committees to act with respect to windfall profits. I have reason to believe that at this time there are tens of millions of dollars in excess, unreasonable, and windfall profits going to the oil companies each day and hundreds of millions of dollars each week, and billions of dollars each month. Why?

Just this week Secretary of the Treasury Mr. Shultz proposed that we tax crude oil only on increase above the base price, that is the price reflecting a reasonable and normal profit. He proposed, we not tax the first 25 cents that we tax the next 35 cents at a rate of 10 percent and so until after $2.5 above base we levy at tax of 85 percent. He estimated this tax on excess profits on crude oil alone would bring into the Treasury of the United States an estimated $3 to $5 billion during the first year.

I want to submit to my colleagues that the excess profits retained by the oil companies would be multiples of that $3 to $5 billion it is estimated would accrue to the Treasury of the Unted States under the proposal floated 2 days ago by the Secretary of the Treasury.

I do not think we can wait while such profits pile up. I think we must now direct the President to specify prices to avoid windfall profits. Moreover, there has to be a remedy and a definition and for this reason I urge a vote of "no" on this resolution which strikes windfall profit reduction.

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. STAGGERS. Mr. Speaker, I yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Speaker, we are informed that the Ways and Means Committee and the Senate Finance Committee are going to consider this matter of windfall profits. The man who is filibustering the legislation before us in the Senate right now is the chairman of the Senate Finance Committee. He is opposed to putting controls on oil company profits. How much chance does this show there is for fair consideration of fair excess profits tax legislation at any early time. The answer is not much. Not much at all.

Mr. STAGGERS. Mr. Speaker, I yield 2 minutes to the gentleman from Massachusetts (Mr. MACDONALD).

Mr. MACDONALD. Mr. Speaker, I thank the gentleman for yielding to me.

I am pragmatic enough to know that I am not going to change any minds, and I am not about to try to do that.

However, I would like all the Members to know, who have not had the opportunity to serve, as I have, with our chairman of the Interstate and Foreign Commerce Committee and seeing him work day in and day out with his whole heart and his whole soul, with every ability at his command, they can have nothing but the highest respect for the man HARLEY STAGGERS.

Mr. Speaker, it does ill repute to anyone in this body to derogate in any way any such man. We should be proud to have him, as I am, among our membership.

The SPEAKER. The question is on the motion offered by the gentleman from West Virginia (Mr. STAGGERS) that the House suspend the rules and agree to the House resolution (H. Res. 760).

The question was taken, and the Speaker announced that the noes appeared to have it.

RECORDED VOTE

Mr. STAGGERS. Mr. Speaker, on that I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 22, noes 240, not voting 170, as follows:

Mr. Young of Texas with Mr. Widnall.

PROVIDING FOR AGREEING TO SENATE AMENDMENT TO HOUSE AMENDMENT WITH AN AMENDMENT TO AMEND S. 921, WILD AND SCENIC RIVERS ACT

Mr. STAGGERS. Mr. Speaker, I move to suspend the rules and agree to House resolution (H. Res. 761) to take from the Speaker's table the Senate bill S. 921, to amend the Wild and Scenic Rivers Act, with a Senate amendment to the House amendment thereto, and agree to the Senate amendment to the House amendment with an amendment.

The Clerk read as follows:

H. Res. 761

Resolved, That immediately upon the adoption of this resolution the bill S. 921, with the Senate amendment to the House amendment thereto, be, and the same is hereby, taken from the Speaker's table to the end that the Senate amendment be, and the same is hereby, agreed to.

The SPEAKER. Is a second demanded?

Mr. DINGELL. Mr. Speaker, I demand a second, and I demand tellers.

Mr. BAUMAN. Mr. Speaker, I demand a second.

The SPEAKER. Is the gentleman opposed to the resolution?

Mr. BAUMAN. I am.

The SPEAKER. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER. The gentleman from West Virginia (Mr. Staggers) will be recognized for 20 minutes, and the gentleman from Maryland (Mr. Bauman) will be recognized for 20 minutes.

Mr. STAGGERS. Mr. Speaker, I again rise and say that it has been a trying situation and an emotional situation. I have now come to the point of offering the bill sent over by the Senate for the consideration of the House.

Mr. BAUMAN. Mr. Speaker, I yield 5 minutes to the gentleman from North Carolina (Mr. Broyhill).

Mr. BROYHILL of North Carolina. Mr. Speaker, I know that the hour is getting late, and we have had a trying session tonight. To say that the session has been confused is an understatement, but I believe this country is looking to us for some leadership.

This bill, if we can pass it, can go to the President's desk. He can sign it. Actually, the bill that we are about to vote upon, I note, is not going to be defended by the chairman. It looks as though I am the only one here who has to do it.

We have the Energy Emergency Act that is contained in the conference report. We are in this situation. If we want a bill, this is the bill that we can send to the President's desk tonight. Title I of the Senate-passed bill is the same as in the conference report, except that title I expires in the Senate-passed bill, the bill that we are considering right now, on April 1, 1974, rather than May 15, 1975, as in the conference report bill. In addition, the Senate-passed bill eliminates section 110 which was in the conference report, which was the so-called windfall profits section. In addition, in section 124, the Senate-passed bill said that in the energy resources report section, the authority to obtain these reports would be vested in the Department of Justice and the Department of the Interior.

Also, there is a change in section 103 which creates the Federal Energy Administration, and that is to strike subsection (d) of section 103 which is in the conference report. This refers to certain reporting requirements of the Federal Energy Administrator.

I know there is controversy here, but it seems to me that we have a chance to act to do something about the crisis which is before us.

The bill that is before us has the same procedures as the conference report, copies of which are available to the Members, that is, that energy conservation plans that are promulgated and implemented by the Administrator would be subject to review, would be subject to oversight, would be subject to the 15 legislative days disapproval procedure, the same thing that is in the conference report.

It seems to me that this is a reasonable compromise. There are some, including the administration, who said that they wanted these energy conservation plans implemented without any congressional oversight. This bill, it seems to me, would be a reasonable compromise in recognizing the need for congressional partnership, one might say, in implementing these energy conservation plans.

I would think that the House would want to act on this bill tonight in order to send it to the President's desk, have it signed, get this issue out of the way, and, above all, see that these programs that are contained in this bill, particularly those in title II relating to emission standards, relating to auto emissions as well as stationary emissions, be put into effect expeditiously and not wait another several months to pass another bill.

Mr. HOSMER. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL of North Carolina. I yield to the gentleman from California.

Mr. HOSMER. Mr. Speaker, I thank the gentleman very deeply and sincerely for saying such nice things about my scenic rivers bill. I hope everybody will vote for it tonight.

Mr. MILFORD. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL of North Carolina. I yield to the gentleman from Texas.

Mr. MILFORD. Mr. Speaker, I congratulate the gentleman in the well. He holds in his hands a conference report which my staff has been trying to obtain all day long today and was unable to. I understand the gentleman wants this House to vote on the bill which none of us has ever seen and on a conference report which none of has ever seen.

Mr. BROYHILL of North Carolina. I will say the conference reports are available here. I see Members who have had conference reports today.

This bill is of course complicated. I do not know how the gentleman voted when the bill came out of the House, but, speaking for one who has lived with this bill for the last month, I say that the Senate-passed bill is a workable bill, it is one in which we can get some action on this energy crisis, and we can do it now and not delay until next year.

I hope the gentleman will support this bill. To do otherwise means further delay.

Mr. KETCHUM. Mr. Speaker, will the gentleman yield?

Mr. BROYHILL of North Carolina. I yield to the gentleman from California.

Mr. KETCHUM. Mr. Speaker, is section 103 in the bill, the allocations section?

Mr. BROYHILL of North Carolina. The allocations section is in section 104.

Mr. KETCHUM. If the gentleman will yield further I would like to ask a question.

Mr. BROYHILL of North Carolina. Section 104 is the rationing section. I might say what this section does is this. The President already has the authority to ration and I think all of us recognize that, under past authority we have given him authority to impose rationing. What this bill does is to go further and say no rule under this section can impose a tax or surcharge. I would think this is a good provision. At least I believe it is.

Mr. KETCHUM. I will go further now to the question the gentleman has already stated, that these powers already exist, but in the bill we had a provision for congressional veto on rationing. That is no longer in this bill. Is that correct?

Mr. BROYHILL of North Carolina. That is correct.

Mr. KETCHUM. Mr. Speaker, for 3 days last week, this body worked long into the night debating the Energy Emergency Act. After pending before the Congress for several weeks, this bill was pushed through the House with unseemly haste, which precluded close scrutiny of its provisions. We did not even have the time to debate scores of amendments to this terrible bill which was badly in need of amendment. Certainly, this was the case with the amendment offered by my esteemed colleague, the gentleman from Pennsylvania (Mr. JOHN HEINZ), which restored to the Congress the power to vote on a program of gasoline rationing.

Mr. Speaker, in my mind this was the most important amendment to this bill, and as I pointed out in my remarks last week it certainly deserved more time for debate. I am delighted, however, that it was included in the House version of the bill. The time has passed for the Congress to stop talking about reasserting its lost authority and do something to get it back. That is what this amendment was all about. It precluded simply passing over to the executive branch the power to institute a massive program of rationing without even a vote in Congress.

Now we are informed that this bill will not include this vital amendment. Once more, the Congress will grant extraordinary powers to the President and shirk from its responsibility to face this crisis squarely. I deplore this action on the part of our conferees in retreating from the fight, and thus I shall not vote for this bill which simply grants more power to the executive branch and absolves Congress from its proper role and responsibilities.

Mr. BAUMAN. Mr. Speaker, I yield 2 minutes to the gentleman from New York (Mr. HASTINGS).

Mr. HASTINGS. Mr. Speaker, I thank the gentleman from Maryland for yielding.

I will be brief. I think it is important we understand what is in title II of this bill again. I heard a great deal of comment on this floor when we passed the House bill and particularly from the gentlemen from the State of California, among others, who were concerned with the Environmental Protection Agency's right to impose parking surcharges in their respective States.

If the gentlemen want to remove that right, they will approve this bill because we suspend the right of EPA to impose a parking surcharge under title II of this bill. If we want to take away from EPA the right to impose that and have congressional authority to implement the parking plan which says they will tell Members where they can in their State build buildings, then we have to have title II.

I can only repeat if we want to have powerplants in this country convert from petroleum to coal, the only way we can do it is if title II is approved.

If we want to have auto emissions standards suspensions, and I might say that these are a modification and compromise between the Senate and House versions, which still protects the right of the environment, then we must approve title II.

This is the only opportunity we now have available to us. If we want to achieve those things, then we vote for this bill.

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. HASTINGS. I yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, am I not right that the existing authority of the Environmental Protection Agency to extend the time for requiring automobile changes has been changed and can waive present requirements? So while existing law does not require extension of the time, the law authorizing the requirements also provides for waiver.

Mr. HASTINGS. I would answer the gentleman by saying the Environmental Protection Agency has advised our committee they are not interested in waiving or suspending any of the existing standards.

Mr. WHITTEN. The question I asked had to do with the authority to postpone. I sincerely believe we will require a postponement, a waiver, and authorize removal of existing expensive and gas-consuming devices.

Mr. JAMES V. STANTON. Mr. Speaker, we are led to believe that we are left with no alternative, but I think there is an alternative.

Rather than vote for a bill which represents what the major oil companies and what the President want, the alternative is to come back on January 4 or 5 and go to work and complete a bill that is not put to us by a gun summoned by Senator LONG or those other interests in the Senate.

If this House had the courage and the will and the fortitude, it would not willy-nilly submit itself to this process that it is now going through. If the character and the strength of the leadership of this House was what it has been saying it was going to do all year, making the legislative branch of the Government a viable force here in the United States that could be supported by the will of the American people, then they would take the courage and the action of calling this House back on January 5 and acting on an energy bill that is not dictated by the oil interests and by Richard Nixon.

Mr. BAUMAN. Mr. Speaker, I yield 2 minutes to the gentleman from Michigan (Mr. HUBER).

Mr. HUBER. Mr. Speaker, I am very concerned. I do not know what happened to the busing situation. As I understand it, that provision was taken out of the bill.

Mr. Speaker, as I understand it, at this late hour, this great representative body that is supposed to be of the people, by the people, and for the people, are going to vote for something that is going to make sure that the kids get bused. Then we would be doing a great disservice to the people and I ask my fellow Congressman to vote "no."

Mr. DINGELL. Mr. Speaker, will the gentleman yield?

Mr. HUBER. Mr. Speaker, I yield to the gentleman from Michigan.

Mr. DINGELL. Mr. Speaker, I thank the gentleman for his kindness and say that he is right. If the Members want another chance to get the busing provisions back, vote no on the bill and we will get another chance.

Mr. BAUMAN. Mr. Speaker, I yield 1 minute to the distinguished minority leader, the gentleman from Arizona (Mr. Rhodes).

Mr. RHODES. Mr. Speaker, this is the only way to get an energy bill tonight. I respectfully submit that this is a bill which should be passed. It is a bill which the people of the United States expect us to pass.

Mr. Speaker, I hope that we will vote "aye," and pass this bill.

Mr. STAGGERS. Mr. Speaker, I yield 4 minutes to the gentleman from California (Mr. Holifield).

Mr. HOLIFIELD. Mr. Speaker, I am going to vote "no" on this bill. I have three oil fields in my district; one in my home town of Montebello; one in President Nixon's former home town of Whittier; and one in Santa Fe Springs. In addition, my district is very near the great Long Beach oil field, which my friend from California (Mr. Hosmer), represents. So let no one say that I do not have oil interests in my district.

But I want to read something to the Members, and this was in the Congressional Record this week, put in by my friend from Illinois (Mr. Price):

> The increase in profits in the third quarter of Exxon was 81 percent; of Mobil 64 percent; of Texaco 48 percent; Gulf 91 percent.

That is the increase in profits. Every time they put a penny increase on a gallon of gasoline they take in $1 billion. Mr. Shultz testified on that before the Ways and Means Committee. This is what we are letting ourselves in for.

The conference report requires statistics on the amount of oil in this country so that we could base equitable prices to control the profits on an equitable basis. It requires a limit on windfall profits. There is no limit on windfall profits in the Senate bill.

We talk about getting a bill tonight—I was in Bethesda three times this week. I am as tired and I am as weak as any man in this body right now, but I will stay here; I will come back on the fifth of January, the second or third or any other time to take the time that is necessary to fight this thing out. I do not mean under a suspension of the rules, but if we have to stay another 3 days—and I pay tribute to the gentleman from West Virginia for the extremely difficult legislative job that he has tried to do under conditions of extreme pressure and limited time.

Mr. Speaker, I say we are not handling this legislation the way it should be handled. I am willing to go home and tell my people that I did not vote for a bill that I thought was wrong. I am willing to tell them that I think it is wrong for these oil companies to get the excessive profits they are getting without any let or hindrance.

We are going to ask the people to sacrifice in many ways. We should have equitable sharing and that means that the oil companies should be willing to earn normal profits—not excessive profits.

This problem is a national problem. It needs an equitable solution. The sacrifices should be shared across the board by the great corporations as well as the mass of our people.

I could ask my people to take rationing, but that can be put on in another bill, and not this bill, and the allocations can be put on in another bill, not under this bill, for fuel oil and that sort of thing.

This vote is going to draw the line between the men and the boys.

Mr. STAGGERS. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. Roy).

Mr. ROY. Mr. Speaker, when I go home I am frequently asked, "Where were you when the energy crisis was developing?" I assume all of us in this Chamber are asked that question.

Of course, each of us has a different answer.

I submit to the Members that if we fail to put in a windfall profits section, when we go home we are going to be asked, "Where were you when prices were going up and profits were going up correspondingly?"

I am personally not willing to say to my people that during the week that crude oil prices were raised $1 by the Cost of Living Council without any attempt to justify on basis of costs I, in my rush to go home, caved in to the other body and passed an energy bill with no windfall profits restriction provision.

So, Mr. Speaker, I urge a "no" vote on the bill.

Mr. BAUMAN. Mr. Speaker, I yield such time as he may consume to the gentleman from North Carolina (Mr. Mizell).

Mr. MIZELL. Mr. Speaker, I have asked for this time to ask the gentleman from Kansas this question:

Was he not the Member who offered the amendment that exempted the oil companies that were producing 25,000 barrels a day from the windfall profits section?

Mr. ROY. Mr. Speaker, I appreciate that question. But we have a problem of the big fish eating the little fish, and those little fish will not survive. The big fish will have all the oil, and there would be nothing the gentleman from North Carolina or myself could do about it.

Mr. MIZELL. The company who produces 25,000 barrels of oil per day should have benefit from windfall profits, under the gentleman's amendment.

Mr. BAUMAN. Mr. Speaker, I yield 1 minute to the gentleman from Illinois (Mr. Derwinski).

Mr. DERWINSKI. Mr. Speaker, I hate to speak after the distinguished diplomats who have just addressed themselves to the subject, but the fact of life is that we face a bill that none of us have seen, and that none of us really know and, notwithstanding any exaggerated oratory, none of us knows who is benefiting or who is suffering.

The administrator of whatever program is on the books will struggle through between now and the 21st or the 28th of January, without any action tonight. They could go on through the end of February without any real action by this Congress, and I do not really understand why at this time of the night and under these conditions we should be voting in favor of a bill that none of us really understand.

Mr. Speaker, this bill will affect every living American, everybody in every Member's district, and I just do not understand the rationale of voting through a bill that will so directly affect every Member's constituent without more than one or two Members understanding what they are really doing.

Mr. Speaker, I suggest we vote down the pending issue.

Mr. BAUMAN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in opposition to the pending resolution, the fragile vehicle to which fate has attached what is suddenly become the compromise emergency energy legislation.

If for no other reason, I and other Members of the House should oppose this illegitimate offspring of the energy crisis because of the manner in which it is being presented to us on this cold and snowy almost-Christmas eve. Do any of us really know what is contained in this proposal so new that the ink is not even dry? After 4 exhausting days of debate on the previous emergency energy bill and this legislative sideshow we have seen tonight we should have learned at least one thing; that this entire subject is far more complex and the need for solutions far too grave to address it in such a slipshod and unparliamentary manner. We have nothing here to recommend the contents of this brand new surprise package other then the bland assurances of its midwives who have also been called into emergency service tonight. Have any of us even had the chance to read what this so-called compromise says?

It is my understanding that the bill as passed by the other body within the last few hours gives to the President and the executive branch almost unlimited power over the energy crisis for a period of 60 days. Does this mean that the President can impose a tax on gasoline as a means to discourage use? Does it mean that he can slap on a bureaucratic system of rationing? Can he issue more and more regulations over which the Congress will have little or no control?

I for one am opposed to rationing and taxes as a means to solve the energy crisis and I think all of us in Congress should have the final say on what is to be done.

Mr. Speaker, it amazes me to see the representatives of the people of this great Nation so willing to turn over to the executive branch the life and death power over the national economy and the lives of every one of our citizens. I want a chance to cast a vote on any plans that will affect my constituents and as I see it, this legislation may well deny me that right by placing all power in the hands of the Executive.

Where are the champions of the powers of Congress now? Where are those who have cried out against Executive usurpation of the powers of the national legislature? I for one was not sent here to surrender the power of Congress to any President of either party, and especially not the power over the grave crisis we are facing with regard to energy. I am opposed to this bill and I believe that those who support it will live to see the day that they will regret their action.

The SPEAKER. Will the Members of the House give the Chair their attention. The electronic equipment is out of order. It is evident that it is not going to be repaired in time to finish this bill tonight. The Chair knows of no way in which to handle this matter except by a rollcall vote, and to combine with the rollcall vote any Member whose name is recorded who has left.

The question is on the motion offered by the gentleman from West Virginia (Mr. STAGGERS) that the House suspend the rules and agree to the resolution, House Resolution 761.

The question was taken.

Mr. DINGELL. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 36, nays 228, not voting 168, as follows:

[Roll No. 723]

Mr. Zwach with Mr. Wyman.
Mr. McClory with Mr. Hruska.
Mr. Young of Texas with Mr. Widnall.
Mr. Brown of Michigan with Mr. Clay.

The result of the vote was announced as above recorded.

ENERGY LEGISLATION

Mr. MALLARY. Mr. Speaker, I deplore the tactics under which this emergency energy bill is brought to us tonight. We have not had an opportunity to study and understand the substance of the conference agreement. We do not have before us nor have we had explained the Senate amendments which are proposed to be added to this bill. Neither have we seen nor do we have the substance of H.R. 12128 which we are being asked to adopt tonight.

I fully recognize the need for energy conservation measures in this crisis. I also fully recognize the need to prevent excessive profiteering by any company in the energy business. A bill needs to be passed. The Congress must act responsibly, but it is not responsible to act after 40 minutes' debate without fully understanding the substance of what this bill attempts to do.

I am willing to come back tomorrow, or Sunday, or next week to act on this critical subject. I will not be railroaded into voting in ignorance on this matter merely to speed the Christmas recess.

Therefore, Mr. Speaker, I must vote "No" on this motion.

Mr. KEMP. Mr. Speaker, I take this time to explain why I voted against enactment of the proposed National Emergency Energy Act.

I believe this bill is worse than no bill at all—much worse. In reality, this bill mandates gas rationing; and, if one would ever want to see further shortages of gasoline, this bill will produce them. Just witness what happened after the freeze on beef prices—the beef shortage was upon us. These bills do not add one barrel of oil or gas to our consumer's needs, but it does mandate rationing as I said earlier.

The President already has all the authority he needs to do what should be done—phase out phase IV regulations and decontrol petroleum, as was done with two other vital industries—cement and fertilizers. He does not have authority to impose new taxes and I for one do not believe he should be given that authority. When other industries were decontrolled, the reason given in both instances was to increase production. Well, Mr. Speaker, that is exactly what is needed to end the petroleum shortage—and, for that matter, other shortages.

The true market price of petroleum products would then rise and we would have to curtail any runaway prices or excessive profiteering at the people's expense. We would, also, have to make sure that middle- and low-income individuals are particularly protected. But, as production is increased, prices will fall again, plus research and development will, by then, have provided new sources of energy. This happened in the early middle of the 19th century when whale oil was our chief source of fuel; as it became more scarce, the price rose and created exactly the incentive needed to develop newer sources of energy. Petroleum and its development and expansion was the result.

Let me explore further my opposition to this hastily devised and poorly considered legislation which will affect us and our free economy well into the next decade.

Important laws affecting the lives of all the American people are considered and passed in this Chamber on almost a daily basis. Each is, we must trust, the product of careful consideration by its sponsor, a legislative committee, the Committee on Rules, the leadership, and this body as a whole. The Congress has passed many good laws, and it has passed some less-than-good laws, and we must not forget that good laws tend to engender more good laws while bad laws produce more bad laws.

We are, today, at the point of embarkation on the direction this Nation will follow in getting through, and eventually resolving, the energy crisis. If we, by the enactment of this legislation, set a certain course of action into motion, it will be hard to reverse or redirect it if we perceive at a later date that we have made a mistake. Subsequent statutes, regulations, policies, programs, agencies, and Federal employees—as well as the private sector—will have proceeded down one direction. It will be difficult to rechannel that momentum. The Congress must, therefore, be assured that it is, in fact, about to go in the right direction before it launches this massive effort.

It is seldom that a matter comes to this Chamber which is an all black or white, all issues clear-cut measure, but at the time of final passage one cannot vote 60 percent this way, 40 percent that way. One must vote all "yea" or all "nay;" there is really no viable third alternative.

I have weighed carefully the countervailing aspects of the legislation now before us—the proposed National Emergency Energy Act, as reported by the House-Senate committee on conference. On the whole, I do not believe this legislation to be worthy of the support of the Members of this House.

The conference reported bill has a number of major problem areas. I believe the bill should be sent back to conference, with instructions from this body to correct those problem areas. What are they?

LAWMAKING POWER GIVEN TO THE EXECUTIVE

First, the bill constitutes a virtually unparalleled abrogation of constitutional powers by the Congress, giving to the Executive actual lawmaking power. It gives such far-reaching powers to the Executive as to raise reasonable doubts about its constitutional validity, if court tests—as I am sure they will—arise from its implementation.

The Constitution, in article 1, gives to the Congress, as the legislative branch, the sole power to make law. And, consistent with the principles of separation of powers, article 2 gives to the Executive the sole power to carry out those laws. The bill before us runs counter to this principle, surely in spirit and, most probably, in letter.

Under the allocation of scarce fuels plan embodied in this bill, a plan of a Federal agency could be put into immediate effect and remain in effect until March 1, 1974. From March 1, 1974, until June 30, 1974, such a plan would have to be delivered to each House but would then go into automatic effect in 15 days if not vetoed. Third, thereafter, the Federal agency could only submit proposals for ordinary legislative enactment.

I suggest this plan is so unrealistic as to the exercise of congressional powers, as to actually deny those powers. The track record of congressional deliberations does not indicate great ability to do anything in 15 days, much less thoroughly review a proposal as major as allocation of scarce resources. Nonaction would put the stamp of legislative approval on executive legislation, and that is what the bill really authorizes—"executive legislation." Congress will have abdicated in favor of the Executive. The Executive can pass law outside the reach of Congress during the period while Congress is not in session—from this week until January 21; and, until March 1, 1974, the Executive can make law effective immediately.

Stated briefly, the issue is whether the Executive, through its agencies, should be given authority to legislate, generally, in all areas in which the agency director finds that such action is simply "necessary to reduce energy consumption." The Executive could do such things, for examples, as establish highway speeds, limit the use of fuels by businesses and industries, direct mandatory carpools, direct mandatory rationing and allocation schemes, establish priorities—according to its standards and not those of Congress—among users, ban various types of lighting, et cetera, without presenting the matter to Congress until after such law or laws went into effect during the recess. After the recess and until June 30, 1974, the Executive could so legislate, but the Congress could exercise that unrealistic, 15-day veto power. I do not believe the people want this concentration of power.

Our form of government is essential to the preservation of our rights and liberties. That form arose from the infringements on rights and liberties which infringements grew out of government without adequate balances and separations of powers. It would be easy to simply vote "yea" today, turning one's back on this issue, but to do so, in my opinion, is to show yet one more example where Congress is willing to surrender power to the Executive because it cannot make the hard, crucial-choice decisions which we are elected to make on the people's behalf.

When we look at what we are about to do—in essence, launch a program that will affect directly the lives and wellbeing of every citizen of our Nation—I think prudence alone mandates a more careful—and more constitutionally defensible—approach be taken. Such a measure would certainly have wider support.

As I stated in an address to this House during final consideration of the House version:

> This bill, if it becomes law, would usher in a virtual economic dictatorship, giving to the Executive an unparalleled peacetime control over the arteries of our economy, and

I, Mr. Chairman, want no part of such an abrogation of economic and political freedom. The shrill cries which we hear in this Chamber today are not dissimilar to those cries we heard for the imposition of wage and price controls—a plan which has turned out to be one of the most dismal records of failure by government in modern times. The Congress ought never to be stampeded into a giving to the Executive of control over our very lives through regulation of our resources.

It has been said, "If you liked the beef shortage, you'll love the mandatory fuel allocation bill." It is unfortunate that such an astute observation may have to be proved—to the people's, the economy's, the Nation's detriment, for nothing in this conference report convinces me that my prior observations are not still applicable.

As the last point on this subject of congressional abrogation, one should note that there is nothing in this omnibus bill which could not be made the subject of individual bills—each treated fully on its respective merits.

BILL DOES NOT ADEQUATELY ENCOURAGE PRODUCTION

I have spoken on a number of occasions during recent weeks and days on the tremendous need for Government policies to foster increases in production. One of the principal reasons for the energy shortage is the inadequate production of fuels.

It is more appropriate for government policy to encourage increased production, from which all reasonable demands could be met, than to try to ration a shortage.

The Washington Post has reported that it will take an expenditure of $130 billion—that is $130,000,000,000—for the petroleum industry alone to bring its production up to meet the demand level anticipated. That will require a return on investments of 18 percent during the foreseeable future, a return greatly discouraged by the provisions of this legislation.

I do not believe in giving the oil industry all the profits it wants; I oppose that. Profits must be reasonably balanced with the capacity of the people to pay higher prices; there must be middle ground; 95 percent of profits will go for developing and exploring for new sources of gas and oil. I even support the elimination of the controversial oil depletion allowance, when profits are otherwise generated for reinvestment. But, I do not believe that we should cripple the capacity of the industry to produce the fuels that our Nation so badly needs. This legislation goes in the same crippling direction as did the price freeze—and it, too, will not work.

Unrealistic price controls, particularly in the natural gas industry, have caused dislocations and misallocations in the economy, have produced over consumption of that fuel and under consumption of others. Misdirected tax policies have contributed to a decline in the rate of capital formation requisite for reinvestments. These are but two of many examples.

This Congress ought to concentrate on increasing production. If we do not, we will prolong the crisis, and I think it would be most unfortunate if the finger can be pointed back at the Congress as the reason for a prolongation of this crisis. Certainly, the people would hold the Members responsible for such a fiasco—and they should.

THE BILL DOES NOT HELP THE CONSUMER

An overriding concern which I have shared with other Members, throughout this national debate on how to resolve the energy crisis, has been the potentially adverse impact of measures being proposed on the individual—the consumer—the low- and middle-income taxpayer.

The role of the consumer is central to a market economy. By the use of free choice and individual selection of the goods and commodities he wishes to buy, the consumer is a bellwether on where industry ought to concentrate its output and production capabilities. On the economic well-being of the consumer rests the vitality and the purchasing power essential to maintaining national production—from which jobs and salaries flow naturally.

The distinguished and respected gentlewoman from Oregon (Mrs. GREEN) reflected the attitudes of the American consumer with a clarity which deems repeating:

> I think the American citizen will make the necessary sacrifices on an individual basis when facing any real national crisis. The majority, the big majority, will respond to a national crisis in a very commendable way if—and I put the emphasis on the word "if"—if they believe their sacrifices are borne in an equitable and fair way.

I agree wholeheartedly with that observation. Because the American consumer treasures more than just material wealth and his pocketbook, he has been willing to sacrifice. He is willing to suffer a little economic hardship, if he feels others are sharing that hardship with him. He is not willing to surrender his freedom to Government regulators.

That is why—despite modestly higher prices—he still prefers the marketplace—which puts him in the decisionmaking process at its most crucial point—over the strictures of a regulated economy—which puts the bureaucracy in that decisionmaking, focal point. Freedom is worth a little more, and the American consumer knows that. What he asks for is simple: He asks that his sacrifices be shared by the sacrifices of others. If he feels that he is being treated unfairly, that other users are given—by government regulation—what he perceives to be unfair advantages over him, then the line is drawn. That must be avoided.

The American consumer has lived through shortages—and rationing—before. He has struggled, persevered, and survived. But those crises were the results of necessities imposed by wartime conditions. This immediate crisis is of a very different nature, for even though the crisis was intensified greatly by the curtailment of shipments of oil from the Arab States to our country, it was also produced by misdirected government policies and regulatory schemes which discouraged production. There can be little wonder why the American consumer questions why he must now sacrifice because government policy was misdirected or too shortsighted. I share his concern.

The consumer is also concerned over the effects of an allocation—mandatory rationing—system upon him and his livelihood. Not only does it threaten his work and his income, and the security of his family arising therefrom, but the use of such ameliorative measures can actually extend the time frame for the long-range alleviation of the crisis. Why? Because rationing can become a crutch which Government and industry lean upon, living thereby with inadequate resources, rather than being compelled by necessity to concentrate with fullest urgency on the production of additional resources.

We must never fail to hold in the highest regard the decisions and values of our consumers—the individual people of America. In the long run they are very perceptive and know what is best for them and the Nation. They should never be sold short by an elitist philosophy which espouses that government can do better for the people than they can do for themselves. The consumer is, as I have indicated, the mainstay of the economy. We should treat him with more respect than we do by allowing this "economic Gulf of Tonkin" bill to pass.

WHAT IS A BETTER ALTERNATIVE?

It is not unfair to ask of me, since I am voting against this bill, "What would you do instead?"

I would approach the issue from the following premise: A concerted nationwide effort to resolve the immediate aspects of the energy crisis must consist of measures on three levels:

First, demand must be reduced. To the extent possible, this should be done through voluntary conservation measures—carpools, use of mass and urban transportation systems, use of lighter and more efficient automobiles, elimination of nonessential trips, et cetera.

Second, present supplies must be allocated in the most efficient manner. This is not achieved by arbitrary and mandatory government regulatory schemes for rationing; the market place is the most efficient and fairest allocator of scarce resources.

Third, supply must be increased. Rather than living with inadequate supplies, we must increase them.

Unfortunately, the bill before us fails, in varying degree, in all of these three areas. Instead of offering incentives for reduction in fuel uses, the bill relies upon the basic approach of compulsory rationing, resulting in less efficient uses than those which would result from a market allocation system. Lastly, the bill does not offer incentives sufficient for increases in supply, except in the one noticeable area of coal. Otherwise, returns on investments are too severely limited to provide adequate capital with which to increase supply to a fully adequate level.

A wide range of methods available for substantially increasing production—the real answer to resolving this crisis—are either not dealt with, or are dealt with inadequately, in this bill. These measures include:

Construction of deepwater ports at which tankers can discharge their crude oil supplies for pumping to shore refineries:

Accelerated development of offshore oil exploration and recovery;

Additional construction of refineries with which to process new volumes of crude oil;

The enactment of various tax incentives for more efficient uses of fuels, both home, travel, and industry;

Increasing production of natural gas;

Removal of those artificial price controls which are strangling production;

An expansion of basic research and applied demonstration projects for more efficient uses of presently used fuels and for discovering and harnessing new or experimental fuel sources.

I think, Mr. Speaker, that it should be obvious that those who oppose the enactment of the specific provisions of the bill before us are not obstructionist, Members without answers—better answers. I think the path outlined and the initiatives suggested are preferable to those embodied in the present bill.

Mr. PERKINS. Mr. Speaker, during my years in the Congress I have devoted a considerable amount of time and effort to bring the Congress attention to the great benefits in the potential use of coal in much greater quantities than presently prevail. I know that these efforts have been recognized, but I regret that it has taken an energy crisis to really bring the potential of coal to center stage. However, we need to continue to move ahead—to move on and solve this problem, and for that reason I would like to make the following statement. I think it will help us see the proper way to move on.

First I will discuss a general energy policy. After setting the stage with that discussion, I will point out how national energy needs can be and must be met by the utilization of coal.

AN ADEQUATE NATIONAL ENERGY DEVELOPMENT PROGRAM

The nature and magnitude of our country's energy shortage is coming into sharp focus. We shall, for the long term, have substantially higher real costs for energy than in our historic national experience. Higher real costs are unavoidable. We are threatened with national dependence, for energy, on the political vagaries of a bloc of foreign nations. This dependence is entirely avoidable. The choice is ours, and ours the decision as to the adequacy or failure of our initiative.

Many things have contributed to the present crisis. These include, on the demand side, a U.S. consumption of energy rising steadily for more than a decade at an annual average rate well above 4 percent per annum, while our accredited government experts persisted in forecasting that this growth would fall toward 3 percent. So, in a decade, the national energy requirements came to be greatly higher than had been foreseen. On the supply side, there was a leveling off of domestic production of crude oil and natural gas, a reduced usage of coal, and a very disappointing rate of completion of nuclear plants. The Federal Government moved ahead very slowly in offshore leasing for oil and gas explorations. The Government hardly moved at all in forwarding the development of substitute oils and gases, oils and gases which can be derived from our abundant coal and shale deposits.

The extent of our shortfall in domestic energy resources is indicated by the fact that since 1970 our import volume of petroleum has almost doubled and, just prior to the outbreak of hostilities in the Middle East last October, imports represented 35 percent of U.S. petroleum supplies—nearly half of which originated in Arab nations.

In short, through lack of foresight and a chronic unwillingness to face unpleasant facts, we permitted our vital national interests to be held hostage by a concert of foreign powers dedicated to the attainment of their individual and collective goals, regardless of any cost to our country and its allies.

Now, like the grasshopper in the fable which indulged its short-term pleasures at the expense of its long-range necessities, we face ill-heated homes, hospitals and schools, rising unemployment and the grim prospect of economic recession and threatened impairment of our capabilities for leadership in the free world.

The cost of reversing this intolerable trend will be immense. But as a Nation, we must bear it. In God's providence, we are blessed with a great and relatively untapped resource potential. It is our most urgent duty to develop it for the good of all our people.

As a first approach, we must form a realistic conception of the size of the task. Responsible estimates indicate the need for an investment between 1970 and 1985 of probably as much as $500 billion to bring the level of our energy supplies to an acceptable level of self-sufficiency. That is more than the national debt. And to carry out a project of such enormous magnitude will require a national effort on an unprecedented scale.

It is tempting, of course, to assume that the job can be done by the private sector. The American free enterprise system, with its marvelous technological capabilities and associated financial institutions, is thus assumed to need little but token assistance or some shared research money from the public treasury. This indeed seems to be the fundamental assumption of the Nixon administration, which has so far set a goal of national energy self-sufficiency in ten years, relying mainly on the resources of the private sector and on a pathetically small and unimaginative Federal program to stimulate and strengthen the private effort, while devoting its major attention to devising means for administering scarcity as we queue up to receive our quotas of gasoline and heating oil.

The period of austerity must be reduced to a minimum and normal rates of growth restored through a marshaling of all our resources to achieve a level of domestic energy availability which will sustain our economic aspirations.

For that purpose, business as usual with reliance on free market forces is inadequate to meet the conditions of today's world. The risks involved far exceed the resources of the free enterprise system. Private firms cannot be expected to withstand the economic warfare of a concert of nation states. Further, the Arab nations enjoy the enormous advantages of vast petroleum resources acquired at little cost to them and with only insignificant costs of production. By contrast, we face the certain prospect of unknown costs to produce conventional supplies from new sources and to develop costly sources of substitute feedstocks and fuels. Finally, the Arab States, having complete control of output, can regulate the flow so as to flood world markets or starve them as may suit their advantage.

To speak of free and open competition and free market forces under these conditions is to mock the fundamental assumptions of the free enterprise system—a system of many buyers and sellers seeking to maximize profit, with no one supplier or group holding dominant market power. Our American producers will need, in these next years, to supply coal while engaging in all the costly expenditures of preserving, restoring, and even improving the coal-bearing environment. They will need to search for oil in the Atlantic and the deep Pacific, where oil has never hitherto been found. They will need to convert the hard rock of shale into oil and solid coal into flowing oils and gas. All these efforts will require vast investment and some years of time. No rational producer will undertake these efforts if he sees down the years an energy market so structured that expensive U.S. energy materials will have to compete with oils produced in the Middle East at a cost in the range of 20 cents a barrel.

Given the hard and inescapable facts of the world economic situation, we must therefore accept the plain necessity of adopting an assured market policy for fostering the development of our energy resources. This means, for example, that investors in a coal liquefaction or shale oil production project approved by the appropriate Federal agency would be given the protection of a contract with that agency guaranteeing to purchase the output of the plant, at an adequate minimum price, to the extent that alternative outlets were not available at higher prices. Thus, the Government would guarantee the economic viability of the enterprise against loss of markets.

It is this abnormal risk resulting from Arab dominance in oil resources, that must be taken if free enterprise is to perform its proper function in the development of our domestic energy resources. If this risk is assumed contractually, we will have taken a major forward step in the long-range solution of our energy problem. I am preparing more legislation to that end and will seek to have hearings held early in the next session.

It is gratifying in this connection to note that the Nixon administration, in the context of its recommended "windfall profits" tax on crude oil, has suggested the possibility of a price guaranty on output of energy projects approved by the authority created to administer whatever program might be established for application of proceeds of the special tax. Such a price guaranty arrangement, however, can be effective only if it is funded and administered on a scale adequate to national need. Halfway measures dependent on limited sources of funds will result in frustration and disillusionment.

The legislation which I shall propose will also deal with such closely related matters as a lending program for domestic energy resource development projects involving loans up to 90 percent of project costs, repayable out of income realized from the project. It will further propose a basic revision in Federal leasing policy to eliminate the deterrent of cash bonuses and the substitution of competitive financial undertakings of exploration and development work, with royalties payable out of production.

I have previously introduced legislation to facilitate, through appropriate Federal assistance, the utilization of our abundant coal reserves for production of pipeline quality gas and hydrocarbon liquids, as substitutes for natural gas and conventional petroleum products. This, suitably expanded to cover other types of energy research and development, combined with the assured market legislation which I am preparing, will, I hope, define a workable federal program and policy for dealing realistically with our most pressing national concern. That concern will, of course, continue to have my most urgent attention. I can only hope that the administration will soon display the requisite sense of urgency.

NATIONAL ENERGY NEEDS CAN BE AND MUST BE MET BY THE UTILIZATION OF COAL

Mr. Speaker, I have great concern that the administration is approaching the energy crisis much too timidly. Most dangerous, speculation changes from day to day as to the future availability of Mideast oil.

I have great concern that regardless of the resolution of the Mideast crisis, our country will be faced with crisis after crisis dependent upon the changing policies of foreign governments if we continue to rely upon energy sources beyond what is available in our country.

As a result of industry and power companies turning more and more to the use of oil, it had been predicted that by 1985, unless this trend was altered, 46 percent of all energy resources used to run industry will be oil products. This would have brought about ever increasing dependence on imported crude oil, subjecting our Nation to the possibility of recurring energy crises precipitated by the changing policies and objectives of foreign countries.

To place ourselves in this position is sheer folly when the United States has over one-half of the world's known coal resources—one and one-half trillion tons of recoverable coal. Taking into account a greatly expanded rate of usage, these reserves would last more than 500 years.

An essential element of a national energy policy is the implementation of a program to bring about at the earliest possible date energy self-sufficiency.

For this reason, the administration's proposals and the legislation which we have cleared through the Congress, helpful as they may be, at this time fall far short of taking the steps that I believe to be urgently needed.

In reality the energy problem has been staring us in the face for more than 20 years. The current crisis is a direct result of our not having faced up to the problem with the obvious solutions at hand.

On April 16, 1953, more than 20 years ago, I made a speech on this floor in which I said:

> By 1975, it is predicted, our daily needs for liquid fuels may be several times greater than our domestic production from petroleum. If we were to be confronted with another all out war, available supplies of liquid fuels would immediately present an acute problem. A growing dependence upon foreign sources of oil would increase our vulnerability and impair our security. It is, therefore, imperatively necessary for us to push ahead, steadfastly and without interruption, with programs for the development of alternative sources of liquid fuel based upon domestic energy resources, including our abundant supplies of coal. . . .

If we are serious about energy self-sufficiency the know-how is at hand and the steps to achieve energy self-sufficiency are clear.

First, we must initiate government-supported demonstration coal gasification and liquefaction plants on a scale to immediately introduce into the energy market gas for industrial and home heating use and liquid fuel for the Nation's oil and gasoline needs.

In this connection, I have introduced H.R. 11887 which would establish and fund a national program for research, commercial development and demonstration of coal gasification and coal liquefaction.

In effect, we would be undertaking what the Germans did in the closing months of World War II when they were shut off from their access to petroleum.

At the end of World War II we began a research program to produce cheap, clean fuel from coal, using the techniques captured from the Germans. A pilot plant in Missouri was so successful that by 1953 it was producing gasoline from coal at a price only 2 cents a gallon higher than gasoline made from petroleum. Suddenly, over my strong protest, the administration closed down the plant. Had that work been allowed to continue, the spectre of gasoline rationing in this country would not now be confronting us.

I also believe that the severity of the problem confronting us requires expanded authority in the Federal Energy Office to undertake a broad range of activities to foster the production and utilization of coal as a major source of the energy requirements of our Nation. In this regard, I am preparing additional legislation to increase the production, transportation and conversion of coal as a source of energy by giving the energy office broad powers to accomplish these objectives.

Second, it is essential that railroad cars and rolling stock be adequate to the task of transporting the increased volumes of coal which a self-sufficiency energy policy will require. That this shortage is very real is manifested by the passage in the Senate of S. 1149, dealing with the railroad freight car shortage, and the provisions of title V of S. 2767, providing for a major rail rolling stock program with guaranteed loans authorized up to $2 billion.

I want to commend my colleagues, the gentleman from Texas (Mr. PICKLE), the gentleman from North Dakota (Mr. ANDREWS), and the gentleman from the State of Washington (Mr. McCORMACK) for their colloquy on October 2, 1973, in which they discussed the freight car shortage problem.

The gentleman from Washington succinctly put it when he said:

> The problem, simply stated, is that rail shippers are unable to obtain the rolling stock they desperately need, when they need it. It is affecting grain producers, orchardists, potato growers, coal mining corporations, and the forest products industry. Last, but certainly not least, it is directly affecting the consumer in increased costs of fresh fruits and vegetables, fuel, and housing, and in many similar unfortunate ways.

Finally, we must take very forceful action to encourage and provide appropriate incentives for the conversion of oil-burning industrial, commercial operations to coal-burning operations, intensifying at the same time our research on reduction of pollutants from the use of this fossil fuel. In this regard, I am hopeful that the authorities being given the administration in the bill approved on the adoption of the conference report on S. 2589, the emergency energy legislation, are adequate to accomplish a maximum possible conversion to coal.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair wishes to announce that the names of all Members who voted by means of electronic device will be included in the list of those voting on this motion so that the RECORD will clearly reflect the names of all Members who have voted on this matter.

AUTHORIZING CLERK TO RECEIVE MESSAGES FROM SENATE AND SPEAKER TO SIGN ENROLLED BILLS AND JOINT RESOLUTIONS NOTWITHSTANDING SINE DIE ADJOURNMENT

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent that notwithstanding the sine die adjournment of the the House, the Clerk be authorized to receive messages from the Senate and that the Speaker be authorized to sign any enrolled bills and joint resolutions duly passed by the two Houses and found truly enrolled.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

AUTHORIZING SPEAKER TO ACCEPT RESIGNATIONS AND APPOINT COMMISSIONS, BOARDS, AND COMMITTEES, NOTWITHSTANDING ADJOURNMENT

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent that notwithstanding the adjournment of the 1st session of the 93d Congress, the Speaker be authorized to accept resignations, and to appoint commissions, boards, and committees authorized by law or by the House.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

REPORTS FILED WITH THE CLERK FOLLOWING SINE DIE ADJOURNMENT BY COMMITTEES MAY BE PRINTED BY THE CLERK AS REPORTS OF THE 93D CONGRESS

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent that reports filed with the Clerk following the sine die adjournment by committees authorized by the House to conduct investigations may be printed by the Clerk as reports of the 93d Congress.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PERMISSION FOR ALL MEMBERS TO INSERT REMARKS IN "EXTENSIONS OF REMARKS" SECTION OF CONGRESSIONAL RECORD

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent that all Members of the House shall have the privilege, until the last edition authorized by the Joint Committee on Printing is published, to extend and revise their own remarks in the CONGRESSIONAL RECORD on more than one subject, if they so desire, and may also include therein such short quotations as may be necessary to explain or complete such Extensions of Remarks; But this order shall not apply to any subject matter which may have occurred, or to any speech delivered subsequent to the adjournment of Congress.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PERMISSION FOR CHAIRMEN AND RANKING MINORITY MEMBERS OF COMMITTEES AND SUBCOMMITTEES TO EXTEND REMARKS AND INCLUDE SUMMARIES

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent that the chairmen of all the standing committees and the subcommittees of the House may extend their remarks up to and including the publication of the last RECORD and to include a summary of the work of their committees; also that the ranking minority member of such standing committee or any subcommittee may have the same permission to extend their remarks and to include a summary, if they desire, from their point of view, separately from that of the chairman.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

PRINTING OF COMMITTEE ACTIVITY REPORTS

Mr. O'NEILL. Mr. Speaker, with reference to the printing of committee activity reports for the session. I wish to remind the chairmen of all committees that the Joint Committee on Printing has ruled that the printing of such reports both as committee prints and in the RECORD is duplication the cost of which cannot be justified.

It is requested that committee chairmen decide whether they wish these reports printed as committee prints or in the RECORD since the Government Printing Office will be directed not to print them both ways.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

Mr. VANIK. Mr. Speaker, reserving the right to object, apparently it appears that it is the intention to proceed with sine die adjournment, and it seems to me that we just cannot leave this legislation in the shape in which it is at the present time; we have not concluded the issue, and I would like to have some assurance that we are going to go ahead with this legislation to see it through to a conclusion in some form or another.

Mr. O'NEILL. Mr. Speaker, if the gentleman will yield, the gentleman from Ohio is speaking correctly, because I have every intention of offering a sine die adjournment resolution. But before I offered it I was going to ask for permission to address the House for 3 minutes in order to explain the resolution, and what is in it.

Mr. VANIK. I hope that the leadership might consider keeping the House in session in some way so that we can proceed to the conclusion of this legislation.

Mr. O'NEILL. I will explain the resolution to the gentleman.

Mr. VANIK. Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY, JANUARY 23, 1974

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent that the business in order under the Calendar Wednesday rule on Wednesday, January 23, 1974, be dispensed with.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts.

There was no objection.

LEGISLATIVE PROGRAM FOR WEEK OF JANUARY 21, 1974

Mr. O'NEILL. Mr. Speaker, normally at this time the minority leader would ask me if I would discuss with him the program for the week that we come back. Normally the week that we would come back, Mr. Speaker, would be January 21, 1974.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Arizona.

Mr. RHODES. I thank the gentleman for yielding.

Mr. Speaker, I should like to ask the gentleman the question. Are we coming back on January 21?

Mr. O'NEILL. Under the resolution that we have passed earlier, we have set the date that we would come back as January 21. As the gentleman is aware, in the resolution the right is given to the Speaker and the President pro tempore of the Senate to call us back, and it gives the right to the majority leader of the House and the majority leader of the Senate to call the Members back. It also gives the minority leader of the House and the minority leader of the Senate the right to do likewise.

Mr. Speaker, in the event that the sine die resolution is agreed to, and if the House is not called back, and if we come back on January 21, 1974, the following schedule would be followed:

For Monday: The Consent Calendar and the following five suspensions:

H.R. 10957, Public Health Service Act Amendments,

H.R. 11385, Health Services Research, Health Statistics, and Medical Libraries Act,

H.R. 11386, Sudden Infant Death Syndrome Act,

H.R. 11387, Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act Amendments,

H.R. 9726, Safe Drinking Water Act.

For Tuesday: The Private Calendar, and the following seven suspensions:

H.R. 5975, Convention on High Seas Intervention,

H.R. 10309, Boiler and Pressure Vessel Standards,

H.R. 6120, *Manatra II* training ship,

H.R. 115 or H.R. 6396, anadromous fish,

H.R. 2286 or H.R. 11541, wildlife refuges right-of-way,

H.R. 75 or H.R. 7, game management on public lands,

H.R. 2283 or H.R. 11809, straight baselines for measuring fisheries zone.

For Wednesday and the balance of the week:

H.R. 2, Pension Reform Act, subject to a rule being granted.

H.R. 11221, deposit insurance, subject to a rule being granted.

H.R. 11354, International Development Association, subject to a rule being granted.

H.R. 11666, Asian Development Bank, subject to a rule being granted.

Conference reports may be brought up at any time, and any further program will be announced later.

May I say to the House that I intend to offer this resolution which I understand will be adopted by the Senate.

I do not have any knowledge at this time as to whether the Senate is meeting tomorrow morning at 9 o'clock or meeting Monday at 11 o'clock. We hear all types of rumors. I have talked to the majority leader of the Senate, and as far as I understand the Senate is still in recess and ready to act. The situation now is that—in the last 3 or 4 days—is that we have been considering this energy legislation. Today we have had three votes on the energy bill conference report that was tacked onto an Interior bill. And we have failed to adopt anything. Apparently we are in a stalemate. I do not know how we can break the logjam, but we have voted three times on a bill the Senate has sent over here. I want the Members to bear in mind that there is a conference report that is still pending in the Senate.

I do not think that there is any onus on us whatsoever. I believe we have acted in good faith to do our part, and we have voted according to our philosophies as we have seen fit for the people we represent.

The resolution, as I have already stated, allows the Speaker and the President pro tempore to call the House back.

It allows the majority leader of the House and the majority leader of the Senate and the minority leader of the House and the minority leader of the Senate to recall the Members. There are those who have asked me if this is adopted when will I call the Members back or will I talk to the leader of the Senate? I do not think now is any time for me to make a decision of that type or for the majority leader or minority leader of the Senate to make such a decision. We are tired, we have been here for a long time. If we were to make such a decision now and I were to say we were to come back a day after Christmas or a day after New Year's, then the Members would say, "Why do we get called back? Why do we make decisions in the late hours of the night?"

The Members may be sure if there is an emergency I will be calling the Members back. I guarantee that to the Members. Of course, that is after I talk with the Speaker and the leadership on both sides.

Mr. JAMES V. STANTON. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Ohio.

Mr. JAMES V. STANTON. Mr. Speaker, I point out to the majority leader and the Members of the House that the one bill that was acted on by this body tonight could go to the Rules Committee and be reported out of the Rules Committee and be acted upon by this body, and I think it is incumbent upon the leadership and the Members of this House to take every step possible to insure that this bill is enacted.

Mr. O'NEILL. In reply to the gentleman, I wish I had the knowledge he has about the way the House operates. If the gentleman knew the work that would have to be done to get this bill out of the Rules Committee, he would realize how difficult that would be. For instance, the White House called me in the middle of the night asking me to assist them in getting the bill out of the Rules Committee. I assumed the White House wanted this legislation, but I can see now that they are really opposing legislation of this type. They are happy with the fact that it has been killed.

Let me say I have the greatest respect for the gentleman, but it is not quite as easy as he thinks it is to get a matter such as this out of the Rules Committee.

Mr. JAMES V. STANTON. I might concur with the majority leader, but I think that ought to be demonstrated to the people of America.

Mr. RHODES. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Arizona.

Mr. RHODES. Mr. Speaker, I can assure the majority leader and the Members of the House that the White House does want the legislation and the right kind of legislation which will insure that we will get more energy and not less.

Mr. O'NEILL. I do not want to argue with the gentleman about the merits of the bill. It is my belief the White House wants to run the country like a monarchy.

PROVIDING FOR SINE DIE ADJOURNMENT

Mr. O'NEILL. Mr. Speaker, I offer a privileged concurrent resolution (H. Con. Res. 411) and ask for its immediate consideration.

The Clerk read as follows:

H. CON. RES. 411

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn on Saturday, December 22, 1973, they shall stand adjourned sine die or until 12:00 noon on the second day after their respective Members are notified to reassemble in accordance with Section 2 of this resolution, whichever event first occurs.

SEC. 2. The Speaker of the House of Representatives and the President pro tempore of the Senate shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it, or whenever the majority leader of the Senate and the majority leader of the House, acting jointly, or the minority leader of the Senate and the minority leader of the House, acting jointly, file a written request with the Secretary of the Senate and the Clerk of the House that the Congress reassemble for the consideration of legislation.

Mr. O'NEILL. Mr. Speaker, I move the previous question on the concurrent resolution.

The previous question was ordered.

The SPEAKER. The question is on the concurrent resolution.

Mr. JAMES V. STANTON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 74, nays 171, not voting 187, as follows:

[Roll No. 724]

So the concurrent resolution was rejected.

Messrs. Barrett, Boland, and Bauman changed their vote from "yea" to "nay."

The result of the vote was announced as above recorded.

RECONSIDERATION OF WILD AND SCENIC RIVERS BILL

(Mr. TAYLOR of North Carolina asked and was given permission to address the House for 1 minute.)

Mr. TAYLOR of North Carolina. Mr. Speaker, tonight we not only failed to pass a bill, but we also killed a bill which we had already passed. The wild and scenic rivers bill was a good bill when we passed it on December 3 and it was a good bill until the Senate started pouring oil on the water. Now it is on the table as an innocent victim. There are impelling reasons why this bill should be enacted quickly so I will bring it back before the House in early January and I ask the cooperation of the Members in getting it reenacted.

Mr. O'NEILL. Mr. Speaker, if the gentleman will yield, I will appreciate it if the gentleman will bring it up today at noon so we will have some business.

Mr. TAYLOR of North Carolina. Mr. Speaker, I will state to the gentleman from Massachusetts we will be glad to bring it up just as quickly as possible, whenever the Parliamentarian can tell us a quick way to get it up. I am fearful we will have to go through the committee process again.

ADJOURNMENT TO 12 O'CLOCK NOON TODAY

Mr. O'NEILL. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at 12 o'clock noon today, December 22, 1973.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

NORTHEAST RAILROAD ASSISTANCE BILL

(Mr. BOLAND asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. BOLAND. Mr. Speaker, I support the conference report on the Northeast railroad assistance bill.

I have spoken in support of this bill on many previous occasions. I feel that it contains the far ranging and comprehensive approach—adequately funded—that the Northeast rail situation demands. The seven bankrupt lines—the remaining solvent railroads as well—must once again become a viable and efficient network.

Mr. Speaker, the importance of a rejuvenated rail system in this country is highlighted only too well by the most current statistics on our national energy shortages. Rail traffic is fuel efficient and, of growing importance to all of us daily, will soon be cheaper and more reliable than other forms of transportation. I hope to see the day when this country can finally wean itself from its slavish dependence upon the automobile. Rail commuter and long-distance traffic—along with rail freight—could be, almost has to be, one of the mechanisms that can accomplish such a tremendous shift in our national habits.

We have learned at various points in our history as a nation that we have been great squanderers of the abundant natural resources with which the United States has been endowed. The major effort at energy conservation and allocation upon which we are now embarked will, I hope, have happy effects similar in nature to those that national forestry conservation programs under Theodore Roosevelt enjoyed during an earlier age. Railroads, if they can once again regain a position of eminence among passenger and freight carriers, will be able to offer significant contributions to energy savings.

Mr. Speaker, the people of Massachusetts are already hard hit by energy shortfalls and the scarcity of petroleum and other essential materials. For them, the "energy crisis" is not just an interesting item in the headlines, it is here. It is now. Factories and businesses in my district are no longer threatening to close down. Some are shut down. More will undoubtedly follow despite our best efforts.

My constituents, like everyone else in this country, were unprepared for this crisis that has hit our country. All they ask is that they be allowed to keep their jobs and live a reasonable life. Energy conservation measures will help them. Energy research and development may help their children. Improved rail service for freight and passengers will help bring security for businesses and jobs in the Northeast that we desperately need. Furthermore, the impact of better railroads can come within a reasonable time. In some cases only a few years could show a marked improvement in Massachusetts, where our unemployment rate is nearly twice the national average.

Mr. Speaker, what I have been trying to emphasize in my remarks is the economic effect—both nationwide and in the Northeast—that railroad rescue efforts will bring. What will happen in the event that this measure is delayed or defeated can also be measured—in percentage drops in the GNP, in lost jobs, in energy wastage. We cannot afford to pass up what may be perhaps the biggest energy conservation possibility of all.

CAROLE COTHRAN OF LOUDONVILLE, N.Y., SERVES AS A VOLUNTEER IN THE CHRISTIAN SERVICE CORPS IN GUATEMALA

(Mr. STRATTON asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. STRATTON. Mr. Speaker, I have just learned that Miss Carole Cothran, one of my constituents, is the 200th volunteer to be placed by the Christian Service Corps, an interdenominational organization with headquarters here in Washington, D.C. Carole, a native New Yorker, recently left the United States for a 2-year commitment to teach second and third grades at the Inter-American School at Quezaltenago, Guatemala.

Carole Cothran is the daughter of Mr. and Mrs. Raymond J. Cothran of Loudonville, N.Y. She is an example of the fine young people of my district. Carole graduated from Gordon College earlier this year and received her bachelor of science degree in elementary education. Carole is listed in "Who's Who in American Colleges and Universities" and has received several academic awards and scholarships.

The school where Carole is now teaching was founded and is governed by a board representing several denominational missions, including the United Presbyterian, Southern Baptist and Church of God. The Inter-American School provides elementary and secondary education for children of missionaries as well as a number of Guatemalan children.

The CSC placed Carole with the Inter-American School in Guatemala and provided 3 months of intensive training for her. Frequently called the "peace corps" of the church, the CSC is only 8 years old and now has placed over 200 volunteers in locations abroad. The CSC is represented by Corpsmen serving 2-year terms in some 65 countries.

Each corpsman agrees to spend 2 full years on the field. However, before going to an assignment the corpsman completes the corps 3-month training program designed to acquaint him or her with the language and culture of the host country. This insures that the 2 years abroad will be used to make a maximum contribution to the lives of the people with whom the corpsmen live and serve.

Carole may extend her time beyond 2 years, as many corpsmen do, but when she comes home, she will spend 3 months sharing her experiences with others, helping to find more young people who will continue the work in Guatemala and in the many other countries where volunteers are needed. The CSC will also assist Carole in readjusting when she resumes her life in the United

States. During this readjustment period many returning corpsmen consider returning to their countries of interest on a full-time basis. About one-fourth of those who have already completed the 2-year term have made this decision.

Mr. Speaker, I am happy to congratulate both Carole Cothran and the Christian Service Corps and wish them the fullest success in pursuing their worthwhile objective of service to the people of foreign lands.

A 25-PERCENT FUEL REDUCTION FOR COMMERCIAL AIRLINES

(Mr. PARRIS asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PARRIS. Mr. Speaker, on December 12, 1973, in accordance with existing law, the proposed mandatory fuel allocation regulations were issued by the newly created Federal Energy Office. The proposed regulations were published in the Federal Register on December 13, 1973, and the public comment period expired at 5 p.m. yesterday, December 20.

I would like to take a few moments to bring to my colleagues' attention a portion of the proposed regulations which I find frankly disturbing. Specifically, I am referring to subpart G—Aviation Fuels.

According to the proposed regulations, the base period for aviation fuels will be set at 1972 levels. It is my understanding that this step alone will result in a 10-percent fuel reduction for the industry. The regulations go on to provide that effective January 7, 1974, all civil air carriers, both domestic and international, will be alloted 85 percent of their base period fuel consumption—thereby bringing the total reduction in fuel allocation to 25 percent of current requirements.

Mr. Speaker, I cannot object too strongly to this proposed action by the Federal Energy Office. The impact of a 25-percent fuel reduction for the commercial airlines will be simply devastating to that industry and the people employed in it.

Representatives of the industry have advised me that on an industry-wide basis, some 30,000 airline employees will be furloughed effective January 7, in the event the proposed regulations are not amended. This figure constitutes one-tenth of the management and staff personnel of the commercial airline industry, although those employed as pilots and flight attendants will be hardest hit by the furloughs.

In addition, effective January 7, some 950,000 scheduled flight departures will be canceled at 500 airports. As a result, 275 aircraft will be grounded—or approximately $1 billion of equipment left idle.

Consider, for example, the plight of Eastern Airlines. Representatives of that air carrier have advised me that already this year, 860 management and staff personnel have been furloughed due to loss of profits. During the first 11 months of this calendar year Eastern shows losses of $44.7 million; in the first 11 months of 1972 their profits were $22 million.

If the proposed regulations are not amended, the following additional furloughs will be mandated: 440 pilots, 500 flight attendants, 800 reservation and airport agents, and 800 engineering and maintenance personnel. I need not point out the severe economic hardship that will be imposed on those who find themshelves without jobs as a result of these cutbacks.

Mr. Speaker, serving as I do on the Energy Subcommittee, I am especially cognizant of the extent of our fuel shortages, and the need for every segment of the economy to be fairly governed by a fuel allocation program. However, first and foremost, I believe any such program must equitably distribute our available fuel supplies among all sectors of the economy; and second, I am convinced that those industries which contribute essential services to the American public must be given priority. Neither of these conditions appear to be met in the Federal Energy Office's plans for commercial aviation.

Let me also bring to your attention two paragraphs from the conference report accompanying the Emergency Petroleum Allocation Act of 1973 (Public Law 93–159), under which authority the Federal Energy Office is operating in issuing the proposed mandatory fuel allocation regulations:

> The conferees have included in section 4(b)(1)(B) specific mention of the need to allocate fuels to provide for the maintenance of transportation facilities and services which serve the public at large. The term "transportation services" is intended to indentify those surface, rail or air facilities and services—whether public or privately owned—which serve the general public or which otherwise serve the objectives of this Act.
>
> The petroleum fuel shortage threatens numerous areas of commerce. The jeopardy from shortage of these fuels impacts most directly on transportation. Without adequate petroleum most United States' domestic and international transportation, with no option to convert to other fuels, would be seriously disrupted. A significant reduction of transportation capability could adversely affect all other areas of commerce and the national economy. Thus, one of the primary objectives of the Act is to assure maintenance of transportation services.

Certainly the intent of Congress could not be more clear towards the priority of the airline industry for fuel allocation purposes. I have contacted the Director of the Federal Energy Office, William E. Simon, to express my vigorous opposition to the currently proposed regulations as they affect commercial aviation, and I urge my colleagues to do likewise.

CAMPAIGN PLEDGES

(Mr. SHUSTER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SHUSTER. Mr. Speaker, during my campaign I said that the people have a right to know about the health of candidates they select for important public offices and I promised that I would take a physical exam and make the results public. The following is a copy of the medical report I received from Dr. Freeman Cary, Attending Physician, Congress of the United States:

> THE ATTENDING PHYSICIAN,
> CONGRESS OF THE UNITED STATES,
> *March 27, 1973.*
>
> Hon. E. G. SHUSTER:
> *U.S. House of Representatives,*
> *Washington, D.C.*
>
> DEAR MR. SHUSTER: We were quite pleased to see you on February 6, 1973 for your first annual physical examination in this office.
>
> It is also our pleasure to report that your physical examination showed that you are in excellent health. Specifically, your reviewed medical history revealed no active health problems; your blood pressure was 108/64; a complete physical examination, including your heart and lungs, was normal; and, your blood studies, chest x-ray and electrocardiagram were normal as well.
>
> In final summary, you are to be congratulated on your non-smoking and your participation in active athletic conditioning. We hope that you will continue such a program.
>
> Please feel free to stop by any time if we maybe of assistance in regard to your ongoing health care.
>
> Sincerely yours,
> FREEMAN H. CARY, M.D.

Mr. Speaker, I also pledged that I would dispose of any stocks I held, place the proceeds in Government bonds or savings accounts, and would make public any non-Government sources of income. I can report that all stocks have been sold or are offered for sale. Although my 1973 income tax has not yet been compiled, I can report today that my 1973 non-Government sources of income are: Estate of Ann Shuster, $4,400; estate of E. R. Greinert, $409; Shuster Farms (jointly with wife) estimated to be less than $5,000; the Altoona Federal Savings & Loan (jointly with wife) $580.84 and the sale of real estate, $13,000.

Mr. Speaker, I believe these disclosures are in harmony with the public interest and urge my colleagues to consider taking similar action.

ACTIVITIES AND ACCOMPLISHMENTS OF THE JOINT COMMITTEE ON ATOMIC ENERGY IN THE 93D CONGRESS, 1ST SESSION

(Mr. PRICE of Illinois asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PRICE of Illinois. Mr. Speaker, as chairman of the Joint Committee on Atomic Energy, I present for the information of my colleagues the annual report on the activities and accomplishments of the Joint Committee. This report covers the activities of this 1st session of the 93d Congress.

The report follows:

ACTIVITIES AND ACCOMPLISHMENTS OF THE JOINT COMMITTEE ON ATOMIC ENERGY IN THE 93D CONGRESS, 1ST SESSION

FOREWORD

It has been the practice of the Joint Committee on Atomic Energy, at the close of each session of the Congress, to submit for the information of the Congress, the executive branch, and the public a report of its activities. (The report for the second session of the 92d Congress was printed in the Congressional Record of November 8, 1972.

The Joint Committee on Atomic Energy was organized on August 2, 1946. It consists of nine Members from the Senate and nine Members from the House of Representatives No more than five from each body can be members of the same political party. The chairmanship alternates between the Senate and the House of Representatives with each Congress.

Present membership is:

Melvin Price, Illinois, Chairman.

John O. Pastore, Rhode Island, Vice Chairman.

Chet Holifield, California; John Young, Texas; Teno Roncalio, Wyoming; Mike McCormack, Washington; Craig Hosmer, California; John B. Anderson, Illinois; Orval Hansen, Idaho; Manuel Lujan, Jr., New Mexico.

Henry M. Jackson, Washington; Stuart Symington, Missouri; Alan Bible, Nevada; Joseph M. Montoya, New Mexico; George D. Aiken, Vermont; Wallace F. Bennett, Utah; Peter H. Dominick, Colorado; Howard H. Baker, Jr., Tennessee.

The Joint Committee is one of the few committees established by statute rather than by rule of each House and is unique in several respects. For example, it is the only Joint Committee of the Congress with legislative functions, including the receipt and reporting of legislative proposals. The Committee is also charged by law with legislative responsibility as "watchdog" of the U.S. atomic energy program. As part of its responsibilities, the Committee follows closely the classified activities of the executive agencies, including the Atomic Energy Commission and the Departments of Defense and State, concerning the peaceful and military applications of atomic energy. The unclassified activities are closely reviewed as well.

In all of these activities, the Joint Committee on Atomic Energy, representing the Congress and the public, seeks to assure the implementation of the following national policy expressed in the Atomic Energy Act of 1954:

"The development, use, and control of atomic energy shall be directed so as to make the maximum contribution to the general welfare, subject at all times to the paramount objective of making the maximum contribution to the common defense and security."

During the 93d Congress, first session, the full Joint Committee met on a total of 50 occasions, 25 of which were public and 25 of which were executive meetings. In addition, there were six subcommittee meetings held in public session, and three subcommittee meetings held in Executive Session.

A total of 18 publications consisting of hearings, reports, and Committee prints were published by the Joint Committee in the first session of the 93d Congress. The publications include testimony taken in executive session with classified material deleted before printing.

A list of the publications follows:

AEC Authorizing Legislation, Fiscal Year 1974:

Part 1. Hearings, January 30, 1973.

Part 2. Hearings, February 6, 21, and 22.

Part 3. Hearings, March 14, 1973.

Part 4. Hearings, March 20 and 22.

Part 5. Environmental statements.

Reports: Authorizing Appropriations for the Atomic Energy Commission for fiscal year 1974 (H. Rept. 93-280; S. Rept. 93-224). June 14 and June 18.

Report: Supplemental Authorization of Appropriations for the Atomic Energy Commission for Fiscal Year 1974 (Senate Report No. 93-487, House Report No. 93-619). November 7, 1973 and November 1, 1973.

Atomic Energy Legislation through the 92d Cong., 2d Session. Committee Print, March.

Current Membership of the Joint Committee on Atomic Energy. Committee Print, April.

Certain Background Information for Consideration when Evaluating the "National Energy Dilemma". Committee Print, May.

Military Applications of Nuclear Technology (Part 1). Hearing (declassified) April 16.

Proposed Amendment to Euratom Cooperation Act of 1958 (S. 1993 and H.R. 8867). Hearing, June 22.

Report: Amendment to Section 5 of the Euratom Cooperation Act of 1958, as amended. (H. Rpt. 93-385; S. Rpt. 93-341). July 19 and July 24.

Understanding the National Energy Dilemma. Committee Print, August.

Proposed Changes in Basis for Cooperative Arrangement for the LMFBR. Hearings, Feb. 28 and May 4.

Future Structure of the Uranium—Enrichment Industry—Phase I. Hearings July 31 and Aug. 1.

The following publications will be released in the near future:

Current Status of AEC Controlled Thermonuclear Research Program. Hearing, July 25.

Proposed Sale of LaCrosse Boiling Water Reactor to Dairyland Power Cooperative. Hearing, Aug. 3.

Naval Nuclear Propulsion Program (declassified). Hearing, March 28.

Proposed Changes in AEC Contract Arrangements for Uranium Services. Hearings, Mar. 7, 8, 26 and Apr. 18.

Military Applications of Nuclear Technology, (part 2) (declassified). Hearing, May 22.

Future Structure of the Uranium Enrichment Industry (Phase II). Hearings, Oct. 2, 3, 4.

Nuclear Reactor Safety. Hearings Jan. 23, Sept. 25, 26, 27 and Oct. 1.

To Consider Dec. 1, 1973 AEC Report on Energy Research and Development. Hearing, Dec. 11.

I. LEGISLATIVE ACTIVITIES

A. Atomic Energy Commission Fiscal Year 1974 Authorization Act (Public Law 93-60)

The Atomic Energy Commission's authorization request for fiscal year 1974, as initially submitted to the Congress on January 30, 1973, called for authorization of $1,753,250,000 for "Operating Expenses" and $779,300,000 for "Plant and capital equipment" (including increases in prior-year authorization) making a total requested authorization of $2,532,550,000. This request represents a decrease of $70,925,000 or about 2.7 percent, below the $2,603,475,000 authorized for fiscal year 1973.

The Joint Committee's recommended authorization for fiscal year 1974 was $2,429,005,000 which is $103,495,000—about 4.1 percent—less than the amount requested, and $174,420,000—about 6.7 percent less than the amount authorized for fiscal year 1973.

Generally, the Commission's authorization request reflects estimated costs in two broad categories of effort, namely, military and civilian applications. Military applications includes primarily the nuclear weapons and naval propulsion reactors programs as well as a portion of the nuclear materials program. Approximately 48 percent of the Commission's fiscal year 1974 estimated program costs, or $1,472,200,000 is attributable to military applications. The estimated cost for the civilian applications of atomic energy totals $1,575,350,000 or about 52 percent of the program costs.

The Joint Committee began consideration of the proposed legislation authorizing appropriations to the AEC for fiscal year 1974 with a public hearing on January 30, 1973. Additional public hearings followed on February 6, 21, 22, and on March 14, 20, and 22. In the course of these hearings AEC's programs for regulation, biological and environmental research, physical research, civilian reactor development, applied energy technology, space nuclear systems, and radioactive waste management were considered. Other hearings were held in executive session on February 2 and 21, and on March 28, 1973. Programs reviewed during these hearings were weapons, nuclear materials production, and the naval nuclear propulsion program.

B. Supplemental Authorization of Appropriations For the Atomic Energy Commission For Fiscal Year 1974 (Public Law 93-158)

On October 23, 1973, an executive communication was transmitted to the Congress requesting the Congress to consider proposed supplemental appropriations to the Atomic Energy Commission of $10,700,000 for operating expenses and $30,000,000 for plant and capital equipment.

On October 30, 1973, the full Committee held an executive hearing on the request for authorization of supplemental appropriations. Representatives of the Atomic Energy Commission and the Department of Defense presented their views concerning the need to restore schedule slippages in certain nuclear weapon systems. The Commission witnesses also testified on the need for additional waste treatment and storage facilities at the AEC's Hanford, Washington site.

On October 31, 1973 Chairman Price, by request, introduced H.R. 11216, a bill to authorize supplemental appropriations of $40,700,000 to the Atomic Energy Commission. On November 1, 1973, the full Committee met in executive session for markup of the bill. At this session, the Committee voted to approve reporting of the bill favorably without amendments and adopted the report. These actions were taken by the unanimous vote of the members present. On November 2, 1973, Vice Chairman Pastore introduced a bill, S. 2645, identical to H.R. 11216.

This bill amends Public Law 93-60, the Atomic Energy Commission Fiscal Year 1974 Authorization Act.

II. CIVILIAN AGREEMENTS FOR COOPERATION

Under the provisions of the Atomic Energy Act of 1954, as amended, proposed agreements for cooperation in the peaceful uses of nuclear energy between the United States and other nations, and amendments thereof, must be submitted to the Joint Committee and a period of 30 days must elapse while Congress is in session before such agreements become effective. In accordance with such procedures, one amendment was submitted to the Committee by the Atomic Energy Commission.

On March 27, 1973, the Atomic Energy Commission transmitted to the Congress a proposed bill to amend Section 5 of the EURATOM Cooperation Act of 1958. This bill was introduced, by request, on June 13, 1973, in the Senate by Vice Chairman Pastore as S. 1993 and on June 20, 1973, in the House by Chairman Price as H.R. 8867. (Public Law 93-88)

The Joint Committee's Subcommittee on International Agreements for Cooperation held a hearing on these bills on June 22, 1973. At that hearing the Subcommittee received testimony from the AEC generally concerning the community requirements for increased quantities of enriched uranium, the Commission's ability to furnish the additional amount of enrichment services required, and the reasons for changing the manner in which the ceiling was expressed from kilograms of contained uranium 235 to an amount which would be sufficient to support the fuel cycle of power reactors of a total specified megawatt electric capacity. Additionally, the Subcommittee accepted for the record a statement from the European Community which also emphasized the

Community's urgent need for this material and the legislation.

The Joint Committee met in executive session on July 18, 1973, to consider these bills. At that time, the Committee voted to report these bills favorably, without amendment, and adopted the report. These actions were taken by the unanimous vote of the members present. The bill amends Section 5 of the EURATOM Cooperation Act of 1958, as amended, to increase the maximum amount of contained uranium 235 which may be transferred to the European Community from 215,000 kilograms to that which would be necessary to support the installed capacity of 35,000 megawatts of electrical energy together with 25,000 kilograms of uranium 235 for other purposes. In terms of kilograms of contained uranium 235, the total increase would be the equivalent of 368,000 kilograms. The ceiling would serve to set an upper limit on the amount of uranium enriching services which may be provided to the Community under contracts with the AEC. An actual commitment to supply any amount of enriched uranium would not occur until the execution of specific supply contracts.

III. INFORMATIONAL HEARINGS

A. Naval Nuclear Propulsion Program

The Joint Committee held an executive hearing on the Naval Nuclear Propulsion Program on March 28, 1973. At that time, Admiral Rickover outlined progress made and plans for future developments in this vitally important segment of our national defense. The hearing record was sent to the Department of Defense for review in order that classified material could be deleted and the information provided by Admiral Rickover could be published as a Joint Committee hearing print.

The naval reactors program involves the continuing development of improved nuclear reactor propulsion systems for a wide range of naval warships including both submarines and surface vessels. The overall program is aimed at taking maximum advantage of nuclear energy to provide ship propulsion systems with unlimited high-speed performance and combat endurance without the need for logistic lines of fuel supply.

B. Energy Demand and Supply Situation

On May 4, 1973 the Joint Committee held an open hearing for Members of Congress to acquaint them with the complexity of the energy demand and supply situation. The staff of the Joint Committee on Atomic Energy has developed a graphic presentation which enables a person (who is not necessarily an energy specialist) to obtain a reasonable understanding of the broad problems, scale and complexity of our energy dilemma in about an hour. The study and graphic data was published in May. In addition, a method has been devised for visually displacing projected future effects of various energy policies on our domestic energy situation.

On August 17, 1973, a Joint Committee Report, entitled "Understanding The National Energy Dilemma" was prepared at the request of Chairman Price. The Report has gone through two printings this year already. The Center for Strategic and International Studies of Georgetown University and the University of Houston have reproduced the report using commercial art work to add greatly to its public appeal. The Center has distributed 10,000 copies and 35,000 additional copies were produced in a second printing. Through such efforts, the public is becoming better apprised of the energy crisis.

The Joint Committee met in open session on December 11, 1973 to discuss the December 1, 1973 report entitled "The Nation's Energy Future" providing Dr. Dixy Lee Ray's recommendations to the President for a five-year $10 billion energy research and development program. In view of the critical importance of the document, the Committee felt it important to receive an oral summary of the report and to address questions to Dr. Ray regarding her recommendations.

C. LMFBR Cooperative Demonstration Plant

The Cooperative arrangement for the Nation's first liquid metal fast breeder reactor (LMFBR) demonstration plant was authorized under Section 106 of Public Law 91–273, as amended by Public Law 92–84. Among other things, that legislation requires that the basis for the arrangement or any amendment thereto be submitted to the Joint Committee on Atomic Energy for a period of 45 days, unless a waiver is granted by the Joint Committee.

On January 26 the Atomic Energy Commission submitted changes to the basic principles which had been submitted on August 14, 1972, which were to be followed in carrying out the cooperative project (see Committee hearing record "Liquid Metal Fast Breeder Reactor Demonstration Plant" Sept. 1972). Hearings were held on the new proposed arrangements on February 28 and May 4. The Committee's decision on the proposed arrangements was supplied to the Commission on June 19, 1973. The Committee's decision was contingent upon a revision in certain aspects of the proposed arrangements. (See Committee print "Proposed Changes in Basis for Cooperative Arrangement for LMFBR", February and May, 1973).

D. Uranium Enrichment

The Subcommittee on Energy of the Joint Committee on Atomic Energy held hearings to consider the impact of the proposed changes in the terms and conditions under which the Atomic Energy Commission will provide uranium enriching services to both domestic and foreign customers. The new contract arrangements are described in the AEC's proposed revisions to the uranium enrichment Services Criteria and related materials which were submitted to the Joint Committee on Atomic Energy on January 18, 1973, and which, under Section 161v of the Atomic Energy Act, must lie before the Joint Committee for 45 days. The hearings of March 7, 8, 12, 26, and April 18, 1973 will be published in the near future.

The Joint Committee on Atomic Energy held hearings, Part I on July 31, and August 1, 1973 entitled "Future Structure Of The Uranium Enrichment Industry". The object of these hearings is to find out what should be done to provide the additional uranium enrichment facilities we need.

The Committee has given a great deal of attention to the provision of adequate uranium enrichment capacity. Developments over the past five years gave cause for concern. There have been slippages in the estimates of the time by which improvements in the present enrichment plants are needed. The Committee, in fact, has added to the Commission's authorization request at various times to accelerate the diffusion plant improvement programs.

Extensive hearings on this matter have been held. The first portion of these hearings which were limited to government witnesses have been published under title "Part I—Future Structure of the Uranium Enrichment Industry". The second portion which included non-government witnesses interested in the matter is in the process of being published under Part II of the same title.

E. Controlled thermonuclear research

The Subcommittee on Research, Development and Radiation of the Joint Committee on Atomic Energy held a public hearing on July 25, 1973 on the current status of the AEC magnetic confinement portion of the controlled thermonuclear program. The Atomic Energy Commission is supporting two fusion programs. The magnetic confinement program has been underway since the early 1950's. The laser-pellet fusion program, begun about 1962, was a minor research effort up to the past few years. It is funded entirely under the weapons program.

In the magnetic confinement program, two recent successful experiments at the Princeton Plasma Physics Laboratory and at the Oak Ridge National Laboratory show that the AEC's CTR program is rapidly approaching the stage where experiments involving large volume research devices will be needed to test scaling laws. Plasma generation and plasma losses are also under intensive study. The Adibatic Toroidal Compressor device at the Princeton Laboratory recently produced a plasma, the working fluid of any fusion reactor, the density of which was close to that expected in future commercial reactors. The Joint Committee considers that now is the time to support a realistically increased research and development program in magnetic confinement CTR which is in direct relationship to the difficulties and magnitude of the potential benefits which lie ahead.

F. Nuclear power reactor safety

On January 23, the Committee commenced its public hearings on nuclear power reactor safety. The Committee heard testimony from the outgoing AEC Chairman, Dr. James Schlesinger, who had been nominated as the Director of the Central Intelligency Agency. The Committee took this opportunity to hear Dr. Schlesinger's views on reactor safety before his change in assignment. This testimony has been referred to as Phase I of the safety hearings.

Phase II is divided into two parts. Part A consists of testimony by the Atomic Energy Commissioners, their principal staff, the Advisory Committee on Reactor Safeguards and the Atomic Safety and Licensing Board Panel. Testimony was heard in public session on September 25, 26 and 27 and October 1. During Part A the subject of the adequacy of the interim criteria for Emergency Core Cooling Systems was not covered since this matter was before the Commission for decision in a rule-making procedure. When the Commission reaches a decision on the acceptability of the proposed ECCS criteria, the Committee will reconvene in public session to receive testimony on the logic and rationale underlying this decision. At the time of filing of this accomplishments report, the decision had not yet been announced.

The Committee intends to continue public hearings on the matter of nuclear power reactor safety early in the next session of Congress. At that time, it is expected that Part B of Phase II will be conducted and a Committee print on Phase I and Phase II will be published. Soon thereafter, the Committee will conduct Phase III of the nuclear power reactor safety hearings. At that time testimony would be received from the representatives of the nuclear power industry, the scientific community, and the public at large.

IV. CLASSIFIED ACTIVITIES

Military Applications

The Subcommittee on Military Applications of the Joint Committee on Atomic Energy held executive sessions on April 16, May 22, and June 29, 1973, to receive briefings on the military applications of nuclear technology by the Atomic Energy Commission, the Department of Defense and the Supreme Allied Commander, Europe. These hearings were sent to the Department of Defense for review in order that classified material could be deleted and information provided could be published as a Subcommittee hearing print entitled "Military Applications of Nuclear Technology". Part I has been published and Part II will be published in the near future.

In September 1973 Chairman Melvin Price visited the Conference of the Committee on Disarmament in Geneva, in regard with arms control and disarmament matters. He also visited military installations in Europe in connection with matters relating to the military uses of atomic energy. A classified report on this matter is on file in the Joint Committee on Atomic Energy office.

Vice Chairman Pastore and Senator Baker in March 1973 visited certain military installations in NATO to review national security matters relating to the military use of atomic energy. A classified report on this matter was sent by them to the Secretary of Defense and the Chairman of the Atomic Energy Commission.

Central Intelligence Agency

From time to time during this year, the Joint Committee Members have met with representatives of the CIA to receive information concerning foreign intelligence matters.

V. OTHER MATTERS

A. Nuclear Electric Power in Space

The space environment from Earth to Jupiter has been determined for the first time. On December 3, 1973, Pioneer 10 (the first nuclear powered interplanetary spacecraft) photographed and recorded the geophysical properties of the planet Jupiter and sent color photos back to the United States. (The ionizing radiation fields and low intensity solar spectrum precluded use of any other than a nuclear power supply for this mission.)

B. Confirmation Hearings

The Senate section of the Joint Committee held hearings on May 17, August 1, and October 12, 1973 on the nominations of Mr. William E. Kriegsman to be an AEC Commissioner, Mr. William A. Anders to be an AEC Commissioner and Mr. Donald R. Cotter to be Chairman, Military Liaison Committee to the Atomic Energy Commission. The Senate approved these nominations on May 31, August 2 and October 13, 1973.

C. International Atomic Energy Agency (IAEA)

Members of the Joint Committee on Atomic Energy attended the General Conference of the IAEA in Vienna, held in September 1973.

D. Visit to the Far East

Chairman Price toured various installations in the Far East during February 1973. The visit was primarily for the purpose of reviewing with officials of the Japanese government the Japanese civilian atomic energy program.

E. La Crosse Boiling Water Reactor (LACBWR)

The Joint Committee held a public hearing on August 3, 1973 to consider the new terms of the proposed sale of the La Crosse Boiling Water Reactor to the Dairyland Power Corporation. LACBWR is a 50 megawatt (net) nuclear steam plant located on the east bank of the Mississippi River, about 19 miles south of La Crosse, Wisconsin. The LACBWR project was one of several reactors built under the Atomic Energy Commission's Cooperative Power Reactor Demonstration Program and was authorized in 1961 under Section 109(c) of Public Law 87-315. The reactor is Government owned and is operated by the Dairyland Power Cooperative under a contract with the AEC for a ten-year period which would end on November 1, 1979.

Under the former arrangement submitted to the Committee, Dairyland would have paid the AEC a net purchase price of $2.1 million for the reactor and the two fuel cores now at the site. Dairyland would have also assumed the cost of operating the reactor as of November 1, 1971. Under the new arrangement, the purchase price would be reduced from the net figure of $2.1 million to a nominal sum of one dollar and the Commission would continue to bear the cost of operating the reactor from November 1971 through August 1973. The costs to obtain a full operating license after transfer of title to Dairyland, will probably equal or exceed the $2.7 million. The current estimate of net savings in operating costs to the Commission is $4.7 million.

VI. COMMITTEE PLANS FOR 93D CONGRESS, 2D SESSION

Included in tentative plans for special attention in connection with the Committee's legislative and oversight responsibilities in the Second Session are the following:

Licensing of Nuclear Power Plants.

Price Anderson Indemnity Protection.

Provision of Uranium Enrichment Services.

Liquid Metal Breeder Reactor Demonstration Plant.

Overall Energy Research and Development Program.

Nuclear Power Reactor Safety.

Policies concerning the supply of natural uranium.

As the legislative work load permits consideration will be given to the conduct of hearings on the Growth, Development and State of the Nuclear Industry as provided under section 202 of the Atomic Energy Act.

THE NEED TO CREATE THE FEDERAL ENERGY ADMINISTRATION BY STATUTE

(Mr. BOLAND asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. BOLAND. Mr. Speaker, previous to the appointment of Mr. William E. Simon as Federal Energy Administrator, we had witnessed a succession of highly touted, so-called energy advisers or energy czars. Each announcement sought to place "new powers" or "overall control" in the hands of the newly discovered energy expert—instant variety.

Instead, each departure spread disillusionment and distrust for the programs which were to have been panaceas for the Nation's energy woes. This trail of discarded energy chiefs and their discredited solutions have not been the only cause of the confusion—rather than concurrence—in the midst of our Nation's energy councils.

Throughout the entire period that the energy crisis has been a principal concern—that is, during the few months that the administration has admitted that we were actually facing a problem—the American people have been subjected to a barrage of conflicting and confusing statements. A wide range of administration figures, resembling in no small degree the mythical nine-headed serpent Hydra, have spouted forth chaos and confusion in the form of widely contradictory and divergent claims. And like the Hydra, who, if one of its heads were cut off, grew back two in its place, the successive removals from office of various energy kingpins have only had the effect of multiplying the conflicting public statements of these administration officials.

Mr. Speaker, I have said that Mr. Simon's appointment marks a turning point for the administration's approach to our energy shortages. It does. It will unite authorities formerly exorcised by Interior's offices of petroleum allocation, energy conservation, energy data, and analysis, and oil and gas plus those of the energy division of the Cost of Living Council. All are now to be lodged under one roof—that of the FEA. But the creation of the Federal Energy Administration and the appointment of the Administrator by Executive order can only be considered an interim measure at best.

The Congress must concern itself with insuring that a permanent statutory basis exists for the FEA.

Since the FEA will also require an appropriation of funds from the Congress, additional opportunities for dialog between the administration and the Congress will be afforded. Considering the people that have thus far been selected to staff the FEA, such an exchange could become one of the few truly cooperative "joint ventures" the administration will have entered into with Congress.

Most of all, however, the authorization of the FEA ought to cement the centralization in one agency of all our energy problem-solving capabilities, instead of their diffusion throughout the Federal bureaucracy. That former setup had made it extremely difficult for my office in Springfield to be either consistent or accurate in answering the tremendous number of constituent inquires we have received on any number of energy related problems. It has been literally impossible for us to reduce the apprehensions of people who are uncertain as to how rules and regulations affect them because of the confusion on that very score within the Federal Government.

Yet, in the barely 2-week period that the FEA has been operating under Administrator Simon, I have detected a noticeable change in the atmosphere of energy policy formulation.

In my home State of Massachusetts, there is a new Regional Director of the FEA for all of New England. Mr. Lawrence W. Rogers is the Regional Director of the Manpower Administration. On loan from the Labor Department, he has been laboring long hours on a 7-day-a-week basis to effect an orderly changeover to the new agency.

From a workload of well over 1,000 cases, which they inherited barely 2 weeks ago, he and his meager staff have reduced the backlog to less than 150 unresolved files. Furthermore, each individual problem has received personal attention, not just the distant formality of a form reply. This kind of result in such a short time is clearly the product of both dedication and a sophisticated approach. It is the kind of service that we should have been receiving all along.

Despite a shortage of staff and inadequate office space, Mr. Rogers has done a very credible job of stemming the tide of rising energy complaints. Like other regional directors—he is hampered by the uncertainty as to where the money for his staff will come from, how much money he will have to hire staff, or from whence his staff will come.

Certainty on those points can only come after an authorization and then an appropriation for the FEA is approved by the Congress. Then only will he or any other Regional Director be able to attract the kind of superior agency personnel that the FEA ought to have to perform the important tasks that have been assigned to it.

Furthermore, it is apparent to me that the 10 regional offices of the FEA are only the barebones of the Federal effort that must be expended if a truly responsive and equitable program of allocation and conservation is to result. Additional local offices are necessary to share the burden with the principal regional FEA offices. One office cannot possibly handle all the requests and inquiries from a region as large and as hard hit by energy shortfalls as New England. It is not fair to the public and it is not fair to the staff of the regional office.

I have proposed on several occasions in letters to the President and other administration officials that an energy policy subregional or local office be set up in western Massachusetts. While the logical place for such an office would be Springfield, which is in my congressional district, I am not proposing the establishment of this office because of what is only a selfish concern for my own constituents. All New Englanders, all Americans, deserve priority recognition and treatment of their energy needs.

I have made my own Springfield district office available on a constant basis to keep the public as fully informed and as well served as we can with the limited resources available to us. But the people of western Massachusetts deserve better than our secondhand, at-a-distance attempt to discover solutions to their problems. So do all American citizens.

As I have indicated, I think that we should enlarge and enhance the basic organizational structure of the FEA as it is now constituted. I would much prefer that the Federal Energy Administration be established through a separate act.

Mr. Speaker, yesterday the Senate passed S. 2776 by a vote of 86 in favor with 2 against. The House should have given consideration to this bill. It is, by far, the better way of creating a more effective Federal Energy Administration. It pulls together by statute, in one agency, the many facets of this difficult problem that is now spread through several Federal agencies. It makes specific appropriations for the FEA instead of the present piecemeal allocations to these several agencies. Its lines of authority are more clearly and precisely defined. It enables the Administrator and his staffs, here in Washington and throughout the country to have a much better grasp on the ability to recruit the staff that is absolutely necessary to have any degree of competence, fairness and equity in the performance of the difficult task that the Federal Energy Administration faces now and in the future.

CONFUSION IN THE HOUSE

(Mr. FRENZEL asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. FRENZEL. Mr. Speaker, again tonight we have been lucky in that the country could not deserve our silly actions. In a time of lack of confidence, the House was again put by its leadership in a position of not knowing what it was voting on. The confusion was, as noted by the gentleman from Louisiana (Mr. Waggonner), not a credit to the House. But around here we seem to thrive on confusion.

The parliamentary situation has been difficult. The Senate has pressed us. But we did not have to get ourselves into this mess, and we did do it to ourselves.

All we had to do tonight was to pass the Senate bill to get an energy bill. Instead we had to monkey around with the two complicated and unknown House resolutions that were poorly explained and never printed for the Members.

I voted against the first resolution of the gentleman from West Virginia (Mr. Staggers), the number of which is unknown to me. The resolution was certain to fail in the Senate and we would surely have no bill.

I think I am as anxious to challenge the Senate as any person here. I recall making a challenge on the public health hospitals and again on the noxious, nongermane FTC amendments to the Alaska pipeline bill. At those times, the very persons who are now asking us to stand up to the Senate were then voting for outright surrender. The problem now is that there may not be any Senate to stand up to.

We have let this thing drag out so long we do not know whether the Senate has a quorum or not. If we want any bill, we should pass the Senate bill. If we send this resolution to a Senate lacking a quorum, we kill any possibility of getting the energy bill this country needs now.

I will stay as long as necessary to work out a bill. I recognize the need to control excess profits of energy companies. I voted against resolutions tonight both with and without the windfall profits section. That isn't the issue. The issue is a bill, the Senate bill, or no bill.

But perhaps even a deeper issue is that of our own procedures. How can we explain to a doubting populace our voting on unprinted, unknown resolutions? Or our total confusion on the parliamentary situation?

It is essential that we follow up this obviously temporary energy bill with needed legislation like extensions of authority and excess profits taxes. It is equally essential that we clean up our own House, so that adventures such as we indulged in tonight need not be repeated.

SUMMARY OF H.R. 10253

(Mr. ROY asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. ROY. Mr. Speaker, yesterday I introduced the National Health Policy and Health Development Act of 1974. Today I am submitting for the Record a short summary of the act, a table of cost figures, a section-by-section analysis, and a copy of the bill for the consideration of the Members and public.

Brief Summary of the National Health Policy and Health Development Act of 1974, H.R. 10253

The proposed Act has four principal parts. Part A would establish a National Council for Health Policy. Part B would create a system of Health Service Agencies (HSAs) responsible for areawide health planning and development throughout the country. Part C would assist State governments in the creation of State Health Commissions (SHCs) responsible for State-level health planning and regulatory activities. Part D would create a new Federal program of construction assistance for health facilities based on loans, loan guarantees, and interest subsidies. The new programs would commence during the present fiscal year, thus overlapping with the authorities for CHP, RMP, and Hill-Burton. The Secretary would be responsible for assisting the existing agencies under the latter programs in their transition into the new programs, and then at the end of the present fiscal year the legislative authorities for CHP, RMP, and Hill-Burton would be terminated. The provisions of the new programs are based on the extensive experience now available with the existing programs and combine the most effective and successful features of each of them.

The *National Council for Health Policy* would be established in the Executive Office of the President. It would have five members appointed by the President with the advice and consent of the Senate, and suitable staff and support for performing its functions. It would be responsible for assessment of the nation's health; assessment of Federal and other health programs; assessment of the need for health resources, services, and financing; developing recommendations for a national health policy; issuing guidelines on the appropriate supply, distribution and organization of health resources and services; and conducting studies and analyses concerning its recommendations for a national health policy. The Council would be required to submit an annual report to the public on the work it has done. In developing policy the Council would be required to give priority consideration to national health priorities specified in the legislation.

In creating a system of *Health Service Agencies* (HSAs) the Secretary would first be responsible for dividing the nation into health areas for planning and development purposes. He would then designate in each health area a private nonprofit corporation as the HSA responsible for planning and development in that area. The legislative proposal specifies minimum criteria for the legal structure, staff, governing body, and functioning of the HSAs. They would be broadly responsible for preparing and implementing plans designed to improve the health of the residents of their health areas; increasing the accessibility, acceptability, continuity, and quality of the health care provided the residents; and restraining increases in costs of such care. In performing these functions, HSAs would be required to gather suitable data; prepare long-range goal plans and short-term priority plans; provide assistance of either a technical or financial nature to people seeking to implement provisions of the plans; coordinate activities with PSROs, SHCs, and other appropriate planning and regulatory entities; review and approve or disapprove proposed uses of Federal health funds within the area; assist States in the performance of capital expenditure reviews under the Social Security Act; and assist the SHCs in certifying as needed health services offered in the area. Procedures and criteria for use by HSAs and SHCs in their performing of reviews required by the legislation are detailed.

Authority is given to the Secretary for providing assistance to organizations seeking to be designated as HSAs during their development, for providing technical assistance of various kinds to HSAs and SHCs, for making planning grants to designated HSAs to fund part of the cost of their planning programs, and for making development grants to the HSAs creating Area Health Services Development Funds for HSA use in implementation of their plans. The Secretary is required to perform annual and triannual reviews of the activities and quality of HSAs to assure that they perform their functions in a satisfactory fashion.

The Secretary would also be required to designate in each State a *State Health Commission* (SHC) meeting criteria for its composition, staffing, and functions which are specified in the legislation. In order to receive designation, a SHC would need to submit to the Secretary an approvable administrative program for carrying out its functions. The SHCs would be responsible for annual review and approval or disapproval of the plans of the HSAs, annual review and comment on the budgets of the HSAs, review of applications submitted by HSAs for assistance from the Federal government, commenting on disapproved applications for Federal funds, performance of capital expenditure review functions under the Social Security Act, certification as needed of health services offered within the State, regulation of health care costs within the State, and (if they so desire) licensure and quality activities. Provision is made for the Secretary to provide financial assistance in the development and operating costs of SHCs. In addition the Secretary would be required after the expiration of the fourth fiscal year after enactment of the legislation to perform the functions of SHCs in any State in which one was not designated.

NATIONAL HEALTH POLICY AND HEALTH DEVELOPMENT ACT AUTHORIZATIONS

[In millions of dollars]

	Fiscal year—			
	1974	1975	1976	Total
Assistance for developing HSA's sec. 615	15	30	30	75
Planning grants for HSA's sec. 618		60	100	160
Development grants for HSA's sec. 619		100	125	225
Assistance for developing SHC's sec. 628(a)	2	3	5	10
Assistance for operating SHC's sec. 628(b)	1	5	10	16
Revolving loan Fund for construction sec. 634[1]		100	......	100
Total	51	232	303	586

[1] Authorized in the aggregate for 3 years. For purposes of yearly totals, considered as equally divided among the 3 years.

The assumptions underlying the figures are to be found in the appropriate sections of the detailed section-by-section analysis of the Act.

The authorizations may be compared with the following summary of authorization and appropriations for CHP, RMP, and Hill-Burton, the programs which would be combined by the legislative proposal.

AUTHORIZATIONS AND APPROPRIATIONS DATA FOR PROGRAMS REPLACED BY THE PROPOSAL

[In millions of dollars]

	Fiscal year 1972		Fiscal year 1973		Fiscal year 1974		Totals	
	Authorized	Appropriated	Authorized	Appropriated	Authorized	Appropriated	Authorized	Appropriated
CHP:								
314(a)	17	7.68	20	10	50	10	47	27.68
314(b)	30	13.2	40	25.1	25.1	23.8	95.1	62.1
RMP	150	90.5	250	159	159	81.95	559	331.45
Hill-Burton	422	197.2	437.5	197.2	197.2	197.2	1,056.7	591.6
Total	519	308.58	747.5	391.3	391.3	313.05	1,757.8	1,012.83

Section-by-Section Analysis of H.R. 10253 National Health Policy and Health Development Act of 1974

The National Health Policy and Health Development Act of 1974 provides amendments to the Public Health Service Act which are designed to assure the development of a national health policy and of effective state health regulatory programs, and area health planning and development programs. Section 1 of the Act provides that it may be cited as the National Health Policy and Health Development Act of 1974.

Section 2(a). This section makes Congressional findings that:

(1) the achievement of equal access for all people to high quality medical care at a reasonable cost is a priority of the Federal Government;

(2) the recent massive infusion of Federal funds into the existing health care system has not produced an adequate supply or distribution of health care resources and consequently has not made possible equal access to such resources by the total population; and

(3) cooperation between the public sector (national, State, and local) and the private sector has not effectively developed a comprehensive, rational approach to the problems of—

(a) the lack of effective methods of delivering health services; and

(b) the maldistribution of health care facilities and manpower.

Section 2(b). States that, in recognition of the magnitude of the problems enumerated in section 2(a) and the importance of their solution, the purpose of this Act is to develop recommendations for a national health policy responsive to the problems enumerated, augment health planning intended to solve these problems within the framework of the national health policy, and to authorize financial assistance for the development of programs indicated by the planning process and the policy. The recommended national health policy, which is to include a specification of national health goals, is to give direction and coordination to public and private health planning and development programs. The policy is to be implemented by a nationwide system of Health Service Agencies (HSA's), to be established by this Act, which are to have within their health areas the responsibility and resources for assuring equal access for the residents of the areas to all necessary health care services.

Section 2(c). Makes additional Congressional findings that:

(1) past and present increases in the cost of medical care, particularly of hospital stays, are excessive and inflationary;

(2) the present proliferation of new health services and capital expenditures for health facilities is often inappropriate and unplanned;

(3) there are presently inadequate financial incentives for the use of appropriate levels of care, and for the substitution of ambulatory and intermediate care for inpatient hospital care;

(4) the many and increasing Federal, State, local, and private responses to these problems have often been fragmentary, inadequate, conflicting, and inequitable; and

(5) State governments have a central role to play in correcting these problems.

In response to these additional findings, this section states the purpose of Part C, of the new Title VI of the PHS Act created by this Act, to be to assist in the development of State health care regulatory programs which, in conjunction with the health planning programs, assure the availability of health services to all people at the lowest feasible rates. These regulatory programs are to regulate rates of payment and reimbursement for health care in order to:

(1) discourage wasteful and inappropriate use of services and promote uses that are economically justified in view of the relationships between costs incurred and benefits received;

(2) assure that all services provided are of acceptable quality;

(3) assure those responsible for the provision of services with necessary revenue requirements for the provision of high quality health services; and

(4) distribute the burden of meeting these revenue requirements fairly among all those who pay for health services.

Section 3. Provides that Title VI of the Public Health Service Act is amended by replacing the existing text with an entirely new text, described below. This has the effect of repealing the existing programs of assistance for construction and modernization of hospitals and other medical facilities (known as the Hill-Burton program). Section 4 of the Act, described at the end of this analysis, also repeals the existing sections 314 (a), (b), and (c), and Title IX of the Public Health Service Act (the Comprehensive Health Planning and Regional Medical Program legislative authorities). Provision is made in section 4 for transition between the program described below, in the new Title VI, and the three programs which it replaces, Hill-Burton, CHP, and RMP. The new Title VI has the following title and provisions.

TITLE VI—NATIONAL HEALTH POLICY, AND HEALTH PLANNING AND DEVELOPMENT

PART A—NATIONAL COUNCIL FOR HEALTH POLICY

ESTABLISHMENT OF NATIONAL COUNCIL FOR HEALTH POLICY

Section 601(a). Establishes in the Executive Office of the President a council to be known as the National Council for Health Policy. Specifies that the establishment of the Council in the Executive Office of the President is not to limit access by the Congress, or its committees, to data, documents, studies, or personnel of the Council.

The location of the Council in the Executive Office of the President is intended by the sponsors of the legislation to assure it close access to Presidential and Congressional health policy making, and an overview of all Executive Branch health activities rather than just those of the Department of Health, Education and Welfare, and to give it prominence and prestige sufficient to give its recommendations national consideration. In this regard, the Council is analogous to the existing Council on Environmental Quality. The provision assuring Congressional access to the works and personnel of the Council underlines the sponsors' belief that such a Council serves both the Executive Branch and the Congress in recommending health policy and should be essentially a public entity.

Section 601(b). Provides for the number, appointment and terms of office of the members of the Council. The Council is to be composed of five members to be appointed by the President with the advice and consent of the Senate. The members are to be qualified by training, experience, or attainments to assist in the functions of the Council. Not less than two of them are to be consumers of health services. Not more than three are to be of the same political party. Council membership is to be for a term of office of six years with the terms of the five members appropriately staggered. The chairman of the Council is to be selected from among the members by the members and to serve for a period of not more than three years.

Section 601(c). Provides that the annual rate of pay for the chairman of the Council is to be at level 2 of the Executive Schedule and the annual rate of pay of the other members at level 3 of the Executive Schedule.

Section 601(d). Provides that the Council may employ and use such staff as it determines are necessary to perform its functions, and may procure the services of experts and consultants as necessary.

FUNCTIONS OF NATIONAL COUNCIL FOR HEALTH POLICY

Section 602(a). Lists the responsibilities of the National Council, as follows:

(1) Assessment of the status of the Nation's health;

(2) Assessment of existing and proposed Federal and other health programs;

(3) Assessment of the need for health resources, services, and financing;

(4) Development of recommendations for a national health policy which are to include a quantifiable statement of national health goals developed after appropriate consideration of the priorities set forth in section 603;

(5) Issuing recommended guidelines respecting the appropriate supply, distribution, and organization of health resources and services; and

(6) Conduct of studies and analyses concerning recommendations developed under paragraph (4) for a national health policy.

In carrying out these responsibilities, the Council is to seek the advice of outside advisory committees which it shall appoint, and is to work with and consult with the health service agencies established by the rest of the legislation.

The legislation is drafted so that the National Council on Health Policy recommends health goals rather than establishing them, in recognition of the fact that the final determination of health policy is appropriately the function of the Congress and the President. The requirement that the Council work with HSAs in establishing national health goals is designed to assure that its recommendations will be responsive to the identified needs of the country as expressed through the plans of the HSA's.

It is further felt that the HSA's will work more effectively to achieve the recommended goals if they have been involved in the formulation of the goals. The responsibilities of the Council for the assessment of the status of the nation's health, existing and proposed health programs, and the need for the supply of health resources and services is recognized to be an immense task and it is anticipated that the Council will obtain substantial staff assistance from the Department of Health, Education, and Welfare.

The guidelines respecting the supply of health resources and services which the Council is to issue are intended to provide guidance to the DHEW and the HSA's in their own planning programs. They would concern themselves with such matters as: the appropriate ratio of physicians to population including considerations of physician distribution both geographically and by specialty, the needed population base and support services for highly specialized health services such as radiation therapy, or renal dialysis and transplantation services, and suitable methods of providing primary care services in rural areas. While it is expected that issuing guidelines for resources and services spoken to in the recommended national health goals would be of high priority, there is no intent that the Council be limited to the development of guidelines by their recommendations for national health goals.

Section 602(b). Requires an annual report on or before February 1, from the Council to the public specifying the results of the activities undertaken to meet the listed responsibilities.

Generally, it is anticipated that this report would include the results of the various assessments done by the Council, enumeration and justification of the recommended national health goals, and copies of guidelines, studies, and analyses prepared by the Council.

NATIONAL HEALTH PRIORITIES

Section 603. Specifies Congressional findings as to appropriate priorities to be used in the formulation of a national health policy and in the development and operation of Federal, State, and area health planning and development programs. These are to include:

(1) The provision of primary care services for medically underserved populations, especially those which are located in rural or economically depressed areas;

(2) The development of multi-institutional systems for coordination of consolidation of institutional health services (including obstetric, pediatric, emergency medical, intensive and coronary care, and radiation therapy services);

(3) The development of medical group practices, especially those whose services are appropriately coordinated or integrated with institutional health services;

(4) The training and increased utilization of physician assistants, and nurse clinicians;

(5) The development of multi-institutional arrangements for the sharing of support services necessary to all health service institutions;

(6) The promotion of activities to achieve needed improvements in the quality of health services, including needs identified by the review activities of Professional Standards Review Organizations;

(7) The development by health service institutions of the capacity to provide various levels of care (including intensive care, acute general care, and extended care) on a geographically integrated basis;

(8) The adoption of uniform cost accounting, simplified reimbursement, and utilization and reporting systems and improved management procedures for health service institutions; and

(9) The development of effective methods for financing of, reimbursement for, and regulating votes of reimbursement and payment for medical care.

The legislation requires the National Health Council in formulating its goals (section 601(a)(4)) and the HSA's in developing their long-range goal plans (section 613 (b)(2)) to give appropriate consideration to these priorities in the development of the goals.

PART B—HEALTH AGENCIES

HEALTH AREAS

Section 611(a)—Requires the Secretary to establish throughout the United States health areas with respect to which he will then designate health service agencies (HSA's) under section 616. Each area is to meet the following requirements:

(1) The area shall be a rational region for the proper planning and development of health services which contains the resources necessary to provide all necessary health services for the residents of the area;

(2) To the extent practicable, the area shall include at least one center for the provision of highly specialized health services;

(3) The area shall follow State boundaries, except that an area may comprise a geographical region which crosses State boundaries if the Secretary determines that such a region is a more rational region for the proper planning and development of health services;

(4) The area, upon its establishment, shall have a population of not less than 500,000 nor more than 3 million; except that (A) the population of more than 3 million, and (B) million if the area includes a Standard Metropolitan Statistical Area (SMSA) with a population of more than 3 million, and (B) the population of an area may be less than 500,000 if the area comprises an entire State which has a population of less than 500,000; and

(5) to the maximum extent feasible, the boundaries of an area may not cross the boundaries of a SMSA.

The Secretary is further required to coordinate his designation of health areas with the designation of areas for PSRO's under section 1152 of the Social Security Act. This coordination is to assure that each health area is made up of one or more whole PSRO areas, or vice versa. This means that the boundaries of a health area are not to cross the boundaries of an area for a PSRO.

These requirements are intended to assure that health areas, which are to cover the entire country without overlap, will represent rational areas for doing health planning, of reasonable size, and bearing reasonable relationships with existing state boundaries and the boundaries for PSRO activities. Each area is to be large enough that it will have the capacity to provide all necessary health services to all of its people. This should also assure that it has a large enough resource base for effective planning. The requirement for a center for the provision of highly specialized health care would generally be met by including in each area an academic health center. The requirements are designed to give the Secretary flexibility in designating health areas so that they can conform to State boundaries wherever this is appropriate, such as in sparsely populated or Western states, or cross state boundaries where the existence of a large metropolitan area on the border of a state makes this more appropriate for health planning. Similarly, it is anticipated that rural and sparsely populated states may constitute an entire health area while more densely populated states such as New York and California may have as many as five or more health areas within their own boundaries. Generally, it is expected that rural areas will be associated in the designation of health areas with whichever urban center they look to for the provision of secondary and tertiary health services.

Section 611(b). Provides requirements for the time schedule which the Secretary is to follow in designating health areas, the officials and organizations with which he is to consult in such designation, and for periodic review and modification of the areas as appropriate. The schedule allows the Secretary four months in which to develop proposed health areas, and a month for receiving comment on these areas by concerned parties, and making their final publication. Generally it is expected that the final publication would occur within at most two months after the close of the period for comment. The Secretary is directed to consult in the designation of health areas with the Governors of the States and the chief executive officers of counties, cities, and other political subdivisions of the States. In addition, he is to consult with the existing 314(a), and 314(b) comprehensive health planning agencies. During the period for comment the Secretary is to receive and consider comments from all interested parties. In his ongoing review of the appropriateness of the designated areas the Secretary is to consult with the same officials, and to provide the same opportunity for comment on proposed changes in the areas as are required for the original designation of the areas.

HEALTH SERVICE AGENCIES

Section 612(a). Defines a HSA as a nonprofit private corporation which is organized and operated as described in section 612(b), and which is capable of performing the functions delineated in section 613. Requires the Secretary to prescribe standards and criteria for the organization and functioning of HSA's in regulations.

Section 612(b). Defines criteria for the (1) legal structure, (2) staff, and (3) governing body of HSA's.

Legal Structure. An HSA is to be legally incorporated in the state in which is located the largest part of its health area's population and is not to be a subsidiary of, or otherwise controlled by any other private corporation or other private legal entity.

This requirement is designed to insure for health planning purposes the financial and organizational independence of the HSA from existing health programs and organizations, including state and local government. The requirement for organizational independence is not meant to prevent the HSA from performing planned related functions for existing health programs and governments, but these should be contractually defined in such a way that it is clear what services are to be rendered, and that the contract does not influence or bias the HSA's planning programs.

Staff. HSA's are required to have a staff which provides the agency with expertise in at least the gathering and analysis of data, planning, and health manpower, facilities and services. The professional staff of any agency is generally to have at least one person for each hundred thousand people in the area served by the agency, except that in areas with a small population the professional staff is always to include at least five members. The staff of an HSA is to be selected, paid, promoted, and discharged in accordance with such systems as the agency establishes, except that rates of pay for the staff are not to be less than those prevailing in the health area for similar positions in other public or private planning and health service entities.

Governing Body. Each HSA is to have a governing body with not less than 10 and not more than 30 members. Provision is made that the governing body may exceed a membership of thirty if it has an established "executive committee" of not more than 25 members to which it has delegated the authority to take action on its behalf. The governing body is to be responsible for:

(1) The internal affairs of the HSA including matters relating to the staffing of the agency, its budget, and procedures and criteria developed and published pursuant to section 614 for performing its functions under subsection 613 (e), (f), and (g);

(2) The approval of the long-range goal plan (LGP) and short-term priorities plan (SPP) required by section 613(b);

(3) Issuing an annual report concerning the agency's activities. The report is to include the LGP and SPP of the agency, and is to be readily available to the residents of the health area and the various communications media serving the area;

(4) Reimbursing its members for their reasonable costs incurred in attending meetings of the governing body;

(5) Meeting at least once in each quarter of each year, and meeting at least two additional times in a year, unless its executive committee meets for it; and

(6) Conducting its business meetings in public and making its records and data available upon request to the public. A quorum for meetings of the governing body is to consist of not less than half of its members, including half of the members in each of the categories described below under composition.

The governing board of the HSA is to be composed as follows:

(1) At least one-third of its members are to be consumers of health services living in the HSA's health area who are broadly representative of the various economic, social, racial, and geographic population groups of the area;

(2) At least one-third of the members are to be providers of health services resident in the HSA's area who are broadly representative of health professionals, public and community health personnel, and allied health personnel; health institutions (including hospitals, extended care facilities, and university health centers), and the employees of such institutions; and people paying for health care services (including direct service and indemnity insurance companies); and

(3) At least one-third of the members are to be residents of the HSA's area who hold public elective offices and who are broadly representative of the elected governmental authorities in the area.

For the purposes of this section, the term "provider of health services" is to mean an individual who receives (either directly or through his spouse) more than one-tenth of his gross annual income from fees or other compensation for the provision of health services, or from financial interests in entities engaged in the provision of health care services, or in producing or supplying of drugs or articles for individuals and entities engaged in the provision of such services, or from both such compensation and such interests.

If the governing body in exercising its functions appoints a subcommittee of its members or an advisory group to it, it is required, to the extent practicable, to make its appointments to the subcommittee or advisory group in such a manner as to provide representation on the subcommittee or advisory group comparable to that described above for the governing body itself.

These requirements for the membership of the HSA's governing body are designed to achieve several purposes. The heterogeneous mixture of individuals represented is intended to prevent domination by any one group or interest of the planning process. The strong representation of elected public officials is intended to assure that the HSA's decisions are made with the general community interests well represented. The strong consumer majority represented by limiting providers of health services to a one-third membership is intended to assure that the health planning done by the HSA is responsive primarily to the interests and needs of the community, as well as the interests and the needs of the health service providers.

Section 612(c). Authorizes HSA's to establish subarea advisory councils representing parts of their health areas to advise their governing bodies on the performance of their functions. To the extent practicable the composition of subarea advisory councils is to conform to the requirements for representation on the governing body.

This provision is intended to assure local in-puts into the planning process, particularly in HSA's planning for large or populous health areas. Subarea councils might well be established by an HSA to represent each county within its area, or each natural community within a large city.

FUNCTIONS OF HEALTH SERVICE AGENCIES

Section 613(a). Makes a general statement of the responsibilities of the HSA's and the purposes for which these responsibilities are to be undertaken. Thus, an HSA has as its primary responsibility the provision of effective health planning for its area and the promotion of the development within the area of health services and facilities which meet identified needs, reduction of documented inefficiencies, and implementation of the health plans of the agency. These responsibilities are to serve the purposes of:

(1) improving the health of residents of a health area;

(2) increasing the accessibility, acceptability, continuity, and quality of the health services provided to the residents; and

(3) restraining increases in the cost of providing the residents with health services.

In meeting their primary responsibility, HSA's are to perform the functions prescribed in section 613(b) through 613(g).

Section 613(b). First, requires HSA's in providing health planning and development for their areas to assemble and analyze data concerning:

(a) the status of the health of the residents of the area;

(b) the status of the health care delivery system in the area and the utilization of that system by the residents;

(c) the effect of the area's health care delivery system on the health of the residents; and

(d) the area's health resources, including health facilities and manpower.

Second, requires the HSA's to annually establish a long-range goal loan (LGP). In establishing the plan the HSA's are required to give appropriate consideration to the health planning priorities set forth in section 603, and the needs and resources described by the data gathered in response to the requirements listed above. The LGP is to be a detailed statement of goals which:

(a) describe a healthful environment and health systems in the area which, when developed, would assure that quality health services would be available and accessible in a manner assuring continuity, at reasonable cost, for all residents of the area;

(b) is responsive to the unique needs and resources of the area; and

(c) takes into account the National Council for Health Policy's guidelines (developed under section 602) respecting the area's supply, distribution, and organization of health resources and services.

Third, requires the HSA's to annually establish a short-term priorities plan (SPP) which describes objectives which will achieve the goals of the LGP, and specifies priorities among the objectives. The HSA is to give priority in the SPP to those objectives which will maximally improve the health of the residents of the area when obtained (as determined on the basis of the relation of the cost of obtaining the objectives to the benefits to be derived from obtaining them), and which are fitted to the special needs of the area.

Fourth, requires the HSA to develop and publish specific plans and projects for achieving the objectives established in the SPP.

In this approach, a goal is considered as a quantifiable statement of something which the HSA wishes to achieve: such as "achieving a supply of physicians equal to or better than one per one thousand residents of the health area." An objective is similar to a goal but has in addition a statement of the time in which the stated goal is to be achieved: such as "achieving a supply of physicians for the health area by 1976 of at least one per fifteen hundred residents." Priorities can be applied to either goals or objectives and give their relative weight or importance. It should be noted that several objectives may be defined to achieve a single goal.

The requirements for the establishment of LGP's and SPP's are designed to strike a balance between giving HSA's some Federal direction for their planning through the use of the National Council and the priorities stated in section 603, and giving them a reasonable opportunity to establish goals and objectives which are particularly responsive to the unique needs of the health area.

Section 613(c). Requires HSA's to implement the LGP and the SPP by performing the following functions:

(1) seeking the assistance of individuals and public and private entities in the health area;

(2) providing, in accordance with the priorities of the SPP, technical assistance to individuals and public and private entities in the area for the development of projects and programs which are necessary to achieve the plans, including assistance in meeting the requirements of the HSA respecting reviews prescribed under section 614; and

(3) making grants or contracts, in accordance with the priorities of the SPP, to individuals and public and private entities in the health area to assist them in planning and developing the projects and programs necessary for the achievement of the health system described in the LGP. Such grants and contracts are to be made from the Area Health Services Development Fund established with grants made under section 619. No such grant or contract is to be used for the support of an established program or to pay the cost incurred by an entity or individual in the delivery of health services.

These requirements are intended to give clear direction to the HSA to the effect that it has an obligation not only for developing plans but also for implementing them. The limitations placed upon the use of Area Health Services Development Fund monies reflect the intention that the money is to be used as seed money rather than ongoing support money.

Section 613(d). Requires HSA's to coordinate their activities with PSRO's, the SHC for their state or states, and any other appropriate regulatory entity in the health area. The HSA's are further required to provide assistance to such organizations and to secure data from them for use in their planning and development programs. They are required to seek to enter into agreements with such organizations which will assure that the planning or regulatory actions which they may take which alter or change the area's health system will be taken in a manner which is consistent with the goals and objectives of the LGP and SPP.

Section 613(e). Requires HSA's to review and approve or disapprove all proposed uses within the health area of Federal funds appropriated for programs under the PHS Act, the CMHC Act, or the Comprehensive Alcoholism Act for the development, expansion, or support of health facilities, manpower, or services. HSA's are further required to establish priorities for the approval of construction project applications under part D of this title. If an HSA disapproves a proposed use of Federal funds, the Secretary of HEW is not to make the funds available for the proposal unless: the entity making the disapproved proposal requests the Secretary to review the HSA decision; the Secretary obtains comments on the decision from the appropriate SHC; and the Secretary (if he reverses the HSA and makes funds available) makes available a detailed statement of the reasons for making the funds available.

This provision is one of several included in the legislation which are designed to insure that the HSA is able to control the allocation of scarce new health resources within the health area in such a fashion that their use will always be consistent with the goals and objectives established in the LGP and SPP.

Further requirements for the making of these reviews by HSA's are given in section 614. These reviews are intended to concern themselves primarily with the relationship of the proposed project being reviewed to the HSA's plans. They are not intended to supersede the HEW's own grant or contract making procedures including its own review of the content and quality of applications submitted for projects. An HSA approval of an application does not, of course, mean that HEW is required to fund it.

Section 613(f). Requires HSA's to review and make recommendations for approval (or disapproval) of all proposed capital expenditures in excess of $100,000 by health service entities in the health area. These reviews are to be performed for and submitted to the planning agency designated under section 1122 of the Social Security Act, generally the SHC, for its use in performing its responsibilities under that designation.

Section 613(g). Requires HSA's to review health services offered, or proposed to be offered in the health area and make recommendations based on these reviews to each SHC for each state in the health area for its certification as needed of the health services reviewed. The HSA's are to perform such reviews on a periodic basis, at least every five years. In the event that an SHC determines that a particular health service cannot be certified as needed, the HSA's are required to work with providers of such services, the SHC's, and other appropriate individuals and entities for the improvement or elimination (as the HSA finds appropriate) of such health services.

Most planning programs to date have concerned themselves only with new or future parts of the health system and have often been charged with an inability to affect existing, clearly unneeded, fragmented, or redundant health services. This provision is designed to allow the HSA's in addition to their responsibilities for future of an area's health system to begin to impact upon the existing system.

PROCEDURES AND CRITERIA FOR REVIEWS OF PROPOSED HEALTH SYSTEM CHANGES

Section 614(a). Requires HSA's and SHC's when reviewing for comment or approval proposed changes in the health system to use established review procedures and criteria. Such procedures and criteria are to be developed and published by either the HSA or SHC in accordance with regulations of the Secretary prior to their actual use. Such procedures and criteria are generally to be used whenever an HSA or SHC is reviewing a proposal, but they are required specifically for HSA's performing reviews pursuant to sections 613(e), (f), and (g), and SHC's performing functions prescribed in section 627. Procedures and criteria are permitted to vary according to the purpose for which a particular review is conducted, or the type of health service being reviewed.

The exercise by HSA's and SHC's of the review authority, whether for comment or approval, represents an important part of the clout with which these agencies are to implement their plans. As such, it is expected that the authority will be exercised in a responsible, public, established manner so that it is always possible for an affected party or concerned citizen to understand the nature and content of reviews, monitor their performance, and participate effectively in them. In light of the importance of such reviews, specifics concerning the procedures and criteria to be used are spelled out in some detail in the following sections.

Section 614(b). Requires each HSA and SHC to include in the procedures used in reviewing proposed health systems changes at least the following:

(1) written notification to affected persons of the beginning of an HSA or SHC review;

(2) schedules for reviews which provide that they shall not take longer than 120 days after the date that the notification described in paragraph (1) is made;

(3) provisions for persons subject to an HSA or SHC review to submit (in such manner and form as may be prescribed and published) information required by the HSA or SHC concerning the subject of the review;

(4) submission to the HSA or SHC of applications under part D of this title (concerning construction of health facilities), other titles of the PHS Act, or other provisions of law for Federal financial assistance for health services;

(5) submission of periodic reports by providers of health services or other persons subject to HSA or SHC respecting the development of their proposals subject to review;

(6) notification to providers of health services or other persons subject to HSA or SHC reviews of the status of such reviews of the health services or proposal being reviewed, findings made in the course of such reviews, and other appropriate information respecting them;

(7) provision for public hearings in the course of reviews, if requested by persons directly affected; and for public hearings for a good cause shown respecting decisions made in the course of reviews;

(8) regular reports of the reviews being conducted (including a statement concerning the status of each review) and of the reviews completed (including a general statement of the findings and decisions made in the course of the reviews) since the publication of last such report;

(9) access by the general public to all publications reviewed and to all written materials pertinent to any such reviews; and

(10) in the case of construction projects, procedures for the submission to the HSA and SHC of letters of intent to begin a construction project detailed enough to show the scope and nature of the project.

Section 614(c). Requires HSA or SHC reviews to include consideration of at least the following criteria for use in judging applications, proposals, and services being reviewed:

(1) the relationship of the health services being reviewed to the applicable LGP and SPP;

(2) the relationship of such services to the long-range development plan, if any, of the person providing or proposing such services;

(3) the need the population served or to be served by such services has for the services;

(4) the availability of alternative, less costly or more effective methods of providing such services;

(5) the relationship of the services reviewed to the existing health care system of the area in which such services are provided or proposed to be provided; and

(6) in the case of services proposed to be provided, the availability of resources (including health manpower, management personnel, and funds for capital and operating needs) for the provision of such services, and the availability of alternative uses of such resources for the provision of other health services.

Section 614(d). Requires HSA's in making reviews under section 613(e) of proposed uses of Federal funds to give priority consideration to the criteria listed in subparagraphs (1) and (6) of section 614(c).

Section 614(e). Requires HSA's in making reviews under section 613(f) of proposed capital expenditures to consider the costs and methods of any proposed construction, and the probable impact of the construction project reviewed on the costs of providing health services by the provider or other person proposing such construction project.

Section 614(f). Requires HSA's in making reviews under section 613(g) of health services for certification as needed, to give priority consideration to the criteria listed in subparagraphs (1), (3) and (4) of section 614(c).

ASSISTANCE TO ENTITIES DESIRING TO BE DESIGNATED AS HEALTH SERVICE AGENCIES

Section 615(a). Authorizes the Secretary to provide all necessary technical and non-financial assistance to nonprofit private entities desiring to become HSA's. Examples of types of assistance which might be provided are given, including the preparation by the Secretary of prototype plans of organization and operation for HSA's. Other examples might include on-site consultation and technical assistance, provision of model constitutions and by-laws for HSA's, or instructions in the raising of funds or collecting of data by HSA's. The Secretary is to furnish such assistance to entities which both express a desire to be designated as HSA's and have the potential for meeting the requirements specified in sections 612 and 613 for HSA's. Priority for such assistance is given to areawide CHP agencies (designated pursuant to section 314(b) of the PHS Act) and RMP projects (designated pursuant to Title IX of the PHS Act). This priority is given because of the anticipation that CHP and RMP agencies are generally the most likely to evolve, either separately or in combination, into HSA's under the new program. Assistance given by the Secretary under this provision is generally intended to assist entities in developing applications for submission under section 616 and otherwise in preparing to meet the requirements of designation as HSA's.

Section 615(b). Authorizes the Secretary to make grants to non-profit private entities to assist them in meeting the costs of organizing and beginning to operate in the manner required by section 612(b). Applications for such grants are required and must be approved by the Secretary. They are to be submitted in such form and contain such information as the Secretary requires and may not be approved unless the Secretary determines that assistance with such a grant will enable the assisted entity to meet the requirements of section 612(b) within two years and will qualify that entity to perform the planning activities prescribed by section 613. Thus any one entity will qualify for assistance under this section for a maximum period of two years.

Appropriations are authorized for the purpose of making grants under this section in the following amounts: $15 million for fiscal 1974, $30 million for fiscal 1975, and $30 million for fiscal 1976. These figures are based on the following assumptions: The maximum number of HSA's assisted will be 150; the maximum amount of assistance in any one year for developing an HSA will be $250,000; most potential HSA's will require two years of support in order to qualify for designation; and most HSA's will receive their first year of support in either fiscal 1974 or fiscal 1975. The figures used should be understood to represent maximums: for instance, many HSA's will clearly require much less than $250,000 in a given year.

DESIGNATION OF HEALTH SERVICE AGENCIES

Section 616(a). Requires the Secretary to designate an HSA for each health area established under section 611. Designations are to be made under agreements entered into between the Secretary of HEW and the entities to be designated as HSA's. Any such agreement is to contain provisions respecting the requirements of section 612(b), concerning the organization of HSA's, and section 613, concerning the planning functions of HSA's, and such additional provisions designed to carry out the purposes of this title as the Secretary prescribes. Designations are to be for a one-year period; except that they may be terminated prior to the expiration of the year:

(1) by the HSA at such time and upon such notice to the Secretary as he prescribes in regulations; or

(2) by the Secretary at such time and upon such notice as he may prescribe in regulation, if he determines that the HSA is not complying with or effectively carrying out the provisions of the designation agreement.

The legislation provides for formal arrangements between the Secretary and HSA's (and SHC's) because various provisions (particularly those of sections 613(e) and (f)) represent actual sharing of authority over the development of health systems between the Secretary and the HSA (or SHC). Thus, upon designation, an HSA becomes an agent of the Secretary and it is this status from which it derives in part its authority to perform the functions described in section 613.

Section 616(b). Provides that the Secretary may not enter into agreements under 616(a) with an entity unless it has submitted an application to the Secretary for designation as an HSA. The application is to contain assurances satisfactory to the Secretary that the applicant meets the requirements of section 612(b) (concerning the organization of HSA's) and is qualified to perform, or is performing, the health planning and development functions prescribed by section 613. This means that a designation as an HSA indicates that the designated entity is in full compliance with the requirements of 612(b) and is in fact performing the various functions required by section 613.

In considering applications the Secretary is to give priority when first designating an HSA for an area to an application from an entity which has been recommended for approval by each areawide CHP agency and each RMP in the health area. The Secretary is not to enter into an initial designation agreement for an HSA without the approval of the Governor of each state in which the health area is located.

TECHNICAL ASSISTANCE FOR HEALTH SERVICES AGENCIES AND STATE HEALTH COMMISSION

Section 617(a). Requires the Secretary to provide HSA's and SHC's with model health plans and planning processes, technical materials and standards for use in health planning, and such other technical assistance as they may require to perform their functions. These provisions are designed to correct a major deficiency in the CHP and RMP programs to date. This deficiency has been the failure of HEW to provide CHP and RMP projects with technical information, planning guides, workbooks for solving planning problems, and technical assistance of various other kinds in an amount and quality sufficient to maximize their ability to perform their responsibilities. Thus, while this section gives the Secretary a general mandate to provide HSA's and SHC's with expert assistance and technical materials, the following section prescribes in substantial detail certain materials which are to be available.

Section 617(b). Requires the Secretary to provide HSA's and SHC's with the following:

(1) requirements for data needed to perform their planning, development, and regulatory functions including data which describe:

(a) the health status of the residents of a health area, including requirements for data which describe mortality and morbidity by age, sex, race, residence, economic status, and occupation, and data which describe the etiologies of such mortality and morbidity;

(b) the status of the resources of a health area including requirements for data which describe health facilities in the area by size, type of services provided, location, and operating costs, and data which describe health manpower in the area by type, specialty, supply, location, income, and mode of practice; and

(c) the utilization of health resources within a health area, including requirements for data which describe the utilization of health resources by various specific population groups, including groups based on age, sex, race, residence, economic status, and occupation.

These data requirements are intended to apply primarily to HSA's The data base developed by HSA's would provide SHC's with a complete data base for the entire state which SHC's will coordinate and use in the performance of their functions. It is anticipated that SHC's will in addition provide HSA's with assistance in gathering data, and will attempt to assure that the data gathered by the various HSA's in a state is of comparable form, content, and quality;

(2) models, consistent with the guidelines established by the Council under section 602 (respecting the appropriate supply, distribution, and organization of health resources and services), for appropriate planning and development by HSA's and regulation by SHC's of health resources and services. Such models are to cover the following:

(a) the provisions of primary care services for medically underserved populations, especially those which are located in rural or economically depressed areas;

(b) the development of multi-institutional systems for coordination or consolidation of institutional health services (including obstetric, pediatric, emergency medical, intensive and coronary care, and radiation therapy services);

(c) the development of medical group practices, especially those whose services are appropriately coordinated or integrated with institutional health services;

(d) the training and increased utilization of physician assistants, especially nurse clinicians;

(e) the development of multi-institutional arrangements for the sharing of support services necessary to all health service institutions;

(f) the promotion of activities to achieve needed improvements in the quality of health services, including needs identified by the review activities of PSRO's;

(g) the development by health service institutions of the capacity to provide various levels of care (including intensive care, acute general care, and extended care) on a geographically integrated basis;

(h) the adoption of the uniform cost accounting, simplified reimbursement, and utilization and reporting systems and improved management procedures for health service institutions; and

(i) the development of effective methods for financing of, reimbursement for, and regulating rates of reimbursement and payment for medical care.

This list should be recognized as the same as the list of national health priorities given in section 603. The intention is that the Secretary will provide HSA's with particular assistance in their planning and development activities designed to support the priorities established by section 603. While it is not anticipated that any HSA would reproduce exactly any model for a planning activity provided to it, it is felt that many would be assisted by having a detailed approach to common shared problems outlined for and made available to them.

(3) guidelines for the organization and operation of HSA's and SHC's including guidelines for:

(a) the structure of an HSA consistent with section 612(b), or of an SHC consistent with section 625(d);

(b) the conduct of the planning, development, and regulatory processes;

(c) the performance of HSA functions in accordance with sections 613 and 614; and

(d) the performance of SHC functions in accordance with sections 614 and 627.

In the same manner in which the requirements of subparagraph (1) are designed to assist HSA's and SHC's in gathering data, and the requirements of subparagraph (2) to assist in the solving of particular planning problems, the requirements of this subparagraph are designed to assist HSA's and SHC's in their proper organization, and the performance of their functions.

PLANNING GRANTS

Section 618(a). Requires the Secretary to make a planning grant in each fiscal year to each HSA with which there is in effect at the beginning of the year a designation agreement under section 616. Planning grants are to be made on such conditions as the Secretary finds appropriate and are to be used by HSA's for the compensation of agency personnel, collection of data, planning, and other agency activities. HSA's are not to use grants under this section to make payments under a grant or contract with any other entity for the development of health services.

Planning grants are thus intended to underwrite the costs of HSA's own internal planning activities. The monies involved are to be kept separate from those available under developmental grants made under section 619. Developmental grants similarly are to be used by HSA's only for making grants and contracts to other organizations and entities for the development of needed health services, and not for the support of the HSA's own internal activities. The separation of these two types of funding is intended to allow separate identification of the costs of these two different types of activities.

Section 618(d). Provides, generally, a method for determining the amount of the planning grant to a given HSA. Each HSA is, first, guaranteed 100 percent Federal funding of its planning activities at a rate of 25 cents per person residing in the HSA's health area (except that, in the case of large HSA's, the maximum level for 100 percent Federal funding is to be $750,000). Second, each HSA is guaranteed Federal funding in the amount of 50 cents per person residing in the health area if it matches the Federal funds in excess of the minimum amount described above on a one for one basis with non-Federal funds. Third, provision is made that HSA's representing health areas with small populations are always to receive a minimum planning grant of at least $150,000.

Requirements for non-Federal matching funds used to achieve Federal funding at a level in excess of 25 cents per capita are given as follows:

(1) no more than 5 percentum of the matching funds are to be contributed to the HSA by any one private contributor; and

(2) funds used for matching Federal funds are to be available to the HSA without conditions or strings attached as to their use by the HSA, and are not to be funds paid to the HSA for its performance of any particular service.

These requirements are intended to insure that the obtaining of matching funds does not incur obligations on the part of an HSA which will bias or limit its planning and development activities. It should be noted that it is anticipated that matching funds will be available to the HSA in cash rather than in the form of in-kind services. No limitation is placed on the HSA's obtaining of funds from public sources, and in fact it is hoped that matching funds will generally be obtained from State and local governments since this will help to assure the public accountability of the HSA.

The method for determining the amounts of planning grants are intended to serve two primary purposes. First, each HSA is to be guaranteed a minimum level of funding adequate for the performance of its planning and development responsibilities. Second, if an HSA and its community desire adequate and sufficient funding, the method is intended to insure that the HSA's communities participate in that funding by matching the Federal dollars. The availability of local money to an agency such as an HSA is generally recognized as guaranteeing the accountability of that agency, and the commitment of its community to its activities. While Federal funding is not to exceed 50 cents per capita, there is no intention that HSA budgets must be limited to 75 cents per capita (the amount obtained with 50 cents per capita from the Federal government and 25 cents per capita local matching for the second 25 cents per capita of Federal funding). However, if a community feels that its HSA should operate at a funding level in excess of 75 cents per capita, it is anticipated that it will bear the costs of funding at such level.

Section 618(c). Authorizes appropriations for the purposes of making payments under section 618(a) in the amounts of $60 million for fiscal 1975, and $100 million for fiscal 1976. No authorizations are given for fiscal 1974 because it is not anticipated that the Secretary will be able to enter into designation agreements with any HSA's before the completion of the current fiscal year. The authorizations are based on the anticipated level of funding, 50 cents per capita for a U.S. population of approximately 200 million people.

Provision is made that if, in any given year, the appropriations fail to provide sufficient funds for making grants to all HSA's in the amounts determined under section 618(b), the grants to all HSA's are to be reduced proportionately to the amount permitted by the level of appropriations. This is done because the provisions of section 618 are written in such a fashion that HSA's which qualify for designation agreements are for all intents and purposes entitled to planning grants, and because the sponsors of the legislation wish to limit this entitlement only by the appropriations process.

DEVELOPMENT GRANTS FOR AREA HEALTH SERVICES DEVELOPMENT FUNDS

Section 619(a). Requires the Secretary to make development grants to HSA's with which to establish an Area Health Services Development Fund from which they are to make grants and enter into contracts in accordance with the requirements of section 613(c) (3). In order to receive a development grant in any given year an HSA must:

(1) have in effect a designation agreement with the Secretary under section 616;

(2) have in effect an LGP and SPP approved by the SHC for its state under section 627; and

(3) be organized and operated in the manner prescribed by section 612(b) and be carrying out its planning and other responsibilities under section 613 in a manner satisfactory to the Secretary as determined under the review required by section 620.

These requirements mean, that while an HSA can receive planning grants without undergoing the review required by section 620 successfully and without having completed an LGP and SPP, it can only receive developmental grants after having done so. Thus, planning grants are relatively easy for an HSA to obtain and this assures that each part of the country will be funded for planning and development of its health system. However, the larger amounts of money available under development grants are available only to communities in which a suitable health plan has been completed and the Secretary has found the planning process to be of adequate quality.

Section 619(b). Provides that the amount of a development grant to any particular HSA shall be determined by a formula which takes into consideration the population of the HSA's health area, the average family income in the health area, and the supply of health services in the health area. Development grants are not to exceed an amount representing a dollar per resident of the health area for which the HSA is designated.

Section 619(c). Authorizes the Secretary to set such conditions as he finds appropriate in addition to those specified for the making of development grants.

Section 619(d). Authorizes appropriations for the purpose of making development grants under section 619(a) in the amounts of $100 million for fiscal year 1975 and $125 million for fiscal year 1976. These authorizations are less than the $200 million which would be needed to make development grants for the entire country at a rate of $1 per capita, because it is anticipated that not all HSA's will qualify for development grants until after the program has been in effect for several years.

REVIEW

Section 620(a). Requires the Secretary to review and approve the annual budget of each HSA with which he has in effect a designation agreement under section 616. These budget reviews are to take into consideration the comments of each SHC designated under section 625 for each state in which the HSA's health area is located.

Section 620(b). Requires the Secretary to perform a detailed review at least every three years of the structure, operation, and activities of each HSA with which he has in effect a designation agreement under section 616. The review is intended to determine:

(1) the extent to which the governing body (and any executive committee which it may have) represents the residents of the health area for which the HSA is designated, and the professional credentials and competence of the staff of the HSA;

(2) the adequacy of the LGP of the HSA in meeting the needs of the area's residents for a healthful environment, and for accessible, acceptable, and continuous quality health care at reasonable costs and the effectiveness of the SPP in achieving the system described in the LGP;

(3) the appropriateness of the health data assembled pursuant to the requirements of section 613(b) and the quality of the analysis of such data;

(4) the extent to which technical and financial assistance from the HSA (including the Area Health Services Development Fund) have been used in an effective manner to achieve the goals and objectives of the LGP and the SPP; and

(5) the extent to which it may be quantifiably demonstrated that:

(a) the health of the area's residents has actually been improved;

(b) the accessibility, acceptability, continuity and quality of health care in the area has actually been improved; and

(c) increases in costs of providing health care have actually been restrained.

The requirements of this section are based upon the experience of the CHP and RMP programs which suggest that an adequate and complete review of the performance of an agency funded by HEW is unlikely to be possible on an annual basis and in fact is probably not necessary. Thus the sponsors of this legislation approve of the approach now being taken by the CHP program in HEW involving a periodic site assessment of each CHP agency.

PART C—STATE HEALTH COMMISSIONS

DESIGNATION OF STATE HEALTH COMMISSIONS

Section 625(a). For the purposes of the performance within each State of regulatory functions described in section 627, this section requires the Secretary to enter into an agreement with a qualified agency of each State whereby such agency shall be conditionally designated as the State Health Commission (SHC) for that State. After this conditional designation, the Secretary is to enter into a formal designation agreement with the agency designating it as the State's SHC, if:

(1) on the basis of its performance while conditionally designated (a trial period, not to exceed 24 months), the Secretary determines that the agency is capable of performing in a satisfactory manner the regulatory functions of SHC's described in section 627;

(2) a State administrative program for the performance of the regulatory functions by the SHC has been approved under section 626.

This two-stage designation process is designed to allow the States up to two years in which to develop effective SHC's. It permits the Secretary to begin the defined working relationship with the State prior to the full development of the SHC, a working relationship between the Secretary and the States which is otherwise not possible under a designation agreement approach.

Section 625(b). States that the purpose of the conditional designation of the qualified agency as an SHC is to allow the Secretary to determine the capacity of that agency for performance of the regulatory functions described in section 627. The designation is not to be made before the Secretary receives and approves from the qualified agency an administrative program under section 626 for the assumption and implementation of the regulatory functions of SHC's. A provision is made for the Secretary in his designation agreement with the State to allow the phasing in of the regulatory functions of the SHC in a manner acceptable to him based on the SHC's increasing performance capability. Official designation of the agency as the SHC is to be made only when the agency is capable of performing all of the regulatory functions required of SHC's. Provision is made that an agreement between the Secretary and a State agency providing conditional designation as an SHC may be terminated by either party on 90 days' notice to the other.

Section 625(c). Generally provides terms for designation agreements, other than those for conditional designation. Agreements are to be for 12-month periods, except that prior to the expiration of an agreement it may be terminated:

(1) by the SHC at such time and upon such notice to the Secretary as he prescribes in regulations (except that the Secretary may not require more than three months' notice); or

(2) by the Secretary at such time and upon such reasonable notice to the SHC as the Secretary prescribes in regulations, but only after the Secretary has determined that the SHC is not complying with or effectively carrying out the provisions of a designation agreement, and has provided the SHC with an opportunity for a formal hearing on the proposed termination of the agreement.

Section 625(d). Prescribes organizational and operational requirements for a State agency which seeks, as a "qualified agency," designation as an SHC. A "qualified agency" is to:

(1) be an independent establishment within the State government;

(2) be the sole agency of the State for: the performance of the regulatory functions prescribed by section 627; administering or supervising the administration of the State's health planning activities; the coordination of the plans of HSA's in the State; and the implementation of those parts of the HSA's plans which relate to the activities of State governments;

(3) not engage in activities which are unrelated to health planning or the regulation of health services, and shall not directly engage in, or be a part, or under the control, of any State agency directly engaged in the delivery or administration of programs of public or personal health services or health manpower education, the construction of facilities for health service institutions, or the administration of the State's Medicaid plan and program or any other program of assistance for medical expenses or public health insurance;

(4) conduct its activities in accordance with procedures and criteria established and published by it. These procedures and criteria are to the extent practicable to conform to the requirements of section 614; and

(5) conduct its business meetings in public.

These requirements are designed to assure that SHC's are able to function effectively as independent regulatory agencies or commissions within State government. In order to avoid any potential conflict of interest, the SHC is to be separated from the State's other health delivery, education, and insurance activities. This is particularly important since its regulatory functions will often affect these other State government activities as well as the private health care sector. The SHC in addition to its regulatory activities is to be involved in health planning in support of the HSA's in the State. Thus, it is to assist in planning for the State government's own health activities. It is to serve as a coordinator of the planning conducted in the various health areas. And, most important, it is to act as an advocate of the HSA's and their plans within the State government. Thus, where an HSA's plan would require a state legislative act, or a change in a State health program, the SHC is to assist the HSA in achieving this change.

The "qualified agency" is to have a governing body composed of three, five, or seven full-time members (whichever number may be authorized under the State law creating the SHC). The members of the governing body are to be appointed by the chief executive of the State or its legislature for staggered terms of not less than four years and paid without regard to the civil service and compensation laws of the State which are generally applicable to the employment and compensation of its employees, but at a rate which will enable persons with appropriate expertise to serve as members of the governing body. No member of the governing body, while a member, is to engage in any other business, vocation, or employment. The majority of the members of the governing body are to be consumers rather than providers of health services (as defined in section 612(b)(3)(B)). The remaining members of the governing council are to be representative of the various health service providers and institutions listed in section 612(b)(3)(B)(2). Members of any one political party are not to represent more than a simple majority of the membership of the governing body. No member of the governing body is to participate in SHC actions concerning matters in which that member has a direct and substantial economic interest. The State's chief executive officer is to select a chairman of the governing body from among its members.

The governing body is to be responsible for the internal affairs of the SHC, including its staff and budget, and for the performance of the SHC's function. The governing body is to be advised by an advisory council appointed by the State's chief executive officer or legislature (whichever is authorized under the law creating the SHC). The advisory council is to provide the governing body with advice on its budget, performance of its functions, and such other matters as the governing body desires. At least two-thirds of the members of the council are to be consumers of health services representative of the various geographic regions of the State, the HSA's in the State, the holders of public elective offices in the government of the State and its political subdivisions, and the various economic, social and racial population groups within the State. The council is to meet periodically, not less often than twice a year, and conduct its meetings in public.

Finally, an agency seeking to qualify as an SHC is to have a professional staff of not less than five individuals with such total numbers and qualifications as the Secretary may require.

STATE ADMINISTRATION PROGRAM

Section 626(a). Provides requirements for State administrative programs required under section 625(a)(2) as a condition for the designation of SHC's. The State administrative program is a plan for the performance within the State by its SHC of the regulatory functions prescribed by section 627. It is not be approvable in any given year unless it:

(1) meets the requirements of section 626(b);

(2) has been submitted to the Secretary by the SHC designated under section 625 at such time and in such detail with such information as the Secretary deems necessary;

(3) has been prepared in consultation with and approved by the advisory council to the SHC; and

(4) has been submitted to the Secretary only after the SHC has given the general public of the State a reasonable opportunity for presenting their views on the program. The public clearly in this case is intended to include the various types of health service providers in the State.

Section 626(b). The State administrative program must:

(1) provide for the performance within the State of the regulatory functions prescribed by section 627, and designate the SHC for the State as the sole agency for the performance of such functions (except as provided in section 627(b)), and provide for the administration of the administrative program;

(2) contain or be supported by satisfactory evidence that the commission has the authority to carry out the regulatory functions and the administrative program in accordance with the requirements of this part, and has authority to enforce its decisions under section 627;

(3) provide for adequate consultation with the SHC's advisory council in carrying out the functions and the program;

(4) set forth, in such detail as the Secretary requires, qualifications for the personnel having responsibilities in the administration of such functions and program;

(5) provide for such methods of administration of the administrative program and the regulatory functions as are generally found necessary by the Secretary for the proper and efficient administration of such functions and program including methods for establishing and maintaining personnel standards on a merit basis and provision for utilization of qualified professional medical personnel, allied health professionals, and other qualified professional staff. The medical personnel are to be used particularly in connection with the development or administra-

tion of any standards of quality and the utilization of health care. The Secretary, in approving State programs as they relate to SHC staffing, is to exercise no authority with respect to the selection, tenure of office, and compensation of any individual employed by the State in accordance with the personnel standards described above;

(6) provide that the State's part of the costs of operating the SHC shall be provided by the State in a manner satisfactory funding Secretary. Examples of a satisfactory funding mechanism are given, including taxes on health insurance premiums or reimbursements for health services, or the collection of fees from regulated health care providers within the State;

(7) provide that the SHC will cooperate with the Secretary in the design and implementation of nationwide cooperative system for producing health statistics; function as a center for the collection, retrieval, analysis, reporting, and publication of such statistics (including data on the health services and fiscal operation of regulated health care providers, and data of the kinds enumerated in section 305 of the PHS Act); and require providers doing business in the State to make statistical and other reports of data to the SHC;

(8) provide in accordance with methods and procedures prescribed or approved by the Secretary for the evaluation at least annually of the functioning of the SHC and its economic effectiveness; and

(9) provide that the SHC will from time to time, not less often than annually, review the State administrative program and submit to the Secretary any modifications which the Secretary considers necessary. These would usually include a budget for the coming year, an indication of any changes in the SHC's governing body, advisory council, or procedures, and a report on the prior year's activities including the evaluation of the SHC's functioning and effectiveness.

Section 626(c). Requires the Secretary to approve any State administrative program, and any modification of such a program, which complies with sections 626 (a) and (b).

STATE HEALTH COMMISSION REGULATORY FUNCTIONS

Section 627(a). Specifies the various regulatory functions, in addition to their health planning functions, which SHC's are to perform as a condition of their designation, under the designation agreement provided for in section 625. These include:

(1) annual review and approval, or disapproval, of the LGP and SPP of each HSA whose health area is located in whole or in part within the State;

(2) annual reviews of the budgets of each HSA located in whole or in part within the State and a report to the Secretary, for the purposes of his review under section 620, including the SHC's comments on the budgets;

(3) annual reviews of the applications submitted by HSA's for grants under sections 618 and 619 and report to the Secretary of the SHC's comments on such applications;

(4) serving as the designated planning agency for the State for the purposes of section 1122 of the Social Security Act. Section 1122 is concerned with the approval or disapproval of proposed capital expenditures by health care institutions for purposes of reimbursement for depreciation under the Medicare program;

(5) determination of which health services in the State should be certified as needed and which should be denied such certification. This determination is to be based upon a consideration of recommendations submitted by the appropriate HSA under section 613(g) concerning the certification of health services offered or proposed within the State. Certification of need is to be conducted on a periodic basis but not less often than every five years for each health service in the State;

(6) licensure of health care facilities and health manpower within the State;

(7) standard setting for health care facilities, and quality review and control for the performance of health services within the State, to the extent that the State wishes to engage in such activities. This provision is designed to insure that standard setting and quality control are conducted by the same organization which is concerned with licensure and cost control if these functions are being performed. The Secretary is not to be able to require these activities on the part of any given State; and

(8) prospective determination of the rates used for reimbursement purposes for health services of health care providers within the State, and regulation of all reimbursements of such health care providers whether the reimbursements are made on either a charge, cost, negotiated, or other basis. In carrying out this rate setting function the SHC is to design its program in order to achieve the following requirements:

(a) permit health care providers subject to its determinations and regulation to retain savings which accrue to them from effective management and cost control;

(b) create incentives at each point in the delivery of health services for the utilization of the most economical modes of services feasible. This is designed to insure that the rate setting program creates incentives for the use of ambulatory care in place of inpatient care where appropriate, or extended care facilities and nursing homes in the place of hospitals where appropriate. It is also intended to insure that within any institutional setting the most economical possible approach is taken to the care of a patient;

(c) document the need for and cost implications of each new service or facility for which a determination of reimbursement rates is sought. Since SHC's are required to exercise certificate of need responsibilities and the responsibilities of section 1122 of the Social Security Act, this provision is designed to permit the exercise of similar responsibilities within the rate setting program. Thus a proposed new service or facility which is not needed or has excessive cost implications could be denied the determination of reimbursement rates in the same manner in which it could be denied a certificate of need or approval for capital depreciation purposes; and

(d) employ for each type or class of health care provider a unit for determining the reimbursement rates of such provider, and a base for determining rates of change in the provider's reimbursement rate. This unit and base are to be satisfactory to the Secretary. It is intended that this provision will allow the States substantial flexibility in the design of their rate regulatory programs. Thus, for instance, the unit for measurement of hospital costs is left up to the State and might be variously the cost of a single admission to the hospital, the cost of a hospital day, the cost associated with the treatment of a single diagnosis, or the cost of individual services and procedures within the hospital.

The sponsors of this legislation are aware that relatively little experience has yet been gained with controlling the costs of medical care. Further, it is clear that a variety of different approaches are possible. This provision is generally designed to require the States to engage in rate regulation in a manner satisfactory to the Secretary but specifically to allow the design of such a program to remain within the discretion of each State. For this reason only the general policy guidelines enumerated above are given in the legislation. For purposes of rate regulatory programs, health care providers are to include at a minimum hospitals, nursing homes and extended care facilities, community health care programs (such as family planning clinics, CMHC's, NHC's, and rehabilitation center), home health agencies and visiting nurse associations, and indirect suppliers of health services (such as medical laboratories, ambulance services, blood banks, and dental laboratories).

Section 627(b). Specifies that the licensure function required of SHC's by section 627(a) (6) may be performed by another agency of State government under an agreement with the SHC satisfactory to the Secretary. State medical licensure activities are often currently performed by State licensure boards. This legislation is not intended to require these activities to cease or be redesigned but is intended to insure that they are conducted under arrangements with the SHC in a manner consistent with the requirements of this Act. This means that licensure decisions under the arrangement with the SHC should be made in a manner consistent with the State's HSA's, LGP's and SPP's wherever those licensure decisions affect the supply and distribution of health resources within the State.

Further specifies that if a State requests (in such manner as the Secretary prescribes) that the designation agreement, either conditional or final, of its SHC not require the SHC to perform the rate regulation function required by section 627(a)(8), then the agreement shall not require the SHC to perform such rate regulation. In such a case, the Secretary is required to perform such regulation beginning with the fourth fiscal year after enactment and continuing until such time as the SHC requests authority to perform the regulation itself.

Section 627(c). Requires SHC's, who make regulatory decisions in performing the functions required by sections 627(a) (4), (5), (6), (7) and (8) which are inconsistent with the applicable LGP or SPP, to submit to the appropriate HSA detailed statements of the reasons for such inconsistencies.

Section 627(d). Requires the Secretary to perform the regulatory functions listed in section 627(a) in and for any State with which a designation agreement for an SHC is not in effect under section 625, if the State has either failed to create an SHC qualified for designation or the Secretary has terminated a designation agreement with the State's SHC. States are to be allowed until the expiration of the fourth fiscal year after enactment of this Act in which to create SHC's before the Secretary begins to perform regulatory functions within the State. The Secretary is required to give the State's chief executive officer at least six months written notice of his intention to perform regulatory functions within the State, before he can do so. In any case in which the Secretary is performing regulatory functions for a State, he is to consult with the HSA's in that State and seek the advice and counsel of an advisory council made up of residents of that state in a manner comparable to that required by section 625 for advisory councils to SHC's.

This provision is designed to assure that the regulatory functions envisioned by this Act are performed throughout the nation after a reasonable opportunity for the development of programs suitable for their performance. The possibility that regulation will be performed in a State by the Secretary is also intended as one substantial motivation to the State to create its own SHG.

GRANTS FOR THE DEVELOPMENT AND OPERATION OF STATE HEALTH COMMISSIONS

Section 628(a). Authorizes the Secretary to make grants to States to assist in meeting the costs of developing SHC's. Development assistance is authorized for only one year in each State and must be matched by the State with at least 10 percent of the costs of the development.

Section 628(b). Authorizes the Secretary to make grants to the States to assist them in meeting the costs of operating SHC's. The States are to bear at least 25 percent of the operating costs in the first year, and 50 percent of such costs in subsequent years, except that the maximum amount of Federal support for any SHC is $500,000.

Section 628(c). Provides that grants may not be made under section 627 (a) and (b) unless an application has been submitted therefor and approved by the Secretary. The applications are to be submitted in such form and contain such information as the Secretary requires. The Secretary is not to approve any applications unless he determines that the federal funds available under the grant will be used to supplement State funds that would be available for the purposes for which the grant is made in the absence of such Federal funds, and in no event will supplant such State funds.

Section 628(d). Authorizes appropriations for grants for the development of SHC's in the amounts for $2 million for fiscal year 1974, $3 million for fiscal year 1975, and $3 million for fiscal year 1976.

Authorizes appropriations for grants for operating SHC's in the amounts of $1 million for fiscal year 1974, $5 million for fiscal year 1975, and $10 million for fiscal year 1976.

PART D—CONSTRUCTION ASSISTANCE

LOANS AND LOAN GUARANTEES AND INTEREST SUBSIDIES

Section 631(a). Authorizes the Secretary to make loans to assist in meeting the costs of construction projects for health facilities to public and nonprofit private entities and to guarantee to non-federal lenders payment of principle and interest on loans made by such lenders to nonprofit private entities for such construction projects.

Section 631(b). Requires the Secretary to pay an interest subsidy of 3 percentum per annum on the interest rate otherwise payable on loans guaranteed under section 631(a) made to nonprofit private health facilities or other nonprofit private entities. The holder of a guaranteed loan is given a contractual right to receive interest payments in the amount of the interest subsidy from the United States. The Secretary's obligation to make interest subsidies available is limited by specifying that contracts to make payments provided for under interest subsidies shall not carry an aggregate amount greater than such amount as may be provided in appropriations acts.

Section 631(c). Provides that loans made under this part may not be for an amount in excess of 90 percentum of the costs of the project for which the loan is made and that no loan guaranteee may be made with respect to a loan or part of a loan whose amount exceeds 90 percent of the cost of the project for which the loan is made.

Section 631(d). Authorizes the Secretary, with the consent of the Secretary of Housing and Urban Development, to obtain assistance from the Department of Housing and Urban Development with respect to the administration of this part so as to promote the efficiency and economy of its administration.

Section 631(e). Provides that the cumulative total of the principal of loans outstanding at any time or with respect to which loan guarantees have been issued may not exceed limitations specified in appropriations acts.

APPLICATIONS

Section 632(a). Specified that the Secretary is not to make loans or loan guarantees under this part unless an application for such has been submitted to him and approved. The application is to be in such form submitted in such manner and contain such information as the Secretary prescribes in regulations. Applications are not to be approved unless the project which would be assisted has:

(1) been approved by the SHC for the State in which the project is located; and

(2) has a higher priority (set by the HSA for the area in which the project is located under section 613(e)) than any other project in such area for which applications are pending before the Secretary.

Requires the Secretary in considering applications under this part, after applying applicable priorities established by section 613(e)(2), to give priority to applications for projects for:

(1) ambulatory care facilities;

(2) rehabilitation facilities;

(3) emergency medical services systems facilities; and

(4) hospitals for areas with rapid, recent population growth.

Section 632(b). Contains provisions concerning payments for laborers and mechanics employed on the proposed construction project based upon the Davis-Bacon Act.

GENERAL PROVISIONS RELATING TO LOANS AND LOAN GUARANTEES

Section 633. Contains various general provisions applicable to the Secretary's authority to make loans, loan guarantees, and interest subsidies. These are broadly based upon and similar to those contained in the present Hill-Burton program and in H.R. 7974 as it recently passed the House of Representatives.

LOAN GUARANTEE AND LOAN FUND

Section 634(a). Establishes in the treasury a loan guarantee and loan fund available to the Secretary without fiscal year limitation in such amounts as may be specified in appropriations acts. The loan fund is to be used by the Secretary to enable him to make loans under this part, to discharge his responsibilities under loan guarantees issued under this part, for payment of interest on a loan guaranteed, and for repurchase by him of direct loans made under this part which have been sold and guaranteed. Authorization of appropriations for capitalization of the loan fund is given in the amount of $100 million in the aggregate for the three fiscal years 1974, 1975, and 1976. As authorized in appropriation acts, the Secretary is authorized to deposit in the loan fund amounts received from interest payments or repayments of principal on loans and any other monies, property, or assets derived by him from operations under this part.

Section 634(b). Authorizes the Secretary to issue notes or other obligations to the Secretary of the Treasury in the event that monies in a loan fund are ever insufficient to enable him to discharge his responsibilities under this part. Various terms and conditions for the issuing and purchase of such notes or other obligations are provided.

DEFINITIONS

Section 635. Defines for the purposes of this part the following terms:

(1) "Construction" as including:

(a) construction of new buildings;

(b) modernization of existing buildings:

(c) the acquisition of initial equipment (including medical transportation facilities) for buildings constructed or modernized with assistance under this part; and (d) acquisition of equipment for any building in any case in which it will help to provide a service not previously provided in the community served by such building.

(2) "Modernization" as including the alteration, expansion, major repair (as permitted by the Secretary in regulations), remodeling, replacing, or renovation of existing buildings; and

(3) "Cost" as applied to a construction project as including architect's fees but not including the cost of off-site improvements or the acquisition of land.

CONFORMING AMENDMENTS

Section 4. Provides that subsections a, b, and c of section 314 and title IX of the PHS Act are repealed (effective July 1, 1974).

EFFECTIVE DATE

Section 5. Provides that the amendments made by this Act are to take effect on July 1, 1974, except that on or after the date of the enactment of the Act the Secretary shall carry out the duties imposed by section 611 of the Act (concerning the designation of health areas), provide assistance as authorized by sections 615 and 628 of this Act (concerning assistance in the initial development of HSA's and SHC's), and seek appropriations under section 634 of this Act (for the purpose of capitalizing the loan fund authorized by part D).

This section and the preceding section repealing the CHP and RMP programs are designed to provide for an overlap in the legislative authorities for CHP and RMP and the legislative authority created by this Act for HSA's and SHC's. This is done so that the Secretary may arrange an orderly transition between the two programs. It is the intention of the sponsors of the legislation that 314(b) agencies and RMP projects funded in fiscal 1974 under their legislative authorities shall be eligible for initial assistance in their development as HSA's to the extent that they meet the applicable requirements of this Act.

H.R. 12053

A bill to amend the Public Health Service Act to assure the development of a national health policy and of effective State health regulatory programs and area health planning programs, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "National Health Policy and Health Development Act of 1974".

SEC. 2. (a) The Congress makes the following findings:

(1) The achievement of equal access for all people to high quality medical care at a reasonable cost is a priority of the Federal Government.

(2) The recent massive infusion of Federal funds into the existing health care system has not produced an adequate supply or distribution of health care resources and consequently has not made possible equal access to such resources by the total population.

(3) Cooperation between the public sector (national, State, and local) and the private sector has not effectively developed a comprehensive, rational approach to the problems of—

(A) the lack of effective methods of delivering health services; and

(B) the maldistribution of health care facilities and manpower.

(b) In recognition of the magnitude of the problems described in subsection (a) and the urgency placed on their solution, it is the purpose of the amendments made by this Act to develop recommendations for a national health policy, to augment comprehensive planning for health services, manpower, and facilities, and to authorize financial assistance for the development of programs to further that policy. The recommendations for a national health policy are to specify national health goals and give direction to and coordinate public and private health planning and health services development programs. The recommended policy is to be implemented by a nationwide system of health service agencies which are to have within their health areas the responsibility and resources for assuring equal access for the residents of the areas to all necessary health care services.

(c)(1) The Congress makes the following additional findings:

(A) Past and present increases in the cost of medical care, particularly of hospital stays, are excessive and inflationary.

(B) The present proliferation of new health services and capital expenditures for health facilities is often inappropriate and unplanned.

(C) There are presently inadequate financial incentives for the use of appropriate levels of medical care, and for the substitution of ambulatory and intermediate care for inpatient hospital care.

(D) The many and increasing Federal, State, local, and private responses to these problems have often been fragmentary, inadequate, conflicting, and inequitable.

(E) State governments have a central role to play in correcting these problems.

(2) In response to the findings in paragraph (1), it is the purpose of part C of title VI of the Public Health Service Act, as amended by section 3 of this Act, to assist the development of State health care regulatory programs which, in conjunction with effective health planning programs, assure the availability of health services to all people at the lowest feasible rates. These regulatory programs shall regulate rates of payment and reimbursement for health care in order to—

(A) discourage wasteful and inappropriate use of services and promote uses that are economically justified in view of the relationships between costs incurred and benefits received;

(B) assure that all services provided are of acceptable quality;

(C) assure those responsible for the provision of services with necessary revenue requirements for the provision of quality health services; and

(D) distribute the burden of meeting these revenue requirements fairly among all those who pay for health services.

Sec. 3. Title VI of the Public Health Service Act is amended to read as follows:

"TITLE VI—NATIONAL HEALTH POLICY, AND HEALTH PLANNING AND DEVELOPMENT

"PART A—NATIONAL COUNCIL FOR HEALTH POLICY

"ESTABLISHMENT OF NATIONAL COUNCIL FOR HEALTH POLICY

"Sec. 601. (a) There is established in the Executive Office of the President a council to be known as the National Council for Health Policy (hereinafter in this title referred to as the 'Council'). The establishment of the Council in the Executive Office of the President shall not be construed as limiting or otherwise affecting access by the Congress, or the committees of either House, (1) to information or documents in the possession of, or to studies conducted by, the Council, or (2) to personnel of the Council.

"(b)(1) The Council shall be composed of five members who shall be appointed by the President by and with the advice and consent of the Senate. The members shall be persons who, as a result of their training, experience, or attainments, are exceptionally well qualified to assist in carrying out the functions of the Council. Not less than two of the members shall be persons who are not professionally engaged in any aspect of the delivery of health care. Not more than three members of the Council shall be of the same political party.

"(2) The term of office of a member of the Council shall be six years, except that—

"(A) of the members first appointed to the Council, two shall be appointed for terms of two years and two shall be appointed for terms of four years, as designated by the President at the time of appointment; and

"(B) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed only for the remainder of such term.

A member may serve after the expiration of his term until his successor has taken office.

"(3) The Chairman of the Council shall be selected by the members from among their number. The term of office of the Chairman of the Council shall be the lesser of three years or the period remaining in his term of office as a member of the Council.

"(c) The annual rate of basic pay of the Chairman of the Council shall be the annual rate of basic pay in effect for level II of the Executive Schedule, and the annual rate of basic pay of each of the other members of the Council shall be the annual rate of basic pay in effect for level III of the Executive Schedule.

"(d) The Council may employ and prescribe the functions of such officers and employees, including attorneys, as are necessary to carry out its functions. In addition, the Council may procure the services of experts and consultants as authorized by section 3109 of title 5, United States Code, but without regard to the last sentence of such section.

"FUNCTIONS OF NATIONAL COUNCIL FOR HEALTH POLICY

"Sec. 602. (a) The Council shall be responsible for the following:

"(1) Assessment of the status of the Nation's health.

"(2) Assessment of existing and proposed Federal and other health programs.

"(3) Assessment of the need for health resources, services and financing.

"(4) Development of recommendations for a national health policy which are to include a quantifiable statement of national health goals developed after appropriate consideration of the priorities set forth in section 603.

"(5) Issuing recommended guidelines respecting the appropriate supply, distribution, and organization of health resources and services.

"(6) Conduct of studies and analyses concerning recommendations developed under paragraph (4) for a national health policy. In carrying out its responsibilities under this subsection, the Council shall seek the counsel of advisory committees appointed by the Council and shall consult with and solicit comments from health service agencies designated under part B.

"(b) The Council shall submit on or before February 1 of each year a comprehensive report to the public specifying the results of the activities undertaken by the Council to meet its responsibilities during the preceeding calendar year.

"NATIONAL HEALTH PRIORITIES

"Sec. 603. The Congress finds that the following deserve priority consideration in the formulation of a national health policy and in the development and operation of Federal, State, and area health planning, development, and regulatory programs:

"(1) The provision of primary care services for medically underserved populations, especially those which are located in rural or economically depressed areas.

"(2) The development of multi-institutional systems for coordination or consolidation of institutional health services (including obstetric, pediatric, emergency medical, intensive and coronary care, and radiation therapy services).

"(3) The development of medical group practices, especially those whose services are appropriately coordinated or integrated with institutional health services.

"(4) The training and increased utilization of physician assistants, especially nurse clinicians.

"(5) The development of multi-institutional arrangements for the sharing of support services necessary to all health service institutions.

"(6) The promotion of activities to achieve needed improvements in the quality of health services, including needs identified by the review activities of Professional Standards Review Organizations under part B of title XI of the Social Security Act.

"(7) The development by health service institutions of the capacity to provide various levels of care (including intensive care, acute general care, and extended care) on a geographically integrated basis.

"(8) The adoption of uniform cost accounting, simplified reimbursement, and utilization and reporting systems and improved management procedures for health service institutions.

"(9) The development of effective methods for financing of, reimbursement for, and regulating rates of reimbursement and payment for, medical care.

"PART B—HEALTH SERVICE AGENCIES

"HEALTH AREAS

"Sec. 611. (a) The Secretary shall establish throughout the United States health areas with respect to which health service agencies shall be designated under section 616. Each health area shall meet the following requirements:

"(1) The area shall be a rational region for the proper planning and development of health services which contains the resources necessary to provide all necessary health services for the residents of the area.

"(2) To the extent practicable, the area shall include at least one center for the provision of highly specialized health services.

"(3) The area shall follow State boundaries, except that an area may comprise a geographical region which crosses State boundaries if the Secretary determines that such a region is a more rational region for the proper planning and development of health services.

"(4) The area, upon its establishment, shall have a population of not less than five hundred thousand or more than three million; except that (A) the population of an area may be more than three million if the area includes a standard metropolitan statistical area (as determined by the Office of Management and Budget) with a population of more than three million, and (B) the population of an area may be less than five hundred thousand if the area comprises an entire State which has a population of less than five hundred thousand.

"(5) To the maximum extent feasible, the boundaries of an area may not cross the boundaries of a standard metropolitan statistical area (as determined by the Office of Management and Budget).

The Secretary shall coordinate the designation of health areas under this section with his designation under section 1152 of the Social Security Act of areas for Professional Standards Review Organizations so that either a health area designated under this section comprises the entire territory of one or more areas designated under such section 1152 or an area designated under such section 1152 comprises the entire territory of one or more health areas designated under this section.

"(b)(1) Within one hundred and twenty days following the date of the enactment of this section, the Secretary shall publish in the Federal Register proposed boundaries for health areas covering the United States. In the development of the proposed boundaries of the health areas, the Secretary shall consult with and solicit the views of the Governor (or other chief executive officer) of each State and the chief executive officer or agency of political subdivisions of States, each State agency which administers or supervises the administration of a State's health planning functions under a State plan approved under section 314(a), and each entity which has developed a comprehensive, regional, metropolitan, or other local area plan or plans referred to in section 314(b). During the thirty-day period beginning on the date of the publication in the Federal Register of the proposed boundaries of the health areas, the Secretary shall consider comments submitted to him by other interested persons respecting the boundaries of such areas and at the expiration of such period he shall publish in the Federal Register the boundaries of the health areas.

"(2) The Secretary shall review on a continuing basis the appropriateness of the boundaries of the health areas and may revise the boundaries as he deems necessary. In making any boundary revision, the Secretary shall consult with and solicit the views of the officials and agencies described in paragraph (1) who represent the geographical regions affected by the boundary revision, shall publish in the Federal Register his proposal for the boundary revision, and shall allow thirty days (from the date the proposal is published in the Federal Register) for the submission of comments on the proposal by interested persons and for his review of such comments before putting into effect the proposed boundary revision.

"HEALTH SERVICE AGENCIES

"Sec. 612. (a) For purposes of this title, the term 'health service agency' means a nonprofit private corporation which is organized and operated in the manner described in subsection (b) and which is capable, as determined by the Secretary, of performing each of the functions described in section 613. The Secretary shall by regulation establish standards and criteria for the requirements of subsection (b) and section 613.

"(b) (1) Legal Structure.—A health service agency for a health area shall (A) be incorporated in the State which is located (in whole or in part) in that area and which has the largest part of the area's population, and (B) not be a subsidiary of, or otherwise controlled by, any other private corporation or other private legal entity.

"(2) Staff.—A health service agency shall have a staff which provides the agency with expertise in at least the following: (A) The gathering and analysis of data, (B) planning, and (C) health manpower, facilities, and services. The size of the professional staff of any agency shall be not less than the greater of 5 or the number obtained by dividing the population (rounded to the next highest one hundred thousand) of the health area which the agency serves by one hundred thousand. The staff of a health service agency shall be selected, paid, promoted, and discharged in accordance with such system as the agency may establish, except that the rate of pay for any position shall not be less than the rate of pay prevailing in the health area for similar positions in other public or private planning or health service entities.

"(3) Governing Body.—

"(A) In general.—Each health service agency shall have a governing body composed, in accordance with subparagraph (B), of not less than ten members and of not more than thirty members, except that the number of members may exceed thirty if the governing body has established another unit (referred to in this paragraph as an 'executive committee') composed, in accordance with subparagraph (B), of not more than twenty-five members of the governing body and has delegated to that unit the authority to take such action as the governing body is authorized to take. The governing body—

"(i) shall be responsible for the internal affairs of the health service agency, including matters relating to the staff of the agency, the agency's budget, and procedures and criteria (developed and published pursuant to section 614) for performing its functions under subsections (e), (f), and (g) of section 613;

"(ii) shall be responsible for the approval of the long-range goal plan and short-term priorities plan required by section 613(b);

"(iii) shall issue an annual report concerning the activities of the agency, include in that report the long-range goal plan and short-term priorities plan developed by the agency, and make the report readily available to the residents of the health area and the various communications media serving such area;

"(iv) shall reimburse is members for their reasonable costs incurred in attending meetings of the governing body;

"(v) shall meet at least once in each calendar quarter of a year and shall meet at least two additional times in a year unless its executive committee meets for that number of times in that year; and

"(vi) shall conduct its business meetings in public and shall make its records and data available, upon request, to the public.

A quorum for a governing body shall be not less than one-half of the members described in each clause of subparagraph (B). If in the exercise of its functions a governing body appoints a subcommittee of its members or an advisory group, it shall, to the extent practicable, make its appointments to any such subcommittee or group in such a manner as to provide the representation on such subcommittee or group described in subparagraph (B).

"(B) Composition.—Of the members of the governing body and executive committee (if any) of a health service agency—

"(i) at least one-third of such members shall be residents of the health area served by such agency who are not providers of health care services and who are broadly representative of the various economic, social, racial, and geographic population groups of such health area;

"(ii) at least one-third of such members shall be residents of such health area who are providers of health services and who are broadly representative of—

"(I) health professionals, public and community health personnel, and allied health personnel;

"(II) the health institutions (including hospitals, extended care facilities, and university health centers) located in such health area and the employees of such institutions not described in subclause (I); and

"(III) persons in such health area who pay for health care services (including direct service and indemnity insurance companies); and

"(iii) at least one-third of such members shall be residents of such health area who hold public elective offices which are broadly representative of the elected governmental authorities in the area.

For purposes of clauses (i) and (ii), the term 'provider of health services' means an individual who receives (either directly or through his spouse) more than one-tenth of his gross annual income from fees or other compensation for the provision of health care services or from financial interests in entities engaged in the provision of health services or in producing or supplying drugs or other articles for individuals and entities engaged in the provision of such services, or from both such compensation and such interests.

"(c) Subarea Councils.—A health service agency may establish subarea advisory councils representing parts of the agencies' health area to advise the governing body of the agency on the performance of its functions. To the extent practicable, the composition of a subarea advisory council shall conform to the requirements of subsection (b)(3)(B).

"FUNCTIONS OF HEALTH SERVICE AGENCIES

"Sec. 613. (a) For the purpose of—

"(1) improving the health of residents of a health area,

"(2) increasing the accessibility, acceptability, continuity, and quality of the health services provided them, and

"(3) restraining increases in the cost of providing them health services,

each health service agency shall have as its primary responsibilities the provision of effective health planning for its health area and the promotion of the development within the area of health services and facilities which meet identified needs, reduce documented inefficiencies, and implement the health plans of the agency. To meet its primary responsibilities, a health service agency shall carry out the functions described in subsections (b) through (g) of this section.

"(b) In providing health planning, development, and regulation for its area, a health service agency shall perform the following functions:

"(1) The agency shall assemble and analyze data concerning—

"(A) the status of the health of the residents of its health area,

"(B) the status of the health care delivery system in the area and the utilization of that system by the residents of the area,

"(C) the effect the area's health care delivery system has on the health of the residents of the area, and

"(D) the area's health resources, including health facilities and manpower.

"(2) The agency shall, after appropriate consideration of the priorities set forth in section 603, and the needs and resources described by paragraph (1), annually establish a long-range goal plan (hereinafter in this title referred to as the 'LGP') which shall be a detailed statement of goals (A) describing a healthful environment and health systems in the area which, when developed, will assure that quality health services will be available and accessible in a manner which assures continuity of care, at reasonable cost, for all residents of the area; (B) which is responsive to the unique needs and resources of the area; and (C) which takes into account the National Council for Health Policy guidelines (developed under section 602) respecting the area's supply, distribution, and organization of health resources and services.

"(3) The agency shall annually establish a short-term priorities plan (hereinafter in this title referred to as the 'SPP') which describes objectives which will achieve the goals of the LGP and priorities among the objectives. In establishing the SPP, the agency shall give priority to those objectives which maximally improve the health of the residents of the area, as determined on the basis of the relation of the cost of obtaining the objectives to the benefits to be derived from obtaining such objectives, and which are fitted to the special needs of the area.

"(4) The agency shall develop and publish specific plans and projects for achieving the objectives established in the SPP.

"(c) In implementing its LGP and SPP, a health service agency shall perform the following functions:

"(1) The agency shall seek to implement its plans with the assistance of individuals and public and private entities in its health area.

"(2) The agency shall provide, in accordance with the priorities established in the SPP, technical assistance to individuals and public and private entities in the area for the development of projects and programs which the agency determines are necessary to achieve the health system described in the LGP, including assistance in meeting the requirements of the agency prescribed under section 614.

"(3) The agency shall, in accordance with the priorities established in the SPP, make grants to and enter into contracts with individuals and public and private entities in the area to assist them in planning and developing the projects and programs which the agency determines are necessary for the achievement of the health system described in the LGP. Such grants and contracts shall be made from the Area Health Services Development Fund of the agency established with funds provided under grants made under section 619. No such grant or contract may be used for (A) the support of an established program, (B) to pay the costs incurred by an entity or individual in the delivery of health care services, or (C) for the cost of construction of health facilities.

"(d) Each health service agency shall coordinate its activities with each Professional Standards Review Organization (designated under section 1152 of the Social Security Act), the State Health Commission, and any other appropriate regulatory entity in the agency's health area. The agency shall, as appropriate, provide technical assistance to such entities, secure data from them for use in the agency's planning and development activities, and enter into agreements with them which will assure that actions taken by such entities which alter the area's health system will be taken in a manner which is consistent with the approved LGP and the SPP in effect for the area.

"(e) Each health service agency shall (1) review and approve or disapprove each proposed use within its health area of Federal funds appropriated for a program under this Act, the Mental Retardation Facilities and Community Mental Health Centers Construction Act of 1963, or the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970 for the development, expansion, or support of health facilities, manpower, or services; and (2) establish priorities for the approval of applications under part D of this title. If an agency disapproves under clause (1) a proposed use of Federal funds for a program described in that clause, the Secretary may not make Federal funds available for such program until he has made, upon request of the entity making such proposal, a review of the agency decision. In making any such review of any agency decision, the Secretary shall give the appropriate State Health Commission an opportunity to consider the agency decision and to submit to the Secretary its comments on the decision. The Secretary after taking into consideration State Health Commission comments may make Federal funds available, notwithstanding the agency decision. Each such decision by the Secretary to make funds available shall be submitted to the appropriate health service agency and State Health Commission and shall contain a detailed statement of the reasons for the decision.

"(f) To assist planning agencies, designated under section 1122 of the Social Security Act, in carrying out their functions under such section 1122, health service agencies for the areas for which such planning agencies are designated shall review and make recommendations to such planning agencies for the approval or disapproval of all capital expenditures in excess of $100,000 proposed by health service entities in the health areas of such health services agencies.

"(g) Each health service agency shall review on a periodic basis the health services offered or proposed to be offered in the health area of the agency and shall make recommendations to each State Health Commission, designated under section 625 for each State in which the agency's health area is located, for the Commission's certification of such health services under section 627(a) (5). If the State Health Commission determines that it cannot certify as needed a particular health service, the health service agency for the health area in which such service is offered or proposed to be offered shall work with the provider or proposed provider of such service, the State Health Commission, and other appropriate individuals and entities for the improvement or elimination (as the agency determines appropriate) of such service. After the initial certification as needed by a State Health Commission of a health service offered within its health area, the agency shall review, at least every five years, the certification of such health service.

"PROCEDURES AND CRITERIA FOR REVIEWS OF PROPOSED HEALTH SYSTEMS CHANGES

"SEC. 614. (a) In conducting reviews pursuant to subsections (e), (f), and (g) of section 613 or in conducting any other reviews of proposed or existing health services, each health service agency shall follow procedures, and apply criteria, developed and published by the agency in accordance with regulations of the Secretary; and in performing its review functions under section 627, a State Health Commission shall follow procedures, and apply criteria, developed and published by the Commission in accordance with regulations of the Secretary. Procedures and criteria for such reviews many vary according to the purpose for which a particular review is being conducted or the type of health services being reviewed.

"(b) Each health service agency and State Health Commission shall include in the procedures required by subsection (a) at least the following:

"(1) Written notification to affected persons of the beginning of an agency or Commission review.

"(2) Schedules for reviews which provide that no review shall take longer than one hundred and twenty days from the date the notification described in paragraph (1) is made.

"(3) Provision for persons subject to an agency or Commission review to submit to the agency or Commission (in such form and manner as the agency or Commission shall prescribe and publish) such information as the agency or Commission may require concerning the subject of such review.

"(4) Submission of applications made under part D of this title, other titles of this Act, or other provisions of law for Federal financial assistance for health services.

"(5) Submission of periodic reports by providers of health services and other persons subject to agency or Commission review respecting the development of proposals subject to review.

"(6) Notification of providers of health services and other persons subject to agency or Commission review of the status of the agency or Commission review of the health services or proposals subject to review, findings made in the course of such review, and other appropriate information respecting such review.

"(7) Provision for public hearings in the course of agency or Commission review if requested by persons directly affected by the review; and provision for public hearings, for good cause shown, respecting agency and Commission decisions.

"(8) Regular reports by the agency and Commission of the reviews being conducted (including a statement concerning the status of each such review) and of the reviews completed by the agency and Commission (including a general statement of the findings and decisions made in the course of such reviews) since the publication of the last such report.

"(9) Access by the general public to all applications reviewed by the agency and Commission and to all other written materials pertinent to any Agency or Commission review.

"(10) In the case of construction projects, submission to the agency and Commission by the entities proposing the projects of letters of intent in such detail as may be necessary to inform the agency and Commission of the scope and nature of the projects.

"(c) Criteria required by subsection (a) for agency and Commission review shall include consideration of at least the following:

"(1) In the case of reviews of health services, the relationship of the health services reviewed to the applicable LGP and SPP.

"(2) The relationship of services reviewed to the long-range development plan (if any) of the person providing or proposing such services.

"(3) The need that the population served or to be served by such services has for such services.

"(4) The availability of alternative, less costly or more effective methods of providing such services.

"(5) The relationship of such services to the existing health care system of the area in which such services are provided or proposed to be provided.

"(6) In the case of health services proposed to be provided, the availability of resources (including health manpower, management personnel, and funds for capital and operating needs) for the provision of such services and the availability of alternative uses of such resources for the provision of other health services.

"(d) In making a review under section 613(e), each health service agency shall give priority consideration to—

"(1) the relationship to the applicable LGP and SPP of the health services reviewed, and

"(2) the availability of resources (including health manpower, management personnel, and funds for capital and operating needs) for any proposed provision of health services, and the availability of alternative uses of such resources for the provision of other health services.

"(e) In making a review under section 613(f), each health service agency shall give consideration to—

"(1) the costs and methods of any proposed construction, and

"(2) the probable impact of the construction project reviewed on the costs of providing health services by the provider or other person proposing such construction project.

"(f) In making a review under section 613(g), each health service agency shall give priority consideration to—

"(1) the relationship of the health services reviewed to the applicable LGP and SPP,

"(2) the need that the population served or to be served by such services has for them, and

"(3) the availability of alternative, less costly or more effective methods of providing such services.

"ASSISTANCE TO ENTITIES DESIRING TO BE DESIGNATED AS HEALTH SERVICE AGENCIES

"SEC. 615. (a) The Secretary may provide all necessary technical and other nonfinancial assistance (including the preparation of prototype plans of organization and operation) to nonprofit private entities (including entities presently receiving grants under section 314(b) or title IX) which—

"(1) express a desire to be designated as a health service agency, and

"(2) the Secretary determines have a potential to meet the requirements of a health service agency specified in sections 612 and 613,

to assist such entities in developing applications to be submitted to the Secretary under section 616 and otherwise in preparing to meet the requirements of this title for designation as a health service agency.

"(b) (1) The Secretary may make grants to nonprofit private entities to assist them in meeting the costs of meeting the organization and operation requirements of section 612(b).

"(2) No grant may be made under this subsection unless an application therefor has been submitted to, and approved by, the Secretary. Such an application shall be submitted in such form and contain such information as the Secretary may require. The Secretary may not approve the application of an entity unless he determines that the entity, with the assistance of a grant under this subsection, will, within two years after such grant is made, be able to meet the requirements of section 612(b) and be qualified to perform the activities prescribed for a health service agency by section 613.

"(3) For the purpose of making payments pursuant to grants under this subsection, there are authorized to be appropriated $15,000,000 for the fiscal year ending June 30, 1974, $30,000,000 for the fiscal year ending June 30, 1975, and $30,000,000 for the fiscal year ending June 30, 1976.

"DESIGNATION OF HEALTH SERVICE AGENCIES

"SEC. 616. (a) For each health area established under section 611 the Secretary shall designate a health service agency. Such designation shall be made under an agreement entered into between the Secretary and the entity to be designated as a health service agency. Any such agreement under this subsection with an entity shall contain such provisions respecting the requirements of sections 612(b) and 613, and such conditions designed to carry out the purpose of this title, as the Secretary may prescribe and shall be for a term of twelve months; except that, prior to the expiration of such term, such agreement may be terminated—

"(1) by the entity at such time and upon such notice to the Secretary as he may by regulation prescribe, or

"(2) by the Secretary, at such time and upon such notice to the entity as the Secretary may by regulation prescribe, if the Secretary determines that the entity is not complying with or effectively carrying out the provisions of such agreement.

"(b) The Secretary may not enter into an agreement under subsection (a) with any entity unless the entity has submitted an application to the Secretary for designation as a health service agency. Such an application shall contain assurances satisfactory to the Secretary that the applicant meets the requirements of section 612(b) and is qualified to perform or is performing the activities prescribed by section 613. In considering such applications, the Secretary shall give priority to an application which has been recommended for approval by (1) each entity which has developed a plan referred to in section 314(b) for all or part of the health area with respect to which the application was submitted, and (2) each regional medical program established in such area under title IX. The Secretary may not enter into an agreement for the initial designation of an entity as the health service agency for a health area unless the Governor (or other chief executive officer) of each State in which such area is located approves such designation of such entity.

"TECHNICAL ASSISTANCE FOR HEALTH SERVICE AGENCIES AND STATE HEALTH COMMISSIONS

"SEC. 617. (a) The Secretary shall provide health service agencies and State Health Commissions (1) model health plans and planning processes, (2) technical materials and standards for use in health planning, and (3) such other technical assistance as they may require to perform their functions.

"(b) The Secretary shall include in the materials provided under subsection (a) the following:

"(1) (A) Requirements for the data needed to describe the health status of the residents of a health area, including requirements for data which describe mortality and morbidity by age, sex, race, residence, economic status, and occupation and data which describe the etiologies of mortality and morbidity.

"(B) Requirements for the data needed to describe the status of the health resources of a health area, including requirements for data which describe health facilities in the area by size, types of services provided, location, and operating costs and data which describe health manpower in the area by type, specialty, supply, location, income, and mode of practice.

"(C) Requirements for the data needed to describe the utilization of health resources within a health area, including requirements for data which describe the utilization of health resources by various specific population groups, including groups based on age, sex, race, residence, economic status, and occupations.

"(2) Model, consistent with the guidelines established by the Council under section 602, for appropriate planning and development by health service agencies and regulation by State Health Commissions of health resources and services. Such models shall cover the following:

"(A) The provision of primary care services for medically underserved populations, especially those which are located in rural or economically depressed areas.

"(B) The development of multi-institutional systems for coordination or consolidation of institutional health services (including obstetric, emergency medical, intensive and coronary care, and radiation therapy services).

"(C) The development of medical group practices whose services are appropriately coordinated or integrated with institutional health services.

"(D) The training and increased utilization of physician assistants, especially nurse clinicians.

"(E) The development of multi-institutional arrangements for the sharing of support services necessary to all health services institutions (including laundry and dietetic services and the purchasing of supplies).

"(F) The promotion of activities to achieve needed improvements in the quality of health services, including needs identified by the review activities of Professional Standards Review Organizations under part B of title XI of the Social Security Act.

"(G) The development by health service institutions of the capacity to provide various levels of care (including intensive care, acute general care, and extended care) on a geographically integrated basis.

"(H) The adoption of uniform cost accounting, simplified reimbursement and utilization and reporting systems and improved management procedures by health service institutions.

"(I) The development of effective methods for financing of, reimbursement for, regulating rates of reimbursement and payment for, medical care.

"(3) Guidelines for the organization and operation of health service agencies and State Health Commissions, including guidelines for—

"(A) the structure of a health service agency, consistent with section 612(b), and of a State Health Commission, consistent with section 625(d);

"(B) the conduct of the planning, development, and regulation processes;

"(C) the performance of health service agency functions in accordance with sections 613 and 614; and

"(D) the performance of State Health Commission functions in accordance with sections 614 and 627.

"PLANNING GRANTS

"SEC. 618. (a) The Secretary shall make in each fiscal year a grant to each health service agency with which there is in effect at the beginning of the fiscal year a designation agreement under section 616. A grant under this subsection shall be made on such conditions as the Secretary determines is appropriate and shall be used by a health service agency for compensation of agency personnel, collection of data, planning, and other activities of the agency. A health service agency shall not use a grant under this subsection to make payments under a grant or contract with another entity for the development of health services.

"(b) (1) The amount of any grant under subsection (a) to any health service agency for any fiscal year shall be the lesser of—

"(A) the product of $0.25 and the population of the health area for which the agency is designated, or

"(B) $750,000,

unless the agency would receive a greater amount under paragraph (2) or (3).

"(2) (A) The amount of such a grant for any fiscal year shall be the product of $0.50 and the population of such area if the application of the agency for such grant contains assurances satisfactory to the Secretary that the agency will expend or obligate in that fiscal year from non-Federal funds meeting the requirements of subparagraph (B) and for the activities of the agency for which such grant is made an amount not less than the amount by which the grant amount for such agency resulting from the application of the formula prescribed by this paragraph exceeds the grant amount for such agency resulting from the application of the formula prescribed by paragraph (1).

"(B) The non-Federal funds which an agency may use for the purpose of obtaining a grant under subsection (a) which is computed on the basis of the formula prescribed by subparagraph (A) shall be funds—

"(i) no more than 5 per centum of which are contributed to the agency by any one private contributor, and

"(ii) which are not paid to the agency for the performance of particular services by it and which are contributed to the agency without conditions as to their use other than the condition that the funds shall be used for the purposes for which a grant made under this section may be used.

"(3) The amount of a grant under subsection (a) to a health service agency for any fiscal year may not be less than $150,000.

"(c) (1) For the purpose of making payments pursuant to grants made under subsection (a), there are authorized to be appropriated $60,000,000 for the fiscal year ending June 30, 1975, and $100,000,000 for the fiscal year ending June 30, 1976.

"(2) Notwithstanding subsection (b), if the total of the grants to be made under this section to health service agencies for any fiscal year exceeds the total of the amounts appropriated under paragraph (1) for that fiscal year, the amount of the grant for that fiscal year to each health service agency shall be an amount which bears the same ratio to the amount determined for that agency for that fiscal year under subsection (b) as the total of the amounts appropriated under paragraph (1) for that fiscal year bears to the amount requires to make grants to each health service agency in accordance with the applicable provision of subsection (b).

"DEVELOPMENT GRANTS FOR AREA HEALTH SERVICES DEVELOPMENT FUNDS

SEC. 619. (a) The Secretary shall make in each fiscal year a grant to each health service agency—

(1) with which there is in effect at the beginning of the fiscal year a designation agreement under section 616.

(2) which has in effect a LPG and SPP approved under section 627, and

(3) which, as determined under the review made under section 620, is organized and operated in the manner prescribed by section 612(b) and is carrying out its planning and other responsibilities under section 613 in a manner satisfactory to the Secretary,

to enable the agency to establish an Area Health Services Development Fund from which it may make grants and enter into contracts in accordance with section 613(c) (3).

(b) (1) Except as provided in paragraph (2), the amount of any grant under subsection (a) shall be determined by the Secretary after taking into consideration the population of the health area for which the health service agency is designated, the average family income of the area, and the supply of health services in the area.

"(2) The amount of any grant under subsection (a) to a health service agency for any fiscal year may not exceed the product of $1 and the population in the health area for which such agency is designated.

"(c) Grants under subsection (a) shall be made on such conditions as the Secretary determines appropriate.

"(d) For the purpose of making payments pursuant to grants under subsection (a), there are authorized to be appropriated $100,000,000 for the fiscal year ending June 30, 1975, and $125,000,000 for the fiscal year ending June 30, 1976.

"REVIEW

"SEC. 620. (a) The Secretary shall review and approve the annual budget of each health service agency with which there is in effect a designation agreement under section 616. Such review shall take into consideration the comments of each State Health Commission designated under section 625 for each State in which the agency's health area is located.

"(b) The Secretary shall review in detail at least every three years the structure, operation, and activities of each health service agency with which there is in effect a designation agreement under section 616 to determine—

"(1) (A) the extent to which the agency's governing body (and executive committee (if any)) represents the residents of the health area for which the agency is designated;

"(B) the professional credentials and competence of the staff of the agency;

"(2) the adequacy of the LGP of the agency in meeting the needs of the residents of the area for a healthful environment and for accessible, acceptable, and continuous quality health care at reasonable costs and the effectiveness of the SPP in achieving the system described in the LGP;

"(3) the appropriateness of the data assembled pursuant to section 613(b) and the quality of the analysis of such data;

"(4) the extent to which technical and financial assistance from the agency are utilized in an effective manner to achieve the goals and objectives of the LGP and the SPP; and

"(5) the extent to which it may be quantifiably demonstrated that—

"(A) the health of the area's residents has actually been improved;

"(B) the accessibility, acceptability, continuity, and quality of health care in the area has actually been improved; and

"(C) increases in costs of the provision of health care have actually been restrained.

"PART C—STATE HEALTH COMMISSIONS

"DESIGNATION OF STATE HEALTH COMMISSIONS

"SEC. 625. (a) For the purposes of the performance within each State of the regulatory functions described in section 627, the Secretary shall enter into an agreement with a qualified agency of each State whereby such agency shall be conditionally designated as the State Health Commission for such State. If—

"(1) on the basis of its performance during a trial period (not to exceed 24 months) of such conditional designation, the Secretary determines that such agency is capable of performing, in a satisfactory manner, the regulatory functions of a State Health Commission prescribed by section 627, and

"(2) a State administrative program for the performance of such functions by the State Health Commission has been approved under section 626, he shall enter into an agreement with such agency designating it as the State Health Commission for such State.

"(b) (1) The Secretary shall initially designate a qualified agency as a State Health Commission on a conditional basis with a view to determining the capacity of such agency to perform the functions prescribed by section 627 for such Commissions. Such designation may not be made prior to receipt from such agency, and approval by the Secretary, of an administrative program under section 626 for the orderly assumption and implementation of the functions of a State Health Commission.

"(2) During any such trial period, the Secretary may require as a condition of designation that a State Health Commission perform only such of the functions prescribed by section 627 as he determines such Commission to be capable of performing. The number and type of such functions shall, during the trial period, be progressively increased as the Commission becomes capable of performing responsibilities so that, by the end of such period, such Commission may be considered for designation but only if the Secretary finds that it is substantially carrying out in a satisfactory manner the functions prescribed by section 627.

"(3) Any agreement under which any agency is conditionally designated as the State Health Commission may be terminated by such agency upon ninety days notice to the Secretary or by the Secretary upon ninety days notice to such agency.

"(c) Any designation agreement under this section with a State Health Commission (other than an agreement under subsection (b), shall be for a term of twelve months; except that, prior to the expiration of such term, such agreement may be terminated—

"(1) by the Commission at such time and upon such notice to the Secretary as may be prescribed in regulations (except that notice of more than three months may not be required); or

"(2) by the Secretary at such time and upon such reasonable notice to the Commission as may be prescribed in regulations, but only after the Secretary has determined (after providing such Commission with an opportunity for a formal hearing on the matter) that such Commission is not complying with or effectively carrying out the provisions of such agreement.

A designation agreement (other than an agreement under subsection (b)) shall contain such provisions as the Secretary may prescribe to assure that the requirements of this part respecting State Health Commissions are complied with.

"(d) For purposes of this section, a 'qualified agency' of a State is an agency which is organized and operated as follows:

"(1) The agency shall—

"(A) be an independent establishment within the State government;

"(B) be the sole agency of the State for (i) the performance of the regulatory functions prescribed by section 627 (except as authorized under subsection (b) of such section), and (ii) administering or supervising the administration of (I) the health planning activities of the State, (II) coordination of the plans of the health service agencies in the State, and (III) implementation of those parts of such plans which relate to the government of the State;

"(C) not engage in activities which are unrelated to health planning or the regulation of health services and shall not directly engage in, or be a part, or under the control, of any State agency directly engaged in, the (i) delivery or administration of programs of public or personal health services or health manpower education, (ii) construction of facilities for health service institutions, or (iii) the administration of the State's plan approved under title XIX of the Social Security Act or of assistance for medical expenses under other public assistance programs or public health insurance programs;

"(D) conduct its activities in accordance with procedures and criteria established and published by it, which procedures and criteria shall, to the extent practicable, conform to the requirements of section 614; and

"(E) conduct its business meetings in public.

"(2) (A) The agency shall have a governing body composed of three, five, or seven full-time members (whichever number may be authorized under the law of its creation) who are appointed by the Governor (or other chief executive officer) of the State or its legislature for staggered terms of not less than four years, and who are paid without regard to the civil service and compensation laws of the State generally applicable to the employment and compensation of its officers and employees but at a rate which will enable persons with appropriate expertise to serve as members of the governing body. During his term of membership, no member of the governing body shall engage in any other business, vocation, or employment. Of the members of the governing body, a majority shall be individuals who are not providers of health services (as defined in section 612 (b) (3) (B)) and the remainder shall be representative of persons and institutions in the State listed in subclauses (I), (II), and (III) of section 612(b) (3) (B) (ii). Not more than a simple majority of the membership of the governing body may be members of the same political party. No member may participate in any agency action concerning any matter in which the member has a direct and substantial economic interest. The State's Governor (or other chief executive officer) shall select a chairman of the governing body from its members.

"(B) The governing body shall be responsible for the internal affairs of the agency, including staffing and budget, and for the performance of the agency's functions.

"(C) The State's Governor (or other chief executive officer) or legislative (whichever is authorized under the law creating the agency) shall appoint an advisory council for the agency to advise it on its budget and the performance of its functions. At least two-thirds of the members of such a council shall be individuals who are not providers of health care services (as so defined) and shall be representative of the various geographic regions of the State, the health service agencies within the State, the holders of public elective offices in the government of the State and of its political subdivisions, and the various economic, social, and racial population groups of the State. Such a council shall meet periodically, not less than two times in a year, and shall conduct its meetings in public.

"(D) The agency shall have a professional staff of such size as the Secretary may prescribe (but in no event less than five) which meets such qualifications as the Secretary shall prescribe.

"STATE ADMINISTRATIVE PROGRAM

"SEC. 626. (a) A State administrative program for the performance within the State by its State Health Commission of the regulatory functions prescribed by section 627 is not approvable for any year unless it—

"(1) meets the requirements of subsection (b);

"(2) has been submitted to the Secretary by the State Health Commission (designated for the State under section 625) at such time and in such detail, and contains or is accompanied by such information, as the Secretary deems necessary;

"(3) has been prepared in consultation with, and be approved by, the advisory council to the State Health Commission; and

"(4) has been submitted to the Secretary only after the State Health Commission has afforded to the general public of the State a reasonable opportunity for presentation of views on the administrative program.

"(b) The State administrative program must—

"(1) provide for the performance within the State of the regulatory functions prescribed by section 627 and designate the State Health Commission for the submitting State as the sole agency for the performance of such functions (except as provided in subsection (b) of such section) and for the administration of the administrative program;

"(2) contain or be supported by satisfactory evidence that the Commission has the authority to carry out such functions and the administrative program in accordance with this part and has authority to enforce its decisions under section 627;

"(3) provide for adequate consultation with the Commission's advisory council in carrying out such functions and the administrative program;

"(4) set forth in such detail as the Secretary may prescribe the qualifications for personnel having responsibilities in the administration of such functions and the administrative program;

"(5) provide for such methods of administration as are found by the Secretary to be necessary for the proper and efficient administration of such functions and the administrative program, including (A) methods relating to the establishment and maintenance of personnel standards on a merit basis consistent with such standards as are or may be established by the Civil Service Commission under section 208(a) of the Intergovernmental Personnel Act of 1970 (Public Law 91-648), and (B) provision for utilization of qualified professional medical personnel (particularly in connection with the development or administration of standards of quality and utilization of health care) and of allied health professionals and other qualified professional staff; but the Secretary shall exercise no authority with respect to the selection, tenure of office, and compensation of any individual employed in accordance with the methods relating to personnel standards on a merit basis established and maintained in conformity with this paragraph;

"(6) provide that the State's part of the permanent costs of operating the State Health Commission shall be provided by the State in a manner (which may include taxes on health insurance premiums or reimbursements for services or collection of fees from regulated providers of health services) and in an amount satisfactory to the Secretary;

"(7)(A) provide that the State Health Commission shall, in cooperation with the Secretary and in accordance with such methods as may be recommended for the design and implementation of a nationwide cooperative system for producing comparable and uniform health-related information and statistics, function as a center for the State for the collection (from health care providers subject to the jurisdiction of the State Health Commission), retrieval, analysis, reporting, and publication of statistical and other information related to health and health care, including data on the health services and the fiscal operations of such providers, and including data of the kinds enumerated in section 305, and (B) require such providers doing business in the State to make statistical and other reports of such information and data to the Commission;

"(8) provide, in accordance with methods and procedures prescribed or approved by the Secretary, for the evaluation, at least annually, of the regulatory functions of the State Health Commission and of their economic effectiveness; and

"(9) provide that the State Health Commission will from time to time, and in any event not less often than annually, review the administrative program and submit to the Secretary any modification thereof which he considers necessary.

"(c) The Secretary shall approve any State administrative program and any modification thereof which complies with subsections (a) and (b). The Secretary shall review for compliance with the requirements of this part the specifications of and operations under each administrative program approved by him. Such review shall be conducted not less often than once each year.

"STATE HEALTH COMMISSION REGULATORY FUNCTIONS

"SEC. 627. (a) Each State Health Commission for which a designation agreement is in effect under section 625 shall, except as authorized under subsection (b), perform within the State for which the Commission is designated the following regulatory functions:

"(1) Review annually and approve or disapprove the LGP and SPP of each health service agency, the health area of which is located (in whole or in part) within the State for which the Commission is designated.

"(2) Review annually the budget of each such health service agency and report to the Secretary, for purposes of his review under section 620, its comments on such budget.

"(3) Review applications submitted by such health service agencies for grants under sections 618 and 619 and report to the Secretary its comments on such applications.

"(4) Serve as the designated planning agency of the State for the purposes of section 1122 of the Social Security Act.

"(5) After consideration of recommendations submitted by such health service agencies under section 613(g) respecting health services offered or proposed to be offered within the State, determine which of the services it will certify as needed. Certification of need shall be conducted on a periodic basis but not less often than every five years.

"(6) License health care facilities and health care delivery personnel in the State.

"(7) To the extent authorized by State law, set standards for health facilities and review for quality the performance of heatlh services within the State.

"(8) Determine prospectively rates used for reimbursement purposes for heatlh services of heatlh care providers within the State and regulate all reimbursements of such health care providers made on either a charge, cost, negotiated, or other basis. In carrying out such function, the Commission shall—

"(A) permit health care providers subject to such determinations or regulations to retain savings accruing to them from effective management and cost control,

"(B) create incentives at each point in the delivery of health services for utilization of the most economical modes of services feasible,

"(C) document the need for and cost implications of each new service or facility for which a determination of reimbursement rates is sought, and

"(D) employ for each type or class of health care provider—

"(i) a unit for determining the reimbursement rates of the provider, and

"(ii) a base for determining rates of change in the provider's reimbursement rates, which unit and base are satisfactory to the Secretary.

For purposes of this paragraph, the term 'health care provider' includes at least the following: Hospitals, nursing homes and extended care facilities, community health care programs (such as family planning clinics, community mental health centers, neighborhood health centers, and rehabilitation centers), home health agencies and visiting nurse associations, and indirect suppliers of health services (such as medical laboratories, ambulance services, blood banks, and dental laboratories).

"(b) The function described in paragraph (6) of subsection (a) may be performed by another agency of the State government under an agreement with the State Health Commission satisfactory to the Secretary. If a State requests (in such manner as the Secretary shall by regulation prescribe) that the agreement for the conditional designation or designation of a State Health Commission for such State not require the Commission to perform the functions described in subsection (a)(8), the terms of any such agreement shall be in accordance with such request and the Secretary shall, but not before the expiration of the fourth fiscal year which begins after the calendar year in which the National Health Policy and Health Development Act of 1974 is enacted, perform such functions within such State until such time as the Commission requests authority to perform such functions and the Secretary determines that it is qualified to perform such functions.

"(c) If a State Health Commission makes a decision in carrying out a function described in paragraph (4), (5), (6), (7), or (8) of subsection (a) which is not consistent with the goals of the applicable LGP or the priorities of the applicable SPP, the Commission shall submit to the appropriate health service agency a detailed statement of the reasons for the inconsistency.

"(d) If, upon the expiration of the fourth fiscal year which begins after the calendar year in which the National Health Policy and Health Development Act of 1974 is enacted, a designation agreement for a State Health Commission is not in effect under section 625, the Secretary shall perform within that State the regulatory functions prescribed by subsection (a) but not before he has given the Governor (or other chief executive officer) of that State at least six months' written notice of his intention to perform within that State such functions. If a designation agreement for a State's Health Commission is terminated under section 625, the Secretary shall perform such functions within that State after giving the notice prescribed by the preceding sentence. In the performance of such functions within any State the Secretary shall consult with the health service agencies within that State and seek the advice and counsel of an advisory council drawn from residents of that State in a manner comparable to that required by section 625 for advisory councils to State Health Commissions.

"GRANTS FOR THE DEVELOPMENT AND OPERATION OF STATE HEALTH COMMISSIONS

"SEC. 628. (a) The Secretary may make grants to States to assist in meeting the costs of developing State Health Commissions. Any grant under this subsection shall be made for development costs incurred in the one-year period beginning on the first day of the first month for which such grant is made and may be for an amount which does not exceed 90 per centum of such costs.

"(b) The Secretary may make grants to States for the operation of State Health Commissions. Each grant under this subsection shall be made for operation costs for the one-year period beginning on the first day of the first month for which such grant is made. The amount of any grant for a State Health Commission's costs of operation for the first year of its operation may not exceed an amount equal to 75 per centum of such costs; and the amount of any other grant for a Commission's costs of operation may not exceed the lesser of (1) $500,000, or (2) an amount equal to 50 per centum of the costs of its operation for the year for which the grant is made.

"(c) No grant may be made under subsection (a) or (b) unless an application therefor has been submitted to, and approved by, the Secretary. Such an application shall be submitted in such form and contain such information as the Secretary may require. The Secretary may not approve any such application unless he determines that the Federal funds under the grant applied for will be used to supplement State funds that would in the absence of such Federal funds be used for the purposes for which such grant would be made and will in no event supplant such State funds.

"(d)(1) For purposes of making payments under grants under subsection (a), there are authorized to be appropriated $2,000,000 for the fiscal year ending June 30, 1974, $3,000,000 for the fiscal year ending June 30, 1975, and $3,000,000 for the fiscal year ending June 30, 1976.

"(2) For purposes of making payments under grants under subsection (b), there are authorized to be appropriated $1,000,000 for the fiscal year ending June 30, 1974, $5,000,000 for the fiscal year ending June 30, 1975, and $10,000,000 for the fiscal year ending June 30, 1976.

"Part D—Construction Assistance

"LOANS AND LOAN GUARANTEES AND INTEREST SUBSIDIES

"Sec. 631. (a) To assist in meeting the costs of construction projects for health facilities, the Secretary may make loans to public and nonprofit private entities and may guarantee to non-Federal lenders payment of principal of and interest on loans made by such lenders to nonprofit private entities for such projects.

"(b)(1) Subject to paragraph (2) of this subsection, in the case of a guarantee under this part of any loan made to a nonprofit private entity, the Secretary shall pay, to the holder of such loan and for and on behalf of such entity amounts sufficient to reduce by 3 per centum per annum the net effective interest rate otherwise payable on such loan. Each holder of a loan which is guaranteed under this part shall have a contractual right to receive from the United States interest payments required by the preceding sentence.

"(2) Contracts to make the payments provided for in this subsection shall not carry an aggregate amount greater than such amount as may be provided in appropriations Acts.

"(c) No loan under this part shall be made in an amount which exceeds 90 per centum of the cost of such project (as determined under regulations of the Secretary). No loan guarantee under this part with respect to any project may apply to so much of the principal amount thereof as exceeds 90 per centum of the cost of such project (as so determined).

"(d) The Secretary, with the consent of the Secretary of Housing and Urban Development, shall obtain from the Department of Housing and Urban Development such assistance with respect to the administration of this part as will promote efficiency and economy thereof.

"(e) The cumulative total of the principal of the loans outstanding at any time which have been directly made, or with respect to which guarantees have been issued, under this part may not exceed such limitations as may be specified in appropriations Acts.

"APPLICATIONS

"Sec. 632. (a) No loan or loan guarantee may be made under this part unless an application therefor has been submitted to the Secretary and approved by him. Such application shall be in such form, submitted in such manner, and contain such information, as the Secretary shall by regulation prescribe. The Secretary may not approve an application under this part for a construction project unless the application (1) has, if there is a State Health Commission for the State in which such project is to be located, been approved by such State Health Commission, and (2) such project has a higher priority (set by the health service agency for such area under section 613(e)(2)) than any other project in such area for which applications are pending before the Secretary for his approval. In considering applications under this part the Secretary, after applying any applicable priority established under section 613(e)(2), shall give priority to applications for projects for facilities for the provision of ambulatory care, facilities for the provision of rehabilitative services, facilities for emergency medical services systems (as defined in section 1201), or hospitals for areas with rapid, recent population growth.

"(b) No application submitted under this part may be approved for a project unless such application contains reasonable assurances that all laborers and mechanics employed by contractors or subcontractors on the project will be paid wages at rates not less than those prevailing on similar work in the locality as determined by the Secretary of Labor in accordance with the Act of March 3, 1931 (40 U.S.C. 276a–276a-5, known as the Davis-Bacon Act). The Secretary of Labor shall have with respect to the labor standards referred to in the preceding sentence the authority and functions set forth in Reorganization Plan Number 14 of 1950 (15 F.R. 3176; 5 U.S.C. Appendix) and section 2 of the Act of June 13, 1934 (40 U.S.C. 276c).

"GENERAL PROVISIONS RELATING TO LOANS AND LOAN GUARANTEES

"Sec. 633. (a)(1) The Secretary may not approve an application for a loan under this part unless—

"(A) the Secretary is reasonably satisfied that the applicant therefor will be able to make payments of principal and interest thereon when due, and

"(B) the applicant provides the Secretary with reasonable assurances that there will be available to it such additional funds as may be necessary to complete the project or undertaking with respect to which such loan is requested.

"(2) Any loan made under this part shall (A) have such security, (B) have such maturity date, (C) be repayable in such installments, (D) bear interest at a rate comparable to the current rate of interest prevailing on the date the loan is made, with respect to loans guaranteed under this title, and (E) be subject to such other terms and conditions (including provisions for recovery in case of default), as the Secretary determines to be necessary to carry out the purposes of this part while adequately protecting the financial interests of the United States.

"(3) The Secretary may, for good cause but with due regard to the financial interests of the United States, waive any right of recovery which he has by reason of the failure of a borrower to make payments of principal of and interest on a loan made under this part, except that if such loan is sold and guaranteed, any such waiver shall have no effect upon the Secretary's guarantee of timely payment of principal and interest.

"(b)(1) The Secretary may from time to time, but with due regard to the financial interests of the United States, sell loans made by him under this part.

"(2) The Secretary may agree, prior to his sale of any such loan, to guarantee to the purchaser (and any successor in interest of the purchaser) compliance by the borrower with the terms and conditions of such loan. Any such agreement shall contain such terms and conditions as the Secretary considers necessary to protect the financial interests of the United States or as otherwise appropriate. Any such agreement may (A) provide that the Secretary shall act as agent of any such purchaser for the purpose of collecting from the entity to which such loan was made and paying over to such purchaser, any payments of principal and interest payable by such entity under such loan; and (B) provide for the repurchase by the Secretary of any such loan on such terms and conditions as may be specified in the agreement. The full faith and credit of the United States is pledged to the payment of all amounts which may be required to be paid under any guarantee under this subsection.

"(3) After any loan made under this part to a public entity has been sold and guaranteed under this subsection, interest paid on such loan which is received by the purchaser thereof (or his successor in interest) shall be included in the gross income of the purchaser of the loan (or his successor in interest) for the purpose of chapter 1 of the Internal Revenue Code of 1954.

"(4) Amounts received by the Secretary as proceeds from the sale of loans under this subsection shall be deposited in the fund established under section 634.

"(c)(1) The Secretary may not approve an application for a loan guarantee under this part unless he determines that (A) the terms, conditions, security (if any), and schedule and amount of repayments with respect to the loan are sufficient to protect the financial interests of the United States and are otherwise reasonable, including a determination that the rate of interest does not exceed such per centum per annum on the principal obligation outstanding as the Secretary determines to be reasonable, taking into account the range of interest rates prevailing in the private market for similar loans and the risks assumed by the United States, and (B) the loan would not be available on reasonable terms and conditions without the guarantee under this part.

"(2)(A) The United States shall be entitled to recover from the applicant for a loan guarantee under this part the amount of any payment made pursuant to such guarantee, unless the Secretary for good cause waives such right of recovery; and, upon making any such payment, the United States shall be subrogated to all of the rights of the recipient of the payments with respect to which the guarantee was made.

"(B) To the extent permitted by subparagraph (C), any terms and conditions applicable to a loan guarantee under this part may be modified by the Secretary to the extent he determines it to be consistent with the financial interest of the United States.

"(C) Any loan guarantee made by the Secretary under this part shall be incontestable (i) in the hands of an applicant on whose behalf such guarantee is made unless the applicant engaged in fraud or misrepresentation in securing such guarantee, and (ii) as to any person (or his successor in interest) who makes or contracts to make a loan to such applicant in reliance thereon unless such person (or his successor in interest) engaged in fraud or misrepresentation in making or contracting to make such loan.

"(D) Guarantees of loans under this part shall be subject to such further terms and conditions as the Secretary determines to be necessary to assure that the purposes of this title will be achieved.

"LOAN GUARANTEE AND LOAN FUND

"Sec. 634. (a) There is established in the Treasury a loan guarantee and loan fund (hereinafter in this section referred to as the 'fund') which shall be available to the Secretary without fiscal year limitation, in such amounts as may be specified from time to time in appropriations Acts, (1) to enable him to make loans under this part, (2) to enable him to discharge his responsibilities under guarantees issued by him under this part, (3) for payment of interest on the loans which are guaranteed under this part, and (4) for repurchase by him of direct loans made under this part which have been sold and guaranteed. There are authorized to be appropriated to provide capital required for the fund $100,000,000 in the aggregate for the fiscal years ending June 30, 1974, June 30, 1975, and June 30, 1976. To the extent authorized from time to time in appropriation Acts, there shall be deposited in the fund amounts received by the Secretary as interest payments or repayments of principal on loans and any other moneys, property, or assets derived by him from his operations under this part, including any moneys derived from the sale of assets.

"(b) If at any time the moneys in the fund are insufficient to enable the Secretary to discharge his responsibilities under this part, he is authorized to issue to the Secretary of the Treasury notes or other obligations in such forms and denominations, bearing such maturities, and subject to such terms and conditions, as may be prescribed by the Secretary with the approval of the Secretary of the Treasury. Such notes or other obligations shall bear interest at a rate determined by the Secretary of the Treasury, taking into consideration the current average market yield on outstanding marketable obligations of the United States of comparable maturities during the month preceding the issuance of the notes or other obligations. The Secretary of the Treasury is authorized and directed to purchase any notes and other obligations issued hereunder and for that purpose he is authorized to use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, and the purposes for which securities may be issued under that Act are extended to include any purchase of such notes and obligations. The Secretary of the Treasury may at any time sell any of the notes or other obligations acquired by him under this subsection. All redemptions, purchases, and sales by the Secretary of the Treasury of such notes or other obligations shall be treated as public debt transactions of the United States. Sums borrowed under this subsection shall be deposited in the fund and redemption of such notes and obligations shall be made by the Secretary from such fund.

"DEFINITIONS

"Sec. 635. As used in this part—

"(1) The term 'construction' includes—

"(A) construction of new buildings,

"(B) modernization of existing buildings,

"(C) the acquisition of initial equipment (including medical transportation facilities) for buildings constructed or modernized with assistance under this part, and

"(D) acquisition of equipment for any building in any case in which it will help to provide a health service not previously provided in the community served by such building.

"(2) The term 'modernization' includes the alteration, expansion, major repair (to the extent permitted by the Secretary by regulations), remodeling, replacement, or renovation of existing buildings.

"(3) The term 'cost' as applied to a construction project includes architects' fees but does not include the cost of off-site improvements or the acquisition of land."

CONFORMING AMENDMENTS

Sec. 4. Title IX and subsections (a), (b), and (c) of section 314 and title IX of the Public Health Service Act are repealed.

EFFECTIVE DATE

Sec. 5. The amendments made by this Act shall take effect July 1, 1974, except that on and after the date of the enactment of this Act (1) the Secretary of Health, Education, and Welfare shall carry out the duties imposed by section 611 of the Public Health Service Act (as added by section 3) and provide the assistance authorized by sections 615 and 628 of such Act (as so added), and (2) appropriations may be made under section 634 of such Act (as so added) for the purpose of capitalizing the fund authorized by that section.

LEAVES OF ABSENCE

(By unanimous consent, leave of absence was granted to:)

Mr. Roncallo of New York (at the request of Mr. Rhodes), for today, on account of illness in family.

Mr. Corman, for himself, for today, on account of official business.

Mr. Brotzman, for the remainder of today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. Thone) and to revise and extend their remarks and include extraneous matter:)

Mr. Crane, for 5 minutes, today.

Mr. McDade, for 10 minutes, today.

Mr. Steele, for 45 minutes, today.

Mr. Hogan, for 60 minutes, today.

Mr. Cronin, for 5 minutes, today.

(The following Members (at the request of Mr. Ginn) and to revise and extend their remarks and include extraneous matter:)

Mr. Gonzalez, for 5 minutes, today.

Mr. Rooney of New York, for 5 minutes, today.

Mr. James V. Stanton, for 5 minutes, today.

Mr. Alexander, for 60 minutes, today.

Mr. Whitten, for 10 minutes, today.

Mr. Roy, for 5 minutes today, to revise and extend his remarks and include extraneous material.

(The following Member (at the request of Mr. Thone), to revise and extend his remarks, and to include extraneous matter:)

Mr. Kemp, today, for 15 minutes.

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. Zablocki in three instances.

Mr. Roy and to include extraneous matter notwithstanding the fact it exceeds two pages of the Congressional Record and is estimated by the Public Printer to cost $3,867.

(The following Members (at the request of Mr. Thone) and to revise and extend their remarks:)

Mr. Rhodes.

Mr. Heinz in two instances.

Mr. Hanrahan.

Mr. Roncallo of New York.

Mr. Whalen.

Mr. Kemp in ten instances.

Mr. Carter.

Mr. Lent in two instances.

Mr. Wyman in two instances.

Mr. Railsback in three instances.

Mr. Symms.

Mr. Martin of North Carolina in two instances

Mr. Maraziti.

Mr. Hosmer in two instances.

Mr. Buchanan in two instances.

Mr. Vander Jagt.

Mr. Findley in two instances.

Mr. du Pont.

Mr. Quie.

Mr. Mizell in five instances.

Mr. Bray in three instances.

Mr. Johnson of Pennsylvania.

Mr. Steiger of Wisconsin.

Mr. Kemp.

Mr. Mallary.

(The following Members (at the request of Mr. Ginn) and to include extraneous matter:)

Mrs. Chisholm.

Mr. Blatnik.

Mr. Owens in 10 instances.

Mr. James V. Stanton.

Mr. Stokes in 10 instances.

Mr. O'Neill in two instances.

Mr. Rooney of New York in five instances.

Mr. Gonzalez in three instances.

Mr. Rarick in three instances.

Mr. Dingell.

Mr. Studds in three instances.

Mr. Johnson of California.

Mr. Harrington in two instances.

Mr. Waldie in three instances.

Mr. Koch in two instances.

Mr. Denholm.

Mr. Hungate.

Mr. Donohue in two instances.

Mr. Kyros.

Ms. Abzug in three instances.

Mr. Roe in 10 instances.

Mr. Brasco in two instances.

Mr. Litton.

Mr. Pickle in four instances.

Mr. McCormack.

Mr. Symington.

Mr. Chappell.

Mr. Burke of Massachusetts.

SENATE BILLS AND JOINT RESOLUTION REFERRED

Bills and a joint resolution of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 2770. An act to amend chapter 5 of title 37, United States Code, to revise the special pay structure relating to medical officers of the uniformed services; to the Committee on Armed Services.

S. 2771. An act to amend chapter 5 of title 37, United States Code, to revise the special pay bonus structure relating to members of the armed forces, and for other purposes; to the Committee on Armed Services.

S. 2830. An act to amend the Public Health Service Act to provide for greater and more effective efforts in research and public education with regard to diabetes mellitus; to the Committee on Interstate and Foreign Commerce.

S.J. Res. 183. Joint resolution to proclaim April 30, 1974, as a National Day for Humiliation, Fasting, and Prayer; to the Committee of the Judiciary.

ENROLLED BILLS AND A JOINT RESOLUTION SIGNED

Mr. HAYS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills and a joint resolution of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1316. An act for the relief of Claude V. Alcorn and 21 others;

H.R. 2303. An act to continue mandatory price support for tung nuts only through the 1976 crop;

H.R. 4738. An act to provide for the striking of medals in commemoration of the 100th anniversary of the statehood of Colorado;

H.R. 5760. An act to provide for the striking of medals commemorating the International Exposition on Environment at Spokane, Wash., in 1974;

H.R. 6758. An act to amend chapter 33 of title 28 of the District of Columbia Code, relating to usury, and for other purposes;

H.R. 8449. An act to expand the national flood insurance program by substantially increasing limits of coverage and total amount of insurance authorized to be outstanding and by requiring known flood-prone communities to participate in the program, and for other purposes;

H.R. 8529. An act to implement the shrimp fishing agreement with Brazil;

H.R. 10806. An act to amend the District of Columbia Minimum Wage Act so as to enable airline employees to exchange days at regular rates of compensation, and for other purposes;

H.R. 11088. An act to provide emergency security assistance authorizations for Israel and Cambodia;

H.R. 11238. An act to amend the act of March 16, 1926 (relating to the Board of Public Welfare in the District of Columbia), to provide for an improved system of adoption of children in the District of Columbia, and for other purposes;

H.R. 11771. An act making appropriations for Foreign Assistance and related programs for the fiscal year ending June 30, 1974, and for other purposes; and

H.J. Res. 858. Joint resolution to provide for the establishment of the Lyndon Baines Johnson Memorial Grove on the Potomac.

SENATE ENROLLED BILLS AND JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 1191. An act to provide financial assistance for a demonstration program for the prevention, identification, and treatment of child abuse and neglect, to establish a National Center on Child Abuse and Neglect, and for other purposes;

S. 1559. An act to assure opportunities for employment and training to unemployed and underemployed persons;

S. 1983. An act to provide for the conservation of endangered and threatened species of fish, wildlife, and plants, and for other purposes;

S. 2267. An act to amend section 303(b) of the Interstate Commerce Act to remove certain restrictions upon the application and scope of the exemption provided therein, and for other purposes;

S. 2482. An act to amend the Small Business Act;

S. 2491. An act to repeal the provisions of the Agriculture and Consumer Protection Act of 1973 which provide for payments to farmers in the event of crop failures with respect to crops planted in lieu of wheat or feed grains;

S. 2812. An act to amend the Federal Water Pollution Control Act to establish the ratio for allocation of treatment works construction grant funds, to insure that grants may be given for other than operable units, and to clarify the requirements for development of priorities; and

S.J. Res. 182. Joint resolution extending the dates for the transmission of the 1974 Economic Report and the report of the Joint Economic Committee.

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. HAYS, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, bills and joint resolutions of the House of the following titles:

H.R. 5874. To establish a Federal Financing Bank, to provide for coordinated and more efficient financing of Federal and federally assisted borrowings from the public, and for other purposes;

H.R. 11575. Making appropriations for the Department of Defense for the fiscal year ending June 30, 1974, and for other purposes;

H.J. Res. 736. To provide for a feasibility study and to accept a gift from the U.S. Capitol Historical Society; and

H.J. Res. 865. Authorizing the President to proclaim March 29, 1974, as "Vietnam Veterans Day".

ADJOURNMENT

Mr. BREAUX. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 1 o'clock and 32 minutes a.m.) the House adjourned until today, Saturday, December 22, 1973, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1654. A letter from the Assistant Secretary of Defense (Comptroller), transmitting a report covering the first quarter of fiscal year 1974 on the estimated value, by country, of support furnished from military functions appropriations for Vietnamese and other free world forces in Vietnam, and for local forces in Laos, pursuant to section 737(b) of Public Law 92–570, as amended; to the Committee on Appropriations.

1655. A letter from the Comptroller of the Currency, transmitting his annual report for 1972, pursuant to section 333 of the Revised Statutes; to the Committee on Banking and Currency.

1656. A letter from the Administrator of General Services, transmitting a report on borrowing authority for the period ended June 30, 1973, pursuant to section 304(b) of the Defense Production Act of 1950, as amended; to the Committee on Banking and Currency.

1657. A letter from the First Vice President and Vice Chairman, Export-Import Bank of the United States, transmitting a report covering the quarter ended September 30, 1973, on the administration of the export expansion facility program, pursuant to Public Law 90–390 (62 Stat. 286); to the Committee on Banking and Currency.

1658. A letter from the Fiscal Assistant Secretary of the Treasury, transmitting a report covering the 6 months ended June 30, 1973, on the inventory of nonpurchased foreign currencies, pursuant to 22 U.S.C. 2363; to the Committee on Foreign Affairs.

1659. A letter from the Director, U.S. Information Agency, transmitting the semiannual report of the Agency for the period ended June 30, 1973, pursuant to section 1008 of the U.S. Information and Educational Exchange Act of 1948, as amended; to the Committee on Foreign Affairs

1660. A letter from the Corporation Agent, Legion of Valor of the United States of America, Inc., transmitting the financial statement of the legion for the fiscal year ended July 31, 1973, pursuant to section 14(b) of Public Law 84–224; to the Committee on the Judiciary.

1661. A letter from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend section 1780 of title 38, United States Code, to authorize the Administrator of Veterans' Affairs to continue to make educational assistance payments to veterans and dependents where educational institutions are closed by reason of the energy crisis or for other emergency reasons; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HOLIFIELD: Committee on Government Operations. Problems in air shipment of domestic animals. (Rept. No. 93–746). Referred to the Committee of the Whole House on the State of the Union.

Mr. BLATNIK: Committee on Public Works. S. 261. An act to amend the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 to provide for minimum Federal payments for 4 additional years, and for other purposes; with amendment (Rept. No. 93–747). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Ms. ABZUG:

H.R. 12102. A bill to terminate the airlines mutual aid agreement; to the Committee on Interstate and Foreign Commerce.

By Mr. BRINKLEY (for himself and Mr. Murphy of New York):

H.R. 12103. A bill to provide for a comprehensive, coordinated 5-year research program to determine the causes of and cure for cancer, to develop cancer preventatives, vaccines or other preventatives, and for other purposes; to the Committee on Ways and Means.

By Mr. CONTE (for himself, Mr. O'Neill, Mr. Harrington, Mr. Cotter, Mr. Moakley, and Mr. Studds):

H.R. 12104. A bill to amend the Natural Gas Act to secure adequate and reliable supplies of natural gas and oil at the lowest reasonable cost to the consumer, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. CRONIN:

H.R. 12105. A bill to amend the Community Mental Health Centers Act to provide for the extension thereof, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. DICKINSON (for himself, Mr. Anderson of California, Mr. Bergland, Mr. Blatnik, Mr. Danielson, Mr. Dorn, Mr. Eshleman, Mr. Fascell, Mr. Flowers, Mr. Ginn, Mr. Green of Pennsylvania, Mr. Jones of Alabama, Mr. Lent, Mr. McCloskey, Mr. McKinney, Mr. Price of Illinois, Mr. Obey, Mr. Patten, Mr. Rose, Mr. Runnels, Mr. Steele, Mr. Studds, and Mr. Charles Wilson of Texas):

H.R. 12106. A bill to provide for the establishment of an American Folk Life Center in the Library of Congress, and for other purposes; to the Committee on House Administration.

By Mr. du PONT:

H.R. 12107. A bill to prohibit discrimination on account of sex or marital status against individuals seeking credit; to the Committee on Banking and Currency.

By Mr. FRASER (for himself and Mr. Blatnik):

H.R. 12108. A bill to amend the Internal Revenue Code of 1954 to provide that the tax on the amounts paid for communication services shall not apply to the amount of the State and local taxes paid for such services; to the Committee on Ways and Means.

By Mr. FRASER (for himself and Mr. Diggs):

H.R. 12109. A bill to amend the District of Columbia Self-Government and Governmental Reorganization Act to clarify the provision relating to the referendum on the issue of the Advisory Neighborhood Councils; to the Committee on the District of Columbia.

By Mr. GUDE:

H.R. 12110. A bill to amend the District of Columbia Redevelopment Act of 1945 to assure that the District of Columbia Redevelopment Land Agency maintains dwellings owned by it according to the laws of the District of Columbia relating to safe and sanitary housing, and for other purposes; to the Committee on District of Columbia.

H.R. 12111. A bill to amend the Chesapeake and Ohio Canal Development Act so as to expand the boundaries of the Chesapeake and Ohio Canal National Historical Park to include certain lands within the areas from North Branch to Cumberland, Md.; to the Committee on Interior and Insular Affairs.

By Mr. HELSTOSKI (for himself, Mr. Dominick V. Daniels, Mr. Howard, Mr. Maraziti, Mr. Minish, Mr. Patten, Mr. Rodino, Mr. Roe, Mr. Sandman, Mr. Thompson of New Jersey, Mr. Rinaldo, and Mr. Widnall):

H.R. 12112. A bill to amend section 401(j) of the Federal Aviation Act of 1958 to provide that no air carrier shall discontinue service, in whole or in part, unless such discontinuance is found to be in the public interest by the Civil Aeronautics Board after public hearings; to the Committee on Interstate and Foreign Commerce.

By Mr. HOLIFIELD (for himself and Mr. Horton) (by request):

H.R. 12113. A bill to revise and restate certain functions and duties of the Comptroller General of the United States and for other purposes; to the Committee on Government Operations.

H.R. 12114. A bill to revise and restate certain functions and duties of the Comptroller General of the United States and for other purposes; to the Committee on Government Operations.

By Mr. KOCH:

H.R. 12115. A bill to amend title VII of the Housing Act of 1961 to establish an Urban Parkland Heritage Corporation to provide funds for the acquisition and operation of open-space land, and for other purposes; to the Committee on Banking and Currency.

By Mr. LATTA:

H.R. 12116. A bill to provide that all letters, memorandums, and other papers produced or acquired by any officer or employee of the United States in connection with the performance of his duties shall be the property of the United States, and to prohibit the sale or use for personal gain of such property; to the Committee on the Judiciary.

By Mr. MARTIN of North Carolina:

H.R. 12117. A bill to amend the Internal Revenue Code of 1954 to increase the maximum credit allowable under section 41 for political contributions to $25 ($50 in the case of a joint return), and to increase the maximum deduction allowable under section 218 for such contributions to $200 ($400 in the case of a joint return); to the Committee on Ways and Means.

H.R. 12118. A bill to amend the Internal Revenue Code of 1954 to encourage greater conservation of energy in environmental conditioning and the use of solar energy by providing an income tax deduction for expenditures made for more effective insulation, more efficient environmental conditioning equipment, and solar environmental conditioning apparatus in residential structures; to the Committee on Ways and Means.

By Mr. MILLER.

H.R. 12119. A bill to amend the Federal Coal Mine Health and Safety Act of 1969 to exclude any coal mine in which every miner who works in such mine is either complete or partial owner or member of the immediate family of such owner from coverage under titles I, II, and III of the act; to the Committee on Education and Labor.

By Mr. NEDZI:

H.R. 12120. A bill to amend title 38 of the United States Code in order to increase the rates of educational assistance, to otherwise improve the educational assistance program, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. PEPPER (for himself, Mr. Staggers, Mr. Mollohan, Mr. Hechler of West Virginia, Mr. Madigan, Mr. Dent, Mr. Denholm, Mr. Yatron, Mr. Gunter, Mr. Burlison of Missouri, Mr. Gray, Mr. Roncalio of Wyoming, Mr. Bevill, Mr. Stubblefield, Mr. Edwards of California, Mr. Evans of Columbia, Mr. Slack, Mr. Perkins, Mr. Price of Illinois, Mr. Morgan, Mr. Carney of Ohio, Mr. Owens, Mr. Hamilton, Mr. Meeds, and Mr. Hammerschmidt):

H.R. 12121. A bill to increase the production, transportation, and conversion of coal as a source of energy; to the Committee on Interstate and Foreign Commerce.

By Mr. PEYSER:

H.R.12122. A bill to establish a National Center for the Prevention and Control of Rape and provide financial assistance for a research and demonstration program into the causes, consequences, prevention, treatment, and control of rape; to the Committee on Interstate and Foreign Commerce.

By Mr. RANGEL:

H.R. 12123. A bill to create a National Landlord and Tenant Commission, to establish housing courts and to define or to provide therefor the rights, obligations, and liabilities of landlords and tenants so as to regulate the activities of the commercial rental housing operations which affect the stability of the economy, the amount of a person's real income, the travel of goods and people in commerce, and the general welfare of all citizens of this Nation; to the Committee on the Judiciary.

By Mr. RODINO:

H.R. 12124. A bill to amend the Natural Gas Act to secure adequate and reliable supplies of natural gas and oil at the lowest reasonable cost to the consumer, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. ROYBAL (for himself and Mr. Waldie):

H.R. 12125. A bill to amend section 312 (1) of the Immigration and Nationality Act; to the Committee on the Judiciary.

By Mr. TOWELL of Nevada:

H.R. 12126. A bill to amend the Internal Revenue Code of 1954 to repeal the taxes on wagering; to the Committee on Ways and Means.

By Mr. VANIK:

H.R. 12127. A bill to prohibit the dumping of spent oil shale on any Federal land other than Federal land leased for the operation of shale oil recovery facilities; to the Committee on Interior and Insular Affairs.

By Mr. STAGGERS:

H.R. 12128. A bill to assure, through energy conservation, end-use rationing of fuels, and other means, that the essential energy needs of the United States are met, and for other purposes; to the Committee on Interstate and Foreign Commerce.

H.R. 12129. A bill to assure, through energy conservation, end-use rationing of fuels, and other means, that the essential energy needs of the United States are met, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. BURKE of Florida:

H.R. 12130. A bill to amend the Public Health Service Act to assure an adequate supply of chlorine and certain other chemicals and substances which are necessary for safe drinking water and for waste water treatment; to the Committee on Interstate and Foreign Commerce.

By Mr. BURKE of Massachusetts:

H.R. 12131. A bill to amend title XVIII of the Social Security Act to require skilled nursing facilities under the medicare program and the medicaid program to provide medical social services; to the Committee on Ways and Means.

By Mr. DENHOLM:

H.R. 12132. A bill to amend the Economic Stabilization Act of 1970, to eliminate price controls of petroleum products; to the Committee on Banking and Currency.

H.R. 12133. A bill to impose an excess profits tax on the income of corporations during the period of national energy emergency and to establish an energy trust fund to develop new energy sources, improve utilization of present sources, develop means for energy conservation, and to promote effective economic techniques for preserving the environment in the United States; to the Committee on Ways and Means.

H.R. 12134. A bill to increase the natural resources depletion allowance for income tax purposes on oil and gas wells, coal and lignite deposits in the United States; to the Committee on Ways and Means.

By Mr. ERLENBORN (for himsef, Mr. Moorhead of Pennsylvania, Mr. Horton, Mr. McCloskey, Mr. Gude, Mr. Thone, Mr. Wright, Mr. Regula, Mr. James V. Stanton, and Mr. Alexander):

H.R. 12135. A bill to amend the Freedom of Information Act to require that information be made available to Congress; to the Committee on Government Operations.

By Mr. HELSTOSKI (for himself and Mr. Murphy of New York):

H.R. 12136. A bill to amend section 401(j) of the Federal Aviation Act of 1958 to provide that no air carrier shall discontinue service, in whole or in part, unless such discontinuance is found to be in the pulbic interest by the Civil Aeronautics Board after public hearings; to the Committee on Interstate and Foreign Commerce.

By Mr. KEMP:

H.R. 12137. A bill to amend the Higher Education Act of 1965 to establish a student internship program to offer students practical political involvement with elected officials on the local and State levels of government; to the Committee on Education and Labor.

H.R. 12138. A bill to establish a procedure assuring Congress the full and prompt production of information requested from Federal officers and employees; to the Committee on Rules.

By Mr. MALLARY (for himself, Mr. Armstrong, Mr. Bennett, Mr. Burgener, Mr. Cleveland, Mr. Davis of Georgia, Mr. Forsythe, Mr. Hechler, of West Virginia, Mr. Heinz, Mr. Moakley, Mr. Montgomery, Mr. Mosher, Mr. Rangel, Mr. Snyder, Mr. Steiger of Wisconsin, Mr. Charles H. Wilson of California, Mr. Winn and Mr. Young of Florida):

H.R. 12139. A bill to provide that pay adjustments for Members of Congress take effect in the Congress next following the Congress in which they are approved; to the Committee on Post Office and Civil Service.

By Mr. MURPHY of Illinois:

H.R. 12140. A bill to amend section 401(j) of the Federal Aviation Act of 1958 to provide that no air carrier shall discontinue service, in whole or in part, unless such discontinuance is found to be in the public interest by the Civil Aeronautics Board after public hearings; to the Committee on Interstate and Foreign Commerce.

By Mr. PICKLE:

H.R. 12141. A bill to establish a National Energy Information System in the Department of Commerce and for other related purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. RANDALL:

H.R. 12142. A bill to amend title 13, United States Code, to assure confidentiality of information furnished in response to questionnaires, inquiries, and other requests of the Bureau of the Census, to provide for a mid-decade sample survey of population, and for other purposes; to the Committee on Post Office and Civil Service.

H.R. 12143. A bill to extend to all individuals the full tax benefits of income splitting now enjoyed by married individuals filing joint returns, and for other purposes; to the Committee on Ways and Means.

By Mr. STOKES (for himself, Ms. Abzug, Mr. Badillo, Mrs. Burke of California, Mrs. Chisholm, Mr. Clay, Mrs. Collins of Illinois, Mr. Conyers, Mr. Corman, Mr. Dellums, Mr. Diggs, Mr. Edwards of California, Mr. Fauntroy, Mr. Fraser, Mr. Harrington, Mr. Hawkins, Mr. Helstoski, Miss Jordan, Mr. Leggett, Mr. Mazzoli, Mrs. Mink, Mr. Mitchell of Maryland, and Mr. Rangel):

H.R. 12144. A bill to require that discharge certificates issued to members of the Armed Forces not indicate the conditions or reasons for discharge, to limit the separation of enlisted members under conditions other than honorable and to improve the procedures for the review of discharge and dismissals; to the Committee on Armed Services.

By Mr. STOKES (for himself, Mr. Rees, Mr. Ryan, Mr. Seiberling, Mr. Sisk, and Mr. Stark):

H.R. 12145. A bill to require that discharge certificates issued to members of the Armed Forces not indicate the conditions or reasons for discharge, to limit the separation of enlisted members under conditions other than honorable, and to improve the procedures for the review of discharge and dismissals; to the Committee on Armed Services.

By Mr. STUDDS:

H.R. 12146. A bill to authorize and encourage certain highway projects to increase availability of energy efficient means of transportation, to amend title 23 of the United States Code, and for other purposes; to the Committee on Public Works.

By Mr. STUDDS (for himself, Mrs. Holt, and Mr. Roe):

H.R. 12147. A bill to extend on an interim basis the jurisdiction of the United States over certain ocean areas and fish in order to protect the domestic fishing industry, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. du PONT:

H. J. Res. 868. Joint resolution providing for a congressional investigation into the status of those American men missing, captured, or dead in Southeast Asia, and for other purposes; to the Committee on Rules.

By Mr. GINN:

H.R. Res. 869. Joint resolution proposing an amendment to the Constitution of the United States with respect to tenure of office for judges of the Supreme Court and inferior courts of the United States; to the Committee on the Judiciary.

By Mr. MILLER (for himself and Mr. Hanrahan):

H.J. Res. 870. Joint resolution proposing an amendment to the Constitution of the United States with respect to the attendance of Senators and Representatives at sessions of the Congress; to the Committee on the Judiciary.

By Mr. MOORHEAD of Pennsylvania:

H. Con. Res. 408. Concurrent resolution expressing the sense of the Congress that housing, housing assistance, and community development programs authorized by Congress should be carried out at levels at least equal to the levels prevailing in calendar year 1972, until such time as funds appropriated for such programs are exhausted or the Congress enacts legislation terminating or replacing such programs; to the Committee on Banking and Currency.

By Mr. RAILSBACK:

H. Con. Res. 409. Concurrent resolution expressing the sense of the Congress that the President, acting through the United Nations or other appropriate international organization, should call for international conferences to consider the present world energy crisis; to the Committee on Foreign Affairs.

By Mr. RANDALL:

H. Con. Res. 410. Concurrent resolution concerning removal of automotive emission control devices by individuals or independent automotive service stations which are neither manufacturers or dealers; to the Committee on Interstate and Foreign Commerce.

By Mr. O'NEILL:

H. Con Res. 411. Concurrent resolution providing for the adjournment sine die of the first session of the 93d Congress; considered and not agreed to.

By Mr. GUNTER (for himself, Mr. Lehman, Mr. Hays, Mrs. Heckler of Massachusetts, Mr. Helstoski, Mr. Koch, Mr. Moakley, Mr. Leggett, Mr. Owens, Mr. Pepper, Mr. Rees, Mr. Rosenthal, Mr. St Germain, Mr. Sarasin, Mr. Seiberling, Mrs. Schroeder, Mr. Sikes, Mr. Stark, Mr. Studds, Mr. Wolff, Mr. Vanik, and Mr. Yates):

H. Res. 757. Resolution creating a select committee to conduct an investigation and study of the role of the oil and gas industry in contributing to the current energy crisis; to the Committee on Rules.

By Mr. LEHMAN (for himself, Mr. Gunter, Mr. Bingham, Mr. Boland, Mr. Brasco, Mr. Brown of California, Mr. Dan Daniel, Mr. Davis of Georgia, Mr. Duncan, Mr. Eshleman, Mr. Fascell, Mr. Froehlich, Mrs. Grasso, Mr. Gude, Mr. Haley, Mr. Hanrahan, and Mr. Harrington):

H. Res. 758. Resolution creating a select committee to conduct an investigation and study of the role of the oil and gas industry in contributing to the current energy crisis; to the Committee on Rules.

By Mr. STAGGERS:

H. Res. 759. Resolution providing for agreeing to the Senate amendment to the House amendment to S. 921, with an amendment; ordered to be printed.

H. Res. 760. Resolution providing for agreeing to the Senate amendment to the House amendment to S. 921, with an amendment; ordered to be printed.

H. Res. 761. Resolution providing for agreeing to the Senate amendment to the House amendment to S. 921; ordered to be printed.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. MONTGOMERY:

H.R. 12148. A bill for the relief of Oscar H. Barnett; to the Committee on the Judiciary.

By Mr. TALCOTT:

H.R. 12149. A bill for the relief of Maria del Refugio Cardenas-Sifuentes; to the Committee on the Judiciary.

HOUSE OF REPRESENTATIVES—*Saturday, December 22, 1973*

The House met at 12 o'clock noon.

The Chaplain, Rev. Edward G. Latch, D.D., offered the following prayer:

The people who walked in darkness have seen a great light.—Isaiah 9:2.

Almighty God, our Heavenly Father, who by the birth of the Babe of Bethlehem has given light to those who sit in darkness, love to those who live with ill will and life to those who walk through the valley of the shadow of death; grant that in Thy light we may see light clearly, in Thy love we may possess love fully and in Thy life we may learn to live all our days.

Guide the citizens of our Nation in the ways of righteousness and the peoples of the world in the paths of peace. May good will live in all our hearts binding us together in the bond of true brotherhood; to the glory of Thy holy name.

May the Lord bless us and keep us; may the Lord make his face to shine upon us; and be gracious unto us; may the Lord lift upon us the light of His countenance and give us peace now and forever more. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Without objection, the Journal stands approved.

There was no objection.

MESSAGE FROM THE SENATE

A message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed without amendment bills of the House of the following titles:

H.R. 1920. An act to designate the portion of the project for flood control protection on Chartiers Creek that is within Allegheny County, Pennsylvania, as the "James G. Fulton Flood Protection Project"; and

H.R. 3733. An act to authorize the American Battle Monuments Commission to assume control of overseas war memorials erected by private persons and non-Federal and foreign agencies and to demolish such war memorials in certain instances.

The message also announced that the Senate agrees to the amendments of the

House to a bill of the Senate of the following title:

S. Con. Res. 11. Concurrent resolution to express a national policy with respect to support of the U.S. fishing industry.

Mr. PIKE. Mr. Speaker, I make the point of order that a quorum is not present.

The SPEAKER. The Chair recognizes the gentleman from Massachusetts (Mr. O'NEILL).

MOTION TO ADJOURN OFFERED BY MR. O'NEILL

Mr. O'NEILL. Mr. Speaker, I move that the House do now adjourn.

The SPEAKER. The question is on the motion made by the gentleman from Massachusetts (Mr. O'NEILL) that the House do now adjourn.

Mr. PIKE. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. The Chair will inform the gentleman from New York (Mr. PIKE) that a quorum is not needed for action upon a motion to adjourn the House.

Mr. PIKE. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device and there were yeas 39, nays 160, not voting 233, as follows:

So the motion was rejected.

The result of the vote was announced as above recorded.

PARLIAMENTARY INQUIRY

Mr. O'NEILL. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman from Massachusetts will state it.

Mr. O'NEILL. Mr. Speaker, realizing the fact that now a call of the House is in order, is it permissible for me to ask unanimous consent that I may address the House for 1 minute?

The SPEAKER. Not in the absence of a quorum.

Mr. O'NEILL. Mr. Speaker, another parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. O'NEILL. It was my purpose to inform the House that there was no business before it and that the Senate is out and will not meet for some time. I had every intention of asking unanimous consent that when the House adjourn today it adjourn to meet on Wednesday next.

That was one unanimous-consent request I was going to make.

The second was I was going to ask that we adjourn to meet on Wednesday and every third day thereafter.

CALL OF THE HOUSE

Mr. O'NEILL. Mr. Speaker, I appreciate the fact that under the rules of the House I must move a call of the House, and I so move.

A call of the House was ordered.

The call was taken by electronic device, and the following Members failed to respond:

The SPEAKER. On this rollcall 218 Members have recorded their presence by electronic device, a qourum.

By unanimous consent, further proceedings under the call were dispensed with.

LEGISLATIVE SITUATION

(Mr. O'NEILL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. O'NEILL. Mr. Speaker, it has come down to almost Christmas Eve, and, as I said last night, we are in a stalemate. I know that oftentimes I have said myself we should not be regulated by the action of the other body, but let me inform the Members as to the situation as it is at the present moment.

As the Members know, we have passed an energy bill in this House. It is over in the Senate laying on the table. There was a motion made yesterday by Senator JACKSON to reject it. That motion was defeated 60 to 0, so the legislation is still alive there. All we have is that piecemeal bit of legislation that was sent back to us yesterday which on three occasions the House rejected.

The leadership of the other body informs us they are meeting at 1 o'clock, and at 1 o'clock if a sine die resolution is not over from the House, they are going to take 3-day recesses and will not be back for business until the 21st of January.

Consequently, today we have no further work before us. There is nothing scheduled. We have already had a motion to adjourn which failed and now a quorum has been established. I see no alternative now but to move a concurrent resolution for a sine die adjournment. If it does not pass, then we will be just sitting around. For what purpose I do not know because there is no business.

Mr. ULLMAN. Mr. Speaker, will the distinguished majority leader yield?

Mr. O'NEILL. I yield to the gentleman from Oregon.

Mr. ULLMAN. I thank the gentleman for yielding.

I know the Members are greatly concerned about the excess-profits situation, particularly with respect to the petroleum industry. I want to tell the Members that we on the Committee on Ways and Means, where the rightful jurisdiction of this problem lies, are equally concerned. I spent a good part of the morning conferring with Secretary Shultz and members of the Joint Committee of the Internal Revenue Taxation staff.

The Secretary has or at present is about to make an announcement that there will be a recommendation. The Secretary is having his staff draft that recommendation now. I have had a look at it. I have discussed it in detail. It is not all the answer. I want to tell the Members that we need to do more than that but it is a tough interim tax on the petroleum industry.

We are going to have some problems with some of our Members who come from petroleum areas because it is tough. What it does is relate the barrel price of oil to a certain date—I think it is June—and imposes an 85-percent tax on the oil companies on price increases above that figure, and it does phase out in a 3-year period, but as I say it is only part of the answer.

We need to take a broader look at the whole business of excess profits but this, believe me, will really take the fat out of the petroleum profits that we are talking about.

The Ways and Means Committee will be taking this up as soon as we get back. The staff of the Joint Committee on Internal Revenue Taxation is doing all the staff work in the interim. I will be conferring with them as well as some of the other members of the committee. I just want to assure the Members that as early as possible in the coming year we will bring back to the House a proposal to take care of this problem of windfall profits.

I think I can assure Members it will be an effective proposal. I think I can assure the Members that it will be responsible and that it will do what I think most of the Members want to do with respect to these windfall profits. I think that is about as much as we can give in the way of assurances.

If we were to try to move now to perfect this kind of bill, we would not be acting responsibly. There is too much staff work that needs to be done and we will have that done during the recess and I would hope we can be reasonable and go home and come back. Personally I would rather come back before the 21st but if the Senate is adamant on that point there is nothing we can do, but I would hope we can vote a sine die adjournment.

Mr. O'NEILL. Mr. Speaker, I thank the gentleman from Oregon, the acting chairman of the Ways and Means Committee, for his statement.

Mr. BROYHILL of Virginia. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. Mr. Speaker, before I yield to the gentleman from Virginia, may I make it clear and understandable to everybody what has transpired and what is going to happen, regardless of our action today.

About a week ago we passed a resolution. That resolution starts the 2d session of the 93d Congress on the 21st day of January. It has already passed the House and the Senate and has been signed by the President. In the event we were to stay here each day, the 1st session of the 93d Congress would expire January 3. I want all the Members to understand clearly that because of the resolution we have already passed, the first session ends January 3 and there will be no session until the 21st and that is because of the Constitution and the resolution that has already been passed. The Members may ask why we cannot pass a sine die resolution to the 7th of January? The answer is that the other body has informed us it will not act on any legislation of that type.

Mr. Speaker, I yield now to the gentleman from Virginia.

Mr. BROYHILL of Virginia. Mr. Speaker, I should like to associate myself with the statement made by the gentleman from Oregon (Mr. ULLMAN).

It is my understanding that the administration is preparing a proposal on excess profits which will be up here as early as possible. I have discussed this with some of the minority members of the Ways and Means Committee and all of them are in support of this approach to the problem and will support the chairman and will give this measure first priority when we come back the 21st of January. It is a proper and most efficient and effective way of dealing with the problem.

Mr. VANIK. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. Mr. Speaker, I yield to the gentleman from Ohio.

Mr. VANIK. Mr. Speaker, I would like to point out that the proposal that I think Secretary Shultz is discussing, and which appeared in the newspapers on an excess profits tax, is really an excise profits tax which will be passed down on through to the consumers of this country.

Mr. Speaker, I do not think that kind of proposal is going to be satisfactory to the House or to the American people, because it provides that the tax will be based on a base price which can be moved upward. As far as I can determine, it is more in the nature of an excise tax which will be passed on to the consumer rather than affect the profits of the oil industry.

Mr. Speaker, the Secretary of the Treasury has just recommended a proposal to reach "excess profits" in the oil industry. But the administration's proposal is a sham approach to the problem. It is hardly likely to reach excess profits.

Under the administration's scheme a base price for crude oil will be established. It is likely to be roughly $4.25 a barrel—the posted rate as of December 1, 1973. The President wants to impose a graduated tax on price increases over that base price. If the price rises $1, a tax of 7.5 cents a barrel is levied. The tax rate goes up so that an increase of $2.50 is taxed at a rate of 85 percent.

The President's proposal is not really an excess profits tax. It is a tax in the nature of a graduated excise tax. As an excise tax, it will be treated as an additional cost of production and passed on, dollar-for-dollar, to the consumer. It in no way will touch oil profiteering.

The revenue hopes of this proposal will

remain only if the original base price remains the same. But as the base price is increased, the tax revenues will phase out. Prices to the consumer will spiral and the impact of the tax on a profit-controlling mechanism will be illusory.

The proposal is a flimsy smokescreen in the name of an excise profits tax. It does not deal with the question of profits in the oil industry. It is an intricate device to sock the consumer and let the profits roll on. The oil industry itself could not have written a better proposal. I hope the Congress will see through this smokescreen.

PERSONAL ANNOUNCEMENT

Mr. FOUNTAIN. Mr. Speaker, on rollcall No. 725, the motion to adjourn, I was unavoidably detained and did not get to the Chamber before the 15 minutes expired.

Mr. Speaker, had I been present, I would have voted "no."

Mr. WHITTEN. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. Mr. Speaker, I yield to the gentleman from Mississippi.

Mr. WHITTEN. Mr. Speaker, we have heard the various views of the members of the Committee on Ways and Means, and last evening the views of the different sides of the aisle with regard to excess profits.

We are all aware of the fact that some of us do not have any firm opinion one way or the other. To further discuss this controversial item at this time strikes me as being beyond the matter we should be thinking about.

The question is, do we have anything to do in the event the majority insists on staying here prior to January 21? If there is anything that can be done, we can stay here, so I think our discussion should be directed to that point.

Mr. Speaker, I ask it straight out: I ask the majority leader, is there anything the House itself could do between now and January 21 other than stay here?

Mr. O'NEILL. Mr. Speaker, the only thing I can say is that we have nothing scheduled.

If the sine die resolution does not pass, a motion would have to be made to adjourn. If the motion did not pass, we would merely sit here for the rest of the day, and what we would be doing I do not know.

Mr. WHITTEN. Mr. Speaker, let me say that I voted to adjourn sine die, so it is not a question for myself.

Mr. O'NEILL. The answer is that there is no schedule.

Mr. McKINNEY. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. Mr. Speaker, I yield to the gentleman from Connecticut.

Mr. McKINNEY. Mr. Speaker, I would like to associate myself with the remarks of the gentleman from Oregon (Mr. ULLMAN).

Mr. Speaker, I suggest that the reason why the membership remains seated here today is basically because of one man in the Senate of the United States, and that particular man happens to be the man in charge of this type of legislation, so I think we should keep that in mind.

Mr. DRINAN. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. Mr. Speaker, I yield to the gentleman from Massachusetts.

Mr. DRINAN. Mr. Speaker, I would like to ask the acting chairman of the Ways and Means Committee a question. I would like to ask whether or not Mr. Nixon's proposed windfall profits proposal substantially differs from what the House enacted. He said that it applies only on crude oil prices, not on profits in the refining and marketing phases of the oil business.

Secondly, it is not retroactive, and whatever is being proposed by the administration is substantially contrary to what this House voted and revoted.

Mr. ULLMAN. Mr. Speaker, will the gentleman yield for a reply?

Mr. O'NEILL. Mr. Speaker, I yield to the gentleman from Oregon.

Mr. ULLMAN. Mr. Speaker, the Members heard me say that this was not the full scope of our proposal. The gentleman from Ohio heard me say that. The Ways and Means Committee is going to look beyond this proposal and excess profits tax per se, but this is an excellent start.

It would go back and pick up the price of oil on the barrel 6 months or so ago and impose an 85 percent tax above that.

Some say that it is going to be passed to the marketplace—it is already passed to the marketplace, and the idea is to pick it up from the oil companies.

It is not a whole answer. We are going to look at excess profits, also, probably, but in as much of this package as we can. But this is a beginning of responsible initial approach to the problem.

Mr. CARTER. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. Mr. Speaker, I yield to the gentleman from Kentucky.

Mr. CARTER. Mr. Speaker, I want to say that for the past 9 years, this has been one of the most difficult years I have served in this House. We have worked hard throughout the years. The Members know that. It is true that we have had some vacation time, but we have made up for it by working long hours at night.

I have noticed over the years that during the waning days of any session more poor legislation comes to the floor of this House, and sometimes we pass it.

Last night perhaps part of this legislation was good and should have been passed. I regret that some of it was not. But during the closing days of the session is no time to consider serious legislation.

The House is weary, and I believe the majority of us want to go home.

Mr. Speaker, I would suggest that we go home for Christmas and see our constituents, and we can come back here to pass a good energy bill.

Mr. BURKE of Massachusetts. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Massachusetts.

Mr. BURKE of Massachusetts. Mr. Speaker, 1 week ago I supported the sine die resolution calling for a recess until January 21, 1974. At that time it was expected that the social security bill and the energy legislation would be passed. The social security legislation passed both branches by a substantial vote and was sent to the White House. However, the energy bill has become stalled in between branches of the House and the Senate and I do not feel that this Congress should go home until an energy bill is passed.

Mr. GONZALEZ. Mr. Speaker, will the gentleman yield?

Mr. O'NEILL. I yield to the gentleman from Texas.

Mr. GONZALEZ. Mr. Speaker, I rise to ask a question of the majority leader.

Is the majority leader saying that in the event we accept this sine die resolution, the President could not call us back before January 21?

Mr. O'NEILL. No, the President has the right to call us back at any time. So does the majority leader and the minority leader, and so does the Speaker, and if an emergency should arise, I am sure we would be called back.

PROVIDING FOR ADJOURNMENT SINE DIE ON SATURDAY, DECEMBER 22, 1973

Mr. O'NEILL. Mr. Speaker, I call up a privileged concurrent resolution (H. Con. Res. 412) and ask for its immediate consideration.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 412

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn on Saturday, December 22, 1973, they shall stand adjourned sine die.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

A FATHER'S LETTER TO HIS SON

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, Glen Johnson is now the distinguished director of the choir of the First United Methodist Church of Coral Gables, Fla., of which my wife is a member. Dr. Johnson has meant much to the choir and to the church by his able and dedicated direction. He is a man of great warmth of heart, great imagination, and great dynamism. Dr. Johnson is much beloved not only by the choir but by the entire church.

On February 5, 1969, Dr. Johnson lost his son, Gary M. Johnson, Sp4c., 45th Medical Company, who was killed in action in Vietnam. Dr. Johnson wrote a letter to his son which is a beautiful and moving instrument conveying all of the love and admiration a parent can have for his son and reveals the warm and close relationship Dr. Johnson enjoyed with his noble son. At this season of the year when sacrifice and spiritual beauty are so much in our minds and hearts it seems to me very fitting that Dr. Johnson's letter entitled "A Father's Letter to His Son," which appeared in the Choral Journal of November–December 1969, appear in the Record following my remarks. Gary M. Johnson was by General Orders No. 790, Department of the Army Headquarters, U.S. Army Vietnam, of March 5, 1969, awarded the Silver Star posthumously for gallantry in action. I ask also that the order of the Department of the Army in Vietnam awarding Gary M. Johnson the Silver Star be carried in full following my remarks and the letter of Dr. Glen Johnson.

A Father's Letter to His Son

GLEN JOHNSON

Glen Johnson is Minister of Music in the nation's sixth largest Methodist Church, the Lovers Lane United Methodist Church in Dallas. He feels that the task of the Church Music Director is not a matter of simply "supplying music" for the Sunday worship service. Dr. Johnson is strongly committed to the belief that through music the Church should be involved in the whole community and its needs; that through the powerful voice of music the message of the Church can most effectively be brought to the people.

Glen Johnson's son, Gary, was an active and devout churchman, a fine musician, who had planned to follow in his father's footsteps in service to the Church he loved.

The article published here is in the form of a letter to this son.

Gary M. Johnson, SP/4, 45th Medical Company, was killed in action February 5, 1969, on active duty in Viet Nam.—Claude Zetty, Chairman, National Committee, Music in the Church.

Music is the prophet's Art;
Among the gifts that God hath sent,
One of the most magnificient.

—Longfellow.

Dear Son: So you wanted to be a church musician—in the face of all we had talked about with reference to the problems of renewal which confront the Church. However, you convinced me that "it was for real"—this call you had—to be the best possible under God, looking to Him whose life was your only real inspiration.

When you gave up your serious music study in your early teens, I thought surely you would choose a different role of servanthood. However, I noticed that you became involved in every musical group possible and that the Church seemed to speak "loud and clear" to you in times of deepest loneliness and highest joy. It was during your college years and your experiences in small churches that I realized the completeness of your commitment.

In our talks I tried to warn you of the struggle which confronted the Church and tried to point out the concern I had for the young church musician who moved into the Church full time before getting the necessary years of "music making" out of his system. The church musician must always put people first. He must never use people. Rather, he should be motivated by such a sense of service that he is used by people.

We used to talk about music as a real part of the "blood and guts" of the Church, Son, because it sings the message of the Church in so many different places, to so many people, in so many different ways. Music therapy to the aged, the mentally ill, the imprisoned, the passerby, the down-and-outer, the up-and-outer, the racist with his hate-sick mind, the child with his loving, searching spirit—all became a concern of yours. In our worship experience you seemed to be impressed with the need to give congregations new experiences in music and sound as often as possible. We seemed to agree that there is no room for "tired" singing or playing. Believing that people really want to learn and be challenged by the new, we hoped to make each new service a challenge to creative expression.

We never quibbled about great music and simple music because we both agreed that people are different and they appreciate different kinds of music and that they could be led to new heights of aesthetic experiences, not through criticism, but by earnest desire to meet the needs of that particular service message or the program's emphasis. Some such services or programs called for only great music; others called for the simplest folk-song approach; and sometimes both were interwoven for the sake of contrast. In all, however, we both agreed that the instrument, whether large choral, instrumental, or small vocal or instrumental, had to be ready for the experience, if it were really to "come off." The fun you seemed to have trying to involve the youth or children in really "making it happen" will always be remembered.

In your last services in Viet Nam your friends have told me that you included many folk songs in your services. All of a sudden it seems that everyone is writing folk songs and many of them are very good. The message content is nearly always helpful. The youth deserve our warmest encouragement at this point. It isn't the exacting discipline of an a capella anthem, but the folk song involvement with church concerns is so real that none can doubt or feel hesitant at their inclusion into a worship service. The possibilities of music as a ministry to the whole person and to the total community drew from you some of your deepest and most enthusiastic responses.

I would like to have had you with me at my music-for-the-jail experience today, I had written that this was now an extended renewal venture, taking many hours a week. The jail population now ranges between 1300 and 1600 inmates. The Chaplain and I move first to the women's chapel, where we sing for an hour with the help of a piano. Then we move to the tanks where there are from 30 to 50 men. There we sing without accompaniment (not even a guitar) folk songs of religious content such as "Lord of the Dance," "They'll Know We Are Christians by "Our Love;;' Broadway tunes such as, "Climb Every Mountain," "You'll Never Walk Alone;" spirituals; western ballads; patriotic songs; and close with Malotte's "Lord's Prayer," in which we intersperse verse or prose of original impromptu response. Someday soon I hope we'll be permitted to take a couple of instrumentalists with us behind those heavy clanging doors. In the jail, as in other places, one can no longer assume that the ways of the Church and its people are known. The inmates would not know any of the hymns. Ten to fifteen years ago they probably would have known most of the church's hymns (particularly of the personal gospel song variety). (That reminds me of the time that I asked a tympanist to play a special service, and, having checked about whether that was all I wanted before the service, he finished his playing in the service, picked up his tympani over his head, and walked out, in front of a thousand people! Afterwards, I found that I was wrong in assuming that he knew about services. He had never been to church, (and he was at least thirty years of age.) How far we will be able to take these imprisoned men will depend in part on politicians' and clergy's cooperation.

Another total community involvement of music was the occasions when you used to go with one of the choirs each month to our State Mental Hospital, leaving immediately after church. We will start this area of music therapy again in September with the cooperation of the Red Cross Chapter. We expect to use mainly folk songs because the mental hospital patient is growing more youthful in years. But, of course, there will be those elderly people who are also a part of our weekly extended ministries who are best ministered to with old personal gospel songs of the camp meeting variety. You remember my telling you what part rhythm and familiarity play in the response of these wonderful leaders of yesteryear. In one filthy Rest Home, 9 out of 13 women had sung an aggregate of over 175 years in church choirs. These are so often the forgotten people of a community.

Some of the greatest times we used to have together were when you were a part of our witness experiences of the Starlighters (Senior High Choir) to the State Juvenile Homes for boys (numbering 1800 plus) and girls (numbering 500 plus), with the use of every type of music at first, gradually moving to the hymns, spirituals, and other sacred songs. These trips took some of our most difficult preparation and have been some of our most lasting remembrances.

The work of the Church today is the most challenging that it has ever been because the lines of conflict and response are so sharply drawn. Even though you seemed so convinced of your calling to the Medic work in Viet Nam and gave all you had to it, I selfishly long for your suggestions in approaching so many of our contemporary Church problems, particularly in our attempts to reach the youth of our land. Our youth are full of conflicting values, and their responses nearly always are packed with realism in their eyes.

Do you remember the wonderful time we had when only six of us decided to carol at Christmas through the less-advantaged areas of the city as we had always done with larger groups—how we knocked on each door for a time, and how our six grew to nearly two hundred interracial carolers in the heart of a project center? It isn't easy to get young people to do this any more today, because of much understandable bitterness and distrust on every city street. The Church at this point could well remember the Cross. The scene of our dear Master turning to his disciples on the way to Jerusalem and asking, "Are you going to leave me, too?" is always before me today. Fun-loving young adults in towering apartments, sophisticated to the extent of changing the Christ of personal experience for a new morality which seems to give unmanageable license—businessmen and factory workers clamoring for things—educators, stumbling in—scientists and the search of what is safe and right to teach professional men living on their childhood's borrowed faith—all of these—and the stupefied young and old misfits—are clamoring for continued recognition, or for simple identity. The songs of today must sing to all of these. The ministry of music can find a way through all of these calloused, hurt, and closed minds. Experiences have been too numerous to discuss, Son, but I wanted you to know that you have helped point the way with your challenge to put music and its witness "Where the Action Is." In every such experience of a group witness in song, the Christ is always present and touching people with His healing balm, waiting for us before we come. The call for meaning is still real down every street, in every bar, coffee house, and high rise.

When one realizes how great was Christ's love for the city, all parts of it, he cannot but abhor how content we church musicians often are to make beautiful music for the select few who can understand, often feeling that our only responsibility is to produce it and let the people "Go hang," if they don't know what the "happening" is all about. The bus loads of youth from the various ethnic groups, the mental institutions, and scores of enthusistic youth and young adults marching and moving to new sounds and rhythms are shunned so that old standards and styles can still satisfy us. Shouldn't our prayer be, "Thank you, Lord, for the past, but help us to listen to Thy call to leave the stained-glass 'hang-ups,' and to use all of our talents, if necessary, to reach the least and lowest, whether on Park Avenue or the storefront church in the ghetto." The words of the following song must surely speak to the musician as well as the vast majority of our ministers and laity. (The acoustically dead but beautiful sanctuaries may be mentioned in passing as well as ill placed organs and choirs.)

Our Hang-Up on the Wall

(By Kent Schneider)

Christ in the city oh what a pity,
it's not where He should go
He doesn't belong there with the sin and the wrong there,
we'll keep Him on the stained glass window (where we can see him)
yes, let's keep Him on our stained glass window
Keep Christ out of slums away from those bums
The people will soil His gown
Let's all keep him spotless and among the good and rotless
and He'll never wear a frown
(He'll never need to 'cause) we've all got stars in our crown
He must have been a fine man, such a good and kind man,
just look at his flowing hair!
And that painting by Sallman makes Him such a tall man
as He hangs so high up in the air (above our heads)
Yes, his hang-up is in the air
Keep Christ out of life away from human strife
of racial riots the war and all
and while I come to think of it,
His skin's got a nice pink to it.
It's good to have him on our wall (He's on our side)
Yes, it's good to have Him on the wall.
Remember that He's King and never shall he swing.
with the lowly and forgotten herd
We are his people meeting in our steeple
to spend His "holy word" (among ourselves)
Yes, to spend his "holy word."
You who are singing, the solemn and non-swinging.
You who are painted on the pew
Christ died for the city, on us Lord have pity
for we have crucified you (upon the walls)
To us Lord please break through.

Renewal of the Church, as we always said, must come from renewed Christians who care enough to give all they have to the work in and out of the Church, working side by side with the Christ who seems always to supersede every experience when it serves God and man and is done in His spirit.

The loneliness without you, Son, is so very deep; but so much of you is expressed in every song that I can feel the tug of your heart pushing me on to greater ventures in the work of our precious Lord.

I love you, Son.

Dad.

[Department of the Army Headquarters, United States Army Vietnam, APO San Francisco 96375]

5 March 1969.

General Orders

Number 780—Award of the Silver Star

1. TC 320. The following AWARD is announced posthumously.

Johnson, Gary M. RA15808824 SSAN 455–72–2596 Specialist Four, United States Army, 45th Medical Company, 68th Medical Group, 44th Medical Brigade, APO 96384.

Awarded: Silver Star

Date action: 5 February 1969

Theater: Republic of Vietnam

Reason: For gallantry in action while engaged in military operations involving conflict with an armed hostile force in the Republic of Vietnam: Specialist Four Johnson distinguished himself by exceptionally valorous actions on 5 February, 1969.

ON IMPEACHMENT

(Mr. PEPPER asked and was given permission to extend his remarks at this point in the Record and to include extraneous matter.)

Mr. PEPPER. Mr. Speaker, the matter of impeachment is a very grave and important one for the Congress, the country, and the President. An able attorney of Miami, Hon. Raymond L. Wise, has written a very informative guest editorial on the subject of impeachment in the Miami Beach Times of November 29. I believe Mr. Wise's article would be of interest to the Members of Congress and, therefore, it appears in the Record immediately following my remarks.

On Impeachment

(By Raymond L. Wise)

Impeachment should be based on careful study and analysis of fact and law by the Judiciary Committee of the House of Representatives and not on rumor and suspicion. We should all withhold judgment until our Representatives in Congress act for us under our Constitution.

A president can be impeached by a vote of 51% of the members of the House of Representatives, present and voting. Impeachment, however, is only an accusation and not a finding of guilt. The trial of the resolution of impeachment is prosecuted before the U.S. Senate, sitting as a trial court. The Chief Justice of the Supreme Court presides. Two-thirds of the Senators present and voting are necessary to convict. After conviction, the president is removed from office.

It is so serious a step that, for nearly two hundred years, only one president, Andrew Johnson, was impeached. He was tried by the Senate and acquitted by one vote, in 1868.

There are two legal theories of what constitutes a ground for impeachment. One is the extremely broad view once taken by Gerald Ford, who may soon be Vice President. In 1970, while he was trying to obtain the impeachment of Mr. Justice William O. Douglas of the Supreme Court, Mr. Ford said an impeachable offense was "Whatever a majority of the House of Representatives consider it to be at a given moment in history." The narrower and sounder view is that, in the case of a president, it must be shown that he committed a serious crime which was an offense against the state, such as treason, bribery, or obstruction of justice or other crimes of that nature.

In view of the tremendous impact on the nation and on the whole world of the use of so drastic a remedy, impeachment should be based only on the ground of the commission of "high crimes and misdemeanors" as called for by the exact language of the Constitution, Article II, Sec. 4. A conviction of the commission of crime should avoid serious disagreement among the people. Few of the 46,000,000 who voted for Mr. Nixon would protest such a result if the trial were fair.

On the other hand, a trial based on hatred or other emotionalism, or on inference and insinuation, or on general dissatisfaction with the way Mr. Nixon is doing his job, or even on the fact that Mr. Nixon selected numerous corruptible men for appointment to high office, close to him, would unnecessarily divide the nation into warring camps.

Therefore, the resolution of impeachment should be founded only on acts by Mr. Nixon, which he himself has admitted committing and which may be violations of criminal law. In short, the facts should be undisputed and the law settled.

If there are any such situations, fairness to Mr. Nixon would require impeachment and trial so that he may be cleared or removed from office.

There is probable cause to believe that Mr. Nixon committed several acts which would warrant scrutiny by impeachment and trial and which fit the above requirements .

The first of these is the illegal discharge of the special prosecutor, Archibald Cox, under circumstances which appeared to be an attempt to disrupt, block or—hopefully—terminate the investigation into Watergate and the other matters being investigated. It is no answer to say an employer can fire an employee. He can do so, but if the result of the firing constitutes an obstruction of justice, the employer must take the consequences.

A second is the discussion, on instructions from Mr. Nixon, by John Ehrlichman with Judge Matthew Byrne, in April, of the possibility of the appointment of Judge Byrne as head of the F.B.I. The discussions took place while the judge was trying the criminal charges against Daniel Ellsberg. The intent to influence the judge in his conduct of the trial can reasonably be inferred from Mr. Nixon's actions in showing a desire to convict Ellsberg from the time the Pentagon papers were first released by Ellsberg in June, 1971, such as the speeches by Mr. Nixon characterizing Ellsberg as endangering national security, ordering illegal wiretaps of Ellsberg's phone and of that of his lawyers, ordering that the records of Dr. Fielding, Ellsberg's psychiatrist, be obtained, knowing they cannot be obtained legally without Ellsberg's consent, and withholding for substantial periods of time the knowledge which Mr. Nixon had of the burglary of Dr. Fielding's office and of the wiretaps when, as a matter of law, the information should have been immediately turned over to Judge Byrne.

A third is the ordering, in May, 1969, of illegal wiretaps of seventeen newspapermen and White House aids. Some of those wiretaps involved conversations with Ellsberg in 1969 and in 1970. The inability of the F.B.I. to produce copies of the conversations at the Ellsberg trial was one of the grounds on which Judge Byrne dismissed the Ellsberg case in May.

A fourth is the ordering by Mr. Nixon of the formation of the "Plumbers", in July, 1971, shortly after Ellsberg released the Pentagon papers. In effect, Mr. Nixon was ordering the White House to set up its own illegal surveillance operation, bypassing the F.B.I.

A fifth is a ten-day obstruction of justice. After Dr. Fielding's office was burglarized, Assistant Attorney General Petersen, on April 16, 1973, informed Mr. Nixon of the burglary and told him that the information must be immediately reported to Judge Byrne, as the Ellsberg trial was in progress. However, Mr. Nixon refused to permit the information to be given to Judge Byrne until April 26, ten days later. Partly on the basis of the burglary, Judge Byrne, on May 11, dismissed the Ellsberg case.

The above five apparent grounds for impeachment are based on facts which are admitted by Mr. Nixon either in his speech of May 22, or in his October press conference, held at San Clemente, or in his statements after the discharge of Archibald Cox.

I have carefully avoided matters which are in dispute as to Mr. Nixon's role in them, such as Watergate and its cover-up; the I.T.T. anti-trust case; the milk price increase; the construction at San Clemente and at Key Biscayne; "the White House Horrors" described by John Mitchell before the Ervin Committee; the $571,000 tax deduction taken by Mr. Nixon for the donation of certain of his papers; the two-time choice of Agnew for Vice-President; the hiring of many in high places who are now charged with crime or being investigated; misuse and improper solicitation of campaign funds from Vesco, oil men and big industry generally; use of vast sums of such cash for questionable purposes; impounding funds voted by Congress; bombing Cambodia and concealing the fact of the bombing; "inoperative statements"; i.e. misinformation frequently given to the public; perversion of the proper use of the F.B.I. and the C.I.A.; the formation of the illegal interagency committee on July 23, 1970, and its rescission on July 28, 1970; the many assaults on civil liberties, including mass arrests without warrants; the use of an "enemies list"; recording conversations without notice to those whose words were recorded; the missing tapes; the Hughes contribution of $100,000; favors alleged to have been received by personal friends of Mr. Nixon; destruction of evidence by shredding and in other ways; the forged Diem cables; allegations of political prosecutions; accusations that the administration and Mr. Nixon himself have a tendency to act above the law; and that more than $1,000,000 was received in the 1972 campaign from men and women subsequently made ambassadors or ministers

As to a great many of those matters there is no credible evidence of the implication or even knowledge of Mr. Nixon personally. As to others, there are doubtful questions of law. As to still others, the motives are not clearly illegal. The use of many of them would warrant a justifiable cry that Mr. Nixon was being persecuted, not prosecuted.

And, finally, above all, Mr. Nixon should not be impeached just because, over 2800 years ago, Homer wrote:

> "For I hold that man hateful as the gates of Hell who says one thing, while another in his heart lies hidden well."

Impeachment should be made of sterner stuff!

IF RATIONING IS INEVITABLE THERE MUST BE SOME LOCAL VOICE

(Mr. RANDALL asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RANDALL. Mr. Speaker, I do not feel quite so lonely today in the position I have taken concerning State and local authority to fairly allocate petroleum products in short supply. I am informed that Maryland's Governor Marvin Mandel, is today meeting with the energy czars to protest the time-consuming and counterproductive procedures by the bureaucrats in Washington wherein they insist upon reviewing and reversing State plans for dealing with the energy crisis.

It has been my position that State and local authorities are far better equipped to equitably treat with the fuel crisis on the basis of their knowledge of local conditions and the special needs that must be satisfied at the local level.

State and local voice over the parceling out of available supplies with some strong machinery for review in Washington, D.C., I submit, is necessary if we are to have a fair distribution of supplies and an equal shouldering of the burdens of shortages. If the evil of rationing should inevitably come, State and local voice will then be all the more necessary. I am gratified to find that the Governor of the great State of Maryland agrees with my position I advanced when we debated the energy bill on the floor of the House.

PERSONAL EXPLANATION

Mr. CHAPPELL. Mr. Speaker, when the vote was taken today on the motion to adjourn, I was not present. Had I been present I would have voted "nay."

PERSONAL EXPLANATION

Mr. McKAY. Mr. Speaker, I wish to state that I came in the Chamber this morning just after the quorum was established.

I request that the record so note.

PERSONAL EXPLANATION

Mr. TIERNAN. Mr. Speaker, on Thursday, December 20, 1973, when the House considered the Northeast Railroad Emergency Act, it has been brought to my attention that according to the record of that vote, I am not recorded as having voted. I was present in the Chamber and voted in favor of the bill, and I would like my explanation to appear in the record.

THE CONSUMER AND WORKING PEOPLE ARE FORGOTTEN: WILL THE MEEK INHERIT THE DEARTH?

(Mr. HECHLER of West Virginia asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. HECHLER of West Virginia. Mr. Speaker, the people of this Nation won a great victory last night over the unholy alliance of the oil corporations and the Nixon administration. This Capitol has been crawling with lobbyists from big oil, as their agents tried to place the Christmas filibuster gun to our heads and force the House of Representatives to accept this oily mess. Loud and clear rang out the answer: the people still rule.

But the battle is far from over, Mr. Speaker. Federal Energy Administrator William Simon, the alumnus of the Wall Street investment banking industry, the same Mr. Simon who intervened and tried to get the Federal Trade Commission to stop its antitrust complaints against the eight major oil corporations last July, has shown by his actions and statements that he preaches and practices the gospel according to Marcus Alonzo Hanna.

> Under the Simon voluntary rationing approach, the strong, the bold and the shrewd will get the gasoline—and the meek shall inherit the dearth.

That's the way Economist Walter Heller accurately states it.

Yesterday, the octopan tentacles of the oil corporations started to encircle the Capitol Dome itself through their agents on Capitol Hill. It is high time, Mr. Speaker, that we start giving top priority in this energy crisis to the millions of consumers and working men and women who are being shoved to the bottom of the totem pole while Mr. Simon and the lobbyists are emphasizing profits, incentives and protection of the big corporations.

Instead of abdicating our responsibility by turning all this power over to Mr. Simon, the Congress ought to mandate rationing, and insure that fair allocations of gasoline and heating fuel at fair prices be made to the working people and consumers of this Nation.

LEAVE OF ABSENCE

By unanimous consent leave of absence was granted to:

Mr. Eshleman (at the request of Mr. Rhodes), for today, on account of illness.

Mr. Charles H. Wilson of California (at the request of Mr. O'Neill), for today, on account of illness in family.

Mr. Corman, for today, on account of official business.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. Mezvinsky) and to revise and extend their remarks and include extraneous matter:)

Mr. Gonzalez, for 5 minutes, today.

Mr. Burke of Massachusetts, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. Blatnik in two instances and to include extraneous matter.

(The following Members (at the request of Mr. Thone) and to revise and extend their remarks:)

Mr. Symms.

Mr. Whalen.

(The following Members (at the request of Mr. Mezvinsky) and to include extraneous matter:)

Mr. Gonzalez in three instances.

Mr. Rarick in three instances.

Mr. Donohue in two instances.

Mr. Studds in three instances.

ENROLLED BILLS SIGNED

Mr. HAYS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled bills of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1920. An act to designate the portion of the project for flood control protection on Chartiers Creek that is within Allegheny County, Pennsylvania, as the "James G. Fulton Flood Protection Project";

H.R. 3733. An act to authorize the American Battle Monuments Commission to assume control of overseas war memorials erected by private persons and non-Federal and foreign agencies and to demolish such war memorials in certain instances.

H.R. 9142. An act to authorize and direct the maintenance of adequate and efficient rail services in the Midwest and Northeast region of the United States, and for other purposes;

H.R. 10511. An act to amend the Urban

Mass Transportation Act of 1964 to permit financial assistance to be furnished under that Act for the acquisition of certain equipment which may be used for charter service in a manner which does not foreclose private operators from furnishing such service, and for other purposes;

H.R. 11333. An act to provide a 7-percent increase in social security benefits beginning with March 1974 and an additional 4-percent increase beginning with June 1974 to provide increases in supplemental security income benefits, and for other purposes;

H.R. 11372. An act to conserve energy on the Nation's highways; and

H.R. 11576. An act making supplemental appropriations for the fiscal year ending June 30, 1974, and for other purposes.

RECESS

The SPEAKER. Under the previous order of the House, the Chair declares the House in recess, subject to the call of the Chair.

The bells will be rung 15 minutes before the House is to return in session.

Accordingly (at 1 o'clock and 6 minutes p.m.) the House stood in recess subject to the call of the Chair.

AFTER RECESS

The recess having expired, the House was called to order by the Speaker at 2 o'clock p.m.

FURTHER MESSAGE FROM THE SENATE

A further message from the Senate by Mr. Arrington, one of its clerks, announced that the Senate had passed a concurrent resolution of the House (H. Con. Res. 412) entitled "Concurrent resolution providing for the sine die adjournment of the 1st session of the 93d Congress," with amendments in which concurrence is requested.

PROVIDING FOR THE SINE DIE ADJOURNMENT OF THE 1ST SESSION OF THE 93D CONGRESS

The SPEAKER. The Clerk will report the concurrent resolution (H. Con. Res. 412) providing for the sine die adjournment of the 1st session of the 93rd Congress, with a Senate amendment thereto, and report the Senate amendment.

The Clerk read the title of the concurrent resolution.

The Clerk read the Senate amendment as follows:

Page 1, line 4, strike out "die." and insert "die or until 12:00 noon on the second day after their respective Members are notified to reassemble in accordance with section 2 of this resolution, whichever event first occurs.".

SEC. 2. The Speaker of the House of Representatives and the President pro tempore of the Senate shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it, or whenever the majority leader of the Senate and the majority leader of the House, acting jointly, or the minority leader of the Senate and the minority leader of the House, acting jointly, file a written request with the Secretary of the Senate and the Clerk of the House that the Congress reassemble for the consideration of legislation.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

SINE DIE ADJOURNMENT

Mr. O'NEILL. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to.

The SPEAKER. In accordance with the provisions of House Concurrent Resolution 412, the Chair declares the 1st session of the 93d Congress adjourned sine die.

Thereupon (at 2 o'clock and 2 minutes p.m.), pursuant to House Concurrent Resolution 412, the House adjourned sine die.

BILLS AND JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. HAYS, from the Committee on House Administration, reported that that committee did on December 22, 1973, present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H.R. 1316. An act for the relief of Claude V. Alcorn and 21 others.

H.R. 1920. An act to designate the portion of the project for flood control protection on Chartiers Creek that is within Allegheny County, Pa., as the "James G. Fulton flood protection project."

H.R. 2303. An act to continue mandatory price support for tung nuts only through the 1976 crop;

H.R. 3733. An act to authorize the American Battle Monuments Commission to assume control of overseas war memorials erected by private persons and non-Federal and foreign agencies and to demolish such war memorials in certain instances;

H.R. 4738. An act to provide for the striking of medals in commemoration of the 100th anniversary of the statehood of Colorado.

H.R. 5760. An act to provide for the striking of medals commemorating the International Exposition on Environment at Spokane, Wash., in 1974.

H.R. 6758. An act to amend chapter 53 of title 28 of the District of Columbia Code, relating to usury, and for other purposes;

H.R. 8449. An act to expand the national flood insurance program by substantially increasing limits of coverage and total amount of insurance authorized to be outstanding and by requiring known flood-prone communities to participate in the program, and for other purposes;

H.R. 8529. An act to implement the shrimp fishing agreement with Brazil, and for other purposes;

H.R. 9142. An act to authorize and direct the maintenance of adequate and efficient rail services in the Midwest and Northeast region of the United States, and for other purposes;

H.R. 10511. An act to amend the Urban Mass Transportation Act of 1964 to permit financial assistance to be furnished under that act for the acquisition of certain equipment which may be used for charter service in a manner which does not foreclose private operators from furnishing such service, and for other purposes;

H.R. 10806. An act to amend the District of Columbia Minimum Wage Act so as to enable airline employees to exchange days at regular rates of compensation, and for other purposes.

H.R. 11088. An act to provide emergency security assistance authorizations for Israel and Cambodia;

H.R. 11238. An act to amend the act of March 16, 1926 (relating to the Board of Public Welfare in the District of Columbia), to provide for an improved system of adoption of children in the District of Columbia, and for other purposes;

H.R. 11333. An act to provide a 7-percent increase in social security benefits beginning with March 1974 and an additional 4-percent increase beginning with June 1974, to provide increases in supplemental security income benefits, and for other purposes;

H.R. 11372. An act to conserve energy on the Nation's highways;

H.R. 11576. An act making supplemental appropriations for the fiscal year ending June 30, 1974, and for other purposes;

H.R. 11771. An act making appropriations for Foreign Assistance and related programs for the fiscal year ending June 30, 1974, and for other purposes; and

H.J. Res. 858. A joint resolution, to provide for the establishment of the Lyndon Baines Johnson Memorial Grove on the Potomac.

BILLS AND JOINT RESOLUTIONS APPROVED AFTER SINE DIE ADJOURNMENT

The President, subsequent to the sine die adjournment of the Congress, notified the Clerk of the House that on the following dates he had approved and signed bills and joint resolutions of the House of the following titles:

On December 20, 1973:

H.R. 5089. An act to determine the rights and interests of the Choctaw Nation, the Chickasaw Nation, and the Cherokee Nation in and to the bed of the Arkansas River below the Canadian Fork and to the eastern boundary of Oklahoma; and

H.R. 11459. An act making appropriations for military construction for the Department of Defense for the fiscal year ending June 30, 1974, and for other purposes.

On December 22, 1973:

H.R. 10717. An act to repeal the Act terminating Federal supervision over the property and members of the Menominee Indian Tribe of Wisconsin; to reinstitute the Menominee Indian Tribe of Wisconsin as a federally recognized sovereign Indian tribe; and to restore to the Menominee Tribe of Wisconsin those Federal services furnished to American Indians because of their status as American Indians; and for other purposes.

On December 26, 1973:

H.R. 11088. An act to provide emergency security assistance authorizations for Israel and Cambodia.

On December 27, 1973:

H.R. 3490. An act to amend section 40b of the Bankruptcy Act (11 U.S.C. 68(b)) to remove the restriction on change of salary of full-time referees.

On December 28, 1973:

H.J. Res. 853. Joint resolution to provide for the establishment of the Lyndon Baines Johnson Memorial Grove on the Potomac;

H.R. 655. An act to provide for the naming of the lake to be created by the Buchanan Dam, Chowchilla River, Calif.;

H.R. 3334. An act for the relief of Maria Lourdes Rios;

H.R. 3758. An act for the relief of Isabel Eugenia Serrane Macias Ferrier;

H.R. 7352. An act to amend section 4082(c) of title 18, United States Code, to extend the limits of confinement of Federal prisoners; and

H.R. 11441. An act to postpone the implementation of the Headstart fee schedule.

On December 29, 1973:

H.J. Res. 736. Joint resolution to provide for a feasibility study and to accept a gift from the United States Capitol Historical Society;

H.J. Res. 865. Joint resolution authorizing the President to proclaim March 29, 1974, as "Vietnam Veterans Day";

H.R. 1316. An act for the relief of Claude V. Alcorn and 21 others;

H.R. 1920. An act to designate the portion of the project for flood control protection on Chartiers Creek that is within Allegheny County, Pa., as the "James G. Fulton Flood Protection Project";

H.R. 2303. An act to continue mandatory price support for tung nuts only through the 1976 crop;

H.R. 4738. An act to provide for the striking of medals in commemoration of the 100th anniversary of the statehood of Colorado;

H.R. 5760. An act to provide for the striking of medals commemorating the International Exposition on Environment at Spokane, Wash., in 1974;

H.R. 5874. An act to establish a Federal Financing Bank, to provide for coordinated and more efficient financing of Federal and federally assisted borrowings from the public, and for other purposes;

H.R. 6758. An act to amend chapter 33 of title 28 of the District of Columbia Code relating to usury, and for other purposes; and

H.R. 10806. An act to amend the District of Columbia Minimum Wage Act so as to enable airline employees to exchange days at regular rates of compensation, and for other purposes.

On December 31, 1973:

H.R. 8449. An act to expand the national flood insurance program by substantially increasing limits of coverage and total amount of insurance authorized to be outstanding and by requiring known flood-prone communities to participate in the program, and for other purposes; and

H.R. 11333. An act to provide a 7-percent increase in social security benefits beginning with March 1974 and an additional 4-percent increase beginning with June 1974, to provide increases in supplemental security income benefits, and for other purposes.

On January 2, 1974:

H.R. 3733. An act to authorize the American Battle Monuments Commission to assume control of overseas war memorials erected by private persons and non-Federal and foreign agencies and to demolish such was memorials in certain instances;

H.R. 8529. An act to implement the shrimp fishing agreement with Brazil, and for other purposes;

H.R. 9142. An act to authorize and direct the maintenance of adequate and efficient rail services in the Midwest and Northeast region of the United States, and for other purposes;

H.R. 11238. An act to amend the act of March 16, 1926 (relating to the Board of Public Welfare in the District of Columbia), to provide for an improved system of adoption of children in the District of Columbia, and for other purposes;

H.R. 11372. An act to conserve energy on the Nation's highways;

H.R. 11575. An act making appropriations for the Department of Defense for the fiscal year ending June 30, 1974, and for other purposes; and

H.R. 11771. An act making appropriations for foreign assistance and related programs for the fiscal year ending June 30, 1974, and for other purposes.

On January 3, 1974:

H.R. 11576. An act making supplemental appropriations for the fiscal year ending June 30, 1974, and for other purposes.

HOUSE BILL DISAPPROVED AFTER SINE DIE ADJOURNMENT—URBAN MASS TRANSPORTATION ACT

The President announced his disapproval of the following bill with a memorandum of disapproval as follows:

I regret that I cannot approve H.R. 10511, a bill to amend the Urban Mass Transportation Act of 1964. Unfortunately, this bill has evolved so as to become an anti-transit measure.

In its favor is the fact that H.R. 10511 would facilitate the use of Urban Mass Transportation monies for the purchase of buses by allowing such equipment to be used for charter services. Unfortunately, however, the bill would leave in effect the prohibition against using buses purchased with Federal-Aid Highway funds in charter activities. By creating different standards for the purchase of buses from the two programs, the bill would discourage the use of highway funds for mass transit purposes. It would thus undermine one of the central achievements of the Federal-Aid Highway Act of 1973, the provision giving greater flexibility to States and communities in meeting their transportation problems. This we cannot afford.

I strongly supported legislation which applied uniformly to both the Federal-Aid Highway program and the Urban Mass Transportation program. The Senate version of the bill provided flexibility, encouraging bus purchases from both of these funding sources. It is essential that our communities' mass transit companies can use their buses to produce badly needed charter revenues, and I will continue to press for this balanced flexibility.

As we face gasoline shortages and an increasing demand for public transportation, we should do all we can to afford local officials genuine flexibility to use Federal-Aid Highway funds to improve mass transit if they so desire. I am withholding my signature from H.R. 10511 because this legislation would work directly against that objective.

I urge the Congress to act early in the next session to relax the charter prohibition uniformly with respect to both the Federal-Aid Highway program and the Urban Mass Transportation program. If this action is taken promptly, our mass transit systems need not suffer any adverse consequences.

RICHARD NIXON.

THE WHITE HOUSE, *January 3, 1974.*

PUBLIC BILLS AND RESOLUTIONS

Under clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. STAGGERS:

H.R. 12150. A bill to amend the Public Health Service Act so as to expand the authority of the National Institute of Arthritis, Metabolism, and Digestive Diseases in order to advance a national attack on arthritis; to the Committee on Interstate and Foreign Commerce.

By Mr. GUNTER (for himself, Mr. LEHMAN, Mr. ROE, and Mr. MATSUNAGA):

H. Res. 762. Resolution creating a select committee to conduct an investigation and study of the role of the oil and gas industry in contributing to the current energy crisis; to the Committee on Rules.

SENATE—*Saturday, December 22, 1973*

The Senate met at 1 p.m. and was called to order by the Acting President pro tempore (Mr. METCALF).

PRAYER

The Chaplain, the Reverend Edward L. R. Elson, D.D., offered the following prayer:

Our Father God, who has illumined all history by the shining light of Bethlehem, we thank Thee for its message moving upon our human hearts, that makes us all children again, believing in the herald angels, singing with the watching shepherds, worshipping with the ancient kings.

For such a time as this may its message of "peace on earth, good will toward men" penetrate all hearts and guide all nations, that sin may be forgiven and suffering relieved by the worldwide reign of the Spirit incarnate in the Child of Bethlehem.

When our worship and festivities are over, send us all, like the shepherds and sages of old, back to the daily round different men and women to make different homes and different cities and different nations because we acknowledge the Lord of Life not on one day only but on all days. So let Thy light spread and Thy will be done, and the theme of the angels be the aim of all men.

Through Him who is born to be King of all life. Amen.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Hackney, one of its reading clerks, announced that the House had passed a bill (H.R. 7684) for the relief of Nicola Lomuscio, in which it requested the concurrence of the Senate.

The message also announced that the House had agreed to a concurrent resolution (H. Con. Res. 412) providing for the sine die adjournment of the 1st session of the 93d Congress, in which it requested the concurrence of the Senate.

ENROLLED BILLS SIGNED

The message further announced that the Speaker had affixed his signature to the following enrolled bills:

H.R. 1920. An act to designate the portion of the project for flood control protection on Chartiers Creek that is within Allegheny County, Pa., as the "James G. Fulton flood protection project";

H.R. 3733. An act to authorize the American Battle Monuments Commission to assume control of overseas war memorials erected by private persons and non-Federal and foreign agencies and to demolish such war memorials in certain instances;

H.R. 11333. An act to provide a 7-percent increase in social security benefits beginning with March 1974 and an additional 4-percent increase beginning with June 1974, to provide increases in supplemental security income benefits, and for other purposes; and

H.R. 11576. An act making supplemental appropriations for the fiscal year ending June 30, 1974, and for other purposes.

The enrolled bills were subsequently signed by the Acting President pro tempore (Mr. METCALF).

HOUSE BILL REFERRED

The bill (H.R. 7684) for the relief of Nichola Lomuscio, was read twice by its title and referred to the Committee on the Judiciary.

THE JOURNAL

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the reading of the Journal of the proceedings of Friday, December 21, 1973, be dispensed with.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

QUORUM CALL

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ADJOURNMENT TO WEDNESDAY, DECEMBER 26, 1973, AT 9 A.M.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that when the Senate adjourns today, it stand in adjournment until 9 a.m. on Wednesday next.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

QUORUM CALL

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the role.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

HOUSE CONCURRENT RESOLUTION 412—SINE DIE ADJOURNMENT

Mr. MANSFIELD. Mr. President, I understand that a resolution of adjournment is at the desk. I ask the Chair to lay it before the Senate.

The ACTING PRESIDENT pro tempore. The Chair lays before the Senate a message from the House of Representatives, which the clerk will state:

The legislative clerk read as follows:

H. CON. RES. 412

Resolved by the House of Representatives (the Senate concurring), That when the two Houses adjourn on Saturday, December 22, 1973, they shall stand adjourned sine die.

Mr. MANSFIELD. Mr. President, I wish to offer an amendment which will be in line with what the Senate has agreed to twice this year already.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The second assistant legislative clerk read as follows:

On page 1, line 4, strike the period and, insert the following:

"or until 12:00 noon on the second day after their respective Members are notified to reassemble in accordance with Section 2 of this resolution, whichever event first occurs.

SEC. 2. The Speaker of the House of Representatives and the President pro tempore of the Senate shall notify the Members of the House and the Senate, respectively, to reassemble whenever, in their opinion, the public interest shall warrant it, or whenever the majority leader of the Senate and the majority leader of the House, acting jointly, or the minority leader of the Senate and the minority leader of the House, acting jointly, file a written request with the Secretary of the Senate and the Clerk of the House that the Congress reassemble for the consideration of legislation.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The concurrent resolution (H. Con. Res. 412), as amended, was agreed to.

Mr. MANSFIELD. Mr. President, the reason for amending the resolution was that twice this year the Senate agreed to the principle it established. It was agreed to on a bipartisan basis among the leadership of the House and the Senate and, incidentally, one of those concurring while he was the Republican leader of the House, is the distinguished Vice President, Mr. GERALD R. FORD.

I want to express the appreciation of the joint leadership to the Senate for the third time this year affirming that principle which, I think, has a great deal of validity so far as this institution and Congress are concerned.

Mr. President, the Senate already has granted permission to adjourn until 9 a.m. on Wednesday next. For the information of the Senate, that would be a pro forma session—in and out. No business would be conducted.

It is the intention of the joint leadership, if agreement cannot be reached, to operate on that basis until noon, January 3, barring, of course, unforeseen circumstances, and on January 3, under the joint resolution passed unanimously by the House and Senate and signed by the President of the United States, the Senate will then stand in recess or adjournment, whichever way one wishes to define it, from noon on January 3, 1974, until noon January 21, 1974.

Mr. GRIFFIN. Mr. President, will the distinguished majority leader yield?

Mr. MANSFIELD. I yield.

Mr. GRIFFIN. I know the Senator means this, but I think to be perfectly clear, so far as the suggestion is concerned, if the House accepts the amendment we adopted we will not come in on Wednesday.

Mr. MANSFIELD. Of course. What the majority leader is endeavoring to do, as he tries at all times to do, is to take out a little insurance.

QUORUM CALL

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ADJOURNMENT AND THE ENERGY BILL

Mr. BAKER. Mr. President, it is now 1:40 in the afternoon on December 22. We are apparently unable, at this point at least, even to agree with the distinguished other body on the method and manner we will adjourn sine die and how we will resolve ourselves on the matter of the authority of the leadership of the respective Houses to reconvene the Congress.

We stand, of course, in the shadow of the possibility that the President of the United States may feel the necessity to reconvene the Congress.

I have no idea of what will happen in those respects. I am not sure when we will adjourn sine die, or if we will adjourn sine die, but I have these remarks to make in the spirit of conciliation and in the spirit of this holiday moment.

During this past week I heard strong words in the conference on the energy bill. I was privileged to be a conferee, as was the distinguished Senator from Montana, the Acting President pro tempore. There was hard bargaining. There was extended debate. There were late night sessions and cancellations of plans not only for adjournment, but also for travel arrangements, speaking engagements, and the like, all in recognition of the fact that we were dealing with a matter of the utmost importance.

I suppose that one of the underlying and never-stated questions of the conference was who would have the authority to direct our route through the rocks and shoals of the present energy crisis, how much power would be given to the President and how much power retained by the Congress, the veto right, and the resolution of disapproval that the Congress might retain.

Those were legitimate concerns. Congress must continue to exercise its constitutional powers and be a full participant in this matter. However, the matter of coequal branches of the Government was legitimate as well. Stated in the vernacular, someone has to be the boss.

Someone has to make the tough decisions and have authority to make them stick.

But the note of conciliation that I would like to utter in these final hours of this session of this Congress are that notwithstanding our disagreements, notwithstanding our unfortunate inability to arrive at a mutual understanding between the two bodies in the form of an energy bill, notwithstanding the long hours and tedious work that has apparently now been lost, at least for this session of this Congress, notwithstanding the frayed tempers of the conferees and Members alike, and no doubt as well of the executive department, notwithstanding those things, we have to keep in mind that we still do have a crisis and a problem.

We must confront this crisis and deal with the problem. Our recent inability to deal with it must not harden into polarization.

It is the country that is the hostage and not the Congress and not the White House.

So, when we come back, whether that is tomorrow or next week or the 3d of January or the 21st of January, I hope that both bodies will put aside the emotions of the moment and dampen the fires and the controversies and once again get down to the business of the country.

It would be of small concern for the House to win or for the Senate to win or for the White House to win if people have to burn air in the fuel jets of their furnaces or their automobiles are stationary because they have no fuel. There will be little consolation for the country, or for those who are entrusted with making the policy decisions in this country. We still have an energy shortage. We cannot afford the luxury of winning or losing.

So many things were not done as a result of our failure to pass an energy bill. I was a conferee, not from the Committee on Interior and Insular Affairs, which had primary jurisdiction, but from the Public Works Committee which had jurisdiction over the extensive environmental provisions of this legislation.

I may say on the floor and in the presence of my distinguished chairman, the senior Senator from West Virginia (Mr. RANDOLPH), that I was very pleased at the progress we made concerning the necessity for a continuation of the fight for clean air and water. We did not throw out the baby with the bath water. We accommodated to the realities of the moment. We wrote, I believe, a realistic and practical section dealing with the automotive emissions that continues our forward momentum and progress in this field, and which will add certainly to the standards of the Clean Air Act. Industry will have an opportunity to fully realize the promise of the new techniques and new designs and to provide for improved fuel economy, as well.

I was impressed that the Clean Air Act provisions of the bill which were hammered out in what was, in effect, a subcommittee of the conference were representative of the environmental concerns of the Members of both the Senate and the House. When we brought our agreement on the environmental provisions to the whole conference, it was adopted almost immediately without extensive debate by the full conference.

In this spirit of conciliation, I must say that I do not want to see these sections go down the tube. We worked hard on them and made good progress.

I urge, and I fully expect, that when the next session of this Congress convenes and we pass an energy bill, that we will take into account those matters upon which we reach a satisfactory accommodation as well as those things that are still in hot dispute.

I hope that we can retain the clean air provisions—both the mobile source provisions and those dealing with revision of standards applicable to stationary power sources.

And as far as I am concerned, our temporary failure to succeed in this matter should in no way prevent our doing what needs to be done for the country early in the next session of the Congress. I believe there is a reservoir of good will that is far greater in scope than the reservoir of agony that brought us to this unfortunate situation.

I suppose that these are the last words I will have to say in this session of the Congress. I would like to take this opportunity to express my good wishes and my respect and admiration for all of those with whom I have served, to the distinguished chairman of the Public Works Committee and to the leadership on both sides of the aisle.

Mr. RANDOLPH. Mr. President, will the Senator yield?

Mr. BAKER. Mr. President, it is my great privilege to yield to the distinguished Senator from West Virginia.

Mr. RANDOLPH. Mr. President, I wish to reinforce what the Senator from Tennessee has said in reference to the conference subcommittee's work as we attempted to cope with providing for a continuance of the environmental standards directly attributable to the Clean Air Amendments of 1970. I speak not a pleasantry, but a fact, when I express my appreciation to the Senator from Tennessee (Mr. BAKER) and to the Senator from Maine (Mr. MUSKIE).

As chairman of the Public Works Committee I joined in our effort. We also were privileged to work with Representative PAUL ROGERS of Florida and Representative HASTINGS of New York. There were many hours of consultation toward achieving a clarification of the points involved. During this work there was an undergirding and an understanding among the conferees.

When we went to the conference with the Senate's recommendations, there was a general confidence among the other Members in what had been done.

I certainly agree with what the Senator who has said: we must not, indeed cannot, allow what has been done, from the standpoint of clean air and the quality of life to be tossed aside. The standards under which we have moved forward represent concerted work, over a period of years which was substantial and necessary. Now we are talking about a pause, not a retreat, but a realistic accommodation to the energy crisis. We were proposing to do this on one or more occasions, even prior to the conference action on the emergency energy legislation.

I further endorse what the Senator from Tennessee (Mr. BAKER) has said about the need for the passage of the energy legislation. When this occurs I hope it will incorporate a considerable amount of what was done by the Senate but did not pass the Congress. I said yesterday during the debate on the emergency energy legislation that some parts of that conference report should have been passed by Congress before this session was to conclude. I still believe as I did yesterday, but I also feel called on to say, while the leadership on both sides of the aisle is present in the Chamber, that we should, as quickly as possible, come to grips with this matter again in the next session. Next year we cannot allow this matter to remain unsettled, let us say, until the spring. We should move promptly on our commitment, even though we failed in this instance. The citizens of our country expect us to act more completely and fully than we were able to do in this first session.

It certainly would be my hope that by early February we would be able to act on emergency energy legislation. A delay beyond that date would be unwarranted.

When the Congress returns we must act with reason rather than rancor, if the essential solutions to our immediate energy crisis are to be forthcoming. Toward this objective the administration and the Congress must join forces and work together.

I recall the words of President Nixon in his November 2 message to the Congress when the Chief Executive said—

> As essential as these actions are to the solution of our immediate problem, we must recognize that standing alone, they are insufficient. Additional steps must be taken, and for that perhaps, we must have new legislation.
>
> I am therefore proposing that the Administration and the Congress join forces and together, in a bipartisan spirit, work to enact an emergency energy bill. Members of my Administration have been consulting with appropriate leaders of the Congress for more than two weeks on this matter. Yesterday I met with the bipartisan leaders of the House and Senate and found them constructive in spirit and eager to get on with the job. In the same manner, I pledge the full cooperation of my Administration. It is my earnest hope that by pushing forward together, we can have new emergency legislation on the books before the Congress recesses in December.
>
> Based on previous consultations with the Congress, I have decided not to send a specific Administration bill to the Congress on this matter but rather to work with the Members in developing a measure that would be acceptable to both the executive and legislative branches.

While this spirit of consultation was reflected during the Senate's hearings and markup on the legislation, it was noticeably absent when it came time for action on the conference report.

If early Senate action is to occur next year such consultations will be essential; this Senator pledges his cooperation with the administration. My remaining concern is that the White House respond in kind. I share hope for cooperation.

As a postscript, I must add, that we

cannot forget that there are several measures that have or will become law. The President, I am sure, will sign the 55-mile-an-hour mandatory limitation on the speed of our vehicles. This will provide a tremendous conservation of gasoline, possibly as high as 165,000 barrels a day. It will contribute not only to more pleasant driving, but also to a better safety record in the months ahead. This measure might otherwise be overlooked; however, it was passed by Congress this session. The Congress also has passed Alaska pipeline legislation, the Emergency Petroleum Allocation Act of 1973, and the administration opposed Eagleton amendment to the Economic Stabilization Act of 1973. These measures, which are the positive product of the Congress, have served as the cornerstone of present energy conservation actions proposed by the President.

But the record of the Senate does not stop there; among the various measures which also have passed the Senate in recent months are the Energy Research and Development Policy Act, the National Energy Conservation Act, legislation providing a statutory basis for the Federal Energy Administration. Each of the measures represents an element of a national energy policy, which our country so vitally needs. Yet, none of the measures would be close to enactment without congressional initiative.

Mr. President, again, I commend my colleague from Tennessee (Mr. BAKER) who, as I determined long ago, is not in any sense politically partisan. Throughout our associations on environmental and energy legislation, he is one who has worked with those of my party in the interests of the Nation as a whole, and for the well-being of the American people.

It is appropriate and timely also, Mr. President, that we recognize the leadership of the Senate—majority and minority. These Senators who hold elective positions within the Congress' structure have worked together and cooperated with all Senators in an effective manner. Their efforts have been dedicated toward the enactment of legislation which will benefit all citizens. I know that their record of service will continue in the second session of this 93d Congress as we strive to enact much needed energy measures and other proposals.

Senators MIKE MANSFIELD and ROBERT C. BYRD, with Senators HUGH SCOTT and ROBERT GRIFFIN, have the appreciation and trust of their colleagues.

Mr. BAKER. Mr. President, I thank the distinguished chairman for his remarks and for his appropriate observations on the accomplishments of the Public Works Committtee. It is a great privilege to serve, as the ranking Republican of the committee, with the distinguished Senator from West Virginia.

I am pleased to follow in the great tradition of bipartisan cooperation in that committee, which dates back to 1967 when I first came to the Senate, and the distinguished Senator from Kentucky, John Sherman Cooper, was the ranking Republican. I was impressed then, and I have continued to be impressed, by the bipartisan spirit in which that committee works.

Mr. President, I shall not prolong these last minutes, but shall merely say that I thoroughly agree with the observations of the distinguished chairman of the committee. I think that by taking the actions we have taken with regard to the environment provisions of this energy legislation we have put the country on notice that we intend to move in this field. We have disclosed through the conference report, which unfortunately we are not adopting, our work product.

Some of the uncertainty regarding clean air standards is dissipated, for surely both the country and industry, especially the automobile industry, understands the direction in which we are moving, and we shall continue to move in a direction which will benefit the entire country.

I reiterate that I hope we will lay our disappointment aside, and that when we return, we will pass this legislation, because not only the Senate, the House, and the President, but the whole country will be the loser if we do not.

Mr. LONG. Mr. President, I wish to express my supreme disappointment that the Senate and the House have not been able to come together in agreement on an energy bill.

Last night the distinguished majority leader expressed a wish that the Senator from Louisiana join with those who were conferring with Senators on the Republican side in the Vice President's ceremonial office, to help to work out a compromise. I think the RECORD might as well reflect at this point that I was pressing those who opposed the conference, to move toward a middle ground, as well as with those who were expressing themselves in favor of the conference report, and in supporting the chairman of the committee, the distinguished Senator from Washington (Mr. JACKSON), that both sides should make concessions.

I think that those who agreed with the administration, in general, and those who seriously objected to the conference report were willing to yield on all but about four of those points. The manager of the bill, the distinguished Senator from Washington (Mr. JACKSON) and his colleagues were willing to come to terms on a number of items, and there was some agreement that the others were willing to yield.

So the Senate did a very fine job of resolving those things in ways that men of honor could advance something which could promote the national interest.

I am an admirer of the chairman of the Committee on Interstate and Foreign Commerce, of the House of Representatives, Mr. STAGGERS. As one who admires him, I am very much disappointed that we were not able to come to terms with him. Unfortunately, it appears that his position was completely adamant on one item. We were never completely rigid about it, speaking for myself. We still are willing to consider it and try to reach a point where we can reconcile our differences.

Unfortunately, the press reports indicate that the chairman of the House Committee on Interstate and Foreign Commerce said that the Senate was trying to run over the House, to treat it as though it were a doormat. I hope the chairman of the House committee will read my remarks and learn that we did all that we could do to get the Senate to agree on something and were trying to get the House to agree. We tried to get the House to agree to a compromise, but it was impossible to do so.

So far as I can determine, in talking to my colleagues in the House, and so far as the record will reveal, there was no opportunity for Members of the House of Representatives to grasp all of the good will at Christmastide that went into the proposed Senate compromise. We regret very much—I am sure that I do—that very little of our good intentions were understood by those in the House of Representatives. In fact, I do not believe it was even suggested for a moment that we had men of good will on this side. We are still that way, and I hope that the spirit of the yuletide season will penetrate to the House of Representatives, as indeed it has in the Senate, and that between now and the first of the year those who have exercised tremendous power in the House will be in a more conciliatory mood.

I asked my friend, JOE WAGGONNER, who serves on the Ways and Means Committee, how it could possibly have been that the Commerce Committee in the House could ever have been accorded the power to pass a so-called excess profits tax law or a Renegotiation Act. The best information I could obtain is that it never occurred to anyone on the Ways and Means Committee of the House that the Rules Committee would grant such an extraordinary rule, that the committee, which did not have jurisdiction of tax or renegotiation measures, would be permitted to take such a matter to the floor without at least according those on the tax-writing committees the opportunity to share the floor and be heard.

Nevertheless, that is how it was. So the Commerce Committee became the tax committee on this, having drafted the first tax law that that committee had drafted in many years—perhaps the first time it has ever drafted a tax law. That committee has been totally unyielding on it. Apparently it was yielding to the point that they were willing to eliminate coal from their Renegotiation Act. I understand—and I will stand corrected if the record proves me wrong—that the chairman of the Commerce Committee, coming from a coal-producing State, did support the measure to eliminate coal from the Renegotiation Act which he would impose on oil.

That really does not get to the real problem. The problem is that one-third of our oil must be imported. We cannot except anyone to sell us world market oil at a price below the world market price. I know that the Commerce Committee of the House can do a fine job of regulating the activities that occur within the United States. I have never seen it proved that the Commerce Committees of Senate or House, or their joint efforts, can do very much about regulating foreign countries. I will await with interest to see it demonstrated if they can regulate Nigeria, Venezuela, Iraq, Iran, or Saudi Arabia. If they want to try it, I am willing to give them my support and my help, provided they will not exert their efforts to regulate foreign nations on a measure as vital as the energy bill which must become law.

That is basically what much of the problem is. We may have to pay a higher price for oil. We may have to pay a higher price for liquefied natural gas during the period of the blockade and the emergency in order to acquire what we can to keep Americans warm. It would be unfortunate if Americans, willing to pay any price to obtain fuel to heat their homes, to carry on their businesses, and to move around, found themselves in a situation where they cannot obtain fuel at any price.

I fear, Mr. President, that that may be what will develop between now and next spring, if the emergency becomes sufficiently acute.

I am convinced that Congress will measure up. Unfortunately, at this point, we do not have enough of an emergency on our hands for statesmanship to reach its zenith. However, I am fully convinced that when the emergency is sufficiently with us, Members of the Senate and our colleagues in the House will prove that they are equal to the task.

Some time ago I said that I really did not think the Senate has the power to destroy this country. I stated that facetiously. I really feel that way about Congress. I do not think Congress has the power to destroy a nation as great as this one—certainly not by neglect. One reason is that Members of the Senate and House react when the emergency becomes acute. We will, in my judgment, measure up to the problem that faces us.

As the chairman of the tax-writing committee, I expect to recommend to that committee and I have strong hope the committee will vote for a measure which does tax excess profits achieved during the energy crisis. But I would hope very much that whatever measure we will write will encourage people to produce more energy, and provide us with more fuel, and that it will be a measure that sees that the purpose should be to achieve more production, greater wealth for this country and, at the same time, to tax those who have some gains to which they are not rightfully entitled. If the details can be worked out, I believe that the Finance Committee and the Ways and Means Committee are capable of working it out.

I regret to say that the effort by the Commerce Committee thus far has fallen short of the target. For example, in their initial effort to write a renegotiation and an excess profits tax law, they set as their base a number of years which from the point of view of the domestic industry were depressed years. Obviously, an excess profits tax should be based on the excess over a fair profit, not the excess over a depressed year. Then, having failed to write language that would properly describe an excess profit, they sought to turn over to a single man, the so-called Administrator, the right to say what he thought the excess profit should be.

It has never been my experience that one man could write a tax law or a Renegotiation Act as well as the broader responsibility of a committee. I would hope that in the days ahead, as passions cool and as the yuletide season gains hold on Senators and Members of the House, the impasse in which we find ourselves will dissolve into the kind of good will which we wish every man and woman in the coming year.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Berry, one of its reading clerks, announced that the House had agreed to the amendment of the Senate to the resolution (H. Con. Res. 412) providing for the sine die adjournment of the first session of the 93d Congress.

VITIATION OF SENATE ACTION ON SENATE CONCURRENT RESOLUTION 62

Mr. MANSFIELD. Mr. President, I ask unanimous consent that Senate action on Senate Concurrent Resolution 62 be vitiated.

The ACTING PRESIDENT pro tempore. Is there objection. The Chair hears none, and it is so ordered.

VITIATION OF ACTION ON ADJOURNMENT RESOLUTIONS

Mr. MANSFIELD. Mr. President, if there are any other resolutions at the desk covering the same subject, advocated by the leadership, I ask unanimous consent that they be vitiated, also.

The ACTING PRESIDENT pro tempore. Without objection, action on all such resolutions, if any, will be vitiated.

ADJOURNMENT SINE DIE—MESSAGE FROM THE HOUSE

Mr. MANSFIELD. Mr. President, I ask the Chair to lay before the Senate a message from the House.

The ACTING PRESIDENT pro tempore laid before the Senate the following message from the House of Representatives:

> *Resolved*, That the House agree to the amendment of the Senate to the resolution (H. Con. Res. 412) entitled "concurrent resolution providing for the sine die adjournment of the first session of the Ninety-third Congress."

VITIATION OF ORDER FOR A PRO FORMA SESSION ON WEDNESDAY NEXT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order under which the Senate would come in on a pro forma basis on Wednesday next to be vitiated.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

QUORUM CALL

Mr. MANSFIELD. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

U.S. POLICY TOWARD THE PEOPLE'S REPUBLIC OF CHINA

Mr. MANSFIELD. Mr. President, when Secretary of State Kissinger was last in Peking, he went to considerable length to emphasize that the new U.S. policy with respect to the People's Republic of China was here to stay. As I recall, he stressed that whatever might be churned in our internal political mills, it would affect, in no way, the continuance of the détente with that nation.

The Secretary of State, of course, cannot speak for the next President of the United States anymore than a Member of the Senate can do so. Nevertheless, in my judgment, Mr. Kissinger was on eminently sound grounds in stressing the bipartisan nature of present U.S. policy. As a Democrat, I acknowledge readily that it was a Republican President and his assistant who took the first significant official step toward rapprochement with China after a protracted separation. Mr. Kissinger's laying of the groundwork was exemplary diplomacy and Mr. Nixon's visit to China was immensely effective summit contact. Both are to be commended for a wise and long overdue initiative. In retrospect, I cannot recall that any Democratic Member of the Senate was hostile to or in any way opposed this step which was taken in the closing period of the first Nixon administration. On the contrary, the President proceeded from a base of assured support in the Congress. Insofar as the Senate is concerned, individual Members had been suggesting for years prior to the official initiative that it was time for a change in China policy. Speaking for myself, the President knew that he could count on full support because, with his knowledge and collaboration, I had been trying for several years—beginning back in the Johnson administration—to open the doors to renewed contact with China.

So with that background and with the bipartisan congressional visits which have since taken place, the new China policy can be said to have put down deep bipartisan roots. I would note, for example, that during the first congressional visit to China, shortly after that of the President's, both the minority leader (Mr. Scott) and I endorsed fully the policy which Mr. Nixon had set. The same was true in the case of the visit of the assistant Republican leader (Mr. Griffin) and the subsequent House leadership, a visit which included, I might note, the participation of the distinguished President of the Senate, Vice President Ford, who would, of course, succeed to the Presidency in the event of a vacancy in that office during the next 3 years. I would note, too, that Vice President FORD has indicated that if by some chance he were to be called to the Presidency, he would retain the services of the present Secretary of State.

Beyond the next 3 years, Mr. President, we are dealing with the unknowns of domestic policies, not to speak of those of international politics. As I said, no one can speak for the next President of the United States. I would venture to suggest, however, that if the rapprochement continues to unfold as it has to date, it is inconceivable that any administration—Republican or Democratic—which takes office after the elections of 1976 would fail to stay with present China policy. Indeed, it may even be that the pace of reconciliation would be accelerated. Certainly, I cannot envision at this time an acceptable alternative to that policy and it is doubtful that the preponderance of the people of the Nation or the Congress would sustain any other.

So, again, let me say that I think that the President and his Secretary of State are on the right track with regard to China and both are to be commended for pursuing it. I am persuaded that the logic of the international situation and the realities of our political process are very likely to keep it going in the same direction under any successor President—Democrat or Republican. In my judgment, only unforeseen and extraordinary developments in Asia can deflect this Nation from that policy. In the long run, the rapprochement of the People's Republic of China and the United States is too full of constructive significance to both nations to be derailed by internal political adjustments in either nation.

Mr. HUGH SCOTT. Mr. President, will the distinguished majority leader yield?

Mr. MANSFIELD. I am delighted to yield.

Mr. HUGH SCOTT. Mr. President, I am very happy that the majority leader has made this very important point pertaining to our current and future relationships with the People's Republic of China.

There have been visits now by a number of Senators to the People's Republic, including the distinguished majority leader and myself, the distinguished assistant minority leader (Mr. GRIFFIN), and the distinguished Senators from Washington (Mr. MAGNUSON), Alabama (Mr. SPARKMAN), and Wyoming (Mr. MCGEE), as well as a number of Members of the House. Therefore, the bipartisan spirit of continued coordination and a move toward normalization of relationships is expressed by the visits and the views of the Members of both parties in Congress, as well as by the actions taken by the Chief Executive.

I think it is very reasonable to assume that no matter who may occupy the office of the Presidency in the future and no matter who may hold the positions we now hold in Congress—I mean by that the body generally, of the Senate and the House—a continuance of a good bipartisan relationship can be expected.

We have found the people of the People's Republic of China to be cordial in their approach to us, frank in their relationships, and cordial to us as visitors. We, in the Senate, have acted as hosts for a number of visitors from the People's Republic of China, and they have reciprocated in entertaining a number of Americans, individuals and groups, as they visited the People's Republic of China.

So, having had for a good part of my life a very strong and personal interest in the history and the development and the culture of China, I am especially pleased that the distinguished majority leader has mentioned this relationship. I think it bids fair to improve and to be widened. It is my hope that many Americans will be able to see for themselves the People's Republic of China, as the facilities of that nation expand for the purpose of receiving and entertaining visitors.

So I thank the distinguished majority leader. I am sure that neither he nor I will ever regret our latest trip to the People's Republic. We both had been there before. I certainly look forward to another visit there at an early opportunity.

Mr. MANSFIELD. I thank the distinguished Senator.

Mr. President, before I call up the resolutions which accompany an adjournment resolution, I would suggest the absence of a quorum.

Mr. LONG. Mr. President, will the Senator withhold that for a moment?

Mr. MANSFIELD. Yes.

Mr. LONG. Mr. President, I believe the Senator is going to make a motion that would not be debatable. I wish to say before we leave that having observed this body for many years, dating to the days when my father served here, it has been my impression that there has been no leader of the Senate who has been more thoroughly considerate of all Senators and who has done more to bring together people than the distinguished Senator from Montana.

In my opinion, not having known all the majority leaders, but having known some great ones, he is the greatest majority leader the Senate has ever had.

There are differences that remain between the House and the Senate, but no differences among Senators; they have all been resolved in this Congress. A great deal of that is the complete responsibility and achievement of our distinguished and able majority leader, the Senator from Montana.

In these days of sparse attendance, when I see only a few faithful on the floor, I feel that the Senate is particularly fortunate to have great leadership on both sides on the aisle: our distinguished and able assistant majority leader, the Senator from West Virginia (Mr. ROBERT C. BYRD); the distinguished minority leader, the Senator from Pennsylvania (Mr. HUGH SCOTT); the distinguished assistant minority leader, the Senator from Michigan (Mr. GRIFFIN). I really think there never has been a time in the history of the Senate when men of good will have worked together more diligently, sincerely, earnestly, and effectively for the ultimate good of this Nation. I only regret it has not been possible in all cases for the good will to penetrate the other body. But I hope that starting in January even that will be possible.

Mr. ALLEN. Mr. President, will the Senator yield?

Mr. MANSFIELD. I yield.

Mr. ALLEN. Mr. President, I, too, would like to join in the praise that has been given to the leadership on both sides of the aisle, and particularly to the distinguished majority leader for his leadership as the majority leader, to the joint leadership; and certainly the distinguished majority whip, the Senator from West Virginia (Mr. ROBERT C. BYRD), at whose feet I have learned and served here in this body.

I have served under only one majority leader, being a freshman Member of the Senate, but I recall that one of the first statements I made on the floor in the Senate when I saw the fair-minded, statesmanlike manner in which the majority leader was conducting the duties of his office, was that the majority leader was growing in my esteem by leaps and bounds. That has been almost 5 years ago and he has continued to grow in my estimation. One thing that I appreciate so much in the majority leader is that he is anxious that every Member of the Senate have an opportunity to have his way and speak out on the issues before the Senate. He is fair-minded; he certainly has great qualities of leadership. He is loved by every Member of the Senate.

I have not always agreed with the majority leader. On occasion when I have voted as the majority leader has voted, I have jokingly said to him, "I am following my leader on this occasion."

But irrespective of whether we vote together on the issues, I know that the people of the State of Alabama are going to have their opportunity to be heard through their two Senators.

So we appreciate this courtesy, this gentlemanly conduct, and treatment that we have always received in the Senate.

I never have had the pleasure of knowing a person who was fairer, who was more dedicated to the public interest as he sees it than is the distinguished majority leader.

I cannot let the opportunity go by without commending the majority leader, the assistant majority leader, the distinguished Republican leader, the assistant Republican leader, and the joint leadership, who give those with differing views an opportunity to be heard in the Senate.

Speaking for the people of Alabama, we are appreciative of this courtesy.

Mr. MANSFIELD. I thank the distinguished Senator for his words are most pleasant, but I must say I feel embarrassed.

Mr. HUGH SCOTT. Mr. President, I would not want to extend indefinitely the embarrassment of our friend, the distinguished majority leader. I have on recent occasions spoken more at length on the same subject but I would like to say here one more time that the relationship which I have enjoyed with the distinguished majority leader and the distinguished assistant majority leader, and the distinguished assistant minority leader has been cordial, cooperative, very happy, interesting, and a worthwhile experience for me. We have been dealt with at all times with total integrity and the utmost understanding of our problems.

We have said before how fortunate we are in having the opportunity on this side to deal with leaders of the caliber of the men who represent the majority in the Senate. We have contained our differences within those essential and tolerable limits of mutual respect and mutual recognition, but this is a body wherein debate flourishes, but flourishes for the sole purpose of ascertaining what is the best and most effective way by which we may discharge our common duties, and involves, too, a continuing search for the truth through the maze of opinion and how imperfect we may be in this exercise. But the fact that we are able to do it within the finest traditions of the Republic is to me indeed a very reassuring and pleasant thought with which to end our present session of the Congress.

Mr. MANSFIELD. I appreciate all those remarks but I am glad that those outside the leadership, like the distinguished Senator from Louisiana (Mr. LONG) and of the distinguished Senator from Alabama (Mr. ALLEN), have taken in the whole leadership collectively on both sides of the aisle because what has been done in this body has been a joint effort and with a lot of understanding and cooperation between Democrats and Republicans, and that has all been forthcoming.

Now, Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

The routine morning business transacted during the day is printed at this point in the RECORD by unanimous consent.

ENROLLED BILLS SIGNED

The ACTING PRESIDENT pro tempore (Mr. METCALF) on today, December 22, 1973, signed the following enrolled bill which had previously been signed by the Speaker of the House of Representatives:

S. 2812. An act to amend the Federal Water Pollution Control Act to establish the ratio for allocation of treatment works construction grant funds, to insure that grants may be given for other than operable units, and to clarify the requirements for development of priorities;

H.R. 8449. An act to expand the national flood insurance program by substantially increasing limits of coverage and total amount of insurance authorized to be outstanding and by requiring known flood-prone communities to participate in the program, and for other purposes;

H.R. 8529. An act to implement the shrimp fishing agreement with Brazil;

H.R. 11238. An act to amend the Act of March 16, 1926 (relating to the Board of Public Welfare in the District of Columbia), to provide for an improved system of adoption of children in the District of Columbia, and for other purposes; and

H.R. 11771. An act making appropriations for Foreign Assistance and related programs for the fiscal year ending June 30, 1974, and for other purposes.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. JOHNSTON (for himself and Mr. HASKELL):

S. 2860. A bill to amend the Natural Gas Act to extend its application to the direct sale of naural gas in interstate commerce, to provide that fair market value shall be the just and reasonable rate for new sales in interstate commerce, and to require full cost rates for industrial sales in interstate commerce. Referred to the Committee on Commerce.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. JOHNSTON (for himself and Mr. HASKELL):

S. 2860. A bill to amend the Natural Gas Act to extend its application to the direct sale of natural gas in interstate commerce, to provide that fair market value shall be the just and reasonable rate for new sales in interstate commerce, and to require full cost rates for industrial sales in interstate commerce. Referred to the Committee on Commerce.

NATURAL GAS AMENDMENTS OF 1973

Mr. JOHNSTON. Mr. President, I am pleased today, on behalf of myself and the junior Senator from Colorado (Mr. HASKELL), to introduce amendments to the Natural Gas Act that will, I believe, provide a basis for solution to at least a part of the energy crisis.

Mr. President, in my judgment, the time has come to seek a compromise that will allow this Nation to begin to seek self-sufficiency in its natural gas supply. Like most compromises, it will be satisfactory to none but tolerable by all those who, in good faith, seek a solution to seemingly irreconcilable differences. Those who believe in continued regulation, yet admit that regulation has not been a success in natural gas, must reconcile with those who believe in no regulation at all, yet admit that an uncontrolled price in times of acute shortage may result in an unjustified price. I believe the bill that I am introducing today accomplishes these objectives.

We must face the fact that the present situation with respect to natural gas is intolerable to the national interest. We clearly need to expand the supplies of natural gas available to our citizens and, at the same time, to assure that our natural gas resources are more efficiently used. Those who have seen the intrastate market bid away gas that otherwise might have gone to the interstate market can agree that market conditions must be brought into balance—but one school of thought would visit the failure of Federal regulation of the intrastate market by eliminating price competiton, while the other would free the interstate market to compete with intrastate bidders without regulatory supervision. People of good will will acknowledge that there is a middle ground—a compromise that retains regulation only of the interstate market but permits competitive bidding at fair market value, with adequate consumer protection.

All of us recognize that, first and foremost, it is the consumer whom we must protect, and it is well to concede that neither school of natural gas thought has adequately considered the plight of the homes, the schools, and the hospitals that need natural gas. These important users of natural gas need an assured supply at the lowest cost. For years these domestic and commercial consumers have paid far too much for their gas in relation to the price paid by industrial consumers of our interstate lines. These industrial consumers were afforded the opportunity to buy large quantities of gas at rates a fraction of the homeowner's cost. Even in the 1960's these industrial consumers were guaranteed "sweetheart" rates cheaper than coal or any competing fuel by the Federal Power Commission, and this was justified on the grounds that "loads were balanced" or "more economical pipelines could be built" or "lower unit costs were available to housewives." In that period of time, many electric utilities switched from coal or oil to gas, in whole or part, simply because it was cheap. And it was cheap only because the Federal Power Commission set far too low a price at the wellhead and compounded its error by loading a disproportionate cost on the homeowners.

Whatever justification there may have been for this policy disappeared when interstate pipelines began to shut off or curtail their customers for want of gas supply. Therefore, with threats to health, safety, welfare and jobs, we in the Congress must focus first on supply. But we must not forget price, and that price can be controlled, not by asking the Federal Power Commission to regulate more, but by requiring industrial consumers to pay the full cost of all new gas supplies, thereby leaving the older, cheaper supplies for homeowners. We must also reverse the trend of those electric utilities who switched to gas to take advantage of inexpensive natural gas. The interstate pipelines will soon find the market clearing level when their industrial customers, direct and indirect, refuse to take gas and find that, after all, other fuels and environmental controls are not so bad after all. In the meantime, new supplies can be encouraged, while homeowners are insulated from risk of failure on the part of those who say—"get supplies at any price"—and those who say—"hold the price for any supplies."

The compromise that is contained in the legislation that I am introducing today involves the following general provisions:

First. New gas is defined as gas first dedicated for sale in interstate commerce after the effective date of the act. This means that only natural gas brought to market for the first time, or gas sold to an interstate pipeline upon the expiration of an intrastate contract, after the effective date of this legislation would be eligible for the "fair market value" regulatory approach of this legislation, thereby avoiding any claim of windfall profits by legislation.

Second. An opportunity for a hearing is afforded any affected consumer or consumer group who wishes to establish that the rate proposed to the Federal Power Commission by an interstate pipeline and an unaffiliated natural gas company is not the fair market value of that gas, defined as the price set by an unaffiliated buyer and seller. An affiliated producer is required to establish that the price set in his contract with his affiliate is no higher than fair market value, as defined. Should the Federal Power Commission determine that the contract price was not the fair market value, the producer will be required to cease the sale.

Third. To ease the administrative burden on the Federal Power Commission, the Commission may, by rulemaking, establish a prima facie fair market value on a nationwide basis, subject to judicial review, and decline to hold hearings unless the contract price exceeds the prima facie standard. To eliminate uncertainty, the new gas rate set in AR70–1, unless modified or set aside upon judicial review, will constitute the first prima facie fair market value.

Fourth. The Commission will retain abandonment jurisdiction over all gas sold in interstate commerce from the time a certificate is accepted, but producers will be permitted to collect the contract prices for old gas after the contracts expire. The Commission would be permitted to authorize a higher rate upon showing of need for special relief to avoid waste, premature abandonment, or confiscation, or upon showing that additional developmental drilling will be undertaken by the producer if a higher rate is permitted.

Fifth. All costs of purchased new gas will be recorded in a separate account by interstate pipelines, and the Commission, by appropriate allocation and rate design, will assure that all industrial customers will pay the full cost of the new gas, including fully allocated fixed and variable costs allowed the pipeline in its cost of service, with all savings in the cost of service thus achieved being used to reduce rates to residential, commercial, feedstock, process users, and plant protection customers.

Mr. President, I believe that the legislation that Senator Haskell and I are introducing today will meet the challenge of both providing incentives for developing much-needed new supplies of natural gas and protecting the legitimate interests of the consumers of this country. I strongly urge its prompt consideration and passage.

I ask unanimous consent that the bill be printed in the RECORD at the conclusion of my remarks.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 2860

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Natural Gas Amendments of 1973".

SEC. 2. Subsection (b) of section 1 of the Natural Gas Act (15 U.S.C. 717(b)) is amended by striking out "for resale".

SEC. 3. Subsection (6) of section 2 of the Natural Gas Act (15 U.S.C. 717a(6)) is amended by striking out "for resale".

SEC. 4. Section 2 of the Natural Gas Act (15 U.S.C. 717a) is amended by adding the following subsections:

"(10) 'Fair market value' means the rates and charges made, demanded or received by agreement (except indefinite pricing clauses, if any) between a willing natural gas company that transports and sells natural gas in interstate commerce and a willing natural gas company that sells, but does not transport, natural gas in interstate commerce, neither of which natural gas company is affiliated with the other.

"(11) 'Definite pricing clause' means a provision in a producer contract which—

"(A) sets forth the price to be paid for natural gas delivered under such contract in terms of specific monetary units, including charges for specific supplemental services to be performed by the producer, without reference to any other contract, price, or circumstances, including, in addition to the initial price, any increases in the initial price, by specific amounts which shall become effective at definite future dates, or which become effective upon establishment of prima facie fair market value by the Commission;

"(B) changes in the price in order to reimburse the seller for all or any part of the changes in production, severance, or gathering taxes or taxes of a similar type or kind levied after a specific date; and

"(C) establishes the price to reflect changes in the heating value of the gas delivered under such contract.

"(12) 'Indefinite price clause' means a provision in a producer contract, other than a definite pricing clause, under which the price for natural gas sold under the contract may be determined or changed.

"(13) 'Affiliate' means a natural gas company directly or indirectly controlled by, controlling or under common control with another natural gas company. For purposes of this definition, and without limiting the generality of the foregoing, a natural gas company will be deemed controlled by another corporation if a member of the board of directors of the natural gas company (or of a parent of the natural gas company) is also a member of the board of directors of the other corporation (or of a parent of the other corporation).

"(14) A corporation will be deemed a 'parent' of another corporation if the former corporation is the beneficial owner of more than 50 percent of the voting power of the latter corporation.

SEC. 5. Subsections (a) of sections 4 and 5 of the Natural Gas Act (15 U.S.C. 717c(a) and 717d(a)) are amended by inserting at the end of each of those sections the following:

"Provided, however, That (i) the just and reasonable rate for the sale of natural gas first dedicated for sale in interstate commerce on or after the effective date of this Act shall be the fair market value of that gas; (ii) if such sale is by a natural gas company to one of its affiliates, the burden of proof of fair market value shall be on the applicant; otherwise, the burden of proof shall be on intervenors in opposition; (iii) the just and reasonable rate for the sale of natural gas delivered pursuant to an existing contract that expires on or after the effective date of this Act shall, upon expiration of such contract, be the rate fixed in the expired contract unless, by appropriate order, the Commission authorizes a higher area or individual rate to prevent waste, premature abandonment, or confiscation, to encourage further exploration or development, or to reflect changes in cost and noncost factors in ratemaking, and

"Further provided, That the just and reasonable rate for sales in interstate commerce for industrial fuel use shall be not less than the fair market value of sales of natural gas to the natural gas company that transports natural gas in interstate commerce and the full cost of transportation allocated to firm customers at the same delivery point or zone."

SEC. 6. Subsection (c) of the Natural Gas Act (15 U.S.C. 717f(c)) is amended by inserting at the end thereof the following:

"Provided, however, That no hearing is required prior to certification of sales (but not transportation) of natural gas in interstate commerce for the first time on or after the effective date of this Act, if the rate charged, demanded or received is equal to or less than the *prima facie* fair market value which the Commission may, from time to time, establish by rulemaking without a hearing, in an amount not less than the last new gas rate determined by the Commission in any proceeding completed prior to the effective date of this Act, unless such determination is modified or set aside upon judicial review, and

"Further provided, That the sale of natural gas to a natural gas company for transmission and sale in interstate commerce may be commenced at the proposed rate upon the filing of the application for a certificate and may be continued until the certificate is issued or denied, and, if denied, the sale shall be terminated forthwith without liability for refund."

ENROLLED BILL PRESENTED

The Secretary of the Senate reported that on today, December 22, 1973, he presented to the President of the United States the enrolled bill (S. 2812) an act to amend the Federal Water Pollution Control Act to establish the ratio for allocation of treatment works construction grant funds, to insure that grants may be given for other than operable units, and to clarify the requirements for development of priorities.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives by Mr. Hackney, one of its reading clerks, announced that the Speaker had affixed his signatures to the following enrolled bills:

H.R. 9142. An Act to authorize and direct the maintenance of adequate and efficient rail services in the Midwest and Northeast region of the United States, and for other purposes;

H.R. 10511. An Act to amend the Urban Mass Transportation Act of 1964 to permit financial assistance to be furnished under that Act for the acquisition of certain equipment which may be used for charter service in a manner which does not foreclose private operators from furnishing such service, and for other purposes; and

H.R. 11372. An Act to conserve energy on the Nation's highways.

The ACTING PRESIDENT pro tempore (Mr. METCALF) subsequently signed the enrolled bills.

ADDITIONAL STATEMENTS

OIL PRICE RATIONING AND EXCESSIVE PROFITS

Mr. HUMPHREY. Mr. President, in the last several weeks we have seen gasoline and home heating oil prices rise at shocking rates. Wholesale fuel prices, which are up nearly 50 percent over December of 1972, exploded by 19.3 percent in November alone, the greatest 1-month increase in decades.

Wednesday, the Cost of Living Council increased the ceiling price on crude oil by $1 a barrel. This will soon be reflected in a 2.3 cents-a-gallon rise in what consumers must pay for gasoline and fuel oil.

At this rate, it may soon cost a man on the minimum wage a full day's pay simply to fill his gas tank.

And if these increases to date are not enough of a burden on the American consumer, he can ponder the recent statements by Mr. William Simon, the head of the new Federal Energy Office, to the effect that gasoline prices may have to go up by 30 cents per gallon to achieve the desired reduction in consumption.

Before this policy of "price rationing" goes any further, however, I believe that the administration should explain to the Congress and the public just what real evidence it has on the effectiveness of further large price increases in cutting consumption. This so-called price rationing works a heavy hardship on the working man or the retired person of modest means without offering him any alternative means of essential transportation, and—what is worse—without requiring equal sacrifice by others. The price increases that already have taken place have had considerable shock effect on all but the rich to eliminate unnecessary consumption. The higher prices go, the more people will experience privation in vain without being able to cut back further on use. The administration should tell us why it believes that price increases as great as 30 cents per gallon will continue to squeeze out consumption in addition to simply imposing pain on the consumer. The higher prices go, the more inequitable this form of conservation is to low and middle income Americans.

Moreover, the administration should tell Congress and the public just why it believes that such price increases—with the billions in unearned profit they hand to the oil industry—will motivate those companies to produce more vigorously to end the shortage. Do we have any assurance that each additional billion dollars given to them in profits will get more oil out of the ground and more refineries built in the United States? Or will much of it be used, for instance, to buy out competitors whose supplies are now being chocked off, and thus further to consolidate the grip of the major firms on the structure of the fuels industries?

Mr. President, in regard to oil company profits, which by the way are up 47 percent so far this year, I was delighted to hear Mr. Nixon say Wednesday night that he intends to prevent "windfall profits" through an excess profits tax.

However, I have learned from experience that it is best not to applaud White House pronouncements until one has had a chance to read the fine print.

As chairman of the Consumer Economics Subcommittee, I intend to closely scrutinize the details of this "excess profits" tax proposal and its impact on our consumers. If it is found wanting, a legislative remedy may be needed.

I ask unanimous consent to print in the RECORD a table showing the extent of the oil companies' profit boom during the last several months.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

INCREASE IN 1973 OIL COMPANY EARNINGS PER SHARE OVER SAME PERIOD OF 1972

[Percent]

Company	3d quarter	1st 9 mo.
Exxon	81	
Union Oil of California	76	56
Mobil	64	38
Getty Oil	73	62
Phillips	42	29
Standard Oil (Indiana)	37	31
Shell	23	
Standard Oil (Ohio)	11	54
Occidental	1957	
Amerada-Hess	500	88
Marathon	37	49
Kerr-McGee	13	40

INDIAN UNEMPLOYMENT

Mr. McGOVERN. Mr. President, on April 9 of this year, Mr. Lloyd Eagle Bull, the secretary of the Oglala Sioux Tribal Council in South Dakota, concluded his statement before the House Subcommittee on Indian Affairs by saying:

> And now we have gotten to the real issue. The issue isn't Wounded Knee. It isn't the treaty of 1868. The issue is jobs. . . . I want to tell you that there is nothing more important that you can do for my people than to get a job program for us. We have an unemployment problem which goes back for generations. No wonder that so many people, even young people, lose hope. Get us jobs, and there won't be an Indian problem any more.

Mr. President, I do not believe that the problem of the reservations could be more succinctly stated.

The Federal Government is currently pouring approximately $1 billion per year into the Indian reservations of this country, and in the past 2 years the rate of unemployment and underemployment has been reduced a mere 2 percent—from 57 percent to 55 percent. Fifty-five percent unemployment. I doubt that any one of us in the Congress can possibly comprehend what it is like to live in an environment where the rate of unemployment is 55 percent.

It is inexcusable that a visitor from the Brookings Institution to reservations in the year 1971 would have to describe his observations as follows:

> An Indian reservation can be characterized as an open-air slum. It has a feeling of emptiness and isolation. There are miles and miles of dirt and gravel roads without any signs of human life. The scattered Indian communities are made up of scores of tar-paper shacks or log cabins with one tiny window and a stovepipe sticking out of a roof that is weighted down with pieces of metal and automobile tires. These dwellings, each of them homes for six or seven persons, often have no electricity or running water—sometimes not even an outhouse. The front yards are frequently littered with abandoned, broken-down automobiles that are too expensive to repair and too much trouble to junk. The number of unemployed is striking. Everywhere there seems to be dozens of Indians standing around doing nothing.

Indian people should not have to leave the reservation—their friends, relatives, customs, and past to participate along with the rest of the country in the most affluent society in the history of man. We in the Congress formed the reservation boundaries, and now it is our duty and responsibility to try as best we can to bring to the reservation the opportunities we have brought to the other parts of the country. We must make an affirmative and substantial commitment to Indian development; our goal must be to give the Indian people the opportunity for economic parity with other Americans.

I ask unanimous consent that the latest Indian unemployment figures as compiled by the Department of the Interior, Bureau of Indian Affairs, be printed in the RECORD.

There being no objection, the figures were ordered to be printed in the RECORD, as follows:

B. RESIDENT INDIAN POPULATION, LABOR FORCE, UNEMPLOYMENT, AND UNDEREMPLOYMENT: SUMMARY BY AREA: MARCH 1973

[Tabulation of selected items as reported by agencies]

[1] Where agency and reservation are identical, only agency is listed.

[2] Horton Agency (Kansas): 1,677 Indians reported in the area of Kansas City, Lawrence, Topeka, and Wichita are not included in this report.

[3] Western Washington Agency (Washington): 1,191 Indians reported for STOWW: Chinook—237, Cowlitz—131, Jamestown-Clallam—196, Marietta-Nooksack—95, Sauk-Suiattle—149, Snohomish—303, and Stillaquamish—80 are not included.

[4] March 1971 data.

[5] March 1970 data.

[6] March 1969 data.

[7] March 1968 data.

[8] March 1967 data.

[9] 1962 data.

[10] March 1972 data.

[10a] 1972 data used because 1973 report showed increases over 50 percent.

[11] Agency (or Area) did not submit individual reservation reports.

[12] Bay Mills includes 783 Indians in a radius of 50 miles.

[13] Figures are from the California Judgement Roll (April 25, 1973) listed by county for only those who were paid. Counties with trust land under the jurisdiction of the Sacramento Area are listed by agency as follows:

Central California Agency: Amador, Butte, Calaveras, Colusa, El Dorado, Fresno, Glenn, Inyo, Kern, Kings, Lake, Lassen, Madera, Mariposa, Mendocino, Modoc, Mono, Placer, Plumas, Sierra, Sonoma, Tehama, Tulare, Tuolumne; Yolo. Palm Springs Area Field Office: Riverside. Hoopa Agency: Del Norte, Humboldt, Shasta, Siskiyou; Trinity. Southern California Agency: Imperial, Riverside, San Bernardino, San Diego; Santa Barbara.

Key: Leaders mean 0 (zero). B means base is too small for percentages to be meaningful. l/f means labor force.

WATER RESOURCES COUNCIL DIRECTOR WARREN FAIRCHILD ADDRESSES CALIFORNIA WATER COUNCIL

Mr. HRUSKA. Mr. President, Warren D. Fairchild, Director of the U.S. Water Resources Council, addressed the fall convention of the California Water Agencies Association to speak on "Priority Activities of the Water Resources Council." This occurred in Anaheim, Calif., on November 29, 1973.

Water has always been a vital factor in the history and progress of man. Not too many years ago, it occupied a renewed prominent place in national concern, because of a realization of the impact of an increasing population and enlarged demand for water. In fact, for a term of years there was a water syndrome, similar to those syndromes the Nation has experienced periodically. Such as the current crises; the environmental crisis of a few years ago; hunger in America before that; education after Sputnik, and so on.

In the case of water, the renewed emphasis was timely and beneficial. Wide inquiry and gathering of facts and information were pursued. Various study and planning efforts were created and set in motion. Local, State, and regional organization intensified, both inside and outside of government spheres. The Association of California Water Agencies is one example of numerous such entities.

The U.S. Water Resources Council is another example. It has for its mission as a Federal agency the maintenance of a continuing study of water supplies necessary to meet requirements in each water resource region in the country; of the relation of regional or river basin plans or programs to the larger regions of the Nation; and of the adequacy of the administrative and statutory means for coordination of the water and related land resource programs on the Federal level. It also reviews plans of River Basin Commissions. It transmits its recommendations to the President for his review and transmittal to Congress.

As in all fields of major endeavor, water finds itself in a dynamic, fast moving scene of development and change. Much of what was solid doctrine for a long time often no longer "relates to today's world." Hence, the necessity of constant study and review. Hence, the necessity frequently to analyze existing programs and plans with a view of adjusting priorities.

So it is with the principles and standards published in September of this year. They provide among other points the new computation of discount or interest rate used in some water programs. This was considered necessary because of the obsolescence of the previously employed rate. Needless to say, the increase and change encountered resistance and opposition.

But Mr. Fairchild points out that interest or discount is but one factor of cost. Counterbalancing it are benefit factors which have come to be obsolete and to require revision. One such benefit factor is to be found in approval of "new normalized agricultural prices." Mr. Fairchild on this point stated during his speech:

> **Based on the price of agricultural commodities in the market place (and with certain constraint), the current normalized prices to be used in evaluating projects, will be over 30 percent higher than those previously approved. Actually, the net effect of these prices for agricultural projects should approximately offset the higher discount rate . . .**

This is one impressive example of the necessity to make evaluation procedure in water development relevant to today's priorities and values.

Mr. Fairchild in his remarks discusses other vital, far-reaching subjects and policies. Mr. President, in order to share them with all who are interested in this subject, I ask unanimous consent that the text of Director Fairchild's speech be printed in the RECORD following my remarks.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

PRIORITY ACTIVITIES OF THE WATER RESOURCES COUNCIL

(Remarks by Warren D. Fairchild, Director, Water Resources Council, before the Fall Convention of Association of California Water Agencies, Anaheim, Calif., November 29, 1973)

When I accepted the appointment as Director of the Water Resources Council, I looked forward to a very exciting, challenging and demanding period in my professional career. It is my contention that the next several years will be an extremely critical period for natural resources programs as the Federal Government attempts to restructure programs and institutions, reorder priorities, and evolve national water policies that reflect the changing values of this great Nation.

The Water Resources Council is a very key agency during this period because of its assigned role in water policy. Section 102(b) of the 1965 Water Resources Planning Act states that the Council shall ". . . make recommendations to the President with respect to Federal policies and programs. . . ."

I want to address two significant activities that the Council has under active consideration and/or implementation at this time. These issues are: (1) Principles and Standards; and (2) cost sharing.

I will not retrace the history in the evolution of the Principles and Standards as published in the *Federal Register* on September 10, 1973. All of you are very much aware of this history; and it would be redundant for me to make such a recap. I will discuss instead the activities associated with implementation.

It would be naive for me to state that the approved Principles and Standards have not been controversial. Pending court action, congressional legislation, and discussions with developmental and conservation groups quickly dispell such naivete. However, before we as water professionals jump to conclusions, it would be well for us to take a hard look at the Principles and Standards as they relate to today's situation.

I will not review the problems presently associated with traditional water projects. However, most of such problems are related to the level of public support which, in turn, reflects priorities and to a considerable extent credibility. Some of this lack of credibility may be related to planning procedures we have used in the past. The discount or interest rate, as well as commodity prices, and allocation procedures used heretofore allegedly do not relate to today's world. As a consequence, many professionals in the water field, in academia and elsewhere question such procedures. If we believe that it is in the interest of the Federal Government to undertake a program on other than economic consideration, then we need to recognize such goals or objectives and identify subsidies required. We should not use evaluation procedures as a gimmick to justify such action.

The discount rate in the Principles and Standards is based upon the cost of all Federal borrowing. It seemed logical to the Council of Members to discount future benefits based on the cost of Federal borrowing. It is not based on economic theory of social time preference or opportunity cost but rather on the cost of money that citizens are willing to loan to our Government for Federal operation. Such a discount rate seems defensible to me.

However, if planning procedures are to be fully creditable, not only should cost factors be relevant, but also benefit factors. It was for this reason that the Council of Representatives on October 9, 1973, approved new normalized agricultural prices following recommendations of the Economic Research Service, U.S. Department of Agriculture. Based on the price of agricultural commodities in the market place (and with certain constraint), the current normalized prices to be used in evaluating projects, will be over 30 percent higher than those previously approved. Actually, the net effect of these prices for agricultural projects should approximately offset the higher discount rate. With the constraint applied, I anticipate that these prices will show another increase next year.

I bring this to your attention to stress the thrust of WRC and participating agencies in making the evoluation procedure relevant to today's priorities and values. I feel the Principles and Standards can do this—a major factor being the requirement of alternative planning to emphasize NED and EQ. Another positive factor is that the Principles and Standards, recently approved by the President give the water agencies positive guidance and should serve to overcome much of the hiatus and indecision recently associated with evaluation and formulation procedures.

Two immediate problems have surfaced on implementation. These are (1) the selectivity (grandfather clause) of authorized but unfunded projects; and (2) investigations currently underway or in the pipeline.

It is my position that the Principles and Standards authorize flexibility to the Federal agencies in administering the selectivity clause on authorized but unfunded projects. True, the administration of this issue is going to be extremely difficult and controversial. It is our plan to outline alternative definitions of various stages of authorized but unfunded projects for consideration at the next COM meeting, which in effect would define the time that authorized projects became funded. Such definitions would exempt certain projects that have reached the funded stage from the Principles and Standards. Exemption beyond this would be up to the head of the Federal agency with opportunity for input from WRC and other Federal organizations.

The pipeline investigations are something else. A hard interpretation would require strict adherence to the Principles and Standards for all reports not yet forwarded to Congress. Such an interpretation would be a very expensive decision. It would require reformulation of all investigations now underway, which would consume most of the available Federal planning resources for a considerable period of time. Similarly there are many investigations under active consideration today that may have serious economic and environmental problems when considered under the new Principles and Standards.

This, then, poses a very sensitive situation requiring sound judgment for its resolution. Obviously, the status of the investigation must be considered—but it cannot be overriding. If an investigation does have serious economic or environmental problems, regardless of status, vigorous application of the Principles and Standards must be the general rule. The Principles and Standards with alternative plans to emphasize environmental quality, afford water agencies an opportunity to step back, take off the "so called" black hat and come forwarded with reformulated plans for the consideration of decision-makers.

Another important aspect of water resources development that is expected to be modified in the future is cost sharing. The President expressed his concern on this matter in his letter to the Water Resources Council, when he approved the Principles and Standards, as follows:

"I understand that analysis of ways to assume more equitable cost sharing by the beneficiaries of water resources projects is underway. I ask that you complete this work promptly so that draft legislation can be transmitted to the Congress in time for enactment this year."

It is anticipated that legislation that will deal with at least a part of the cost-sharing problem will be introduced in the Congress early in the next session. The responsibility for determining the method of financing water projects rests with the U.S. Congress.

As a background to my discussion on cost sharing, I would like to review with you the situation relative to authorized but unconstructed water projects. Presently there is about $20 billion estimated construction costs associated with such projects. Having been recently associated with the U.S. Bureau of Reclamation, as an Assistant Commissioner, I would use the situation of the Bureau to indicate the present dilemma of financing the construction of projects.

The Bureau presently has a $6.2 billion backlog. The increased cost of construction because of inflation has been running about 7% annually for the last 5 years. This means that approximately $450 million of Federal appropriation is required each year for the Bureau to meet the inflation factor; whereas the construction appropriation to Reclamation has run about $300 million annually. This means that the Bureau has a larger dollar backlog at the end of the year than at the beginning, even if desirable new projects are not authorized.

Logically, there are three options or combination of options that are available to resolve this problem. These options are: (1) increase substantially the Federal appropriation; (2) cut projects out of the backlog; and (3) develop new methods of financing. The need to explore all three options; however, I would like to discuss with you option (3) which relates directly to cost sharing.

Initially, it should be understood that I am discussing cost sharing—not non-Federal financing—there is a difference. There are national interests and Federal benefits that justify a strong Federal role. Cost sharing is based on the concept of sharing of costs by all levels of government, Federal, State and local based on benefits received. Identification of benefits is part of the determination in the economic justification of projects. If you questions the benefits—you are in essence questioning the justification of projects.

It is my position that economically justified water projects are sound investments, based on real benefits. If this is the case, then we need to evolve a method of financing so as we can accrue these benefits. I have worked as a water professional at the local, state and Federal level. I am convinced that benefits from these projects accrue at all of these levels. The questions come down as to how these levels can and should share their costs in order that the construction of desirable projects can proceed in a rational and timely manner, which is not the case today. My conversations with many local and state officials lead me to believe that they stand ready to invest their funds in such projects—if the Federal Government articulates a sound water policy on cost sharing. These same people recognize the present program characterized by an indeterminate waiting period is not sound in that it does not allow for a reasonable, if any, assurance that a project will ever be constructed—at least in their life time.

A pragmatic level of cost sharing accomplishes two things: (1) eliminates "free loaders" who are unwilling to pay for any of the benefits they will receive; and (2) increase funding for construction. The water agencies in the Executive Branch are facing a real challenge in developing a legislative package on cost sharing for consideration of the U.S. Congress. In order to be acceptable, it must recognize an appropriate level of sharing of costs; and it must be at a level that encourages, not discourages non-federal cooperation. I see cost-sharing as the real key in moving this Nation's water programs.

In the short time I have had available with you today, I have limited my remarks to the recently published WRC Principles and Standards, and cost sharing. I have done so because these are two important activities on which the Council is now placing considerable emphasis. This is not to downgrade other water policy areas that the Council has under consideration or must address in the near future. These relate to such items as: (1) institutional arrangements, (2) methodology, (3) priorities, (4) food and fiber; (5) water for energy; and (6) coordinated comprehensive water and related land planning. Again, it is my pleasure to meet with you today, I trust this short presentation will give you some insight into the programs of the Water Resources Council in making recommendations to the President and the Congress on water policy. It is a very interesting area of activity; but, needless to say, it also has its controversial aspects.

RICE DIPLOMACY

Mr. JOHNSTON. Mr. President, in the past year we have realized for the first time that the American farmer is an integral part of the American economy. Having been blessed for years with agricultural overproduction, we have seen during 1973 that our agricultural products are of enormous significance to the other nations of the world, and that other nations are willing to compete with American purchasers for our farm output.

As we have learned this lesson the hard way, public understanding for our agricultural programs has increased. Today, more Americans than ever before can appreciate why it is wise policy for our Government to maintain stable agricultural productions levels.

Recently, another very beneficial aspect of our farm program has come to my attention. Under Public Law 480, the Government has long purchased surplus agricultural products, including rice grown in my own State of Louisiana, and shipped these products abroad as part of our foreign aid program. Public Law 480 has been severely criticized. Unquestionably, the program is badly in need of reform and streamlining. Nevertheless, Mr. President, we should not be too quick to forget the vital role played by our agricultural products shipped abroad under Public Law 480.

An excellent editorial in the August 1973 issue of the Rice Journal emphasizes the role of "rice diplomacy." For the information of the Senate, I would like to introduce this editorial into the Record.

Mr. President, I ask unanimous consent that the editorial in the August 1973 issue of the Rice Journal be printed in the Record following my remarks.

There being no objection, the editorial was ordered to be printed in the Record, as follows:

The Editor's Page

So the worldwide shortage has pushed rice prices to historic levels. Farmers all around the Rice Belt are happy and prosperous. When the sun shines it is a good time to patch the roof, so we might think about where our Amercian rice has gone, what it is doing, and how the current situation contrasts with other times.

In Cambodia, the U.S. Air Force has been air-dropping 100 pound sacks of American rice to people cut off by Communist advances. In South Vietnam our rice is being used to fulfill our political commitment for economic assistance, and at the same time buttress the government in power.

The Philippine President on the eve of his election sends out the word: "Let the markets be flooded with rice." His Government is returned to power. The fact that there were any stocks at all on hand for the populace was due in part to imports of 150,000 tons of American rice under both PL–480 and commercial terms.

In Indonesia, the produce of American rice farmers helped to ease the shortage, feed the hungry, and maintain political stability. Our supplies to Korea helped fill the "rice gap" and ease the domestic political problems of one of our important allies.

In the Middle East, the availability of American rice on commercial terms has become meshed with the supply of oil from the Arabian Peninsula. If foreign oil production is important to national security, so is our domestic rice production.

Couple this with the recent official announcement that no further PL–480 sales will be approved until January of 1974 except for national security purposes, and the point is again well illustrated. At the same time, restrictions are being threatened for commercial exports. It seems that when worldwide supplies do not meet international political demands, the Government is quick to throw the rice farmer into uniform.

Now let us look at the situation in another way. Imagine that we are back in 1968. Warehouses are bulging; there is a glut on the market. The rice farmer is not everybody's friend, but has become a political liability. A lot of talk is heard about agriculture budgets, and how the rice farmer's allotment is costing the taxpayer more than any other program. Complaints are heard from the Budgeteers that the produce of our farmers must be bought by the government and then almost given away abroad.

Yet American rice in 1968 was serving the exact same purpose as in 1973—alleviating world hunger and assisting friendly governments. The big difference is that world supplies are tight. This means that what the U.S. Department of Agriculture and the U.S. rice farmer were taking the blame for only a few years ago now turns out to be a Godsend to the U.S. Department of State and to those in Washington concerned with national security.

Our rice farmers are supplying an international demand, in bad times as well as good, and their labor goes to fulfill our international political purposes. There is something wrong, when times are bad, with having the cost of the program borne by the USDA alone. At least part of the cost should be assigned to the Department of State or to agencies concerned with humanitarian and national security programs.

American rice production is an expensive proposition. But those who protest the cost of programs designed to help move rice abroad through government sponsorship should weigh that expense against the cost of bombs, bullets, and American lives.

CONSTITUTIONAL ISSUES INVOLVED IN CONCEPT OF A FEDERAL NO-FAULT AUTOMOBILE INSURANCE PLAN

Mr. HRUSKA. Mr. President, during hearings in the Senate Judiciary Committee on "no-fault" automobile insurance bills, testimony was received from Dr. Mitchell Wendell, a constitutional law authority, on various constitutional aspects which arise in this field.

Dr. Wendell holds a law degree from Columbia University—1945—and a Ph. D. in public law and government from that same school—1949. He is a member of the New York State and District of Columbia Bars. His experience and activity in law has been wide and varied, including 6 years as counsel to the Council of State Governments.

His testimony covers a variety of questions on the constitutional impact of S. 354, the bill reported by the Senate Commerce Committee. They include:

1. Does the Congress have the constitutional power to authorize states to enact no-fault laws?

2. Can or must a state administer a federal no-fault law different from or in preference to the state law?

3. What is the effect of the provisions of S. 354 mandating particular kinds of state administrative structures and relationships: for example, Section 109?

4. What would be the likely result of enactment of S. 354?

Mr. President, it is a scholarly, well-documented presentation which Dr. Wendell made. I ask unanimous consent that its text be printed in the Record at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HRUSKA. Mr. President, there are other considerations besides constitutional which arise as to S. 354. One of them is the broad policy question of whether the deliberately enacted national policy—as directed in the McCarran Ferguson Act—by the Congress in 1945, should be abrogated in the fashion attempted in S. 354. Or whether it should be modified or altered in such or similar fashion, or at all.

No hearings were held on the broad issue presented in the Senate Commerce Committee hearings, in sufficient degree to enable us to get a perspective of the massive impact which eventual Federal preemption would have on the millions of insurance policyholders of every line of insurance. We can well conclude that the impact would be great.

As to automobile insurance alone, there is in the context of various bills pending, a great deal of controversy.

Washington State Insurance Commissioner testified before the Judiciary Commitee that there are about 200 plans of no-fault insurance that have been designed, compiled, and disseminated throughout the country.

The Senate Committee on Commerce has proposed one of its own plans—of its own contrivance to establish Federal nationwide no-fault automobile insurance.

Many students in this field, including Washington and Oregon State Insurance Commissioner Karl Herrmann, oppose such a plan, pretty much on the basis that if no-fault insurance is an idea whose time has come, it should arrive in the several States of the Union in such terms and plan as each State prescribes for itself.

Many persons, viewing the great variety of plans, and the varying differences of judgment and treatment accorded them by the public and legislatures of the States, consider it presumptuous, officious, and unwise for the Senate Commerce Committee to sweep aside all such decisions, and to say in paternal fashion: "None of your plans are satisfactory. We offer a plan which is the latest product of our committee. You take it. If you do not adopt and comply with this committee's plan, then we will force it on you by congressional act, whether you like it or not."

Apart from the wisdom, workability, and desirability of no-fault, as a concept, therefore, some policy questions arise. Among them are constitutional issues, which are compelling and which must be fully met. To this point they have not been treated sufficiently, Dr. Mitchell Wendell's paper on this subject will be very helpful to overcome this deficiency.

So will the statements and testimony

of State insurance commissioners from Washington State and Oregon—Commissioner Karl Hermann and Commissioner Lester L. Rawls respectively. Both oppose the Federal interventions.

Mr. President, I ask unanimous consent that their statements be printed in the RECORD at the conclusion of my remarks.

Later hearings will include testimony from other State insurance commissioners, State Governors, from National Association of Insurance Commissioners and others.

They want to participate in the trend of moving power in public affairs away from Washington and back to the States and localities.

They consider they can serve the consumer—the insurance buying public—more efficiently, effectively, and responsively than a Federal bureau or layer of bureaus in the Nation's Capital.

EXHIBIT 1

STATEMENT OF DR. MITCHELL WENDELL ON S. 354

I am Dr. Mitchell Wendell, a member of the New York and District of Columbia Bars. I have had fifteen years of experience as a professor of Constitutional Law and Political Science. For six years I was Counsel to the Council of State Governments. Now I am a consultant specializing in Intergovernmental Relations, Legislation and related matters. Because I appear today as an expert witness on the Constitutional Law and Intergovernmental Relations aspects of no-fault insurance legislation. I have appended a fuller professional biography to this statement.

I have been retained, for compensation, by the American Mutual Insurance Alliance to do research and technical analysis relating to the Constitutional Law and Intergovernmental Relations aspects of no-fault. However,, this statement represents my personal view as a long time practitioner and student.

BASIC ISSUES

S. 354 is not the usual type of legislation designed to persuade or induce states to address problems by developing and implementing policies or approaches deemed desirable by the Congress. This bill contains many if not all of the exact provisions of a no-fault law. It is as comprehensive and detailed a measure as a state legislature might enact on the subject. In order to avoid preemption, a state must have a law and administrative structure precisely as prescribed in S. 354. The rights and obligations of drivers, passengers, pedestrians, and insurance companies—indeed of everyone concerned with motor vehicle accidents, damages and injuries—would be specifically determined pursuant to the provisions of the federal statute or of the state laws which would have to copy the exact provisions of the federal statute, except that in some particulars a state law could have additional provisions.

As the bill provides for no federal administration or enforcement (other than approval of State plans), its viability is entirely dependent on the ability and willingness of all states to accept no-fault, enact no-fault plans precisely like what the authors of S. 354 have in mind, and administer the system. Whether all of this is realistic, or even possible, depends on the answers to several questions:

1. Does the Congress have the constitutional power to authorize states to enact no-fault laws?

2. Can or must a state administer a federal no-fault law different from or in preference to the state law?

3. What is the effect of the provisions of S. 354 mandating particular kinds of state administrative structures and relationships: e.g. Section 109?

4. What would be the likely result of enactment of S. 354?

1. Does the Congress have the constitutional power to authorize states to enact no-fault laws? Five states have constitutional provisions which forbid limitation of the tort remedy, thereby making no-fault laws impossible for them to enact or administer.[1] Nineteen additional states have provisions in their constitutions which do not go as far but which nevertheless either deny or seriously restrict the possibility of their enacting and administering no-fault statutes.[2] Unless, these states, through their own constitutional amendment processes, elect to remove these provisions, they cannot meet the conditions that would be created by S. 354. The bill attempts to find a way around this barrier by declaring such elements of state law to be preempted. Section 201 (a) reads:

SEC. 201(a)

"Preemption.—Any provision of any State law which would prevent the establishment or administration in such a State of a no-fault plan for motor vehicle insurance in accordance with this title or title III of this Act is preempted."

The Commerce Committee Report explains this provision thus:

"In subsection (a) of this subsection, Congress preempts any provision of State law 'which would prevent the establishment or administration' in that State of a no-fault plan for motor vehicle insurance in accordance with title II or title III of S. 354. It is a stated purpose of the legislation to enable 'each State to participate legislatively, to administer without interference, and to continue regulating the business of insurance' while establishing minimum standards which each State must meet or exceed so as to assure a nationwide low-cost, comprehensive, and fair system of motor vehicle accident and insurance law (Section 102(b). Any provision of State law which would prevent the establishment or administration of a no-fault plan for motor vehicle insurance in accordance with S. 354 would frustrate that stated purpose and interfere with the national goal of a State-Federal partnership in the motor vehicle insurance reform effort.

"Therefore, under authority of Article VI of the Constitution, any State law which would prevent the establishment or administration of no-fault plans in accordance with title II or title III is preempted.

"It should be noted that plans in compliance with title II and title III 'meet or exceed' the minimum standards. Therefore, State law preventing the establishment or administration of a plan which met and exceeded the national standards would also be preempted.

"Subsection (a) is intended to restrict the power of a State to frustrate national policy by adopting or maintaining State laws which prevent the establishment or administration of a no-fault plan in accordance with title II or title III of the bill. As Chief Justice Marshall pointed out in *McCulloch* v. *Maryland*, 4 Wheat 316 (1819):

"'The States have no power, by taxation or otherwise, to retard, impede, burden, or in any manner control, the operations of the Constitutional laws enacted by Congress to carry into execution the powers vested in the general government. This is, we think, the unavoidable consequence of that supremacy which the Constitution has declared.'

"This subsection restricts the power of a State; it does not grant the State power. *The bill itself does grant a State power to participate with the Federal Government in the motor vehicle insurance reform effort. But the restrictions on State power in subsection (a) should not be confused with the grant of power to the States generally contained within the bill—a grant of power closely resembling that set forth in the McCarran-Ferguson Act (59 Stat. 33). . . .*" [Emphasis added.]

The Committee's phraseology is peculiar and contains serious misconceptions. It assumes that Section 201(a) is designed to keep a state from frustrating national policy. This might be an accurate categorization if we had a situation in which states were preventing the Federal Government from administering a law which the Congress had enacted. The Committee Report appears to believe that mere inaction on the part of a state and its failure affirmatively to administer a law which Congress has enacted is constitutionally identical with positive obstruction by the state of national action. As will be shown in this statement there is a vital difference between these two situations. The Supremacy Clause (Article VI, Section 2) does not compel a state to take affirmative action.

Also, the Report's likening of S. 354 to the McCarran-Ferguson Act is erroneous. That Act is a classic consent statute in the tradition of the Lacey Act, 31 Stat. 188 (1900), 16 USC 668(d) (Supp. IV 1951); Webb-Kenyon Act, 37 Stat. 699 (1913), 27 USC Sec. 112 (1946); the Hawes-Cooper Act, 45 Stat. 1084, 49 USC 60 (1946); and the Ashurst-Sumners Act, 49 Stat. 494 (1935), 18 USC 1761. These statutes employ the constitutional doctrine first developed in *Leisy* v. *Hardin*, 135 U.S. 100, 10 S.Ct. 681, 34 L.Ed. 128 (1890): i.e. that by specific statutory declaration Congress can make it clear that its own action is not intended to preempt the field or to bar action which states may wish to take. In other words a consent statute such as the McCarran-Ferguson Act frees a state to act if the impediment is a federally imposed one. These statutes have no significance and would be of no avail where the impediment is in a state constitution or in the lack of desire on the part of a state to take action.

Assuredly, S. 354 would dismantle the remedies now provided for those injured or suffering losses as a result of vehicular accidents. It is plain on the face of the U.S. Constitution that a valid Congressional enactment nullifies or renders inoperative a state law with which it is in conflict. However, the Commerce Committee's Report, and so the bill, is in error when it presumes that the provisions of S. 354 or of state laws enacted in conformity therewith would stand in the place of the abrogated remedies.

The difficulty is that the architects of Section 201(a) and of the entire theory of intergovernmental relations on which S. 354 rests mistake the negative act of destroying state law for the affirmative one of authorizing something effectively to be put in the place of the abrogated remedies. Contrary to the Commerce Committee's supposition, the result of S. 354 in the affected states would be to create a void in which persons who suffer injuries or losses in vehicular accidents would have no practicable means at all of securing redress or recompense.

The only purpose that can be served by preemption is to prevent states from interfering with federal activities prosecuted pursuant to Acts of Congress. The quoted passage from the Committee Report claims no more. However, it goes on to assert that other provisions of S. 354 do authorize states to enact no-fault laws consistent with the provisions of the bill. It is the misconception on which that assertion rests which produces the fatal constitutional infirmity in S. 354 and the entire plan for legislation which it embodies.

There are two reasons for this conclusion:

1. Neither the basic premises of our federal system nor any provision of the U.S. Con-

---

Footnotes at end of article.

stitution give Congress the ability to act as a source of legislative or administrative power for state governments; and

2. The Supremacy Clause is a restriction on state power, not an expansion of it.

CONSTITUTIONS AS SOURCES OF POWER

Our present form of Federal Government was created by the people of the United States when they, acting through the states, adopted the U.S. Constitution.[3] That document identifies certain enumerated powers which are delegated to the national government, and which the people have authorized it to exercise. Consequently, the Federal Government is one of limited authority: it may only do those things permitted by the governed as revealed in the constitution.[4]

This theoretical basis of federal authority, while inherent in the idea of a written constitution, is expressly reaffirmed in the Tenth Amendment. This Amendment states that powers not granted to the national government "are reserved to the States respectively, and to the people." There are two important concepts embodied in these words. The first is that state mechanisms and institutions determine whether and how reserved powers will be employed; and the second is that there are powers in addition to those delegated to the national government, which states may not be able to exercise.[5] Otherwise, the phrase "or the People" would be superflous. Such a construction cannot be proper since it would disregard the university accepted canon of constitutional interpretation of Chief Justice Marshall that "It cannot be presumed that any clause in the constitution is intended to be without effect."[6] Thus, any statute enacted by Congress must be authorized by an affirmative grant of power contained in the Constitution. The fact that the federal powers enumerated in Article I, Section 8 and in the several Amendments have been vastly expanded by judicial construction, does not invalidate this proposition or mean that federal powers are now unlimited, for the basic governmental framework in the United States today of two independent levels of government, each deriving their efficacy from those governed, forbids such a result.

None of the powers enumerated as belonging to Congress empower that body to compel or to authorize state governments to exercise powers that they do not otherwise possess. As will be shown in the subsequent discussion of the Supremacy Clause, the only exception to this statement is in instances where the impediment to state action is a federal law or an established intent of Congress that the states not enter a field that Congress has occupied. The no-fault legislation does not fit this pattern. Rather it presumes that the states can and should take affirmative action along the lines specified in the bill.

Just as the U.S. Constitution both confers and limits the powers that can be validly exercised by Congress, so the constitutions of the individual states provide the only sources of power for the state legislatures.[7] A limitation contained in a state constitution is as binding on the state legislature and on administrative agencies of the state as a limitation in the U.S. Constitution is binding on Congress.[8]

The entire rationale of our federal system depends on the validity of this proposition. Within the domain of their reserved powers, the states are independent governments. Our political and constitutional theory is also that they are limited governments. The specific limitations for each state government are those imposed by the people of the state through the state constitution making process no less than those imposed by the Federal Constitution. Each state can, by provisions in its constitution, place beyond the power of its government the making of certain kinds of laws. Each state has done this—notably in the Bill of Rights in its constitution[9]—but also in a variety of other provisions such as limitations on taxation, prohibition or limitation of borrowing by the state government[10] and by its local governments, and restrictions on the abolition of the tort remedy.[11]

Clearly, the people of a state, by adopting a constitutional provision, can determine that the state government simply will not be able to do some of the things that it might otherwise do.

CONGRESS AND STATE ACTION

Congress has assisted and frequently even laid the basis for coercing state action. Usually, it has done so through the grant-in-aid device.[12] However, in the constitutional sense, the states are free to accept or reject the aid.[13] Their actions are pursuant to their own processes. If legislation is involved, it is such as the state legislature can enact under its own constitution. Inability of a state to take the action necessary to qualify for the federal grant would be as good a reason as any for the state not to do the things prescribed by Congress and so not to receive the aid. Despite the great number of grant programs and statutes, Congress has not sought to secure from the states action contrary to their constitutions.

A second type of relationship of Congress to state action has been in the so-called "consent statutes". In these instances, Congress has indeed enabled states to enact and enforce legislation that they were otherwise unable constitutionally to sustain.[14] But in none of these instances is the obstacle to state action a restrictive provision of a state constitution. In each of these consent situations, the impediment has been a federal statute enacted by Congress in exercise of its commerce power, or the belief (generally as the result of a court holding) that Congress had occupied the field or intended that the field remain free of regulation.[15] Consequently, the state law was or would have been invalid because contrary to a regulatory program actually being administered by the Federal Government or to a limitation or regulation imposed by Congress. As will be shown below, it is far different for Congress to protect its own policies functioning pursuant to valid exercises of its own constitutional powers than for Congress to seek to confer an affirmative power on the state government which that government does not already have.

There are only a few narrow instances in which the U.S. Constitution expressly gives to Congress the power to compel states to act even though the required state action would violate state constitutional provisions. Section 2 of the 13th, 15th, 19th and 24th Amendments and Section 5 of the 14th Amendment state that Congress is empowered to enforce the substantive provisions of these Amendments by appropriate legislation.[16] Three of these Amendments, the 13th, 14th and 15th, were adopted immediately after the Civil War[17] and were designed to ensure that slavery be forever abolished (the 13th); that all persons entitled to United States and state citizenship receive that citizenship; that no state could define the consequences of federal citizenship or deny to anyone due process of law or equal protection of the laws (the 14th); and finally that the right of a citizen to vote not be linked in any way to race (the 15th). The immediate post-Civil War climate made those in control of the Union feel that court enforcement of these protections was not enough and that Congress should, with respect to their particular subject matter, have the role of an affirmative policeman of state action or inaction.

A similar motivation can be detected in the other two Amendments mentioned above, the 19th and 24th. The 19th Amendment granted women the right to vote, and the 24th abolished poll and other similar taxes in federal elections. Both of these Amendments involve the right to vote, a right which is one of the most important in a democratic system,[18] and consequently supplementing the normal method of enforcement was justified by the unique nature of the right being protected. However, these considerations are entirely absent when no-fault legislation is the issue for there is no historical antecedent or special reason requiring that the normal balance between the federal and state governments be shifted away from state autonomy.

Two additional features of these Amendments also distinguish them from the usual situation. First, the Amendments specifically empower Congress to enforce their substance by legislation, both negative and affirmative. No other clause of the constitution similarly vests in the Federal Government the power to require a state to enact and administer legislation. Although the necessary and proper clause of Article I, Section 8 could perhaps be construed as such an authorization, this has been foreclosed by the Supreme Court.

In the case of *Kinsella* v. *U.S.*,[19] a case in which an article of the Uniform Code of Military Justice was held unconstitutional the Court on the effect of the necessary and proper clause stated that:

"If the exercise of the power (of Congress to 'make Rules for the government and Regulation of the land and naval Forces') is valid it is because it is granted in Clause 14, not because of the necessary and proper clause. That clause is not itself a grant of power, but a caveat that the Congress possesses all the means necessary to carry out the specifically granted 'foregoing' powers of Section 8 and 'all other Powers vested by this Constitution . . .' As James Madison explained the necessary and proper clause is 'but merely a declaration, for the removal of all uncertainty, that the means of carrying into execution those (powers) otherwise granted are included in the grant.'" Writings of James Madison, edited by Gaillard Hunt, 383.[20]

Both the Court and Madison were speaking of the Federal Government's executing the laws. In order to make this apparent, it is only necessary to remember that the Necessary and Proper Clause is the last of the enumerated powers of Congress. The agents to which Congress may normally delegate power are the administrative agencies of the Federal Government. These agencies, being either directly responsible to the President or to Congress, are under a legal obligation to perform the will of Congress. The President is under a constitutional obligation to execute the laws enacted by the national legislature. (Article II, Section 3, Clause 4.) Nowhere is a similar obligation or authority conferred on a state governor or any other administrative or legislative organ of state government. Thus, the Necessary and Proper Clause is not an affirmative grant of power to Congress and cannot be relied upon to justify this element of no-fault legislation.

The second, and more practical, reason why the Necessary and Proper Clause cannot be viewed as authorizing Congress to compel positive action by state legislatures is one of federalism, for such a power would in effect eliminate the states as autonomous governmental entities. Unlike Section 5 of the 14th Amendment which is coupled with specific limitations upon state action and thus limits the realm of federal enforcement, the Necessary and Proper Clause is linked to all the enumerated powers of Congress. Consequently, to construe this provision in the same manner as Section 5 would enable the Federal Government to

---

Footnotes at end of article.

mandate state enactment and enforcement of legislation in most, and perhaps in all areas, regardless of state constitutional prohibitions. The enactment of federal legislation, such as the pending no-fault bill, which would require the assertion of federal powers broad enough to engulf state governments cannot be viewed as either necessary federal legislation or in any way proper.

Therefore, while it is well established that provisions of the U.S. Constitution and action of Congress pursuant to them can place limitations on the states and so reduce the realm in which a state constitution can empower a state government to act,[21] there is no provision in the constitution other than the above-mentioned Amendments which can be interpreted as permitting the Federal Government to authorize a state legislature to enact legislation which would violate its constitution. None of these provisions are even remotely construable as sources of authority for Congress to enact no-fault legislation.

2. Can or must a state administer a federal no-fault law different from or in preference to the state law? In the case of a state with a constitution that forbids or restricts adoption of a no-fault law, the discussion under Question 1 above is determinative of the issue. It remains to consider whether a state which could enact a no-fault law but has not done so would be required or authorized to adopt no-fault by virture of S. 354. A related question is whether a state that has enacted a no-fault law could enforce the provisions of S. 354 in place of its own statute.

In assessing the practical results that could be achieved by federal legislation, it also becomes important to determine whether they could be compelled to do so, even if unwilling. In exploring such questions, the effect of the Supremacy Clause is of fundamental significance. Also, the true character of what is sometimes loosely referred to as state enforcement of federal law must be considered.

THE SUPREMACY CLAUSE

Can anything in the Supremacy Clause of the U.S. Constitution (Article VI, Section 2) be employed to empower a state to enact no-fault provisions? The Clause reads:

"This Constitution, and the Laws of the United States which shall be made in Pursuance thereof; and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land; and the Judges in every State shall be bound thereby, any Thing in the Consitution or Laws of any State to the Contrary notwithstanding."

This provision has always been understood to mean that a state law which is in conflict with a valid Act of Congress cannot be enforced. The words "and the Judges in every State shall be bound thereby" show how the Clause is intended to work. In any litigation coming before state courts, those tribunals must decline to give effect to a conflicting state law.[22] In a severely limited number of instances where Congress has provided for the exercise of concurrent jurisdiction by state courts under federal statutes, it has also been determined that the state judges may entertain the cases.[23] However, the Clause says nothing about state legislatures or the executive branch of state government. As a practical matter, of course, all state officials must appreciate that any of their statutes which conflict with valid federal enactments cannot be enforced. However, the Supreme Court has also held that neither the states nor the Federal Government enforces each others laws in any affirmative sense.[24]

It should further be noted that states are bound to observe only those Acts of Congress which are valid. With the possible exception of the 13th, 14th, 15th, 19th and 24th Amendments subject matters, the Constitution gives Congress no power to authorize a state legislature to disregard its state constitution, nor to compel such a legislature to take affirmative action in enacting a state statute. Accordingly, words in a federal statute that would purport to allow states to enact no-fault laws could be construed as valid only if given two meanings:

1. Congress does not intend to exclude state law from the no-fault field. This would remove any federal impediment to the state action and would be a consent statute. However, it would not remove a state impediment to the action.

2. Congress expresses a desire that states enact certain no-fault provisions. This might be justified as an encouragement to state action, but such a desire would be unproductive in the case of a state whose constitution prohibits the legislature from taking the desired action or in which the legislature was unwilling to pass a particular no-fault law.

To be the "supreme law of the land" a federal statute must be validly enacted: i.e., enacted in exercise of a power delegated to Congress by the enumeration of powers in the Constitution.[25] The Supremacy Clause is not a grant of power to Congress. It is merely a description of the status of Acts of Congress which have been validly enacted. The purpose of the provision is to protect the integrity of federal law, not to authorize the enactment of state law.

If the Supremacy Clause could be used by Congress to confer powers on state legislatures and state administrative agencies, the Congress could amend large parts of state constitutions in total disregard of the amending processes prescribed by those documents. Acts of Congress, and not the state constitutions, would be the fundamental law of the states. Such effectiveness as a state constitution would be only subordinate and would continue only so long and to the extent that Congress did not replace it. Such a concept is a novel constitutional doctrine and is entirely inconsistent with the constitutional theory of our federal system. Moreover, it is hard to see why the enactment of no-fault insurance by the states is so basic an issue for our entire governmental structure as to precipitate a major change of our constitutional framework of government.

AGENCY AND DEPUTIZATION

For those states that are not constitutionally unable to do so, the test of their probable conformity with the particular kind of no-fault desired by the authors of S. 354 would be their willingness to espouse policies very close to or identical with those embodied in the bill. Experience has much to tell us about state assistance in implementing national policy. In such instances, the states actually administer their own laws and not that made by Congress.

As already noted, the courts of the states can be required to apply federal law, if it come to them in a form suitable for judicial proceedings. Relatively early in the history of workmen's compensation, it was established that pursuant to a mandatory act of Congress, the state courts were required to do so in certain cases under the federally enacted employers' liability law. (Second Employers Liability Cases, 223 US 1 (1912)). A similar holding resulted when compulsory state court jurisdiction over cases arising out of World War II price controls was unsuccessfully challenged. (*Test* v. *Katt*, 330 U.S. 386 (1947)). However, when states have undertaken administrative enforcement of federal law, it has been by noncompulsory means involving cooperative techniques designed to circumvent the legal rule that neither the state nor the Federal Government can enforce the other's laws. (*United States* v. *Constantine*, 296 U.S. 287 (1935)).

One such technique is for the state to make its own law identical with or substantially similar to the federal law. The state then administers its own law, with the result that the objectives of the federal law are attained.

For example, this has been done quite extensively in the field of pleasure boat regulation. Under the Federal Boating Act of 1958, the identification numbering of pleasure boats propelled by motor is required. Almost all states have instituted similar requirements, even down to details of required position and size of numbers. Administration of the state laws is in effect administration of the federal law, although technically the state is not applying federal law at all.

Similarly, the Coast Guard has established requirements for safety equipment on boats. Many state laws provide that the carrying of Coast Guard approved equipment and devices is compliance with requirements of the state law. If the states had not taken these actions, the only alternatives would have been direct federal administration or no administration at all.

In other instances, state personnel are deputized to administer federal laws. Leading examples of this approach have been the enforcement of migratory bird treaty requirements by state wardens and the administration of rationing during World War II. In these instances, however, state law must authorize the receipt of the deputization and state administrative cooperation is necessary to make the system work.

3. What is the effect of the provisions of S. 354 mandating particular kinds of state administrative structures and relationships: e.g. Section 109? The authors of S. 354 appear to recognize that the no-fault systems they would like to see in operation involve much more than bookkeeping transactions for the claiming and payment of money. Services on a large scale to be provided in virtually every community in the country are involved. For example, Section 109 of the bill would require administration of medical and rehabilitation programs for victims of vehicular accidents. Since the scope of this legislation is and as a practical matter must be confined to no-fault insurance, Section 109 understandably mandates administrative duties of considerable importance for state insurance commissioners with respect to the medical and rehabilitation programs and purports to establish relationships and duties for the state rehabilitation programs.

For the constitutional reasons already set forth in this statement, it is extremely doubtful that Congress can provide state agencies with the authority they need to administer such programs, although it is quite clear that S. 354 could destroy any vehicular insurance and reparations programs in a state whose overall administrative organizational structure did not conform precisely to the requirements of Section 109 or the view of the Secretary of Transportation when he passes upon a state plan pursuant to Section 201(b).

I have not made a study of state constitutions in order to determine whether any of them contain provisions that would inhibit either the state insurance agencies or the state health and rehabilitation agencies from performing in the ways contemplated by Section 109. Nor have I analyzed either the state statutes creating these agencies or the federal statutes and administrative regulations under which state rehabilitation programs receive federal grants-in-aid. Accordingly, I do not know whether there is anything in these constitutions and laws that would be at odds with the non-fault role which S. 354 proposes. However, I would suggest that such an examination needs to be undertaken if we are not to run the serious

---

Footnotes at end of article.

risk that the federally mandated no-fault system would distort or cripple programs now intended to serve the needs of vocational rehabilitation and education or of public welfare.

In any event, it is necesary to observe that the difficulty with the federally prescribed and ostensibly state implemented system projected by S. 354 is that a no-fault insurance program constructed at the federal level is not a proper vehicle for rearranging the administrative fabric of state government. State legislatures are the much more appropriate organs of government for such purposes. They are in a position to consider the entire range and balance of functions that state agencies should perform and to allocate responsibilities among them in ways that will accommodate rather than prejudice all state programs needed to serve public requirements.

This suggests that state laws and administration are either necessary or desirable elements of a no-fault system, thus it is much better that the states institute no-fault by themselves and in their own ways.

4. What would be the likely result of enactment of S. 354? Although I doubt that they so intend, the authors of S. 354 would play a game of brinksmanship with our vehicular reparations and insurance systems. The first consequences of the bill's enactment would be the obliteration of all the laws under which persons suffering injury or loss are now insured and can collect for the results of vehicular accidents.

Probably, this is even true of existing state no-fault laws because it would only be by the sheerest coincidence that any of them fully meet the detailed prescription of S. 354.

The only premise on which S. 354 is workable is that faced with the absolutely catastrophic and intolerable character of such a situation, all the states would feel irresistible compulsion to do whatever was necessary to save their people from the havoc that Congress would have wrought. If this took constitutional amendments, they would be forthcoming; if it took new statutes, they would be passed; if it took reorganization of existing state agencies, this too would be done because the alternative would be too unthinkable to contemplate.

Perhaps all of this would occur, but it would not happen overnight. Many states have elaborate provisions for constitutional amendments which, like the processes for amending the Federal Constitution, have been purposely constructed to prevent hasty, ill-considered action. The provision of S. 354 requiring that the states act at the next regular session of their legislatures is totally at variance with customary timetables for securing amendments in many states. Even the expected legislative process for states which would need only statutory action cannot normally be relied upon for rapid completion in so controversial an area as no-fault. In this connection, it seems only reasonable to point out that Congress has already had no-fault legislation under consideration for several years and is not finished yet.

For the reasons presented in this statement, I believe S. 354 raises serious constitutional problems. While it is impossible to say with certainty what the courts will do with difficult questions of first impression, the precedents and the constitutional character of federal-state relations as we know them are in conflict with the premises on which S. 354 depends. At the very least, this is true for the states whose constitutions prohibit or restrict no-fault plans. It may be true to some degree for all states.

Some types of legislation can hope to avoid constitutional testing. This is the case where procedural or political factors make it unlikely that an issue will be litigated.

To suppose that E. 354 and the several parts of the system it envisages would remain out of the courts is unrealistic in the extreme. Plaintiffs and defendants in automobile cases and those affected by vehicular insurance policies number in the tens of millions—indeed they include virtually the entire population.

Limitation of recovery for pain and suffering alone, to say nothing of other substantive and procedural aspects of no-fault, will not cease to engender contest merely because a federal law is enacted.

I believe that the Congress, and particularly this Committee, should be very uneasy with legislation that is sure to let loose a flood of litigation that will produce uncertainty for years in a field so vital to the physical and economic protection of all members of the population.

This is not to argue that no-fault is an erroneous principle, or that the enactment of no-fault statutes is intrinsically bad. I have not been concerned with that question in my testimony. It is to argue, however, that S. 354 seriously needs rethinking, both in detail and in its basic structure. A constitutional infirmity in a federal no-fault law would be catastrophic, especially if it preempts the state laws—no-fault or traditional tort remedy—on which our reparations system now depends. On the other hand, an infirmity in the no-fault law of a single state (however serious) can more readily be borne because the territory and the number of people affected is so much less. This is an excellent example of a field in which the worth of the state components of the federal system as laboratories is particularly great. At the present stage of development and implementation of the no-fault concept, it seems especially unwise to add federal constitutional uncertainties to the freight which this reform must carry.

[25] *Albema* v. *Booth*, 21 How. 506 (1858).

STATEMENT OF KARL HERRMANN, WASHINGTON STATE INSURANCE COMMISSIONER

Mr. Chairman and members of the Committee, No-Fault Insurance is a magic term which has captured the imagination of the American public. Although everyone is for it, few understand what it actually is. There are approximately two hundred plans that have been carefully designed, compiled, and disseminated throughout the country. To say the least, it is extremely confusing even to the experts who try to make sense out of this melee of proposals.

Reduced to the least common denominator, no-fault insurance is no more than first-party insurance. In most instances, it has been affected or recommended with mandatory provisions of the law.

The appalling tragedy lies in the fact that it has been represented as the great panacea, or cure-all, full of many sophisticated and complex problems confronting automobile insurance. We must remember that it is impossible to get something for nothing. Every business or industry must take in more than it pays out in order to survive. This is true whether we are considering the local hamburger stand, Lockheed, Rolls Royce or Penn Central Railroad. It makes no difference how small or large the enterprise. This principle applies.

Insurance is no exception. If, for example, a company or industry as a whole pays out X amount in claims, it must take in X plus in premium. That plus must be enough to pay all expenses, a reasonable return on capital invested, if it is a stock company, and provide enough surplus for growth and development. If we do not accept and believe in this formula, then we do not believe in the private enterprise system. When we look around at other nations, especially behind the Iron Curtain, we can realize as a matter of fact that with all its faults, the private enterprise system has delivered the greatest amount of the world's goods and services to the greatest number of people from the top to the bottom strata of our society than any other system so far devised.

Why have we at present become engrossed in no-fault automobile insurance? The concept is not new. It was first considered back in the World War I era. Herbert Hoover was interested in the subject. The Columbia University made a study back in the thirties. Doctors Keeton and O'Connell kicked the idea around for a decade or two. Then, all of the sudden, with the name of no-fault, it took with the public and there has been a great popular demand for immediate change in our auto insurance reparations system.

The DOT study, which also has been referred to as the two-year two million dollar study, has brought this subject to a head. In a nut shell, it points out that our present auto reparations system has failed to meet the public need and necessity and gives two basic reasons why. First, over half of the automobile accident victims, including pedestrians, do not receive one cent of compensation for their damages resulting from personal injury, and those who are compensated as a class receive in benefits less than half the money paid in premium dollars. To be exact, the amount is approximately 44¢ on every dollar paid.

This presents the question, "How are we going to fill this vacuum with a more efficient system which will provide compensation for everyone who is injured as the result of an automobile accident?" In approaching the problem, we must understand that approximately 70 percent of the premium dollar is paid for coverage of repair or replacement of property. About 30 percent is paid for coverage of repair and rehabilitation of people. On the property side, we already have no-fault insurance under the definition that it is no more than first-party coverage. My collision policy covers me regardless of fault. The problem lies with the other 30 percent of the premium dollar. So it is immediately evident that there cannot be a tremendous reduction in the overall premium by revising our personal injury coverage.

Those who have gone about the Nation heralding their contention that we can reduce premiums 35–40 percent and increase coverage to include everyone who is injured are indeed false prophets. If personal injury coverage were given free of charge, it would not meet their wild representations of overall premium reduction.

Another pertinent principle is the price in the abstract means nothing. Price must always be compared with the quantity and the quality of the service or contract. Whenever price is reduced, regulators in the public interest, should at least make certain that more than the price reduction has not been taken from the quantity and quality side of our equation. In dealing with tangible goods that can be weighed, measured, felt, and seen, the consumer can usually judge for himself whether the price paid is in keeping with value received. In intangibles, such as insurance, evaluation becomes difficult even for those experienced in the field. Applying this concept to auto insurance, when we restrict, limit or deny an accident victim's right of recovery, we are taking away a valuable right or option.

In many instances where thresholds have been applied, situations have been created whereby the policy holders have been shortchanged. I refer specifically to one state where premiums were reduced 15 percent under its so-called no-fault program and benefits were reduced 75 percent. It doesn't take a professional actuary or a skilled mathematician to tell us who came out at the little end of the horn in that situation. High benefits and low premiums are incompatible. The late President Harry Truman in referring to our national defense expenditures stated this principle when he in effect said that if you provide a bargain basement price, you are going to get a bargain basement product.

The States of Delaware, Oregon and Washington have no-fault benefits that cover all victims who were formerly left out in the cold, so to speak, without denying or changing any of their rights. Our state of Washington is now affording some of the most generous benefits so far offered in the nation in a voluntary add-on program. With the lower speed limit, I feel confident we can meet the benefit standards of Senate bill 354 without legislation or further regulation. I am sure the industry will cooperate with me in meeting the proposed benefit levels. In doing this, we will have all of the benefits proposed by this federal legislation without restrictions and without limiting the insured's right of recovery under our present laws and regulations.

The experience in the two other states that have an add-on plan indicates that litigation has been drastically reduced. It has been reduced primarily through immediate payment of wage loss, hospital and medical expense without regard to fault. The prior payment plan under liability claims where liability was evident substantially reduced litigation for all of the companies that instituted the plan. People, at least in our state, and I believe the same prevails through the nation, are not litigious. They do not want to be forced to go to a lawyer. They abhor the trauma of a law suit. Immediate payment on a no-fault basis removes the necessity of legal action in a large percentage of cases. So, we can distribute the benefits to all auto accident victims with a possible decrease in premiums. I have run surveys and I have conducted extensive personal interviews with the rank and file of people who sit behind the wheel of the family car. I have not as yet found one person who believes that he should have complete immunity when he gets behind the wheel of a car.

Most people throw up their hands in protest when I ask this question: Would you approve a change in our laws that would operate in the following manner: Suppose I run a stop sign and hit you and your family broadside in your stationwagon. I walk away uninjured, but all of you are hospitalized, some with serious injury. When you ask me what I am going to do about your losses, I can legally say, I will talk to the police but you are on your own. You must go to your own insurance company, look to your own policy and received such benefits as you have paid for out of your own pocket. Under the law, I am no longer in any way civilly responsible for my acts behind the wheel of my car.

Most people consider this unfair, unjust, and inequitable. They also believe it would be removing a very effective deterrent to careless, reckless or wanton behavoir behind the wheel.

Although drastic changes in the present auto insurance concept are necessary to further and protect the public interest, care should be taken to avoid a system that is going to shortchange the public and result in a situation that is not compatible with good reason and common sense. Since the companies agreed to offer no-fault benefits in our state that are close to those recommended in Senate bill 354, I believe that voluntary no-fault insurance with the recommended benefits should be made available in every state in the nation. With the companies willing, I cannot conceive of any insurance commissioner taking opposition to this plan unless his state has already adopted a better system with greater benefits than those proposed in Senate bill 354.

By this system of voluntary action, we would not only be providing benefits to all those who do not have coverage under our present reparations system, but we would also be compiling actual, real-world experience that would be of great value when and if it is necessary to put further restraints and conditions on our present system. In other words, we would not be shooting in the dark. We would know what the price tag is. Prices will certainly vary from state to state. The claim frequency in some of states is four times that in the state of Washington. The frequency and dollar amount of claims are substantial factors in our X plus formula as previously referred to. It is evident, therefore, that state-by-state experiments and trial operations are necessary if we are to evolve into a sane and sensible program that will bring more and better coverage to all our accident victims at the least possible price.

It is my position in conclusion that it is not necessary to invoke the gun-in-the-ribs approach that federal legislation would mandate to state regulation. If the committee finds it necessary to set up guidelines simply because it is convinced that many states will not get off dead center without the thrust and mandate of federal law, then I believe that the guidelines should be limited to the level of benefits that are paid to the auto accident victims regardless of fault. I know that the committee has been presented with actuarial studies. So has our state legislature. So has my department, the NAIC and every insurance department throughout the nation. These studies are all over the scale, claiming reductions, increases and the status quo. Practically everything that can be said about this program and all of its ramifications has been documented by an actuarial study. Actuarial science is a science as far as techniques are concerned, yet when these techniques are applied to assumptions, judgments, trends and other factors that cannot be truly predetermined, then the results cannot be relied upon to the same degree of accuracy as actual, in the field experience.

I recommend that you first give the states a chance to act, but if you do find it necessary to mandate, limit it to the level of no-fault benefits.

Statement of Lester L. Rawls, Insurance Commissioner of the State of Oregon

My name is Lester L. Rawls and I am the Insurance Commissioner of the State of Oregon. I have been in that position for 15 months. Prior to my appointment as Insurance Commissioner I practiced law in Portland, Oregon, and prior to my law practice I was employed by an insurance industry in various positions in underwriting and claims. My last position was branch manager of the Continental National American Group in Oregon.

When I took my oath of office I promised to support the Constitution and the laws of the state of Oregon. One such law is the theme of our department, that being ORS 731.008. "The Legislative Assembly declares that the Insurance Code is for the protection of the insurance-buying public"—and that it shall be construed in a liberal manner to effect the intent of the Legislature to protect the people of Oregon. I also accept by inference, if not directly, my responsibility to act in a manner which will be to the best interests of the people of the state of Oregon as I see it. It is in this context that I appear here today to testify before this body.

As most of you know, the philosophy of no-fault insurance is not a new concept. It has been around for many years. Certain combination of events have given support to a joining of two individual ideas with a result of what is now known as "no-fault".

The first concept is that every injured person should have coverage for his medical claim and his loss of income. Through the years there have been many ideas as to the best approach to accomplish this. When I first began my insurance career we attempted to add medical coverage and disability income to every auto policy on a voluntary basis. However, because of the competition between agents and companies, the idea did not catch on and I'm sure that prior to the enactment of the no-fault laws around the country, including Oregon, little disability income is written in conjunction with an auto policy.

The second factor, commonly known as a threshold, concerns a problem which insurance companies have disliked for years—that is the so-called nuisance or small bodily injury claim. The president of American Casualty Company once said that it was not the large bodily injury claim, $10,000 or more, that bothers the expense factor of their company, but it was the little bodily injury claim that drove companies up the wall. He said if there was a way to bar such claims from coming in the door of the company it would be a boon to the insurance industry and I'm sure it would.

In 1970, my predecessor, a man with a non-insurance, non-lawyer background, called together a committee of laymen, insurance personnel, and lawyers of distinction in fields other than trial or personal injury work and asked that they develop a no-fault law for Oregon. This committee was chaired by the Honorable William Dale, Judge of the Circuit Court of Oregon—a man of impeccable credibility and who had only the best interest of the people in mind in all of his deliberations. Out of this committee came what is commonly known as the Oregon plan—a plan which makes prompt payments of medical bills and disability income and a plan which also has done an excellent job of answering the problem of small law actions.

Briefly, the plan is as follows (I will give the amounts of coverage effective on 1/1/74): Medical Coverage, $5,000 per injured person, Disability Income, Maximum $750 a month for a period of 52 weeks ($750 being 70% of the gross monthly income), and Essential Services, $18 per day.

Coverage is mandatory for *all* auto liability policies issued on private passenger autos.

In Oregon where it is estimated that 96% of the registered autos are covered by insurance, the program has worked with far greater success than was ever dreamed of.

Public reaction, when they understand the program, is good.

We are told by the courts that there is no question about the reduction in court cases.

The major auto writers all advise that their bodily injury claim count has been reduced drastically. Of course, some of these are hesitant to attribute this to Oregon's program, but anyone who has worked in insurance and law as I have recognizes the syndrome immediately. When the injured party is reimbursed for his injury regardless of fault the impetus to make a bodily injury claim fades away in a large number of cases.

Also, a very important element in Oregon's laws which I personally believe is the real key to the reduction of law suits is Oregon's reimbursement statute. Briefly, it requires that an injured party reimburse his own insurance company fully from any settlement or judgment he may receive from the tortfeasor. Thus, if a person has a small injury and knows that he must pay his own insurer from any proceeds he receives, he takes a different look at the possibility of a judgment sufficient to take care of the court costs, filing fee, deposition, subpoena fees, doctors' fees and reimbursement of his carrier before he and his attorney receive anything.

In its counterpart, the tort threshold, the plaintiff can achieve the threshold and then is home free, because he does not have to pay his carrier back.

Oregon's law went into effect on 1/1/72. The law called for all auto liability policies to carry the mandated coverage on all new or renewal policies after 1/1/72. We have had almost a year and a half of experience under the new law. Recently companies began to lower their auto rates and the results were reductions ranging from 8% to 15%—Insurance Services Office recommends an 11% reduction in auto liability.

Recently a nationally recognized actuary was in our office and suggested that the Oregon plan just has the insurance industry in a state of confusion. We discussed the concept of a tort threshold and its domination of the thinking of those individuals to the extent that it is difficult, if not impossible, for industry to accept an alternative. The Oregon plan is, of course, the plan which is people-oriented and takes no rights away from the people, whether rich or poor. The Oregon plan doesn't set an artificial barrier conceived by someone other than the injured party to achieve before he can ask for redress against the person who injured him. The argument of court congestion fails in Oregon where in Multnomah County (the largest in the state) the plaintiff can go to trial four to six months after he files his first compalint.

I'm sure that many of the other states have similar situations and it is incongruous to me to be faced with a federal standard set by persons not acquainted with the Oregon situation that will be a detriment to the people of Oregon. Each and every state has peculiar problems with its own area—more so in auto insurance than any of the other personal lines coverages. The problems that affect Pennsylvania, New Jersey, Illinois and California are not the ones that affect Oregon, Alaska or Idaho. This was recognized by the Congress when the McCarran-Ferguson Act was passed. Congress felt then and I'm sure may feel now that each state should be left to regulate itself. We have proven that in Oregon. I do not believe that it is a case where the just must suffer with the unjust. It is a case where the people of the states can go directly to their own assembly as the people of Oregon did and demand the changes that are necessary.

Many feel that because a part of the law is not working as they feel it should that the way to solve the problem is to take away all the rights of the people and then if they had something before, they now have nothing and thus it is equal. This is analogous to the custom in some native tribes whereby the cure for a headache is to drive a spike through the head of the person from one temple to the other. It is an absolute cure and one need never to worry about the headache again. That problem is solved. In the present bill one goes a step further and not only drives the spike through the head of the one with the headache, but takes in all the family members whether or not their heads ache and renders the same treatment.

We fully appreciate the concern of the Congress for the welfare of the people, but when each state is attempting to solve its problem, why not leave us to our own duties and let these United States solve whatever difficulty they have rather than have arbitrary rules set down which may or may not be in the best interests of the insurance-buying public.

Mr. MANSFIELD. Mr. President, the 93d Congress opened after an election which returned the President to the White House with a most impressive majority. At the same time, a Democratic House and Senate were also retained by the people and the margin of the Democratic majority in the Senate actually increased. There were those who chose to focus on the results of the Presidential election and to overlook those of the congressional. It was not an uncommon view in this city at the time that Congress had all but ceased to have relevance in this Government. At the start of the year, the beginnings of contempt for the constitutional role of Congress were clearly to be seen in the ruthless resort to impoundment practices, and in the abuses of executive privilege.

That is what the 93d Congress confronted when, in early January, it assembled for the first time. Frankly, I have never known Members of the Senate to be more concerned about the security of the constitutional structure of the Government than they were at that time. There was fear of what was transpiring but, I am happy to say, there was also a determination to halt the erosion.

In this atmosphere, the majority conference of the Senate endorsed a leadership statement of purpose and objectives for this session. The statement called on the Senate to move immediately to reassert the coequal role of the legislative branch in the Government of the United States. It called for action on a number of specific issues which ranged from ending the involvement in Indochina to the investigation of the Watergate affair and related matters arising out of the political campaign of 1972. In all, 20 issues were set forth for action in the Senate during this Congress. Today, as the first session draws to a close, I am happy to report that we have made progress on almost all of them.

The Democratic Conference asked, as a matter of priority, for repassage of measures which the President had pocket vetoed after the adjournment of Congress. Other measures were also listed for prompt disposal, measures on which the Senate had already spent many hours in the previous Congress. The response of the Senate committees and their chairmen and of all of the Members to this request was prompt and thorough. Of 28 recycled legislative items, over 78 percent have become public law or have passed the Senate and await House action. Only four of the remainder are of substantial significance—a comprehensive housing program, no-fault insurance, national health insurance, and the creation of a consumer protection agency. These can be expected to come before the Congress next year.

That is one measure of the response of the Congress to the depredations of the last election and to the contempt of Congress with which they are associated. It is a response written with the ink of a public dedication of the highest order on the part of the elected Members of the Congress. It is a response in which every Member of the Senate can take satisfaction—Republicans no less than Democrats. Indeed, I cannot recall a Senate which has been more disposed to put the constitutional stability and the interests of the Nation as a whole above partisanship and above sectionalism than the Senate of this 93d Congress.

It is easy to find fault with this Congress as any other. It is easy to rake over the trivia. The fact is, however, that the Congress has been the anchor of the people's freedom. It has been the rock of the Nation at a time when the executive branch has been seized in a whirlwind of resignations, disclosures, denials, dismissals and indictments. The Nation owes special thanks to Senators ERVIN and BAKER and the other members of the Senate Special Committee for what they have done to turn the light of public scrutiny on the abuses of power—to say the least—that has been rampant for too long in this Government. The committee took on an onerous task at the direction of the Senate—not one of them volunteered—and they have discharged that task with a scrupulous but relentless thoroughness. The work of the Senate Committee on the Watergate affair and related matters has been an essential catharsis for the Nation's political life.

Nor should we overlook the work—the thorough work of the Judiciary Committee in the examination of Patrick Gray, when he was nominated as Director of the FBI, in the examination of Elliot Richardson and Senator SAXBE for the Attorney General post as well as in the establishment of a legal basis for a Special Prosecutor in the Watergate affair. In all of these matters, the committee, as the agent of the Senate, was pursuing carefully and thoroughly the constitutional responsibilities of this body.

Let no one doubt, moreover, the role of the Congress in ending the military involvement in Vietnam. To be sure, the war was a long time in ending. United States combat forces were a long time in coming home. Too long, far too long. Too many lives too late. And we are now paying the price of the stretchout of a wasting war. And we will pay it for many decades to come. But would it have ended at all without the persistent pressure from the Congress? Would it have ended at all had not the Congress acted on June 30 to cut off the funding of U.S. military activity in Southeast Asia. These are questions for the historians of the future. For the present, it is enough that the involvement has ended and it is not likely to be resumed. It is not likely to be resumed, especially when the overwhelming sentiments of Congress against unilateral Executive military adventures have been set forth in the War Powers Resolution which became law without Presidential approval.

Before reviewing specific legislative achievements of this session, I would point out that this year we have the dubious distinction of casting more rollcall votes than any other group of Senators in the 20th century. Last year's total of 532 has been surpassed this year with 594 votes. I might add that we are well on the way to breaking the all-time total for any Congress which was made in the 47th Congress—1881–83—when 986 rollcall votes were cast. This is one record which I hope will not be superseded. Rollcall votes are a measure of time expended and not always for useful purposes, notwithstanding the scorecards which are maintained and the snap judgments of performance which emerge from them. I hope that in the coming session, a little more discretion will be exercised in the use of this parliamentary mechanism.

This year the Senate has passed over 700 measures, ratified 22 treaties, and confirmed 66,817 nominations. I shall mention at this point only those of major importance which have already been enacted or await House action: the Agriculture and Consumer Protection Act, the war powers resolution, compensation for victims of violent crimes, District of Columbia home rule, welfare reform, social security benefits increase, emergency medical services, health maintenance organizations, private pension plan reform, minimum wage increase, which was vetoed, vocational rehabilitation, voter registration, highways-mass transit funding, Northeast rail services improvement, and veterans' benefits increase.

With regard to energy and the environment, we have passed an unprecedented number of significant bills, mostly in the last couple of months. Several Senators, notably Senators JACKSON, MAGNUSON, RANDOLPH, MUSKIE, MOSS, and their Republican counterparts, have been working on solutions to energy and related problems for many years. Senator BYRD of West Virginia, has worked for years to obtain support for coal research. The spadework which was done by these Senators prepared the ground for the measures rushed to Congress in the last few months by an executive branch caught short by the energy crisis. Because of what they had already done and not because of any prodding from the executive branch, the Interior, Commerce, Government Operations, and the Public Works Committees have been able to bring out, with great dispatch, a range of thoughtful legislation which should help the Nation in meeting the current crisis. The executive branch, no less than the Congress, owes much to the chairmen and members of these committees for their contributions in the following measures: The Alaska pipeline, strip mining controls, emergency petroleum allocation, national energy emergency, energy research and development, energy conservation, daylight-saving time, energy conservation, speed limits, and land-use policy, and the Federal Energy Emergency Administration Act.

At the end of a long and fruitful first session, I wish to thank the able assistant majority leader, the Senator from West Virginia (Mr. ROBERT C. BYRD), who has worked closely with me and with great dedication to keep the Senate at peace within itself to the end that the work might flow smoothly. He has given unstintingly of his time and it was long and weary and of his talent—a talent which is extremely effective—especially on the floor of the Senate. I also wish to thank the distinguished minority leader Mr. HUGH SCOTT, for his understanding, accommodation and cooperation—our relationship could not be better; it is a good relationship, because we lay the cards on the table, and each of us knows what the other one intends to do at any given moment—and also his capable assistant, Senate GRIFFIN for his consideration, cooperation and the time he, too, spent on the floor for their cooperation and good humor and, above all, their readiness to work together with us to make the Senate work.

To the Senators, I express my thanks for their understanding, my appreciation for their forbearance, and my profound respect for their courage and determination, to the end that the Nation and the validity of its constitutional structure might be placed above all other consideration. It is not an easy life that is led here, especially for the younger Senators with families. But what the Senate is and what the Senate does in these critical days is of the utmost relevance to the future of this Nation. The Senate of the 93d Congress has been outstanding in every respect. What it has done speaks for itself.

Mr. President, I ask unanimous consent that various documentation related to my remarks and a complete report of Senate legislative activity with a subject index which has been prepared by Mrs. Elizabeth O. Shotwell, chief clerk, and by staff members of the Democratic Policy Committee, be printed in the RECORD and also as a Senate document.

THE PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibits 1 through 7.)

Mr. MANSFIELD. Mr. President, it gives me great pleasure to report to the Senate on the most up-to-date figures respecting the President's budget requests for funding operations of the Government this fiscal year compared with the action of the Congress on those requests. I am delighted to report that the Congress, acting responsibly and with the interests of all Americans closely in mind, has effected a cut overall of $3.2 billion in the President's budget requests for fiscal 1974. Precisely, the Congress, when it adjourns sine die this year, effected a slice of $3,020,236,226.

I will now incorporate the entire breakdown which was prepared by the Senate Appropriations Committee of this outstanding record in the CONGRESSIONAL RECORD. In short, it reflects that the Congress has shown a deep concern for the health and education of the Nation's people with their environment and with the quality of their lives, and has added vitally needed sums to these domestic priorities from enormous savings taken out of unneeded military and foreign assistance programs, some of which have lost all relevance in the world today.

I congratulate the Senate and the Congress for this achievement; it is a record—a bipartisan record—in which we may all take pride.

EXHIBIT 1

SENATE OBJECTIVES AS OUTLINED IN THE STATE OF THE SENATE SPEECH BY THE MAJORITY LEADER, JANUARY 3, 1973

1. Reinforcement of Constitution's checks and balances and reassertion of legislative role.
2. End of war in Indochina (no sine die adjournment).
3. Cooperation with House.
4. Coordination with Democratic Governors.
5. Spending Ceiling set by Congress.
6. Computerization and Access to material in Budget.
7. Clarification of the Impoundment of Funds practice.
8. Reduction of Defense Spending.
9. Closing of Overseas Bases.
10. Cutting of the size of the Federal Bureaucracy.
11. Reorganization of the Federal Government.
12. Quick Disposal of Priority Legislation, including 1973 vetoes.
13. Need for Health Insurance and Welfare Reform.
14. Reform of Campaign Financing law.
15. Investigation of Watergate Bugging and other Practices.
16. End of FBI Dossiers on Congressmen.
17. Insurance of Freedom of Speech of the Press.
18. Reform of Senate Rules, including seniority.
19. Policy Committee to Delineate Party Positions.
20. Clarification of the use of Executive Privilege.

EXHIBIT 2

REMARKS OF SENATOR MIKE MANSFIELD AT THE DEMOCRATIC CONFERENCE, JANUARY 3, 1973

We meet, today, with a new majority. We meet with new responsibilities and a new mandate.

The same electorate that endorsed the President increased the Democratic majority in the Senate by two votes. If the re-elected Members (Senators Sparkman, McClellan, Mondale, Eastland, Metcalf, McIntyre and Randolph), and the Senators-elect (Senators Abourezk (S.D.), Biden (Del.), Clark (Iowa), Haskell (Colo.), Hathaway (Me.), Huddleston (Ky.), Johnston (La.), and Nunn (Ga.)) will stand, the Conference would appreciate the opportunity and the privilege of congratulating them en bloc.

In my judgment, the vote for each of these Senators in November was cast for them as individuals. Each speaks with unique ideological and regional accents. Each has a sensitivity to a particular constituency. Nothing I may say, today, is intended to detract from that basic fact of victory in this or any other free election. Collectively, however, these Senators are representative of the Democratic Party. They reflect the strength of a unified political identity in the midst of ideological diversity, of a party that excludes no sector of the nation, nor any group of Americans.

What I have to say now, I say with all due respect and affection for our distinguished colleague from South Dakota. (And if I may digress for a moment, I would note that not a single Member of the Democratic Majority in the Senate of the 92nd Congress—south, north, east or west—defected to the Republican Presidential candidate in November.) Notwithstanding the outcome of the November election, it should be emphasized that, as a Senator from South Dakota, George McGovern shares the mandate which the electorate has given to the Senate Majority. I have every confidence that we can expect of him a vigorous contribution in its pursuit.

The recent election tells us something of what the people of the nation expect of the Senate. If there is one mandate to us above all others, it is to exercise our separate and distinct constitutional role in the operation of the Federal government. The people have not chosen to be governed by one branch of government alone. They have not asked for government by a single party. Rather, they have called for a reinforcement of the Constitution's checks and balances. This Democratic Conference must strive to provide that reinforcement. The people have asked of us an independent contribution to the nation's policies. To make that contribution is more than our prerogative, it is our obligation.

An independent Senate does not equate with an obstructionist Senate. Insofar as the Leadership is concerned, the Senate will not be at loggerheads with the President, personally, with his party or his Administration. The Senate will give most respectful attention to the President's words, his program and his appointments. Every President deserves that courtesy. During the period in which you have entrusted me with the leadership, every President has had that courtesy.

In a similar vein, the rights of the Republican Minority in the Senate will be fully sustained by the Majority Leadership and I anticipate the cooperation of the minority leadership in the operation of the Senate. I would say to the Minority, however, no less than to the Majority, that the Senate must be prepared to proceed in its own way. When conscience so dictates, we must seek to initiate and advance public programs from the Senate and, as indicated, to revise proposals of the Executive Branch.

It is my expectation that the House of Representatives will join in this approach. To that end, the Senate Leadership will seek to establish close and continuing liaison with that of the House. Looking to the needs of the entire nation, moreover, the Leadership will put out new lines of communication to the Governors Conference, notably to its Democratic Members, as well as to the National Democratic Party. We have much to learn from these sources about conditions in the nation. Their contribution can help to improve the design of federal activity to meet more effectively the needs of all States.

There is no greater national need than the termination, forthwith, of our involvement in the war in Viet Nam. This Conference has been in the vanguard in seeking a legislative contribution to rapid withdrawal from that ill-starred, misbegotten conflict. The Majority Conference has resolved overwhelmingly to that effect. Members have voted on the Senate floor preponderantly, to that effect.

Nevertheless, the war is still with us. Notwithstanding intermittent lulls and negotiations, the prisoners of war remain prisoners and their numbers grow with each renewal of the bombing. The fact is that not a single prisoner has been released to date by our policies; the handful who have come home have done so in consequence of gestures from Hanoi. The recoverable missing in action have yet to be recovered and their numbers grow. Americans still die in twos and threes and plane-loads. Asians die by the hundreds and thousands. The fires of an enduring hostility are fed by unending conflict. We are in the process of leaving a heritage of hate in Southeast Asia to our children and our children's children. And for what?

With the election behind us, I most respectfully request every Member of the Conference to examine his position and his conscience once again on the question of Viet Nam. I do not know whether there is a legislative route to the end of this bloody travesty. I do know that the time is long since past when we can take shelter in a claim of legislative impotence. We cannot dismiss our own responsibility by deference to the President's. It is true that the President can still the guns of the nation in Viet Nam and bring about the complete withdrawal of our forces by a stroke of the pen. It is equally true that the Congress cannot do so. Nevertheless, Congress does have a responsibility. We are supplying the funds. We are supplying the men. So until the war ends, the effort must be made and made again and again. The Executive Branch has failed to make peace by negotiation. It has failed to make peace by elaborating the war first into Cambodia, then into Laos and, this year, with blockade and renewed bombing, into North Viet Nam. The effort to salvage a shred of face from a senseless war has succeeded only in spreading further devastation and clouding this nation's reputation.

It remains for the Congress to seek to bring about complete disinvolvement. We have no choice but to pursue this course. I urge every Member of this caucus to act in concert with Republican Senators, by resolution or any other legislative means to close out the military involvement in Viet Nam. If there is one area where Senate responsibility profoundly supersedes party responsibility, it is in ending the involvement in Viet Nam.

In view of the tendency of this war to flare unexpectedly, the Leadership now questions the desirability of the Congress ever again to be in *sine die* adjournment as we have been since October 18, 1972. In that Constitutional state the Congress is unable to be reassembled on an urgent basis except by call of the President. It is the Leadership's intention, therefore, to discuss this gap in Congressional continuity with the House leaders. It may well be desirable to provide, at all times, for recall of the Congress by the Congress itself. There is ample precedent for providing standby authority of this kind to the combined Leaderships.

If Indochina continues to preoccupy us abroad, the Senate is confronted, similarly, with an overriding domestic issue. The issue is control of the expenditures of the Federal government. We must try to move to meet it, squarely, at the outset of the 93rd Congress.

In the closing days of the last session, the President asked of Congress unilateral authority to readjust downward expenditures approved by the Congress within an overall limit of $250 billion. The President's objectives were meritorious but his concern at the imbalance in expenditures and revenues might better have been directed to the federal budget which is now a tool—not of the Congress, but of the Executive Branch. It is there that the origins of the great federal deficits of the past few years are to be found. The fact is that Congress has not increased but reduced the Administration's budget requests, overall, by $20.2 billion in the last four years.

As the Conference knows, the House did yield to the President's request for temporary authority to readjust downward, arbitrarily, Congressional appropriations. The Senate did not do so. The Senate did not do so for good and proper reasons. The power of the purse rests with Congress under the Constitution and the usurpation or transfer of this fundamental power to the Executive Branch will take the nation a good part of the last mile down the road to government by Executive fiat. That is not what the last election tells us to do. That is not what the Constitution requires us to do.

I say that not in criticism of the President. The fault lies not in the Executive Branch but in ourselves, in the Congress. We cannot insist upon the power to control expenditures and then fail to do so. If we do not do the job, if we continue to abdicate our Constitutional responsibility the powers of the federal government will have to be recast so that it can be done elsewhere.

We must face the fact that as an institution, Congress is not readily equipped to carry out this complex responsibility. By tradition and practice, for example, each Senate committee proceeds largely in its own way in the matter of authorizing expenditures. There is no standing Senate mechanism for reviewing expenditures to determine where they may fit into an overall program of government. A similar situation exists in our dealings with the House. So, if we mean to face this problem squarely, it is essential for us to recognize that the problem is two-fold. It involves: (1) *coordination of expenditures within the Senate* and (2) *coordination with the House.*

In the closing hours of the 92d Congress, Congress created a Joint Committee to recommend procedures for improving Congressional control over the budget. While this committee cannot be expected to conclude its work by February 15, as the statute directs, it would be my expectation that by that date an interim report will have been submitted to the Congress. Thereafter, it is the Leadership's intention to seek the extension of the Joint Committee in the hope that a definitive answer can be found to the problem.

In the meantime, what of the coming session? Unless the Congress acts now to strengthen coordinated control of expenditures, it is predictable that the Executive Branch will press again for temporary authority to do so. It is predictable, too, that sooner or later a Congressional inertia will underwrite the transfer of this authority on a permanent basis.

That is the reality and it ought to be faced squarely here in this caucus and on the floor of the Senate. Unless and until specific means are recommended by the Joint Committee, I would hope that the Conference will give the Leadership some guidance on how an over-all expenditures ceiling may be set as a goal for the first session of the 93d Congress. Shall we attempt to do it here in the Caucus? Shall we take a figure by suggestion from the President? Thereafter, how will we divide an over-all figure among the various major priorities and programs? How much for defense? For welfare? For labor and so forth?

Who will exercise a degree of control over expenditures proposed in legislation? Can it be done by a committee of committee chairmen? The Appropriations Committee? Should the Majority Policy Committee monitor expenditure legislation before it reaches the Senate boor to determine compatibility with an overall limitation? In any case, where will the necessary budgeting technicians and skilled fiscal officers be obtained? From the General Accounting Office? The Congressional Research Service? By an expanded Senate staff?

I would note in this connection the provisions of the Reorganization Act of 1970 which called for a unified computerized system for the federal government. The system was to permit classifying various programs and expenditures of the government so that we might know, among other things, how much was being spent for each particular purpose. This knowledge is essential for effective control of expenditures on the basis of a program of priorities.

The computer project is being undertaken jointly by the Treasury and the Office of Management and Budget, in cooperation with the General Accounting Office. It is my understanding that the project has concentrated, to date, on the needs of the Executive Branch while those of the Congress are being overlooked. If that is so, this project had better be put back on the right track. If it is necessary, the Congress should alter the enabling legislation to make certain that we get the information that is needed to control expenditures. It would be my hope that the appropriate committees would move without delay to look into this situation.

If the President seeks the cooperation of the Senate in negotiating an immediate end to the involvement in the Vietnamese war, in the control of expenditures or in any other matter of national interest, he will have that cooperation. Cooperation depends, however, on a realistic give and take at both ends of Pennsylvania Avenue. In the name of cooperation, we cannot merely acquiesce in unilateral actions of the Executive where the Constitutional powers of Congress are involved as they are in Viet Nam and in the control of expenditures. I would also note in this connection the proclivity of the Executive Branch to impound funds from time to time for activities approved by the Congress. This dubious Constitutional practice denies and frustrates the explicit intention of the Legislative Branch.

There are some areas in which, clearly, we can work cooperatively with the President. Defense expenditures, for example, can continue to be reduced to a more realistic level. I am glad to note that the Armed Services Committee and the Appropriations Committee both have been moving to bring about a general reduction of requests of the Executive Branch for these purposes. As a matter of fact, the reduction in defense appropriations amounts to $5.3 billion for FY '73 and I would hope that we will do even better this year.

We should also consider closely the Administration's announced plans to close some domestic military bases during the coming year. The Executive Branch should not overlook the approximately 2,000 installations and bases which we have set up in all parts of the world at a continuing cost of billions of dollars annually. Here, too, there is an area for cooperation with the President. I would suggest most respectfully that the Senate and the President consider jointly both in terms of obsolescence and economy the closing of a good many of these overseas establishments.

In the civilian sector, the President has indicated that the Federal bureaucracy is too large. There would certainly be grounds for close cooperation with the Senate in this sphere. The misuse and underuse of civil servants is a scandalous waste of public funds which is felt especially at a time of rising federal salary scales. To overload the agencies and departments with personnel is also demeaning and deadening to the dedicated men and women in the federal service.

If the President will work with the Congress on this matter, I am persuaded that the Civil Service can be reduced substantially from its present 2.8 million employees. The reduction can be without personal hardships, by a carefully developed program which would permit greater flexibility in transfers among agencies and incentive retirements. Such a program coupled with the natural attrition of death and resignation and with accompanying limits on new hirings could do much to improve the tone of government service and curb the payroll costs which now stand at $32 billion a year.

The President has expressed an interest in proceeding with his earlier proposed plans for reorganizing the Federal government. Clearly, there is a need for reorganization of sprawling, over-extended, over-lapping Executive departments, agencies and commissions. It must be faced as a realistic matter, however, that any basic reorganization in government is a difficult undertaking at best. In my judgment, a wholesale approach is not likely to achieve anything more concrete now than when it was first advanced two years ago. It would be only a charade. It is my hope, therefore, that the President would concentrate on areas of maximum need. It seems to me that Members of the Senate who have shown a deep interest in this problem can be very helpful in working with the Administration to define those areas.

Turning to our potential contribution to a legislative program for this session, I would emphasize that the Senate has a distinct mandate to assert its own concepts of priorities. The Constitution does not require us to await proposals from the Executive Branch. In this connection, two categories of "carry-over" legislation from the 92d Congress warrant immediate attention. The first consists of those measures passed by Congress in the last session but vetoed by the President. In many cases, the same measures can be reported promptly by the appropriate committees largely on the basis of comprehensive hearings held in the past. Within this group, of even more urgent concern are the following bills which were vetoed after Congress adjourned without opportunity to override:

1. An Act to Establish Mining, Mineral, and Related Environmental Research Centers in Each State.
2. The Airport Development Acceleration Act.
3. The Public Works Navigation and Flood Control Construction Bill.
4. The National Environmental Data System Act.
5. Extension of Grants to States for Vocational Rehabilitation of Handicapped Individuals.
6. The Veterans' Health Care Reform Act of 1972.
7. The National Veterans' Cemetery System Act.
8. Reclassification of Positions of Deputy U.S. Marshals.
9. National Institute of Gerontology Bill.
10. Revision of the Older Americans Act of 1965.
11. Public Works and Economic Development Act Amendments of 1972.
12. Appropriations for the Departments of Labor and Health, Education, and Welfare for Fiscal Year 1973.

A second category of priority bills includes those which were reported out and considered in either the House or the Senate during the 92d Congress but not enacted. They include pioneering measures of great relevance to the quality of the nation's life and the welfare of its citizens. These measures should be reported by the Committees early in the current session so that the Congress may consider them carefully. The list includes:

1. Comprehensive Housing.
2. Consumer Protection Agency.
3. No-fault Insurance.
4. Minimum Wage.
5. Pension Reform.
6. Comprehensive Health Insurance.
7. Health Maintenance Organizations.
8. Strict Strip Mining Controls.
9. Omnibus Crime Victims Bill.
10. Highway Federal Aid.
11. War Powers.
12. Anti Hijacking.
13. Consumer Product Warranty.
14. Land Use.
15. Fair Credit Billing.

I would note, in particular, legislation involving health insurance. Senators have introduced various measures dealing with this subject. The Administration has advanced other proposals. The Congressional approach tends to offer more comprehensive health coverage to the people of the nation. The Administration is more concerned with costs. It would be my hope that a compromise can be brought about between what Senators have suggested and what the Administration has recommended. In that fashion, we might at least begin to move in the direction of meeting the medical and hospital needs of all of our citizens.

In a closely related area, we will have to come to grips with the question of welfare reform. Over the past ten years, the costs of welfare have increased from $5 billion to approximately $15 billion. The trend continues upward. The states and localities are overwhelmed by a growing demand for assistance. They plead for greater federal assistance in shouldering this load.

It is inconceivable to me that this nation will ever turn its back on those among us whose lives have been crippled by physical or mental handicaps, by unemployment, by poverty and disease. For years, we have assisted such people, by the millions, abroad as well as at home.

Nevertheless, we must find a better way of dealing with this problem. We must find a more effective system not only of training but of placement to put the able-bodied to work. It is more than a matter of getting people off welfare rolls. It is a matter of the right to personal dignity for every American who is prepared to assert it. It is a right which is interwoven with supporting oneself and family and with making a constructive contribution to the nation.

To date, the Administration has failed to meet this situation. So, too, has the Congress. Hopefully, together, in the 93d Congress we can make a new beginning.

Once, again, in the last election the flaws in the electoral system were paraded before the nation. In my judgment both Congressional and Presidential campaigns are too repetitive, too dull and too hard on candidates and electorate. Most serious, the factor of finance begins to overshadow all other considerations in determining who runs for public office and who does not, in determining who gets adequate exposure and who does not. It is not healthy for free government when vast wealth becomes the principal arbiter of questions of this kind. It is not healthy for the nation, for politics to become a sporting game of the rich.

This Congress must look and look deeply at where the nation's politics are headed. In my judgment, ways must be found to hold campaign expenditures within reasonable limits. Moreover, to insure open access to politics, I can think of no better application of public funds than, as necessary, to use them for the financing of elections so that public office will remain open to all, on an unfettered and impartial basis, for the better service of the nation. With this principle forming the objective, it would be desirable to consider limiting campaigns to three weeks or four weeks, later scheduling of conventions and possibly, replacing the present haphazard, expensive, time-consuming state primaries with national primaries. Once again too, consideration might be given to abolishing the electoral college and to adjustments in the Constitutional provision involving the Presidential term of office and, perhaps, that of the Members of the House.

The Federal Election Campaign Contributions Act, which we enacted in the 92d Congress and which was put into effect this past year, may also need refinement and modification to reduce undue paper-shuffling and principle of full disclosure. There are also some specific matters relating to the past elections which warrant investigatory attention. One is the so-called Watergate Affair which appears to have been nothing less than a callous attempt to subvert the political processes of the nation, in blatant disregard of the law. Another is the circulation by mail of false allegations against our colleagues, Senator Muskie, Senator Jackson and Senator Humphrey, during the Florida primary campaign, with the clear intent, to say the least, of sowing political confusion.

Still another is the disconcerning news that dossiers on Congressional candidates have been kept by the FBI for the last 22 years. This practice has reportedly been stopped. It would be well for the appropriate committees to see to it that appointed employees in the agencies of this government are not placed again in the position of surreptitious meddling in the free operation of the electoral process. The FBI has, properly, sought to avoid that role in other situations. We must do whatever is necessary to see to it that neither the FBI, the military intelligence agencies or any other appointive office of the government is turned by its temporary occupants into a secret intruder into the free operation of the system of representative government in the United States.

On November 17, 1972, I addressed letters to Chairman Eastland of the Judiciary Committee and Chairman Ervin of the Government Operations Committee. I requested that these two Chairmen get together and make a recommendation to the Leadership on how to proceed to investigate these and related matters, to the end that the Senate's efforts may be concentrated. I renew that request, today.

While I am on this subject, I would like to suggest, too, that attention be given to the appearance in the Courts and Executive Agencies of what may be a tendency to cloud by disconcerting interpretations the safeguards of the First Amendment as they apply to practitioners in the press and other media of communications. If this tendency does exist, the Congress has a responsibility to try to check it. The press, radio and TV are prime sources of light in the otherwise hidden recesses of our government and society. They are as essential to the fulfillment of our legislative responsibilities as they are to the general enlightenment of the public. At the very least, therefore, it seems, too, that a Senate inquiry is called for into the implications of recent court decisions and such official pronouncements as that of the Director of the Office of Telecommunications Policy regarding the "Fairness Doctrine." We share with the President and the Courts a Constitutional responsibility to protect the freedom of the press to operate as a free press.

I would like next to present a few thoughts about the internal procedures of the Senate. In recent weeks, much has been said about the evils of the seniority system. I can understand the intent of those who make these assertions. Yet, I would observe that, in general, the Senate has been well served in the years of my personal recollection, by the Chairmen of its various committees.

For the benefit of the new Members, however, I would point out that the system which is followed in the Senate by the Democratic Conference in nominating Members to Senate committees is not one of automatic deference to seniority. In the first place, nominees for each standing committee and its chairmen are designated by the Conference's Steering Committee and by secret ballot. During the 92d Congress, for the first time, the Leadership submitted in block to the Democratic Conference for concurrence the names of any new members of the several committees. The Steering Committee's selections were endorsed unanimously by the Conference.

Beginning in the 92d Congress, moreover, the Conference adopted a ratification procedure calling for separate Conference concurrence in the case of each of the Steering Committee's designees for Committee Chairman. That process will be followed this year and a Democratic Conference will be called for that purpose when the Steering Committee completes its work. Finally, I should note that what I have just discussed is the procedure only for designation of Democratic Members to Senate committees. The actual election of committees and chairmen occurs on the floor of the Senate where, once again, they are subject to challenge. The safeguards seem to me to be substantial. Nevertheless, the Chair will entertain any request for further discussion of this matter.

On another question, I have received from Senator Moss, a letter which states, in part:

"It is my hope that the Democratic Conference will adopt a resolution directing the Policy Committee to set forth the legislative objectives of the Democratic Party. It follows, of course, that all Democrats would be expected to support to the maximum degree possible these objectives."

Let me note, in this connection, that in early 1969, the Leadership did raise with the Policy Committee the question of who was to speak for the Democratic Party in the Federal government in view of the election of a Republican President. The Committee agreed unanimously that a need existed for such a spokesman. Thereupon, it adopted unanimously certain new rules of procedure which were proposed by the Leadership to deal with this need. In general, these rules provided for regular meetings of the Policy Committee to consider issues which might be identified as suitable for the assumption of a party position. Those issues were to be considered which came to the Policy Committee—quoting from the Committee's rules—"by reference . . . from any Member of the Policy Committee, by staff study of legislative proposals, statements or other actions of the Administration and by reference to the (Policy) Committee from any legislative Committee."

The Committee further agreed to consider "the issues which are thus brought to its attention for the purpose of determining whether they are of a significance *and* are likely to evoke sufficient agreement as to warrant adoption by the Majority Party of a Policy position."

Finally, the Committee agreed to seek "to secure the widest degree of party acceptance of a position on any significant issue (and) . . . to be guided by a minimum of a two-thirds vote in determining the issues on which a party position should be taken."

In short, basic machinery in line with Senator Moss' suggestion has been available and in operation in the Policy Committee for four years. The rules of procedure which govern in this connection were approved in full and unanimously by the Democratic Conference on May 20, 1969, as well as by the Legislative Committee Chairmen. They have been used to identify and to disseminate more than a dozen party positions in the Senate and, in general, these positions have had substantial Democratic support.

It is conceivable that the Conference would wish to make changes in the functions of the Majority Policy Committee with a view to strengthening its role along the lines of Senator Moss' letter. It would be helpful, however, if the Policy Committee itself might consider this matter before it is discussed in the Conference. If there are to be modifications in the present procedures of the Committee, as approved unanimously by the Conference in the past, we ought to be as specific as possible in presenting them. The Policy Committee will be meeting soon and the Leadership will undertake to raise the matter at that time. The results of the discussion will be brought back to the Conference thereafter if changes are to be proposed.

I will now close these remarks with a final reference to the last election. I suppose each of us interprets the national sentiment which is reflected in the outcome in terms of his own predilections. Certainly, I have done so. Therefore, "the state of the Senate," as seen from the viewpoint of the Democratic Majority might not necessarily dovetail with the mandate which the Administration delineates from President Nixon's reelection or that which is seen by the Republican Minority in the Congress.

Nevertheless, it does seem that the election tells all of us—President, Democratic Majority and Republican Minority—what the people of the nation do not want.

(1) They do not want one party or one branch government during the next two years.

(2) They do not want to turn back the clock on the national effort to improve the human climate and the physical environment in which the people of this nation must live.

(3) They do not want a rate of change which whether too slow or too rapid produces major internal chaos and disruption.

(4) Most of all, they do not want the President to persist nor the Congress to acquiesce in the indefinite continuance of the senseless bloodshed in Viet Nam and, with it, accept the indefinite postponement of the return of the POW's and the recoverable MIA's.

These negatives point the way to the positive path which the Senate Majority Leadership intends to pursue during the next two years. We will not abandon the effort to end the U.S. involvement in Viet Nam and to bring back the POW's and the recoverable MIA's, period, We will work to preserve and to enhance the faithfulness of this nation to its Constitutional principles and its highest ideals and, in so doing, we will not shut the door on essential changes.

The Leadership needs your cooperation; your understanding and your support. Ideas are welcomed, equally, from every Member of this Conference, the oldest no less than the youngest, the most junior no less than the most senior. Together, we are here, in the last analysis, with only one mandate—to serve the people of the several states and the nation. With your help, the Leadership will strive to carry out that mandate in full.

EXHIBIT 3

STATUS OF PRIORITY LEGISLATION, 1973

Measures Pocket Vetoed in 1972:

1. Airport Development—Public Law 93–44.
2. National Cemeteries—Public Law 93–43.
3. Older Americans—Public Law 93–29.
4. Public Works-Economic Development—Public Law 93–46.
5. Veterans Medical Care—Public Law 93–82.
6. Vocational Rehabilitation—Public Law 93–102.
7. Labor-HEW Appropriations—Public Law 93–192.
8. Flood Control—Cleared for President.
9. National Institute on Aging—Passed Senate 7–9–73.
10. Mining Research Centers—Passed Senate as amendment to S. 425 (Stripmining).
11. Environmental Data Centers—Hearings held.
12. Deputy U.S. Marshals Pay—Pending in Committee.

Measures which Died in Senate-House Conference in 1972:

13. Highways Funds—Public Law 93–87.
14. War Powers—Public Law 93–148.
15. Minimum Wage Increase—Vetoed by President; sustained by House.
16. Welfare Reform—In conference.
17. Anti-Aircraft Hijacking—Passed Senate 2–21–73.

Measures which Passed Senate Only in 1972:

18. Health Maintenance Organization—Cleared for President.
19. Fair Credit Billing—Passed Senate 7–23–73.
20. Land Use Policy—Passed Senate 6–21–73.
21. Compensation for Victims of Crime—Passed Senate 4–3–73.
22. Consumer Product Warranties—Passed Senate 9–12–73.
23. Comprehensive Housing—Markup in progress.

Measures which Passed House only in 1972:

24. Strip Mining Controls—Passed Senate 10–9–73.
25. Consumer Protection Agency—Hearings held.

Major Measures Reported to Senate in 1972:

26. No Fault Insurance—To be reported from Judiciary by 2–15–74.
27. Pension Reform—Passed Senate 9–19–73.
28. National Health Insurance—Pending in Committee.

EXHIBIT 4

RESOLUTIONS PASSED BY SENATE DEMOCRATIC POLICY COMMITTEE AND/OR DEMOCRATIC CONFERENCE, 1973

1. Resolution on Priorities in Considering Legislation.
2. Resolution on Refusal of Cabinet and Other Officials to Testify Before Senate Committees.
3. Resolution on Open Hearings.
4. Resolution on Executive Privilege.
5. Resolution on Media Programming, Planning, and News Reporting.
6. Tunney Resolution Urging Budget Committee to Set a Spending Ceiling.
7. Resolution on Freedom of the Press and Revealing Sources.
8. Resolution on the Energy Crisis.
9. Resolution on Campaign Expenditures Ceiling.
10. Resolution on Congressional Access to Data on the Federal Budget and Other Fiscal Information.
11. Resolution on Reduction of Military Expenditures Abroad.
12. Resolution on Spending Ceiling.
13. Pastore Resolution on Closing of Foreign and Domestic Military Bases.
14. Kennedy Resolution on Assistance to Those Affected by Base Closings.
15. Resolution on Cambodia.
16. Resolution on Public Financing of Federal Elections.
17. Resolution on Economic Stabilization.
18. Resolution on Federal Employment and Annuity Practices.

EXHIBIT 5

COMMITTEE ON APPROPRIATIONS—U.S. SENATE, BUDGET ESTIMATES OF NEW BUDGET AUTHORITY CONSIDERED IN APPROPRIATION BILLS, 93D CONG. ,1ST SESS. AS OF DEC. 21, 1973

Does not include any "back-door" type budget or spending authority in legislative bills; or any permanent (Federal or trust) authority, under earlier or "permanent" law, without further or annual action by the Congress]

11. Defense (H.R. 11575)	77, 250, 723, 000	74, 101, 309, 000	−3, 149, 414, 000	77, 250, 723, 000	73, 264, 627, 000	−3, 986, 096, 000	73, 714, 930, 000	−3, 535, 793, 000
12. Foreign Assistance (H.R. 11771)	6, 866, 567, 000	5, 833, 912, 000	−1, 032, 655, 000	6, 992, 917, 000	5, 593, 440, 000	−1, 399, 477, 000	5, 780, 434, 000	−1, 212, 483, 000
13. Military Construction (H.R. 11459)	2, 944, 900, 000	2, 609, 090, 000	−335, 810, 000	2, 944, 900, 000	2, 670, 972, 000	−273, 928, 000	2, 658, 861, 000	−281, 039, 000
14. Special Resolution, Gold Devaluation (H.J. Res. 748)	2, 250, 000, 000	2, 203, 000, 000	−47, 000, 000	2, 250, 000, 000	2, 203, 000, 000	−47, 000, 000	2, 203, 000, 000	−47, 000, 000
15. Supplemental (H.R. 11576)	1, 428, 790, 218	1, 433, 035, 718	+4, 245, 500	1, 534, 183, 886	1, 888, 425, 386	+354, 241, 500	1, 703, 125, 386	+168, 941, 500
Total, bills for fiscal 1974, to date	170, 642, 138, 513	167, 128, 116, 464	−3, 514, 022, 049	171, 804, 643, 751	169, 183, 455, 857	−2, 621, 187, 894	168, 784, 407, 525	−3, 020, 236, 226
B. Bills for fiscal 1973:								
1. Urgent Supplemental (H.J. Res. 496)	1, 366, 800, 000	1, 368, 600, 000	+1, 800, 000	1, 366, 800, 000	1, 368, 600, 000	+1, 800, 000	1, 368, 600, 000	+1, 800, 000
2. 2d Supplemental (H.R. 7447, vetoed)	[3, 162, 880, 434]	[2, 855, 542, 209]	[−307, 338, 225]	[3, 607, 105, 504]	[3, 699, 239, 279]	[+92, 133, 775]	[3, 362, 845, 279]	[−244, 260, 225
3. 2d Supplemental (H.R. 9055)	3, 607, 105, 504	3, 362, 845, 279	−244, 260, 225	3, 607, 105, 504	3, 362, 845, 279	−244, 260, 225	3, 362, 845, 279	−244, 260, 225
Total, bills for fiscal 1973	4, 973, 905, 504	4, 731, 445, 279	−242, 460, 225	4, 973, 905, 504	4, 731, 445, 279	−242, 460, 225	4, 731, 445, 279	−242, 460, 225
C. Totals for the session, to date	175, 616, 044, 017	171, 859, 561, 743	−3, 756, 482, 274	176, 778, 549, 255	173, 914, 901, 136	−2, 863, 648, 119	173, 515, 852, 804	−3, 262, 696. 451

[1] The budget for 1974, as submitted Jan. 29, 1973, tentatively estimated total new budget authority for 1974 at $288,029,000,000 gross ($256,761,000,000 net of some $31,268,000,000 interfund and intragovernmental transactions and certain so-called proprietary receipts handled as offsets for budget summary purposes only). Of this total, an estimated $146,477,000,000 does not require current action by Congress; it involves so-called permanent appropriations such as interest, and various trust funds, already provided for in other basic laws. The remainder, $172,820,000,000 is for consideration at this session (mostly in the appropriation bills) except for increased pay costs which will be considered at the 2d session of the 93d Congress. About $8,600,000,000 of the $172,820,000,000 was shown in the January budget as being "for later transmittal" for supplemental requirements under present law, new legislation, and allowances for contingencies and civilian pay rasies, and $49,534,408 of the remainder requires legislative reauthorization, through various authorization bills or where the authorization expires periodically.

[2] Includes $90,360,000 in advance 1975 appropriations.

AGRICULTURE

Agriculture and Consumer Protection Act

Amends the Agricultural Act of 1970 and extends, in general, the present farm program, with the following and other provisions.

Target Prices—

Establishes for the 1974 through 1977 crops a new "target price" method of price-support payments for wheat, feed grains (corn, grain sorghums, and, if designated by the Secretary of Agriculture, barley), and cotton on all allotted acres using an established price, which is also the "target price" for the first two years of the program, and results in a target price of $2.05 per bushel for wheat, $1.38 per bushel for corn (with reasonable rates to be set for grain sorghums, and if designated, barley, in relation to the rate of corn), and 38 cents per pound for cotton for the 1974 and 1975 crops, with future target prices to be set by evaluating an established price in subsequent years and increasing or decreasing it to reflect changes in prices paid as shown by an index of production costs (production items, interest, taxes, and farm wage rates) published by the Department of Agriculture; provides under this method of payment, that a producer will receive a payment equal to the difference between the target price and the average price received by farmers the first 5 months of the marketing year or the loan level, with no payment to the producer if market prices are higher than or equal the target price, instead of, as at present, for wheat, payments on the domestic allotment only, and not on the export allotment, of the difference between the average market price for the first 5 months of the marketing year and 100 percent of parity, but not less than 75 percent of parity; for corn, payment of the difference between such average market price and the greater of $1.35 per bushel or 70 percent of parity, with a guarantee of 100 percent of parity on one-half the domestic allotment; for cotton, payment of the difference between such average market price and 35 cents per pound or 65 percent of parity adjusted according to the national base acreage allotment, including a minimum payment of 15 cents per pound whatever the market price;

Other provisions—

Changes the present $55,000 per crop limitation on wheat, feed grains, and cotton to $20,000 per farmer applicable to income supplement payments only;

Suspends the wheat marketing certificate collections from processors on July 1, 1973; extends the suspension of wheat marketing quotas through 1977; provides for payments to farmers in the case of a natural disaster or other circumstances beyond a farmer's control that prevent the planting or harvesting of crops; provides for a cost-sharing program to eradicate the boll weevil or other cotton insect;

Continues the dairy indemnity program; increases the minimum dairy support price on manufactured milk to 80 percent of parity for the balance of this marketing year and for the next marketing year, which ends March 31, 1975;

Continues the wool program; provides forestry incentives for small farmer forest owners; extends and expands the food stamp program;

Provides, regarding the rural environmental conservation program, a permanent requirement for 3, 5, 10, and 25 year contracts, and perpetual easements to carry out the purposes of the rural environmental assistance program (REAP), Great Plains, and water bank programs; provides 50 percent cost-sharing for rural firefighting equipment;

Provides that the Secretary of Agriculture shall establish a disaster reserve of inventories not to exceed 75 million bushels of wheat, feed grains, and soybeans for alleviating distress caused by a natural disaster; provides that the President shall make appropriate adjustments in the maximum price which may be charged under the provisions of Executive Order 11723, dated June 13, 1973, or subsequent order, for any agricultural products (at any point in the distribution chain) as to which the Secretary of Agriculture certifies to the President that the supply of the product will be reduced to unacceptably low levels as a result of any price control or freeze order or regulation and that alternative means are not available;

And contains other provisions. S. 1888. Public Law 93–86, approved August 10, 1973. (181)

Agriculture and Consumer Protection Act amendment

Amends, because of the administrative difficulties involved, the provisions of the Agricultural Act of 1949 as amended by the Agricultural and Consumer Protection Act of 1973 which provides for payments to farmers in the event of crop failures with respect to crops planted in lieu of wheat or feed grains, to limit the payments for such crops to soybeans, cotton, corn, grain sorghums, barley and wheat. S. 2491. Public Law 93– , approved 1973. (VV)

Census of agriculture

Directs the Secretary of Commerce to submit, within 30 days of enactment of this resolution, an estimate of funds needed to carry out the statutory mandate for conducting a census of agriculture in 1974; requires that funds heretofore or hereafter appropriated for planning the 1974 census shall be utilized for such purpose; and directs the Secretary to take the necessary action to insure that the data acquired from the 1974 census be made public through appropriate publication as soon as practicable following the taking of such census. S.J. Res. 95. P/S June 22, 1973. (VV)

Emergency tobacco allotment transfer

Authorizes the Secretary of Agriculture to permit the transfer of tobacco acreage allotments across county lines in 1973 in 12 named counties in Georgia and South Carolina if he finds that one of the counties has suffered an overall loss of 10 percent or more in the number of acres of tobacco planted as a result of a natural disaster and that the lease will not impair the program and provides that the provisions of the act shall apply only to those farms which had suffered a loss of 30 percent or more in the number of acres of tobacco planted, in which case the transfer would have to be to a farm in the same or a nearby county within the State having an allotment for the same kind of tobacco. H.R. 9172. Public Law 93–80, approved August 1, 1973. (VV)

Feed grain set-aside program

Increases the payment rate for option B participants in the feed grain program to assure option B participants the same parity guarantees which option A participants now have. S. 1572. P/S April 18, 1973. (VV)

Forest Service personnel level

Requires that the number of permanent, full-time Forest Service employees employed by the Department of Agriculture to carry out the activities of the Forest Service be maintained at not less than 450 above the June 30, 1973 ceiling of 20,404 permanent, full-time personnel. S.J. Res. 134. P/S July 20, 1973. (VV)

Indian River grapefruit promotion

Permits marketing orders for Florida Indian River grapefruit to provide for crediting a handler's direct market promotion expenditures against his assessment for market promotion expenses under the order. S. 1945.

Public Law 93–230, approved December 29, 1973. (VV)

Public utility cooperatives

Makes the farmer voting control requirement for borrowers from banks for cooperatives 60 percent in the case of public utility cooperatives (instead of 80 percent as now required for all cooperatives) thus encouraging rural electrics to utilize private sources for some of their financial needs. S. 2150. P/S December 14, 1973. (VV)

Rice allotment transfer

Permits rice growers who are unable to plant part or all of their farm acreage allotments in 1973 because of flood or other natural disaster to transfer their allotments to other farms in the same or adjoining county. H.R. 6883. Public Law 93–27, approved April 27, 1973. (VV)

Rural development loans

Authorizes the Secretary of Agriculture to make loans from the Rural Development Fund, for periods of up to 5 years, to private profit or nonprofit Rural Loan Investment Companies (RLIC) organized solely to purchase, service, sell, or otherwise deal in loans made private financial agencies (which could borrow up to 20 times its net assets from the Rural Development Insurance Fund at the same interest rate the Treasury Department must pay to borrow funds) for purposes for which loans can be made under the Consolidated Farm and Rural Development Act. S. 2470. P/S October 9, 1973. (VV)

Rural electric and telephone loans

Amends the Rural Electrification Act of 1936, as amended, to provide a revised program for rural electric and telephone loans; creates a revolving fund with unlimited borrowing authority, for the making of insured rural electric and telephone loans; provides that such insured loans will bear interest at five percent to two percent, with two percent loans to be available only if the borrower (a) has an average subscriber density of two or fewer per mile; or (b) has an average gross revenue of at least $450 below the average (for electric borrowers) or $300 below the average (for telephone borrowers); or, if the Administrator of the Rural Electrification Administration, in his sole discretion, finds that (c) the borrower has experienced extenuating circumstances or severe hardship; or (d) cannot produce net income before interest of at least 150 percent of its total interest requirements and still meet the objectives of the act; or (e) cannot without an excessive rate increase provide service consistent with the act; authorizes the guarantee of rural electric and telephone loans made by other lenders with interest at rates agreed upon by borrowers and lenders; requires loans made for rural electric and telephone facilities under the Consolidated Farm and Rural Development Act to be refinanced under the Rural Electrification Act of 1936 at the request of the borrower; provides that financial transactions of the Fund in interim notes and insured obligations (section 304), insured loans and advances (section 305(a)), and guaranteed loans (section 306) are not to be included in the totals of the budget of the United States and shall be exempt from any limitation imposed by statute on expenditures and net lending (budget outlays) of the United States; and contains other provisions. S. 394, Public Law 93–32, approved May 11, 1973. (20, 118)

Rural environmental assistance — REAP — and water bank programs

Requires the Secretary of Agriculture (1) to make payments under the Rural environmental assistance program (REAP) in the full amount appropriated therefor, and (2) to enter into agreements under the water bank program to the full extent permitted by available appropriations therefor. H.R. 2107. P/H February 7, 1973; P/S amended March 1, 1973; Conference report filed. (26) (Comparable provisions are contained in the Agriculture and Consumer Protection Act which became Public Law 93–86.)

* *Rural water and waste disposal grant program*

Requires the Secretary of Agriculture to make grants in the full amounts appropriated for the Farmers Home Administration water and waste disposal grant program which was terminated by the Department of Agriculture effective January 1, 1973. H. R. 3298. Vetoed April 5, 1973. House sustained veto April 10, 1973. (55)

Tung nut price support

Terminates, effective with the 1977 crop, the requirement that tung nuts be supported at from 60 to 90 percent of parity. H.R. 2303. Public Law 93– , approved 1973. (VV)

Wheat referendum

Permits the wheat marketing quota referendum with respect to the national marketing quota for the 1974 crop (which, since the Agricultural Act of 1970 extends only to the 1973 crop, otherwise would be required to be held no later than August 1, 1973, for the 1974 crop) to be deferred until the earlier of October 15, 1974, or 30 days after the adjournment of the 1st session of the 93d Congress, thereby permitting Congress a further opportunity to develop new legislation. S. 1938. Public Law 93–68, approved July 10, 1973. (VV)

Woodsy owl

Authorizes the Secretary of Agriculture to establish and collect use or royalty fees for the manufacture, reproduction, or use of the character and name, "Woodsy Owl," and the associated slogan "Give a Hoot, Don't Pollute," originated by the Forest Service; and contains other provisions. S. 1585. P/S June 14, 1973. (VV)

APPROPRIATIONS—1973

Further continuing appropriations

Extends the existing continuing resolution (Public Law 92–334) from February 28, 1973, to June 30, 1973, at the annual funding level, to provide further continuing appropriations for the activities covered by the Foreign Assistance and Related Programs Appropriation Act, the Departments of Labor and Health, Education, and Welfare, and Related Agencies Appropriation Act, neither of which have yet been enacted, and authorizes $6,224,000 for the American Revolution Bicentennial Commission; requires the President to submit periodic reports on impoundments to Congress; and contains other provisions. H.J. Res. 345. Public Law 93–9, approved March 8, 1973. (VV)

**Second supplemental appropriations*

Makes supplemental appropriations for the fiscal year ending June 30, 1973, in the amount of $3,362,845,279 for the following: Agriculture-Environmental and Consumer Protection; Defense; District of Columbia; Foreign Operations; Housing and Urban Development, Space, Science, and Veterans'; Interior and Related Agencies; Labor, and Health, Education, and Welfare; Legislative; Public Works; State, Justice, Commerce, and Judiciary; Transportation; Treasury, Postal Service, and General Government; and Claims and Judgments; prohibits the expenditure of funds appropriated in this act to aid or assist in the reconstruction of North Vietnam; provides that no funds may be transferred on or after the effective date of this act under the authority of section 735 of the Department of Defense Appropriations Act, 1973, to support directly or indirectly U.S. combat activities in, over or from off the shores of Cambodia or in or over Laos by U.S. forces; and provides that "none of the funds herein appropriated under this Act or heretofore appropriated under any other Act may be expended to support directly or indirectly combat activities in, over or from off the shores of Cambodia or in or over Laos by U.S. forces;" prohibits the use of any appropriation contained in this or any other act for publicity or propaganda purposes for the preparation, distribution, or use of any kit, pamphlet, booklet, publication, radio, television, or film presentation designed to support or defeat legislation pending before the Congress except in presentation to the Congress itself; and contains other provisions. H.R. 7447. Vetoed June 27, 1973. House sustained veto June 27, 1973. (155, 218)

Contains identical sums and provisions for the various items of the several departments and agencies as in the vetoed bill; provides that no funds appropriated in this act shall be expended to aid or assist in the reconstruction of the Democratic Republic of Vietnam (North Vietnam); provides that none of the funds herein appropriated under this act may be expended to support directly or indirectly combat activities in or over Cambodia, Laos, North and South Vietnam or off the shores of Cambodia, Laos, North and South Vietnam by United States forces, and after August 15, 1973, no other funds heretofore appropriated under any other act may be expended for such purpose; and contains other provisions. H.R. 9055. Public Law 93–50, approved July 1, 1973. (254)

Urgent supplemental appropriations

Appropriates $1,368,600,000 for supplemental appropriations for fiscal year 1973 for the Civil Aeronautics Board, the Veterans Administration, the Department of Health, Education, and Welfare, and the General Services Administration, of which $122.1 million is for the basic educational opportunity grant program, $210.3 million for the supplemental educational opportunity grant program, $270.2 million for the college work-study program, and $269.4 for the direct student loan program under the Department of Health, Education, and Welfare, and provides additional funding for fiscal year 1973 to schools in Federally impacted areas. H.J. Res. 496. Public Law 93–25, approved April 26, 1973. (100)

APPROPRIATIONS—1974

Agriculture-environmental and consumer protection

Appropriates a total of $9,927,667,000 new obligational authority for fiscal year 1974 of which $5,088,0568,000 is for agricultural programs, $394,322,000 for rural development programs, $1,062,177,000 for environmental programs, and $3,382,600,000 for consumer programs. H.R. 8619. Public Law 93–135, approved October 24, 1973. (245)

Continuing appropriations

Makes continuing appropriations to avoid interruption of continuing government functions until: (a) the enactment into law of an appropriation for any project or activity provided for in this joint resolution; or (b) enactment of the applicable appropriation act by both Houses without any provision for such project or activity; or (c) September 30, 1973, whichever first occurs; provides that new obligational authority under this act to carry out the Foreign Assistance Act of 1961, as amended, and the Foreign Military Sales Act, as amended, shall not exceed an annual rate of $2.2 billion, and shall not be funded at a rate exceeding one quarter of such annual rate; provides that, notwithstanding any other provision of law, on or after August 15, 1973, no funds herein or heretofore appropriated may be obligated or expended to finance directly or indirectly combat activities by United States military forces in or over or from off the shores of North Vietnam, South Vietnam, Laos or Cambodia; provides that, unless specifically authorized by Congress, none of the funds herein appropriated under this joint resolution or heretofore appropriated under any other act may be expanded for the purpose of providing assistance in the reconstruction or rehabilitation of the Democratic Republic of Vietnam (North Vietnam); and contains other provisions. H.J. Res. 636. Public Law 93–52, approved July 1, 1973. (253)

Extends the Continuing Resolution, Public Law 93–52, making futher continuing appropriations for fiscal year 1974, from September 30 to October 11, 1973. H.J. Res. 753. Public Law 93–118, approved October 4, 1973. (VV) This measure is superseded by Public Law 93–124.

Extends the Continuing Resolution, Public Law 93–52, making further continuing appropriations for fiscal year 1974, until the sine-die adjournment of the first session of this Congress, and supersedes H.J. Res. 753 which temporarily extends the date of Public Law 93–52 from September 30 to October 11, 1973; provides that none of the funds made available by this Act shall be used by the Cost of Living Council to formulate or carry out a program which discriminates among petroleum marketers in the method of establishing prices for petroleum products; exempts the Export-Import Bank from the requirement that the funding rate for activities covered by the Foreign Assistance Appropriation Bill shall not exceed one quarter of the annual rate as provided by the joint resolution; and provides that no State in the aggregate will receive less than 90 percent of the amounts it received in fiscal year 1972 for grants to local educational agencies, and that no local educational agency shall receive less than 90 percent nor more than 115 percent of what it received in fiscal year 1973. H.J. Res. 727. Public Law 93–124, approved October 16, 1973. (446, 454)

Defense

Appropriates $73,714,930,000 in new budget obligational authority for fiscal year 1974 for the various military departments and other activities of the Department of Defense, H.R. 11575. Public Law 93–238 approved January 2, 1974. (560)

Departments of State, Justice, and Commerce, the Judiciary, and related agencies

Appropriates $4,466,012,000 for fiscal year 1974 for the Departments of State, Justice, and Commerce, the Judiciary, and related agencies; and contains other provisions. H.R. 8916. Public Law 93–162, approved November 27, 1973. (385,464)

District of Columbia

Appropriates for the District of Columbia a total of $417,717,000 in Federal funds of which $187,450,000 represents the Federal payment to the District, and $954,731,000 in District of Columbia funds for fiscal year 1974. H.R. 8658. Public Law 93–91, approved August 14, 1973. (302)

Foreign assistance

Appropriates $5,475,068,000 for foreign assistance and related programs for fiscal years 1973 and 1974, including Foreign Assistance Act Activities, Foreign Military Credit Sales, Emergency Security and Disaster Relief Assistance and the Export-Import Bank. H.R. 11771. Public Law 93–240, approved January 2, 1974. (567)

Housing and Urban Development, Space, Science, Veterans, and certain other independent agencies

Appropriates $19,056,500,000 for the Department of Housing and Urban Development, Space, Science, Veterans, and certain other independent executive agencies, boards, commissions, corporations, and offices for fiscal year 1974. H.R. 8825. Public Law 93–137, approved October 26, 1973. (371)

Interior and related agencies

Appropriates $2,443,137,200 in new budget obligational authority for fiscal year 1974 for the Department of the Interior and related agencies including the U.S. Forest Service. H.R. 8917. Public Law 93–120, approved October 4, 1973. (350)

Labor, and Health, Education, and Welfare, and related agencies

Appropriates $32,926,796,000 for the Departments of Labor, and Health, Education, and Welfare and related agencies for fiscal year 1974 ($787,690,000 for the Department of Labor; $31,589,369,000 for the Department of Health, Education, and Welfare, and $549,737,000 for related agencies). H.R. 8877. Public Law 93–192, approved December 18, 1973. (447, 540)

Legislative branch

Appropriates a total of $605,189,933 in new budget obligational authority for the Legislative Branch for fiscal year 1974. H.R. 6691. Public Law 93–145, approved November 1, 1973. (300)

Military construction

Appropriates $2,658,861,000 for military construction for the Department of Defense for fiscal year 1974. H.R. 11459. Public Law 93–194, approved December 20, 1973. (494, 546)

Par value modification

Appropriates such sums as may be necessary, but not to exceed $2,203,000,000, to enable the Secretary of the Treasury to carry out section 3 of the Par Value Modification Act (Public Law 92–268), as amended, which directs the Secretary to maintain the value, in terms of gold, of United States dollars contributed to the International Monetary Fund, the International Bank for Reconstruction and Development, the International Development Association, the Inter-American Development Bank and the Asian Development Bank. H.J. Res. 748. Public Law 93–142, approved October 26, 1973. (VV)

Public Works for Water and Power Development and Atomic Energy Commission

Appropriates $4,749,403,000 in new budget obligational authority for fiscal year 1974 for Public Works for Water and Power Development, including the Corps of Engineers—Civil, the Bureau of Reclamation, the Bonneville Power Administration and other power agencies of the Department of the Interior, the Appalachian Regional Development Commission, the Federal Power Commission, the Tennessee Valley Authority, the Atomic Energy Commission, and related independent agencies and commissions. H.R. 8947. Public Law 93–97, approved August 16, 1973. (305)

Supplemental

Appropriates $1,703,125,386 in supplemental appropriations for fiscal year 1974. H.R. 11576. Public Law 93–245, approved January 3, 1974. (555)

Transportation and related agencies

Appropriates $2,898,466,006 in new budget obligational authority for fiscal year 1974 for the Department of Transportation including: the Coast Guard, Federal Aviation, Federal Highway, National Highway Traffic Safety, Federal Railroad, and Urban Mass Transportation Administrations, and the St. Lawrence Seaway Development Corporation, and for related agencies: the National Transportation Safety Board, Civil Aeronautics Board, Interstate Commerce Commission, Panama Canal, and $90 million advanced appropriations for fiscal year 1975 for Washington Metropolitan Area Transit Authority. H.R. 8760. Public Law 93–98, approved August 16, 1973. (336)

Treasury, Postal Service, and general government

Appropriates a total of $5,233,189,000 for fiscal year 1974 for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies. H.R. 9590. Public Law 93–143, approved October 30, 1973. (365)

CONGRESS

Access to information

Assures Congress the full and prompt production of information its committees seek from the executive branch in the exercise of its constitutional functions by establishing ground rules for the legislative and executive branches to observe over any future disagreements over the availability to Congress of information held by executive officials. S. Con. Res. 30. Senate adopted December 18, 1973. (VV)

Adds a new part to the Legislative Reorganization Act of 1970 which establishes by statute the duty of Federal officials and employees to produce information requested by Congress or any of its committees unless they are instructed by the President in writing not to do so and permits congressional determination as to the necessity of such information despite such a Presidential instruction; authorizes the committee chairmen to issue subpenas to compel the production of the information and in the event of noncompliance with such subpenas and subject to the approval of their respective Houses of Congress, to bring civil actions in the United States District Court for the District of Columbia which is authorized to enforce the subpenas by a mandatory injunction or other appropriate order, to modify the subpenas or set them aside entirely. S. 2432. P/S December 18, 1973. (VV)

Budget message, economic report, and impounded funds

Extends to January 29, 1973, the time for the President to submit to Congress the budget for fiscal year 1974; extends to January 31, 1973, the time for transmittal of the economic report; extends the time for the Joint Economic Committee to file its report on the President's economic report not later than March 10, 1973; and requires the President to transmit to Congress by February 10, 1973, a report with respect to all funds impounded from October 27, 1972, and before January 29, 1973 and from July 1, 1972, and before October 27, 1972. H.J. Res. 1. Public Law 93–1, approved January 19, 1973. (VV)

Committee meetings—Rule XXV

Amends Senate rule XXV to provide that meetings for the transaction of business of each standing committe of the Senate shall be open to the public, except during closed sessions for marking up bills, for voting, or when the committee by majority vote orders a closed session: Provided that any such closed session may be open to the public, if the committee by rule or majority vote so determines. S. Res. 69. Senate adopted March 6, 1973. (28)

Congressional and Supreme Court pages

Provides for replacement of the existing Congressional and Supreme Court page corps with an older group of pages (18 to 21 years of age) who would not require the afterhours supervision many feel is necessary for the younger pages; repeals the authority in existing law for the construction of a residential page classroom and dormitory building; and contains other provisions. S. 2067. P/S July 12, 1973. (VV)

Congressional franking reform

Establishes for the first time criteria for what is and is not frankable in the use of franking privilege by the Vice-President, Members of Congress, and Congressional officials under the definition of official business as passed by the Congress in Title 30, U.S.C.; establishes a House Commission on Congressional Mailing Standards and empowers the Senate Select Committee on Standards and Conduct with original jurisdiction to provide guidance, assistance, advice and counsel to Members of the House and Senators, respectively through advisory opinions or consultations in connection with the mailing of franked mail and provides a remedial action for willful violations of any of the franking requirements; and contains other provisions. H.R. 3180. Public Law 93–191, approved December 18, 1973. (VV)

Federal Constitutional Convention Procedures Act

Provides the procedural machinery necessary to effectuate that part of article V of the Constitution of the United States which authorizes a convention called by the States to propose specific amendments to the Constitution; clarifies Congressional authority with regard to the specific procedures for a constitutional convention called by the States; and contains other provisions. S. 1272. P/S July 9, 1973. (VV)

Federal Impoundment Control Procedures Act

Requires, in Title I of the bill, Impoundment Control Procedures, that the President, when a budget authority is impounded, shall send a special message to the Congress specifying the amount of the budget authority impounded, the reasons therefore, and to the extent practicable, the estimated fiscal, economic, and budgetary effect thereof; provides that, unless Congress acts to ratify the impoundment, or if its acts to disapprove it, by concurrent resolution within 60 days of continuous session after receipt of the message, that the obligation of the budget authority is mandatory and those funds may not be reimpounded; sets, in Title II of the bill, a ceiling of $268 billion on expenditures and net lending for fiscal year 1974; provides that the President shall reserve such amounts as may be necessary to keep within the ceiling, and that the reservations shall be made proportionately by functional category, and, where practicable, subfunctional category, as set out in the 1974 U.S. Budget in Brief, with the exception that no reservations shall be made from amounts available for interest, veterans' benefits and services, payments from social insurance trust funds, public assistance grants under Title IV of the Social Security Act, food stamps, military retirement pay, medicaid, and judicial salaries; and contains other provisions. S. 373. P/S May 10, 1973; P/H amended July 25, 1973; In conference. (126, 127)

Joint economic report—Extension

Extends from March 10, 1973, to April 1, 1973, the time for the Joint Economic Committee to submit its report on the President's Economic Report. H.J. Res. 299. Public Law 93–7, approved February 16, 1973. (VV)

Extends the time for the President to submit the 1974 Economic Report to the Congress to February 1, 1974, and the time for the Joint Economic Committee to submit its report on the President's 1974 Economic Report to the House and Senate to March 13, 1974. S.J. Res. 182. Public Law 93–235, approved January 2, 1974. (VV)

Rules of evidence—Congressional consideration

Provides that notwithstanding any other provisions of law, that the proposed Rules of Evidence for United States Courts and Magistrates, the Amendments to the Federal Rules for Civil Procedure, and the Amendments to the Federal Rules for Criminal Procedure which are contained in the orders entered by the Supreme Court on November 20, 1972, and December 18, 1972, and transmitted to Congress by the Chief Justice on February 5, 1973, shall have no force and effect except to the extent, and with such amendments, as they may be expressly approved by Act of Congress. S. 583. Public Law 93-12, approved March 30, 1973. (VV)

Secret Government documents

Establishes an ad hoc committee of the Senate to conduct a study and submit to the Senate by June 30, 1973, a report and recommendations on all questions relating to the secrecy, confidentiality, and classification of government documents committed to the Senate or any member thereof. S. Res. 13. Senate adopted January 9, 1973. (VV)

SENATE CONFIRMATION OF NOMINATIONS

Certain Federal offices

Requires that future appointments to fill vacancies in the offices of the head of the new Mining Enforcement and Safety Administration, the Director of the Bureau of Land Management, the National Park Service, and the Bureau of Outdoor Recreation, the Commissioner of Reclamation, and the Governor of American (Eastern) Samoa shall be made by the President by and with the advice and consent of the Senate and provides that such appointees shall serve at the pleasure of the President for a term of not to exceed 4 years subject to reappointment and confirmation. S. 1828. P/S July 25, 1973. (316)

Cost of Living Council

Requires that appointments to the Office of Director of the Cost of Living Council shall be made by the President by and with the advice and consent of the Senate. S. 421. P/S January 23, 1973. (VV)

Senate confirmation of nomination Executive Office appointees

Requires that appointments by the President to fill the offices of Executive Secretary of the National Security Council and the Executive Director of the Domestic Council, which are made after the effective date of this act, shall be subject to Senate confirmation, and provides that if the International Economic Policy Act of 1972 is extended beyond its present expiration date of June 30, 1973, the Executive Director of the Council on International Economic Policy also shall be appointed by and with the advice and consent of the Senate, and that no individual shall serve in that office after that date unless so appointed. S. 590. P/S May 9, 1973. (122)

Heads of executive departments

Provides that the head of any executive department as defined in 5 U.S.C. 101 (the Departments of State; Treasury; Defense; Justice; Interior; Agriculture; Commerce; Labor; Health, Education, and Welfare; Housing and Urban Development; and Transportation) shall serve for a term of 4 years, subject to Senate confirmation, beginning at noon on January 20 of the year in which the term of the President appointing such department head begins, except that (1) the term of the head of any executive department serving on the date of the enactment of this act shall begin on such date and expire at noon on January 20, 1977, and (2) a person appointed to fill a vacancy occurring prior to the expiration of the term for which his or her predecessor was appointed shall serve only for the unexpired portion of that term, thus requiring that Cabinet officials retained by a President serving a second term must be confirmed by the Senate prior to reappointment; provides that nothing in this act shall be construed to affect the power of the President to remove any department head; and contains other provisions. S. 755. P/S May 2, 1973. (106)

•Office of Management and Budget

Abolishes and reestablishes as new offices the offices of Director and Deputy Director of the Office of Management and Budget and provides that the offices shall be filled by the President, by and with the advice and consent of the Senate, with the provisions of this act to take effect 30 days after enactment. S. 518. Vetoed May 18, 1973; Senate overrode veto May 22, 1973; House sustained veto May 23, 1973. (6,144)

Amends the Budget and Accounting Act, 1921, to provide a 4 year term of office for the offices of Director and Deputy Director of the Office of Management and Budget beginning on January 20 of the year the President's term begins, except that the terms of the present incumbents shall expire January 20, 1977, and provides that an appointment made when a vacancy occurs before the expiration of the incumbent's term shall be made only for the unexpired portion of the term; requires that appointments by the President to fill the offices of Director and Deputy Director be subject to the advice and consent of the Senate; provides that this requirement is to become applicable to either office if the incumbents are reappointed or immediately after the individual holding the office ceases to hold the office; transfers from the President to the Office of Director, Office of Management and Budget, all of the functions which were vested by law in the Bureau of the Budget, and its Director, and transferred to the President by Reorganization Plan No. 2 of 1970; and contains other provisions. S. 37. P/S June 25, 1973; P/H amended December 17, 1973. (210)

Establishes a 4 year term of office for the offices of Director and Deputy Director of the Office of Management and Budget beginning on January 20 of the year the President's term begins, except that the terms of the present incumbents shall expire January 20, 1977, and provides that an appointment made when a vacancy occurs before the expiration of the incumbent's term shall be made only for the unexpired portion of the term; requires that appointments by the President to fill the offices of Director and Deputy Director be subject to the advice and consent of the Senate, and provides that this requirement is to become applicable to either office upon expiration of the term or immediately after the individual holding the office ceases to hold the office; requires that the Executive Director of the Domestic Council and the Executive Secretary of the National Security Council shall be appointed by the President by and with the advice and consent of the Senate, and provides that this requirement shall apply to appointments made to these offices after the date of enactment of this act. S. 2045. P/S June 25, 1973. (211)

U.S. Capitol Historical Society Study

Provides for a feasibility study for a sound and light performance system for the East Front of the National Capital and allows the United States, through the Capitol Buildings, Architect of the Capitol account, to accept gifts from the Historical Society. H.J. Res. 736. P/H December 3, 1973; P/S amended December 7, 1973. (VV)

• War Powers Act

Requires the President to consult with Congress before introducing U.S. Armed Forces into hostilities or into situations where imminent involvement in hostilities is clearly indicated; in the absence of a declaration of war, requires the President to submit within 48 hours to the Congress a report setting forth the circumstances necessitating the introduction of forces, the constitutional and legislative authority for such action, and the estimated scope and duration of the hostilities or involvement, such report to be made at least every six months; requires the President to terminate the use of the Armed Forces within 60 days after submission of the report to Congress unless the Congress (1) has declared war or has specifically authorized such use of the Armed Forces, (2) has extended by law the 60 day period, or (3) is physically unable to meet as a result of an armed attack; provides that the 60 day period may be extended for 30 days if the President determines and certifies in writing to Congress the need for the use of the forces in bringing about a prompt removal of the forces; provides that authority to introduce Armed Forces into hostilities or situations where involvement in hostilities is indicated shall not be inferred from any provision of law, including appropriations measures or treaties, unless such authority is specifically authorized; and contains other provisions, H.J. Res. 542. Vetoed October 24, 1973; House overrode veto November 7, 1973; Senate overrode veto November 7, 1973. Public Law 93-148, without approval November 7, 1973. (303,451,462)

CONSUMER AFFAIRS

Consumer product warranties

Sets forth, in title I, disclosure and designation standards for written warranties on each consumer product that costs the consumer more than $5; defines Federal contents standards for full warranties; provides meaningful consumer remedies for the breach of written warranty and written service contract obligations; in title II, improves the Federal Trade Commission's ability to deal with unfair consumer acts and practices affecting interstate commerce by granting the Commission the power to: (1) seek preliminary or permanent injunctions, (2) initiate actions in district courts seeking specific redress for consumers injured by unfair or deceptive practices, and (3) secure civil penalties for knowing violations of the FTC Act; in title III, requires the Board of Governors of the Federal Reserve System to issue regulations similar to those of the FTC proscribing unfair acts or practices of financial institutions unless the Board disagrees that such acts are unfair and publishes its findings in the Federal Register; and, in title IV, makes specific provisions for used car warranties. S. 356. P/S September 12, 1973. (VV)

Lead-based paint poisoning amendments

Amends the Lead-Based Paint Poisoning Act, Public Law 91-695, and authorizes therefor an annual appropriation of $63 million for each of fiscal years 1974 and 1975; expands the authority of the Secretary of Health, Education, and Welfare to make grants to local and State Government units for programs to detect and treat incidents of lead-based paint poisoning to include private, non-profit organizations; increases from 75 percent to 90 percent the Federal share for the cost of such programs; provides that no lead-based paint shall be applied to any toy, furniture, or cooking, drinking or eating utensil manufactured and distributed in interstate commerce after enactment of the act; provides that, effective January 1, 1974, that lead-based paint means any paint containing more than 6 one-hundreths of one percent lead, or, if after the study authorized by this act is completed, it is determined prior to December 31, 1974, that a 5 one hundredths of 1 percent level is safe, that level shall be used instead; and contains other provisions. S. 607. Public Law 93-151, approved November 9, 1973. (VV)

Meat and poultry inspection amendments

Amends the Federal Meat Inspection Act and the Poultry Products Inspection Act to increase (beginning fiscal year 1974) the maximum Federal contribution to the cost of any State meat or poultry inspection system from 50 to 80 percent, and provides that the total cost of any cooperative arrangement for meat or poultry inspection purposes to be contributed under the Talmadge-Aiken Act (Public Law 87-718) shall be equal to the highest percentage contributed to any State under either of these acts. S. 1021. P/S April 2, 1973. (73)

Motor vehicle defect remedy act

Amends the National Traffic and Motor Vehicle Safety Act by empowering the Secretary of Transportation to require that the manufacturer of a motor vehicle or an item of motor vehicle equipment (including tires) which contains a safety related defect or a failure to comply with a motor vehicle safety standard to remedy such defect or failure to comply without charge to the consumer; defines the administrative hearing procedure available to such manufacturer; provides for a procedure whereby the Secretary can act immediately to remove an obvious hazard by applying to a District Court for such temporary or permanent relief as may be necessary to protect the public; authorizes therefor an appropriation of not to exceed $46.773 million for fiscal year 1974; and contains other provisions. S. 355. P/S May 17, 1973. (VV)

Rabbit meat inspection

Makes rabbit meat inspection mandatory, at Federal cost, by extending the provisions of the Poultry Products Inspection Act to rabbits and rabbit products, and sets the effective date of the provisions of the bill at July 1, 1973. S. 43. P/S February 21, 1973. (VV)

Truth in Lending Act amendments (fair credit billing)

Amends the Truth in Lending Act to protect consumers against inaccurate and unfair billing practices; prohibits, in title I, The Fair Credit Billing Act, unfair credit billing practices including provisions relating to resolution of billing errors, regulation of credit reports, acknowledgement of billing inquiries, prompt crediting of payments, length of the billing period, use of cash discounts, and prohibition of offsetting a disputed bill from funds on deposit; contains, in title II, largely technical amendments to improve the administration of the Truth in Lending Act and includes a provision limiting a creditor's maximum liability in a class action suit brought under the act to $100,000 or 1 percent of the creditor's net worth, whichever is less; prohibits, in title III, The Equal Credit Opportunity Act, any creditor from discriminating against any person on account of sex or marital status in granting or denying credit, including all credit transactions, whether for consumer, business, or other purposes and includes cash loans, installment sales, mortgage loans and the opening or closing of a revolving charge account; and contains other provisions. S. 2101. P/S July 23, 1973. (311)

Wool Products Labeling Act amendments

Amends the Wool Products Labeling Act of 1939 by substituting the term "recycled wool" for the terms "reprocessed wool" and "reused wool" thus combining the terms into one definition for the term "recycled wool." S. 1816. P/S July 20, 1973. (VV)

CRIME-JUDICIARY

Amendments of 1973 to Federal laws relating to explosives

Amends section 845(a) of title 18 U.S.C. to entirely exempt commercially manufactured black powder, percussion caps, safety and pyrotechnic fuses, quills, quick and slow matches, and friction primers intended to be used solely for sporting, recreational or cultural purposes in antique firearms and certain antique devices from regulation under title XI of the Organized Crime Control Act of 1970 (P.L. 91–452) relating to explosives, and amends section 921(c)(4) of title 18 U.S.C. to add language exempting from the term "destructive device" in the Gun Control Act of 1968 (P.L. 90–618) antique devices such as small, muzzle-loading cannon used for recreational and cultural purposes. S. 1083. P/S July 13, 1973. (278)

Antitrust Procedures and Penalties Act

Changes certain specifics in the manner in which consent decrees in civil antitrust cases are formulated by providing that the district court shall make an independent determination as to whether or not the entry of a proposed consent decree is in the public interest as expressed by the antitrust laws by (1) encouraging additional comment by interested parties, (2) requiring that the Department of Justice file a public impact statement, and (3) requiring the defendent to disclose all communications made on behalf of the firm relating to the consent decree other than those made exclusively by counsel of record; increases the fines for criminal violations of the Sherman Act from $50,000 to $100,000 for individuals and $500,000 for corporations; amends the Expediting Act to require that final judgments and interlocutory orders in certain civil antitrust cases if appealed, be heard by the circuit courts of appeals; eliminates the provision that a three-judge court be impaneled in civil actions where the United States is the plaintiff under the Sherman or Clayton Act upon the filing by the Attorney General with the district court of a certificate that the cases are of general public importance; provides for direct appeal to the Supreme Court from final judgments of the district court only in cases certified by the district judge upon the application of either party to be of general public importance; and contains other provisions. S. 782. P/S July 18, 1973. (293)

Bankruptcy act amendments

Amends section 40b of the Bankruptcy Act (which prohibits salary increases for referees in bankruptcy from occurring more than once every two years) to place referees in bankruptcy on an equal basis with other judicial officers whose salary is determined by the Judicial Conference of the United States. H.R. 3490. Public Law 93–200, approved December 27, 1973. (VV)

Civil remedies for victims of racketeering activity and theft

Amends title 18 of the United States Code to strengthen civil remedies for victims of racketeering activity and provide a civil action for damages resulting from violations of section 659 title 18 of the United States Code, which realtes to crime involving property in interstate or foreign commerce. S. 13. P/S March 29, 1973. (VV)

Commission on bankruptcy laws

Requires the Commission on Bankruptcy Laws of the United States to submit a comprehensive report of its activities, including its recommendations, to the President, the Chief Justice of the United States, and the Congress prior to July 31, 1973; provides for termination of the Commission 30 days after the submission of its final report; and provides that appropriated funds shall remain available until expended or until the Commission ceases to exist. H.J. Res. 499. Public Law 93–56, approved July 1, 1973. (VV)

Community supervision and services act

Authorizes a program of community supervision and services for selected criminal defendants in the Federal court system, to divert them to a program of intensive treatment and supervision prior to trial. S. 798. P/S October 4, 1973. (VV)

Crime Control Act

Extends the Department of Justice Law Enforcement Administration (LEAA) program for three years and authorizes appropriations therefor of $1 billion for each of fiscal years 1974 and 1975, and $1.25 billion for fiscal year 1976; vests all policy and administrative authority in the Administrator and replaces the two Associate Administrators by a Deputy Administrator for Policy Development and a Deputy for Administrative Management; strengthens Federal supervision over the States' planning process; requires a program for the improvement of juvenile justice as part of the comprehensive State plan; increases the minimum planning allocation to each State from $100,000 to $200,000 to assure the continued flow of adequate funds to cities; requires regional planning boards to include a majority of local elected officials; places time limits on plan approval in order to expedite fund flow; revises the matching fund requirements to eliminate non-cash matching; reduces the non-Federal matching share from 25 to 10 percent with the new 90 to 10 matching ratio to apply to all grants requiring matching-planning, action, and corrections improvements grants; requires, with a limited transition time for waiver, States to contribute in the aggregate, at least 50 percent of the local share of the costs of both planning and action programs by increasing the State "buy-in" for action grants from 25 to 50 percent, and from 0 to 50 percent for planning grants, and adds "buy-in" provisions regarding corrections grants; retains and strengthens the law enforcement education program; and contains other provisions. H.R. 8152. Public Law 93–83, approved August 6, 1973. (VV)

Debt collection

Expands the prohibitions of section 712, title 18, U.S.C., to cover all persons attempting to collect any debt through the misuse of official sounding names in order to convey the false impression that an agency of the Federal Government is involved in the collection, without regard for whether, as required by the present provision, such person is "engaged in the business of collecting or aiding in the collection" of debts. H.R. 689. Public Law 93–147, approved November 3, 1973. (VV)

Disqualification of judges

Makes the statutory grounds for disqualification of a judge in a particular case conform generally with the recently adopted canon of the Code of Judicial Conduct which relates to disqualification of judges for bias, prejudice or conflict of interest. S. 1064. P/S October 4, 1973. (VV)

Federal Tort Claims Act and reorganization plan No. 2 of 1973 amendments

Amends reorganization plan No. 2 of 1973, which became effective on July 1, 1973, to nullify the provisions providing for the transfer of immigration inspectors from the Immigration and Naturalization Service of the Department of Justice to the Customs Bureau of the Department of the Treasury and provides a remedy against the United States for the intentional torts of its investigative and law enforcement officers thus allowing innocent victims subjected to unlawful raids or abuses to have a cause of action against the individual Federal agents and the Federal Government. H.R. 8245. P/H July 17, 1973; P/S amended November 30, 1973 and December 3, 1973. (VV)

Inmate furloughs

Broadens provisions of law to allow prison inmate furloughs for the purpose of establishing or reestablishing family and community ties, or for any other significant reason consistent with the public interest. H.R. 7352. Public Law 93–209, approved December 28, 1973. (VV)

Judicial review of decisions of the Interstate Commerce Commission

Modernize the judicial machinery for review of orders of the Interstate Commerce Commission by placing review in the United States courts of appeals pursuant to the Judicial Review Act of 1950. S. 663. P/S November 16, 1973. (VV)

Methadone Diversion Control Act

Amends the Comprehensive Drug Abuse Prevention and Control Act of 1970, Public Law 91–513, commonly called the Controlled Substances Act, to provide new authority for the regulation of the use of narcotic drugs in the treatment of narcotic addicts; provides definitions of "maintenance treatment" to enable the Attorney General to establish more specific and comprehensive regulatory control over the handling of narcotic drugs used in the treatment of narcotic addicts; requires practitioners who dispense or administer narcotic drugs in the treatment of narcotic addicts to obtain a special registration predicated on the approval of treatment standards by the Secretary of Health, Education, and Welfare and the approval of security standards by the Attorney General; enables the Attorney General to deny, revoke, or suspend the special registration for failure to comply with the new standards; makes the full range of civil remedies and felony penalties available under the Controlled Substances Act applicable to practitioners who provide narcotic drugs without obtaining the special registration, in violation of the registration, or after revocation of the registration; and requires the special registered practitioners to keep complete records of narcotic drugs directly administered to patients in their presence. S. 1115. P/S June 8, 1973. (VV)

Public Safety Officers' Benefits Act

Amends the Omnibus Crime Control and Safe Streets Act of 1968 to provide a gratuity of $50,000 to the dependents of public safety officers killed in the line of duty where the crime or death occurs on or after October 17, 1972, and authorizes the Law Enforcement Assistance Administration to make an interim payment, not to exceed $3,000, to an entitled dependent when it is determined such person is eligible to receive the gratuity under the provisions of this act. S. 15. P/S March 29, 1973. (VV)

Public Safety Officers' Group Life Insurance Act

Amends the Omnibus Crime Control and Safe Streets Act of 1968 to establish a means of meeting the financial needs of public safety officers or their surviving dependents through group life, accidental death, and dismemberment insurance (the amount of coverage to be based on individual salary with a minimum coverage of $10,000 and a maximum coverage of $32,000) and to assist State and local governments to provide such insurance. S. 33. P/S March 29, 1973. (VV)

Revision of the Jurisdiction of Three-Judge Courts

Amends sections 2281, 2282, 2284, and 2403 of title 28, United States Code, to eliminate the requirement for special three-judge courts in cases seeking to enjoin the enforcement of State or Federal laws on the grounds of unconstitutionality; provides for the retention of three-judge courts when otherwise required by act of Congress or in any case involving apportionment of congressional districts or the apportionment of any statewide legislative body; clarifies the composition and procedure of three-judge courts in cases where they will continue to be required; and insures the right of States to intervene in cases seeking to enjoin State laws on the ground of unconstitutionality. S. 271. P/S July 14, 1973. (VV)

Runaway Youth Act

Authorizes the Secretary of Health, Education, and Welfare to make grants and to provide technical assistance to localities and nonprofit private agencies for the purpose of developing local facilities to deal primarily with the immediate needs of runaways in a manner which operates outside the law enforcement structure and juvenile justice system which are designed to shelter young people for a short period of time, rather than on a long term basis, and supply such medical care and counseling as needed, and are equipped to provide a program of field counseling for the runaway and his family after the runaway has moved to permanent living facilities; authorizes funds to conduct research on the scope of the runaway problem in this country focusing on but not limited to "the age, sex, socioeconomic background of the runaway children, the places from which and to which children run, and the relationship between running away and other illegal behavior;" authorizes therefor the appropriation of $10 million for each of fiscal years 1974, 1975, and 1976; and contains other provisions. S. 645. P/S June 8, 1973. (VV)

Territorial franchises in the soft drink industry

Amends the Federal Trade Commission Act and the anti-trust laws to clarify the circumstances under which exclusive territorial licenses to manufacture, distribute, and sell trademarked soft drink products shall not be deemed unlawful; provides that if the requirements of this bill are met, relevant territorial provisions in which a trademark owner grants licensees the right to manufacture, distribute, and sell trademarked soft drink products in specifically defined geographic areas are not only lawful but enforceable through judicial proceedings; makes lawful license provisions which have the effect of precluding indirect evasions of the license agreement, thus protecting the exclusive territorial rights of one licensee from direct or indirect sales by the licensor or any of its other licensees into his defined geographic area so long as there is substantial and effective competition within his territory; and contains other provisions. S. 978. P/S June 11, 1973. (VV)

Victims of Crime Act

Amends the Omnibus Crime Control and Safe Streets Act of 1968 to establish a direct Federal crime compensation program for territorial areas of direct Federal concern to provide a means of meeting the financial needs of the innocent victims of violent crime, intervenors acting to prevent the commission of a crime or assisting in the apprehension of suspected criminals, or their surviving dependents; establishes an independent board to administer the program; defines the acts or omissions considered to be crimes for purposes of the program; sets the amount of $100 as the minimum amount for which a claim may be filed and the amount of $50,000 as the maximum amount of a claim; creates a Criminal Victim Indemnity Fund in the Treasury to consist of moneys from (1) criminal fines paid in the various courts of the United States, (2) additional appropriated funds, and (3) contributed funds; authorizes the appropriation of $5 million for fiscal year 1973 and, until specific appropriations are made, authorizes the use of funds appropriated for the Department of Justice or the Law Enforcement Assistance Administration; and authorizes the use, through the established mechanisms of the Law Enforcement Assistance Administration, of LEAA grant funds on the usual 75–25 percent basis to assist substantially comparable State programs. S. 300. P/S March 29, 1973. (VV)

Victims of Crime Act (Omnibus)

Establishes a Federal crime compensation program for territorial areas of direct Federal concern for innocent victims of violent crime, intervenors, or their surviving dependents, and provides for Federal assistance to substantially comparable State programs; provides group life insurance coverage for public safety officers or their surviving dependents, and assistance to States and local governments to provide such insurance; provides gratuities for dependents of public safety officers killed in the line of duty; strengthens civil remedies for victims of racketeering activity; provides for additional sentences for persons convicted in a United States court of a felony threatening life or property when a firearm is used or carried during the commission of the felony; provides for additional sentencing of persons as a public menace who are convicted of the manufacture, distribution, or dispensing of one-tenth or more of pure heroin or morphine, who are not addicts at the time of the offense; and contains other provisions. S. 800. P/S April 3, 1973. (78)

DEFENSE

Armed Forces Enlisted Personnel Bonus Revision Act

Amends chapter 5 of title 37, U.S.C., to revise the special pay bonus structure relating to members of the Armed Forces, and provides for the appointment of female candidates to the U.S. military academies. S. 2771. P/S December 20, 1973. (VV)

Coast Guard authorization, 1974

Authorizes a total appropriation of $109,-239,000 for the Coast Guard for fiscal year 1974 for the procurement of vessels and related pollution abatement programs and an additional helicopter and helicopter search and rescue station, and for the construction of shore and offshore establishments and bridge alterations; continues the LORAN–A electron navigation system and authorizes the replacement of equipment for the LORAN–C and approves expansion of the LORAN–C West Coast Project; authorizes an end year strength of 37,607 for active duty personnel; and contains other provisions. H.R. 5383. Public Law 93–65, approved July 9, 1973. (VV)

Defense Production Act amendment

Terminates the borrowing authority mechanism by which all program operations under the Defense Production Act have been financed since the initiation of the original 1950 act and substitutes conventional appropriation methods for any future operations. S. 1980. P/S August 2, 1973. (VV)

Dependents Assistance Act of 1950 Amendments

Makes permanent in the law certain provisions of the Dependents Assistance Act of 1950, as amended, which expire July 1, 1973, as follows: (1) continues the current monthly rates for quarters allowances for junior enlisted members, (2) removes the provision in title 37, U.S.C., that junior enlisted members are considered at all times to be without dependents, (3) removes the requirement that junior enlisted members must allot part of their pay before they can receive the higher quarters allowance authorized for members having dependents, (4) provides secretarial authority to grant hardship discharges for certain enlisted members with dependents, (5) establishes procedures for determining dependency of parents, (6) provides that aviation cadets receive the same quarters allowance as an E–4, and (7) provides that monthly quarters allowance to dependents of members shall not, for such period as the Secretary may prescribe, be contingent on a pay status thus permitting payment when an enlisted member is AWOL or incarcerated by a foreign government prior to trial; authorizes a basic allowance for quarters for junior enlisted members in the reserve and guard while on active duty for training for less than 30 days; repeals section 207 of the Career Compensation Act of 1949 which contains obsolete provisions regarding the reenlistment bonus; eliminates certain other provisions of law which are either obsolete or are covered elsewhere in existing law; extends for two years, to July 1, 1975, the authority to pay special pay to physicians, dentists, veterinarians, and optometrists; permits a member to claim as a dependent an unmarried, acknowledged, illegitimate child; extends for one year, to July 1, 1974, the bonus authority for certain enlistments in the combat arms of the armed forces; extends until December 31, 1973, the date after which members in the rank of colonel or equivalent (0–6), or above, in noncombat assignments are no longer entitled to flight pay; provides that the act shall become effective July 1, 1973; and contains other provisions. H.R. 8537. Public Law 93–64, approved July 9, 1973. (VV)

Disposals from national stockpiles

Authorizes the disposal from the national stockpile of various materials, as follows:

Abaca—at 25 million pounds. H.R. 4682. Public Law 93–48, approved June 22, 1973. (VV)

Aluminum—at 207,440 short tons. S. 2413. Public Law 93–220, approved December 28, 1973. (VV)

Copper—at 251,600 short tons. S. 2316. Public Law 93–215, approved December 28, 1973. (VV)

Molybdenum—at 36,500,000 pounds. S. 2551. Public Law 93–219, approved December 28, 1973. (VV)

Opium (Morphine Content)—at 65,700 pounds for immediate disposal. S. 2166. Public Law 93–218, approved December 28, 1973. (VV)

Sisal—at 100 million pounds. H.R. 4682. Public Law 93–48, approved June 22, 1973.

Silicon Carbide—at 196,500 short tons. S. 2493. Public Law 93–216, approved December 28, 1973. (VV)

Zinc—at 357,300 short tons. S. 2498. Public Law 93–212, approved December 28, 1973. (VV)

Junior Reserve Officer Training Corps program

Eliminates the present exclusion of females from the minimum number of 100 students necessary to maintain a Junior Reserve Officer Training Corps (ROTC) unit, permitting girls to be officially enrolled in the program. H.R. 8187. Public Law 93–165, approved November 29, 1973. (VV)

Medical officers pay structure

Increases monthly special pay for physicians (including Public Health Service officers) with two years active service from $150 to $350 a month; terminates the current continuation pay for physicians in pay grades below O–6 (colonel); and authorizes new bonuses, of up to $10,000 a year, for physicians in pay grades below O–6 for each year they agree to continue active service. S. 2770. P/S December 20, 1973. (VV)

Military construction authorization, 1974

Authorizes a total of $2,773,584,000 in new budget obligational authority for fiscal year 1974 for construction and other related authority for the military departments and the Office of the Secretary of Defense within and outside the United States, and authority for construction of facilities for the Reserve Components. S. 2408. Public Law 93–166, approved November 29, 1973. (467)

Military procurement authorization, 1974

Authorizes $21,299,520,000 for fiscal year 1974 for the procurement of aircraft, missiles, naval vessels, tracked combat vehicles, torpedoes, and other weapons, and research, development, test and evaluation for the Armed Forces, and to prescribe the authorized personnel strength for each active duty component and of the Selected Reserve of each reserve component of the Armed Forces, and the military training student loads; authorizes the end strength for active duty personnel for fiscal year 1974 at 2,190,000, a reduction of 43,000 persons; continues the authority for merging military assistance financing for South Vietnam and Laos with funding of the Department of Defense and authorizes therefor $1,126,000; requires an annual authorization by Congress of the number of civilians employed by the Department of Defense; prohibits direct or indirect use of funds for economic or military aid to North Vietnam; places a $25 million limitation on advance payment that may be made to a defense contractor without prior congressional approval; phases out the National Industrial Reserve and replaces it with the Defense Industrial Reserve which consolidates the National Industrial Equipment Reserve machine tools and the "Tools for Schools" lending program with the Defense Department's general reserve; calls on the President to seek, through appropriate bilateral and multilateral arrangement, payments to offset fully any balance-of-payment deficit incurred by the United States during fiscal year 1974 as a result of the deployment of forces in Europe to fulfill NATO commitments; prohibits procurement of other than American goods unless consideration has been given to labor-surplus areas, small businesses, U.S. balance of payments, cost of shipping, foreign duties and other related factors; authorizes the Secretary of Defense to assist the Department of Health, Education, and Welfare and the Department of Transportation in providing medical emergency helicopter transportation to civilians; extends the President's authority until December 31, 1975, to transfer to Israel by sale, credit sale, or guaranty aircraft and related equipment; provides for the continued operation, at the January 1, 1973, level, of the Public Health Service hospitals located at Seattle, Boston, San Francisco, Galveston, New Orleans, Baltimore, Staten Island, and Norfolk; and contains other provisions. H.R. 9286. Public Law 93–155, approved November 16, 1973. (436, 461)

Military training

Removes the four-year limitation on active duty service that a reserve officer may be required to perform upon completion of Army and Air Force sponsored educational programs. H.R. 10366. Public Law 93–169, approved November 29, 1973. (VV)

Promotions of military personnel in a missing status

Amends section 552(a) of title 37, United States Code, to insure that promotions of personnel carried as missing are valid for all purposes, including Federal benefits to survivors, even when the date of death of the missing member is later determined to have occurred prior to the promotion date. S. 1493. Public Law 93–26, approved April 27, 1973. (VV)

Sale of naval vessels stricken from the naval register

Amends section 7305 of title 10 United States Code, which permits the sale of naval vessels under strict advertised sealed bid procedures, to provide that no vessel of the Navy may be sold in any manner other than that provided by section 7305, or for less than its appraised value, unless the sale thereof is specifically authorized by law enacted after June 30, 1973, with the exception of a written agreement of sale entered into prior to June 30, 1973, thereby precluding the sale of stricken vessels, including those on loan which may be stricken from the Naval Register prior to loan expiration, to foreign nations under the general category of defense articles under Public Law 90–629, the Foreign Military Sales Act of 1946. S. 1773. P/S May 21, 1973; P/H amended December 17, 1973. (VV)

Service academy appointments

Authorizes the Delegates in Congress from Guam and the Virgin Islands each to nominate a cadet to each of the three service academies and permits each of the Service Secretaries to nominate one cadet to his respective service academy upon the recommendation of the Governor of American Samoa. H.R. 7582. Public Law 93–171, approved November 29, 1973. (VV)

Servicemen's benefits

Makes several amendments to the Internal Revenue Code of 1954 which are designed to continue the same tax treatment for servicemen and former servicemen under the Survivor Benefit Plan, P.L. 92–425, as formerly was available for them under the Retired Serviceman's Family Protection Plan in the case of annuities for surviving spouses or certain child beneficiaries, and contains other provisions. H.R. 4200. P/H June 27, 1973; P/S amended September 19, 1973. (391)

Travel expenses

Amends section 406b of title 37, United States Code, which provides permanently assigned crewmembers of the uniformed services with entitlement to round trip transportation between a home port where their dependents reside and the port at which the ship is being overhauled, to also include the port at which the ship is being inactivated. H.R. 10369. Public Law 93–170, approved November 29, 1973. (VV)

Allows more equity for travel and transportation allowances by permitting members of the uniformed services who accept consecutive overseas tours, one of which is in a restricted or "short tour" area, to be awarded travel and transportation allowances to their home of record between such tours. S. 1038. Public Law 93–213, approved December 28, 1973. (VV)

U.S. soldiers' and airmen's home

Amends an 1883 law to allow the Secretary of the Treasury to increase the amount of interest paid on the permanent fund of the United States Soldiers' and Airmen's Home making it equal to similarly situated trust funds. H.R. 8528. Public Law 93–185, approved December 15, 1973. (VV)

Women in the Coast Guard

Provides for integration of the Women's Reserve into the main Coast Guard Reserve thus giving women the capability to serve on both active and inactive duty as an integral part of the United States Coast Guard. H.R. 9575. Public Law 93–174, approved December 5, 1973. (VV)

DISTRICT OF COLUMBIA

Authorization for certain programs and activities

Provides legislative authorization for 26 activities, considered necessary for effective operation of the District of Columbia which were previously authorized only in the annual appropriations act; directs the District Government Public Service Commission to conduct a study of the adequacy of service and regulation of the taxicab industry in the District and to report their recommendations to Congress within 9 months; and contains other provisions. H.R. 8250. Public Law 93–140, approved October 26, 1973. (VV)

Child adoption subsidy payments

Authorizes the Commissioner of the District of Columbia to make adoption subsidy payments on behalf of children with special needs, where such children otherwise would in all likelihood go without adoption, and where the adoptive family is deemed appropriate in all respects but for its economic inability to meet the child's needs. H.R. 11238. Public Law 93–241, approved January 2, 1973. (VV)

District of Columbia Insurance Act

Establishes a post-assessment insurance guaranty fund to be known as the District of Columbia Insurance Guaranty Association, obligated, in the event an insurance company becomes insolvent, to pay all covered claims of policyholders; increases the amount of paid-up capital each domestic capital stock and mutual life insurance company is required to have in order to transact business in the District from $200,000 to $1 million, the amount of coverage available under group term life insurance to maximums of $100,000 or 300 percent of compensation and a minimum of $30,000, the amount of paid-up capital stock and surplus required of all stock companies licensed under the Fire and Casualty Act from $300,000 to $600,000, the surplus requirement for domestic mutual companies from $150,000 to $300,000, the amount for foreign mutuals from $200,000 to $400,000, and the amount of a contract with the District government for which a bond is required from $2,000 to $10,000; and contains other provisions. H.R. 4083. Public Law 93-89, approved August 14, 1973. (VV)

District of Columbia Rent Control Act

Authorizes the District of Columbia Council to adopt rules regarding maximum rental increases as it deems necessary and appropriate in the District of Columbia, and requires that the Council hold public hearings within 60 days after the enactment of this bill to determine whether such regulations are needed. H.R. 4771. Public 93-157, approved November 21, 1973. (VV)

District of Columbia Self-Government and Governmental Reorganization Act

Sets forth a charter which shall establish the means of governance of the District following its acceptance by a majority of the registered qualified electors of the District voting thereon in the charter referendum held with respect thereto; provides a charter amending procedure whereby the charter may be amended by an act passed by the Council and ratified by a majority of the registered qualified electors of the District voting in the referendum held for such ratification, which then must be ratified by both Houses of the Congress;

Establishes a Council of the District of Columbia whose 13 members shall be elected by the registered qualified electors of the District on a partisan basis, with the Chairman and 4 members to be elected at-large, and 8 members to be elected one each from the eight election wards established, from time to time, under the District of Columbia Election Act, with 4-year terms of office;

Vests the legislative power granted to the District by this Act in the Council, which shall have the authority to create, abolish, or organize any office, agency, department, or instrumentality of the government of the District and to define the powers, duties, and responsibilities thereof; provides that an act passed by the Council shall be presented to the Mayor, who shall, within ten calendar days (excluding Saturdays, Sundays, and holidays) either approve or disapprove such act, with such act to be effective if not disapproved within that time limit; provides that if an act is disapproved by the Major, the Council within 30 days, upon a two-thirds vote, may transmit the act to the President of the United States which shall become law within 30 days unless disapproved by the President; contains provisions for partial approval or disapproval by the Mayor; places certain limitations on the authority of the Council to pass any act;

Establishes the Office of Mayor of the District of Columbia who shall be elected by the registered qualified electors of the District; vests the judicial power of the District of Columbia Court of Appeals and the Superior Court of the District of Columbia; provides for submission of an annual budget by the Mayor to the Council, which shall by act adopt the annual budget which shall be submitted by the Mayor to the President for transmission to the Congress; establishes an Office of District of Columbia Auditor; gives the District certain borrowing authority; creates a District of Columbia Board of Elections;

Contains a reservation of congressional authority, whereby the Congress reserves the right, at any time, to exercise its constitutional authority as legislature for the District, by enacting legislation for the District on any subject, whether within or without the scope of legislative power granted to the Council by this Act, including legislation to amend or repeal any law in force in the District prior to or after enactment of this Act and any act passed by the Council;

And contains other provisions. S. 1435. Public Law 93-198, approved December 24, 1973. (573)

Dulles and Friendship Airports transit lines

Amends the National Capital Transportation Act of 1969 to authorize the Secretary of Transportation to make payments to the Transit Authority in such amounts as may be requisitioned by the Transit Authority to finance the cost of designing and other necessary planning for a rail rapid transit line in the median of the Dulles Airport road to the Dulles International Airport; provides for the Secretary to contract with the Transit Authority for a comprehensive study of the feasibility of extending a rail rapid transit line in the median of the Baltimore-Washington Expressway to the Friendship International Airport; and authorizes therefor an additional appropriation of not to exceed $10 million to carry out the purposes of this act. S. 2047. P/S July 9, 1973. (261)

Election law

Amends the District of Columbia Election Act as follows: changes the filing deadline for nominating petitions from 45 to 60 days before an election; eliminates the 90 day durational residency requirement for voting in the District; authorizes the Board of Elections to use volunteers in connection with voter registration drives and non-partisan voter education efforts; reduces the signature requirements for third party candidates for President from 5 percent to 1 percent of the registered voters; grants the Board of Elections the authority to enact rules and regulations to carry out responsibilities and duties given to it under the Election Act; extends the period of time provided under the Election Act for the Board of Elections to rule on the validity of challenged ballots from 7 to 10 days; provides for polls to open at 7:00 a.m. on election days; provides for the term of newly-elected members to the Board of Education to begin 30 days after the certification of their election; eliminates the run-off election for the Delegate to Congress; and contains other provisions. H.R. 6713. Public Law 93-92, approved August 14, 1973. (VV)

International center complex

Authorizes an additional appropriation of $2.2 million for improvements to the land (streets, sidewalks, water mains, etc.) which was transferred to the Department of State under the authority of Public Law 90-553, for use as sites for foreign chanceries. S. 1235. Public Law 93-40, approved June 12, 1973. (VV)

John F. Kennedy Center for the Performing Arts

Authorizes an appropriation of $2,400,000 for fiscal year 1974, and $2,500,000 for fiscal year 1975, to the Secretary of the Interior for maintenance, security, information, interpretation, janitorial, and all other non-performing arts functions of the John F. Kennedy Center for the Performing Arts. S. 1759. Public Law 93-67, approved July 10, 1973. (VV)

Minimum Wage Act for airline employees

Amends the District of Columbia Minimum Wage Act in order to allow airline employees to engage in the practice known as "day trading" which allows an employee to accumulate a number of successive days off, in addition to the two regular days off each week, by voluntarily working more than five days in succession. H.R. 10806. Public Law 93-223, approved December 29, 1973. (VV)

National Visitor Center Facilities Act of 1968 Amendments

Amends the National Visitor Center Facilities Act to authorize the appropriation of $8,680,000 for construction necessary to complete the alteration and renovation of Union Station as a National Visitor Center, and to direct that the Secretary of the Interior provide interpretive transportation services in or between the National Visitor Center, the Capitol Grounds, the Mall, th Ellipse, the John F. Kennedy Center for the Performing Arts, East and West Potomac Park, and such other visitor facilities as may be established pursuant to the National Visitor Center Facilities Act. H.R. 5857. Public Law 93-62, approved July 6, 1973. (VV)

Robert F. Kennedy Memorial Stadium

Amends section 8 of the Public Buildings Act of 1959 to authorize the Armory Board to borrow $1.5 million to increase the seating capacity of the Robert F. Kennedy Memorial Stadium by up to 8,000 seats for football games and causes 50 percent of the revenues derived from such seats to be the sole security for any loan that the Armory Board might receive. H.R. 6330. Public Law 93-72, approved July 10, 1973. (VV)

Southeastern University

Reaffirms and makes clear the independence and non-profit status of Southeastern University. S. 389. P/S November 28, 1973.

Taxability of insurance and bank holding company dividends

Amends the existing District of Columbia tax laws to provide with respect to all taxable years ending after December 31, 1973, that dividends and interest received by a corporation from an insurance company, bank, and other savings institution subject to the 2 percent net premium tax imposed by Section 6 of Title II of the District of Columbia Revenue Act of 1947 (D.C. Code, Title 47, Sec. 1806), shall not, when paid to the parent corporation, be considered as income from sources within the District, and thus shall not be subject to the District of Columbia income tax; and exempts the Mayor, and members of the city council of the District or the Chairman of the Council of the District as established by the District of Columbia Self Government and Governmental Reorganization Act from the provisions of the Hatch Act (7324(a)(2), U.S.C.). H.R. 6186. P/H November 26, 1973; P/S amended December 14, 1973; House agreed to Senate amendments with an amendment December 20, 1973; Senate asked for conference. (VV)

Usury law amendment

Provides the District of Columbia Council with authority to amend certain existing laws in the District of Columbia relating to usury, and permits the Capital Yacht Club of the District of Columbia to borrow money without regard to the usury laws of the District. H.R. 6758. Public Law 93-229, approved December 29, 1973. (VV).

ECONOMY-FINANCE

Aluminum penny

Authorizes the Secretary of the Treasury, when he determines that the use of copper in the one-cent piece is no longer practicable, to change the alloy to not less than 96 percent aluminum and such other metals as he shall determine, and to prescribe the weight thereof. S. 2795. P/S December 14, 1973. (VV)

American Revolution bicentennial coins

Authorizes the Treasury to change the design on the reverse side of the dollar, half dollar and quarter dollar coins minted on or after July 4, 1975, to commemorate the Bicentennial of the American Revolution and directs that all such coins minted between July 4, 1975, and January 1, 1977, shall bear the date "1776-1976" in place of the date of coinage and all such coins minted thereafter the date "1776-1976" in addition to the date of coinage. S. 1141. Public Law 93-127, approved October 18, 1973. (VV)

Ceilings on deposit interest rates

Extends from June 1, 1973, until August 1, 1974, the authority of the Federal Bank Regulatory Agencies to establish flexible ceilings on the rate of interest payable on time and savings deposits by Commercial Banks, Mutual Savings Banks, and Savings and Loan Associations. S.J. Res. 128. Public Law 92–63, approved July 6, 1973. (VV)

Duty suspensions

Caprolactam Monomer in Water Solution

Retroactively extends from December 31, 1972, to December 31, 1973, the temporary suspension of duty on imports of caprolactam monomer in water solution, and contains other provisions. H.R. 6394. Public Law 93–79, approved July 30, 1973. (VV)

Copper

Reinstitutes a suspension of the import duty on certain forms of copper for 1 year, to June 30, 1974, and establishes the "peril point" below which the duty suspension becomes inapplicable at the domestic price of 51 cents per pound. H.R. 2323. Public Law 93–77, approved July 20, 1973. (VV)

Dyeing and Tanning Materials

Reinstates the temporary suspension of duties on imports of certain dyeing and tanning materials including logwood to September 30, 1975, and provides that the duty suspension shall apply to all entries after September 30, 1972, the date on which the previous suspension of duties terminated. H.R. 3630. Public Law 93–101, approved August 16, 1973. (VV)

Istle Fiber and End of Freeze on Agricultural Products

Continues the existing suspension of duty on certain istle to September 5, 1975; provides that the President shall make appropriate adjustments in the maximum price which may be charged under Executive Order 11723, June 13, 1973, for any agricultural commodity (at any point in the distribution chain) which the Secretary of Agriculture certifies will be reduced to unacceptably low levels of supply as a result of the freeze and that alternative means for increasing the supply are not available. H.R. 2261. P/H June 27, 1973; P/S amended June 30, 1973. (VV)

Manganese Ore

Continues for a 3-year period through June 30, 1976, the existing suspension of duty on certain manganese ore which is principally used for metallurgical purposes in the production of steel. H.R. 6676. Public Law 93–99, approved August 16, 1973. (VV)

Metal Scrap

Continues for an additional 2 years, to July 1, 1975, the temporary suspension of the duties on certain metal waste and scrap, principally such scrap as iron and steel, aluminum, magnesium, nickel, and nickel alloys, as provided for by item 911.12 of the Tariff Schedules. H.R. 2324. Public Law 93–78, approved July 30, 1973. (VV)

East-West trade policy resolution

Affirms the Congress' general support for increased commercial and non-commercial relations with the nonmarket economy countries, principally the Union of Soviet Socialist Republics, the People's Republic of China, and Eastern Europe. S.J. Res. 131. P/S June 30, 1973. (VV)

Economic Stabilization Act Amendments

Extends for 1 year, to April 30, 1974, the Economic Stabilization Act of 1970 which authorized the President to issue such orders and regulations as he may deem appropriate to stabilize prices, rents, wages, and salaries; gives the President authority to establish, after public hearings, priorities of use and an allocation system of supplies of petroleum products, including crude oil, in order to meet essential needs in various sections of the country and to prevent anticompetitive effects which could develop from shortages of petroleum products; exempts workers earning less than $3.50 an hour from wage controls; states as the intent of Congress that nothing in this act be construed to authorize or require the President to impound or withhold funds appropriated, authorized, or authorized to be obligated by the Congress; requires business enterprises required to make price reports to the Cost of Living Council (firms with annual sales or revenues of $250 million or more) to make public disclosure of reports, except for proprietary information or trade secrets, which cover periods during which the firm charges a price for a substantial product that is 1.5 percent over the price lawfully in effect for such product on January 10, 1973, or on the date 12 months preceding the end of such period, whichever is later; and contains other provisions. S. 398. Public Law 93–28, approved April 30, 1973. (53)

Federal financing bank

Provide for a Federal Financing Bank through which the marketing of Federal and federally assisted borrowing activities can be centralized; provides for advance submission of financing plans to the Secretary of the Treasury and for Treasury approval of the method and source of financing, timing, rates of interest, maturities, and all other financing terms and conditions of certain obligations issued or sold by Federal agencies and provides that (1) the prior approval requirement does not apply to obligations issued or sold pursuant to an Act of Congress which expressly prohibits any guarantee of such obligations by the U.S. (that is, obligations issued or sold by the Tennessee Valley Authority), and (2) obligations issued or sold by the Farmers Home Administration. H.R. 5874. Public Law 93–224, approved December 29, 1973. (VV)

Financial institution structure and regulation

Extends until December 31, 1974, the authority of the Board of Governors of the Federal Reserve System, the Board of Directors of the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board to regulate in a flexible manner the interest rates or dividends payable by insured banks on time and savings deposits and by members of the Federal Home Loan Bank system on deposits, shares, or withdrawable accounts; prohibits NOW accounts by which a depositor may remove funds from a savings account through the use of a negotiable order of withdrawal except that such accounts are permitted in the States of Massachusetts and New Hampshire, the only two States in which such accounts are presently being offered; amends the National Housing Act to place, in general, a statutory prohibition until June 30, 1974, on the approval by the Federal Home Loan Bank Board and the Federal Savings and Loan Insurance Corporation of conversions from the mutual to stock form by savings and loan associations whose accounts are or would become insured by the Corporation, permits Federal savings and loan associations and national banks to invest in State housing corporations incorporated in the State in which the association or bank is located; establishes a new procedure for payment by insured savings and loan associations of premiums into the reserve fund of the Corporation; and contains other provisions. H.R. 6370. Public Law 93–100, approved August 16, 1973. (VV)

Housing and urban development laws and authorities temporary extension

Extends the authority of the Secretary of Housing and Urban Development to carry out its basic housing and community development programs under the National Housing Act for 1 year, to June 30, 1974, and authorizes therefor an appropriation of $1.943 million; extends the Federal Housing Administration (FHA) insuring programs; provides continued authority for the Urban Renewal, Model Cities, Open Space, Neighborhood Facilities, Rehabilitation Loans, Comprehensive Planning and New Communities programs; extends the flexible interest rate authority of the Secretary, in consultation with the Administrator of the Veterans' Administration, to set interest rate ceilings for FHA mortgage insurance programs and VA guaranteed loans; expands protections for homebuyers by authorizing expenditures for the correction of defects in homes financed under certain FHA programs; assures that Federal housing assistance programs are carried out to the full extent authorized by the Congress; requires the Secretary in processing and approving applications for assistance to give priority to any State or unit or local government which is adversely affected by a reduction in the level of expenditure of employment at any Department of Defense installation; and contains other provisions. H.J. Res. 512. P/H May 21, 1973; P/S amended July 20, 1973; House recommitted conference report September 5, 1973. (304)

Provides for a temporary extension through October 1, 1973, of Farmers Home Administration insurance authority and the flexible interest rate authority under the rehabilitation loan authority under the Housing Act of 1964, which expired June 30, 1973, and provides for temporary waiver of certain limitations applicable to GNMA. S.J. Res. 144. Public Law 93–85, approved August 10, 1973. (VV)

Extends the authority of the Secretary of Housing and Urban Development to carry out its basic housing and community development programs under the National Housing Act to October 1, 1974; extends the Federal Housing Administration (FHA) insuring programs; provides continued authority for the Urban Renewal, Model Cities, Open Space, Neighborhood Facilities, Rehabilitation Loans, Comprehensive Planning and New Communities programs; extends the flexible interest rate authority of the Secretary to set interest rate ceilings for FHA mortgage insurance programs and VA guaranteed loans; requires the Secretary in processing and approving applications for assistance to give priority to any State or unit of local government which is adversely affected by a reduction in the level of expenditure of employment at any Department of Defense installation; and contains other provisions. H.J. Res. 719. Public Law 93–117, approved October 2, 1973. (VV)

Interest Equalization Tax Extension Act

Extends the application of the interest equalization tax for 15 months, to June 30, 1974; provides, with certain exceptions, that the interest equalization tax exclusion for stock or debt obligations issued by a less developed country corporation shall not apply to stock or debt obligations issued by a less-developed country shipping corporation after January 29, 1973; provides for an exclusion from the interest equalization tax for: original or new issues of stock or debt obligations; stock acquired by conversion of a debt obligation if no additional consideration is paid and the debt obligation itself qualifies for the exclusion; or for a debt obligation issued to refund or refinance an original or new issue which qualified for the exclusion, to finance direct investment in the United States except for the acquisition and exploitation of natural resources, subject to the foreign issuer or obligor agreeing to meet certain conditions with respect to that investment for a period of ten years; provides that a qualified lending or financing corporation, or a U.S. corporation engaged in a lending or financing business through offices located outside the United States, may use domestic source funds to lend for qualified export credit transactions or to buy goods made in the United States for leasing or sale outside of the United States; requires the Secretary of the Treasury to study the effect on international monetary stability of the Canadian exemption from the interest equalization tax and make a report to the Congress not later than September 30, 1973; and contains other provisions. H.R. 3577. Public Law 93-17, approved April 10, 1973. (VV)

Interest rates on time and savings deposits

Instructs the Secretary of the Treasury, the Board of Governors of the Federal Reserve System, the Board of Directors of the Federal Deposit Insurance Corporation, and the Federal Home Loan Bank Board to take action to limit the rates of interest on dividends which may be paid on time deposits of less than $100,000 by institutions regulated by them. S.J. Res. 160. Public Law 93-123, approved October 15, 1973. (VV)

National banks investment in agricultural credit corporations

Permits a National Bank to purchase for its own account a minority stock interest in an agricultural credit corporation providing the amount invested at any one time shall not exceed 20 percent of the bank's unimpaired capital and surplus. S. 1884. P/S June 28, 1973. (VV)

Par Value Modification Act amendments

Directs the Secretary of the Treasury to take the necessary steps to establish a new par value of the dollar of $1 equals 0.828948 Special Drawing Right (SDR) or the equivalent in terms of gold, $42.22 per fine troy ounce of gold, thus devaluating the U.S. dollar by 10 percent and changing the official price of gold from $38 to $42.22 per ounce; states it is the sense of Congress that the President shall take all appropriate action to expedite realization of the international monetary reform noted at the Smithsonian on December 18, 1971; legalizes private ownership of gold as of the date the President reports to Congress that elimination of regulation on private ownership will not adversely affect the international monetary position of the United States; directs the Secretary of the Treasury to require multinational corporations to submit reports of foreign currency transactions; and contains other provisions. H.R. 6912. Public Law 93-110, approved September 21, 1973. (83, 374)

Public debt limit; unemployment compensation; health extension; campaign checkoff

Continues the present debt limitation level of $465 billion by extending the current temporary debt limit of $65 billion from June 30, 1973, through November 30, 1973; extends unemployment insurance benefits in States whose rate of insured unemployment is at least 4.5 percent without regard to present eligibility requirements regarding the rate in the prior 2 years or whether 13 weeks have expired since the last State extended benefit period, until such time as the State's insured unemployment rate drops below 4 percent; extends for one year the authorization for project grants under the maternal and child health program scheduled to expire June 30, 1973, and provides for a transition in funding to a State-coordinated program; requires the presidential campaign checkoff provisions on the income tax return form to be placed in a non-partisan form on the front page of the return or by the side of the page where signature is required, and contains other provisions. H.R. 8410. Public Law 93-53, approved July 1, 1973. (242, 258)

Public debt limit extension

Raises the current temporary debt limit increase of $65 billion to $75.7 billion, with no change in the permanent debt limit of $400 billion, and extends the temporary limit from November 30, 1973, to June 30, 1974. H.R. 11104. Public Law 93-173, approved December 3, 1973. (506)

Purchase of U.S. obligations by Federal Reserve Banks

Extends from June 30, 1973, to November 1, 1973, the authority of Federal Reserve banks to purchase U.S. obligations directly from the Treasury. S. 1410. Public Law 93-93, approved August 14, 1973. (VV)

Extends from November 1, 1973, to July 1, 1974, the authority of the Federal Reserve banks to purchase U.S. obligations directly from the Treasury. S. 2556. P/S October 10, 1973. (VV)

Railroad Retirement Act Amendments

Simplifies administration of the social security minimum guaranty provision contained in section 3(e) of the Railroad Retirement Act by permitting the Board to disregard postretirement earnings for purposes of all guaranty provision calculations of an employee benefit; liberalizes the eligibility conditions for children's benefits under the act to conform with the liberalizations provided in such benefits under the Social Security Act by Public Law 92-603 whereby a survivor benefit will be paid as follows: after adoption by anyone, instead of only by a close relative; to a child for a disability which began before age 22 instead of age 18; to a student child after age 22 in some cases; to a dependent grandchild who is treated as a child of his grandparent; and extends kidney disease medicare coverage to railroad employees, their spouses, and their dependent children on the same basis as such coverage is now provided for persons insured under the Social Security Act. H.R. 7357. Public Law 93-58, approved July 6, 1973. (VV)

Securities laws amendments

Amends the Securities Exchange Act of 1934 to establish a clear, congressional policy that membership on national securities exchanges is not to be denied to finance institutions so long as brokerage commission rates on those exchanges remain fixed; also provides that at such time as commission rates become competitive (when national securities exchanges cease to maintain or enforce fixed rates of commission, or April 30, 1976, whichever is later) all members of national securities exchanges must cease executing exchange transactions for their affiliates and the institutional accounts which they manage, and would thus, upon the elimination of fixed commission rates, prohibit financial institutions and securities firms which manage institutional accounts from using exchange memberships for their own benefit or for the benefit of such accounts; provides for a two year transition period following the last date upon which a national securities exchange maintains or enforces fixed rates of commission or April 30, 1976, whichever is later, in order to allow exchange members relying upon the income from performing brokerage for managed institutional accounts to phase out this combination of functions; gives the Securities and Exchange Commission (SEC) the authority to regulate the manner in which members of national securities exchanges may trade from on or off the floor of an exchange for their own account and for the account of their affiliates, which, accordingly, will have the authority to control the trading of financial institutions, as long as it is not inconsistent with the purpose of this proposed legislation, which are exchange members during the period before the elimination of fixed commission rates; amends the Investment Company Act of 1940 and the Investment Advisers Act of 1940 to permit a mutual fund manager or investment adviser to cause a fund or client to pay commissions to a broker in excess of the commissions being charged by other brokers for effecting similar transactions, if that broker provides research services of value to the fund or client and the adviser makes appropriate disclosures concerning such payments, as the SEC may require; amends the Investment Company Act to remove the existing uncertainty as to the legality of the transfer for profit of a controlling interest in a mutual fund management company, and provides that a controlling interest in such a management company may be sold at a profit provided that for three years after the transaction at least 75 percent of the directors of the fund are independent of the new and old investment advisers, and that the transaction does not impose an "unfair burden," as defined, on the fund; and contains other provisions. S. 470. P/S June 18, 1973. (193)

Securities Processing Act

Amends the Securities Exchange Act of 1934, as amended, by vesting in the Securities and Exchange Commission (SEC) the power and the responsibility to direct the evolution of clearance and settlement methods employed by national securities associations and by broker-dealers engaged in interstate commerce; requires clearing agencies and securities depositories to register with and report to the SEC, and empowers the Commission to review and amend the rules of such entities; directs the Commission to proceed toward elimination, by December 31, 1976, of the negotiable stock certificate as a means of settlement in transactions between brokers and dealers, and to report to the Congress annually through 1976 on its progress, with any recommendations it might have for further legislation to eliminate the stock certificate; prohibits the imposition of State and local taxes in such a way as to inhibit unreasonably the development of an efficient national clearing and depository system; directs the Commission to consider the practice of registering securities in "street name" to determine whether such registration is consistent with the policies of the Securities and Exchange Act of 1934 and whether steps can be taken to facilitate communications between corporations and their shareholders while at the same time retaining the benefits of "street name" registration; requires registration and reporting by transfer agents; and contains other provisions. S. 2058. P/S August 1, 1973. (VV).

Social Security Amendments, Welfare Reform

Makes a number of major substantive changes in the Social Security Act that affect social security cash benefits, the supplemental security income program (SSI), social services, child welfare services, child support, aid to families with dependent children (AFDC), medicare and medicaid; establishes a new tax credit for low-income workers with children; and contains other provisions including:

Social Security Cash Benefits: certain changes in the amount and the time of automatic cost-of-living increases (which as originally authorized by Public Law 92-336, would be effective beginning January 1975 with, as further authorized by Public Law 93-66 (Vote No. 255), an early partial payment of this increase of 5.9 percent effective for June 1974), including the replacement of the 5.9 percent June 1974 increase with an 11 percent increase in two steps of 7 percent effective with the month of enactment, followed by a second increase, starting with June 1974, to bring the benefits up to 11 percent above the present level, thus increasing the regular minimum benefit from $84.50 to $90.50 and $93.80; the average old-age benefit payment from $166 to $178 per month and to $186; the average benefit for an aged couple from $276 to $296 to $310; and for aged widows from $157 to $169 to $177;

Special Minimum Social Security Benefits: provisions, in regard to the new special minimum benefit which was established by Public Law 93-66 for persons retiring after many years of covered employment at relatively low wages, raising the special minimum after 30 years of coverage from $170 to $182, effective the month of enactment and to $190 effective for June 1974, with, thereafter, the special minimum to be increased automatically as the cost of living rises;

Taxable Wage Base: the raising of the taxable wage base from $12,600 in 1974 to $13,-

200, with the wage base to increase automatically as wages rise as under present law, and new tax rates;

Tax Credit for Low-Income Workers with Families: the addition of a provision to the tax laws which provides that a low-income worker with one or more children is to receive a credit equal to a specified percentage of the combined employer-employee social security taxes generated by his employment if his wages do not exceed $4,000 (the percentage of social security taxes being the equivalent of 10 percent of wages);

Supplemental Security Income: certain changes in the SSI program, which becomes effective in January 1974, and, under present law, would provide Federal payments to assure the aged, blind, and disabled a monthly income of at least $130 ($195 for couples), with, under Public Law 93–66, an increase to $140 and $210 July 1974 including provision for a further increase to $146 and $219 effective July 1974;

Food Stamp Eligibility for SSI Recipients: a repeal of the prohibition against participation by SSI recipients in the food stamp program and transitional provisions for States which have already acted in this regard;

Social Services: conversion of the present law as it affects social services to a $2.5 billion social services revenue sharing program, effective November 1, 1973;

Child Welfare Services: authorization for a national adoption information exchange system; establishment by the States of programs of protective services to prevent child abuse and neglect;

Child Support: inclusion of provisions regarding matching funds and penalties for States in regard to programs for collection of support and establishment of paternity, with the basic responsibility remaining in the States;

AFDC: provisions for a pass-along of social security benefit increases; increases in the amount of earnings which may be disregarded for AFDC payments; reinstatement of the community work and training programs that existed prior to 1968 under the Social Security Act, with the setting of prohibitions against requiring certain persons, including any mother with a child under age 6, to participate and provision for protective payments for a child if a parent refuses to participate;

Medicare and Medicaid Amendments: provisions which treat the matter of medicaid eligibility for SSI recipients; make medicaid coverage mandatory for persons who receive a mandatory State supplemental payment only; expand benefits for occupational therapy; permit certain individuals who are not yet 65 (the age for medicare eligibility) to buy into medicare at cost; and

Miscellaneous: a prohibition on the use of Federal funds under title 19 of the Social Security Act (which provides grants to States for medical assistance programs for low-income people) for abortions; a prohibition on the export of materials used for the exploration and production of crude oil or refined petroleum products to any foreign country which prohibits the export of such products to the United States, or to any country which exports such products to that foreign country. H.R. 3153. P/H April 2, 1973; P/S amended November 30, 1973; In conference.

Social Security—SSI benefits increase

Increases by 7 percent the monthly social security benefit as of March, 1974 and by an additional 4 percent beginning June, 1974, to bring benefits up to 11 percent above the present payment; provides that automatic cost-of-living increases in the future will become effective for the month of June rather than for January; increases the present taxable wage base of $12,600 to $13,200 in 1974; increases the Supplemental Security Income (SSI) payments to the aged, blind, and disabled from $130 to $140 per month for an individual beginning January 1974 with a further increase to $146 in July, 1974; increases SSI payments to a couple from $195 to $210 in January, 1974 and to $219 in July, 1974; provides that SSI recipients will continue to be eligible to participate in the Food Stamp program until July 1, 1974; further suspends the implementation of the social services regulations issued by the Department of Health, Education, and Welfare until December 31, 1974; contains provisions regarding: eligibility of SSI recipients to participate in the Medicaid program, care facilities which do not meet Medicaid standards, any reimbursement of physical therapists under Medicare; permits, for a 90-day period, Federal matching of extended unemployment compensation benefits in any State whose insured unemployment rate exceeds 4 percent without regard to the present requirement that unemployment must be at least 20 percent higher in that state than it was in a comparable period in the two prior years; and contains other provisions. H.R. 11333. Public Law 93–223, approved December 31, 1973. (524)

EDUCATION

Education of the handicapped amendments

Extends the Education of the Handicapped Act (Public Law 91–230) for three years, through fiscal year 1976, and authorizes therefor a total appropriation of $643.7 million; adds four new leadership positions at the Bureau of Education for the Handicapped to assist the associate commissioner in carrying out his duties; continues the advisory committee through July 1, 1976, at an annual authorization of $100,000; makes grant authorizations for preschool and school programs to the States of $65 million for fiscal year 1974, $80 million for fiscal year 1975, and $100 million for fiscal year 1976; requires each State to set forth a plan of the procedures it will use to identify, locate and evaluate every handicapped child in that State, to submit the plan to the Commissioner of Education for approval by December 31, 1974, to consider any amendment to the State plan a required portion of the State plan after June 30, 1975, and to establish policies and procedures to protect the confidentiality of data and information collected by the State; provides that no State shall expend funds for doing the plan required unless that State receives an amount greater than the amount allotted to that State in fiscal year 1973 and raises the minimum each State may receive from $200,000 to $300,000, increases the maximum allowable funds for administration and planning from $100,000 to $200,000, and provides that unless the aggregate of the amounts allotted to the States in fiscal year 1974 is $45 million or more these provisions shall not apply; authorizes for the three year period a total of $48 million for deaf/blind centers and services, $75 million for early childhood education, $37 million for regional resource centers, $1.5 million for recruitment and information, $135 million for manpower and personnel training, $42 million for research in the education of the handicapped, $55 million for handicapped persons, and $27.5 million for special programs for children with specific learning disabilities; amends the Higher Education Act of 1965, as amended, by allowing an institution to be eligible for funds if 10 percent of its current undergraduate body is composed of GI bill trainees; provides an entitlement of not less than 90 percent of funds obtained in the preceeding year to local educational agencies which qualify for a phaseout of impact aid over a 5 year period under certain circumstances; and contains other provisions. S. 895. P/S June 25, 1973. (VV)

National commission on the financing of postsecondary education

Extends the authorization of the National Commission on the Financing of Postsecondary Education and changes the date on which it must make its final report from April 30, 1973; provides that if fiscal year 1973 appropriations are $385 million or less for the basic educational opportunity grant program that the basic grants shall be limited to full time freshman students. H.J. Res. 393. Public Law 93–35, approved May 16, 1973. (VV)

ELECTION REFORM

Federal Election Campaign Act Amendments

Repeals the equal time requirement of Section 315 of the Communications Act as it applies to elective Federal office; makes at least 15 minutes of free time available to each of the candidates, whoever he may be; repeals the existing limitation on media and telephone spending with a total limitation on all expenditures by or on behalf of a candidate for Federal elective office; places a ceiling of 10 cents in the primary and 15 cents in the general election, multiplied by the estimated population 18 years old or older in the Congressional district or the State, respectively; limits the expenditures by a Presidential candidate in any one State to the amount that a candidate for Senator from that State is entitled to spend; provides a floor as follows: permits expenditures of at least $175,000 (without regard to the amount reached by using the multiplication formula) for all Senatorial candidates, Delegate, Resident Commissioners, and candidates for the House of Representatives in States which are entitled to only one Representative and permits expenditures of $90,000 by candidates for the House of Representatives from a State entitled to more than one representative; places a limit of $3,000 on the amount that may be contributed to any candidate in any one year by any one contributor; places a limit of $25,000 in the aggregate on the amount which an individual may contribute to a political committee or on behalf of any candidate; places, except for the central campaign committee or the State campaign of a candidate, the national committee of a political party, or the Democratic or Republican Campaign Committees of the Senate or House of Representatives, a limit of $3,000 on the amount political committees may contribute to candidates for the Congress and for the Presidency; prohibits expenditures of over $1,000 by an independent individual on behalf of a candidate without certification by the candidate that the payment of that charge will not exceed the expenditure limitation for that candidate; creates a Federal Election Commission to administer and enforce the act; contains provisions for assistance to the States for voter registration; and contains other provisions. S. 372. P/S July 30, 1973. (344)

Federal Election Reform Commission

Establishes an independent commission, to be known as the Nonpartisan Commission on Federal Election Reform, to conduct an extensive and exhaustive study of the practices engaged in by political parties and individuals in the course of Federal political campaigns; to consider the advisability of changing the term of office of Members of the House of Representatives, or the Senate, or the President of the United States; to make recommendations for such legislation, constitutional amendment, or other reforms as its findings indicate, and in its judgment are desirable to revise and control the practices and procedures of political parties, organizations, and individuals participating in the Federal electoral process; and contains other provisions. S.J. Res. 110. P/S July 30, 1973. (VV)

Federal elections, date for

Sets a time for the holding of primary elections or nominating conventions for choosing candidates for election to the offices of U.S. Senator, Representative, Delegate, or Resident Commissioner by providing that they shall be held at any time during the period beginning on the first Tuesday in August; provides that a political party which nominates its candidate for election to the office of President by holding a national nominating convention shall hold that convention beginning on the third Monday of August of the year in which the President and Vice President are elected; makes election day, the first Tuesday next after the first Monday in November, in 1976, and every second year thereafter, a national holiday; provides that the act shall take effect on January 1, 1976; and contains other provisions. S. 343. P/S June 27, 1973. (229)

Presidential election campaign of 1972

Select Committee on Presidential Election Campaign Activities

Establishes a Select Committee on Presidential Campaign Activities, consisting of 7 members of the Senate, to conduct an investigation and study of the extent to which illegal, improper, or unethical activities were engaged in by persons acting either individually or in combination with others in the Presidential election campaign of 1972, and to determine whether in its judgment, there is a necessity to enact new legislation to safeguard the electoral process by which the President of the United States is elected; provides for the appointment, by the President of the Senate, of the 7 member panel to consist of 4 members of the majority party and 3 members of the minority party, upon the recommendation of their respective leaders; empowers the committee to make a complete investigation and study of matters relating to the breaking, entering, and bugging of the Democratic National Committee in the Watergate Building in Washington, D.C., and sets the time for the committee to file a report of its findings at not later than February 28, 1974; authorizes an amount not to exceed $500,000 for committee expenses to be paid from the contingent fund of the Senate; and contains other provisions. S. Res. 60. Senate adopted February 7, 1973. (13)

Amends S. Res. 60 to increase the authorization for expenses of the Select Committee on Presidential Election Campaign Activities through February 28, 1974, from $500,000 to $1 million of which not to exceed $40,000 shall be available for the procurement of the services of individual consultants or organizations thereof. S. Res. 132. Senate adopted June 25, 1973. (VV)

Authorizes the Chairman of the Select Committee on Presidential Election Campaign Activities, Senator Sam J. Ervin, to appear and testify before the U.S. district court for the Southern District of New York in a criminal case entitled United States of America vs. John N. Mitchell, Maurice Stans, and others, which involves a campaign contribtuion for $250,000 allegedly made by Robert Vesco. S. Res. 181. Senate adopted October 10, 1973. (VV)

Declares Senate approval of actions taken by the Select Committee on Presidential Elections Campaign Activities in the issuance on July 23, 1973, of two subpenas duces tecum to the President for the production of tapes and other materials as being fully authorized under the provisions of S. Res. 60, under which the committee was established. S. Res. 194. Senate adopted November 7, 1973. (VV)

Confers jurisdiction upon the District Court of the District of Columbia over any civil action brought by the Senate Select Committee on Presidential Campaign Activities to enforce or secure a declaration concerning the validity of any subpena or order issued by the Committee to the President, Vice President or any officer or employee of any department or agency of the United States for the production of any information, documents, taped recordings, or other materials relevant to matters the Committee is authorized to investigate as set forth in S. Res. 60. S. 2641. Public Law 93–190, without approval December 18, 1973. (VV)

Amends S. Res. 60 to provide an additional $500,000 for expenses of the Select Committee on Presidential Election Campaign Activities through February 28, 1973, of which not to exceed $50,000 shall be available for the procurement of the services of individual consultants or organizations. S. Res. 209. Senate adopted December 4, 1973. (VV)

Special Prosecutor for Watergate Investigation

States the sense of the Senate that the President should (1) immediately designate an individual of the highest character and integrity outside the Executive Branch to serve as special prosecutor for the government of the United States in any and all criminal investigations, indictments, and actions arising from any illegal activity by any persons, acting individually or in combination with others, in the Presidential election of 1972, or any campaign, canvass, or other activity related to it; (2) grant such special prosecutor all authority necessary and proper to the effective performance of his duties; and (3)submit the name of such designee to the Senate, requesting a resolution of approval thereof. S. Res. 105. Senate adopted May 1, 1973. (VV)

Watergate Grand Jury

Extends to June 4, 1974, the term of the grand jury of the United States District Court for the District of Columbia which was impaneled on June 5, 1972, and provides that the United States District Court for the District of Columbia, upon determination by that Court that the business of the grand jury will not be completed by that date, may extend its term for an additional 6 months, or if the court fails to extend the term, the Chief Judge of the United States Court of Appeals for the District of Columbia may extend its term for an additional 6 months on application by the grand jury upon the affirmative vote of a majority of its members that it has not completed its business, provided however, that in no event shall such term extend beyond December 4, 1974. H.R. 10937. Public Law 93–172, approved November 30, 1973. (VV)

Voter Registration Act

Establishes a voter registration system for Federal elections through the mail; establishes within the Bureau of the Census a Voter Registration Administration to administer the program with an Administrator and two Associates of different political parties to be appointed for terms of 4 years by the President and confirmed by the Senate; provides that an individual who qualifies to be a voter under State law and registers as provided under this act shall be entitled to vote in Federal elections in that State; requires States to provide for an applicant to register up to 30 days before a Federal election; provides that the Administration shall prepare voter registration forms designed to provide a simple method to register by mail to be distributed by the Postal Service at least every two years, which the applicant shall mail or deliver when completed to the local registration agent who must then notify the applicant of his acceptance or rejection; provides, in regard to prevention of fraudulent registration, that, in addition to appropriate action under State law, a State official shall notify the Administration which shall provide assistance, and that when a State official or the Administration determines that a pattern of fraudulent registration or attempted fraudulent registration exists, either may request the Attorney-General to bring a civil action, in any appropriate United States district court to enjoin fraudulent registration; includes criminal penalties for the falsifying of voter registration forms or voting more than once; provides for payment to the States of the cost, as determined by the Administration, of processing registration forms under this act, and provides financial assistance to States adopting this system for State elections; and contains other provisions. S. 352. P/S May 9, 1973. (121)

ENERGY

Alaska pipeline

Authorizes the Secretary of the Interior, or appropriate agency head, to grant rights-of-way through Federal lands (except for National Park System, Indian, and Outer Continental Shelf lands) for transportation by pipeline of oil, natural gas, synthetic liquid or gaseous fuels, or any refined product produced therefrom; provides that the width of a right-of-way shall not exceed 50 feet plus the ground occupied by the pipeline and related facilities unless the Secretary or the agency head determines otherwise; provides that a right-of-way may be supplemented by a temporary permit for the use of Federal lands in the vicinity of the pipeline with the approval of the Secretary or the agency head; contains provisions concerning the suspension or termination of a right-of-way, the reimbursement to the government for the use of the right-of-way at the fair market rental price as well as for certain other expenses, and the joint use of rights-of-way; provides that pipelines and related facilities be constructed, operated, and maintained as common carriers; prohibits the export of domestically produced oil unless the President certifies to Congress that such exports (1) will not diminish the total quantity or quality available to the United States, (2) are in the national interest, and (3) are in accord with the Export Administration Act of 1969 and Congress does not disapprove within 60 days;

Provides, in Title II, Trans-Alaska Pipeline Authorization Act, that the trans-Alaska oil pipeline, from the North Slope of Alaska to Port Valdez, be constructed promptly without further administrative or judicial delay under the National Environmental Policy Act of 1969 (NEPA); authorizes and directs the Secretary and other Federal officers to issue rights-of-way and other authorizations necessary for the construction and operation of the trans-Alaska oil pipeline system, including roads and airstrips, as described in the final Environmental Impact Statement issued on March 20, 1973; imposes strict liability of up to $50 million without regard to fault on the owners of the pipeline for any one incident on land; imposes strict liability on the owners of tankers carrying oil from the pipeline without regard to fault at $100 million for any one oil spill, with the owner and operator jointly liable for the first $14 million and the Trans-Alaskan Pipeline Liability Fund liable for the remainder up to $100 million; establishes the Trans-Alaskan Pipeline Liability Fund as a non-profit corporate entity to be administered by the holders of the trans-Alaska pipeline right-of-way, and provides that a fee of five cents per barrel will be collected from the owner of the oil at the time it is loaded on the vessel until $100 million has been accumulated in the Fund and resumed when the Fund falls below $100 million;

Authorizes the President to negotiate with Canada, in Title III, to determine its willingness to permit the construction of pipelines or other transportation systems across Canada for the transport of natural gas and oil from Alaska to U.S. markets, including the use of tankers by way of the Northwest Passage; requires the President to report to the House and Senate Interior and Insular Affairs Committees on the results of such negotiations;

Contains miscellaneous provisions, in Title IV, regarding vessel construction standards, vessel traffic control by the Coast Guard in the Valdez area, Senate confirmation of the Director of the Energy Policy Office and the head of the Mining Enforcement and Safety Administration except for the present appointees unless such nominations are disapproved by the Senate, exemption of the first sale of crude oil and natural gas from stripper wells (those wells with an average daily production of not more than 10 barrels) from price restraints and allocation programs, and advance payment to Alaska natives of $5 million every six months beginning fiscal year 1976; grants the Federal Trade Commission the requisite authority to insure prompt enforcement of the laws the Commission administers by granting statutory authority to directly enforce its subpenas and to seek preliminary injunctive relief to avoid unfair competitive practices; exempts independent Federal regulatory agencies from obtaining advance approval from the Office of Management and Budget before collecting information from ten or more persons and provides a procedure for advance review by the General Accounting Office to insure that such information requested is obtained with a minimum burden upon businesses or persons required to furnish such information;

And contains other provisions. S. 1081. Public Law 93–153, approved November 16, 1973. (289,463)

Daylight Saving Time Energy Conservation Act

Seeks to alleviate the national energy shortage by imposing 1 hour advanced time on a year-round basis for a two-year trial period (beginning at 2:00 a.m. on Sunday, January 6, 1974, and ending at 2:00 a.m. on Sunday, April 27, 1975) throughout the country; amends the Uniform Time Act of 1966 to allow States the option to go permaently on year-round daylight saving time and authorizes the President to exempt any State upon a proclamation by the Governor of that State, prior to the effective date, that such an exemption from uniform advanced time is necessary to avoid undue hardship or to conserve fuel; requires the Secretary of Transportation to report to Congress on the operation and effects of this act on the use of energy, traffic safety (including the safety of children traveling to and from school), and school hours; and requires the Federal Communications Commission to permit certain daytime broadcast stations to operate before local sunrise. H.R. 11324. Public Law 93–182, approved December 15, 1973. (536)

Elk Hills Naval Petroleum Reserve

Authorizes the production and development of petroleum from Naval Petroleum Reserve Numbered 1 (known as Elk Hills Naval Petroleum Reserve) for national defense purposes and directs the exploration of Naval Petroleum Reserves Numbered 1 and 4. S.J. Res. 176. P/S December 19, 1973. (582)

Emergency Petroleum Allocation Act

Requires the President to implement a comprehensive mandatory allocation program providing for the compelled distribution of crude oil, residual fuel oil, and refined petroleum products in amounts and at prices in accordance with regulations to be promulgated not later than 15 days after the enactment date of this Act (with a 30 day delay permitted with respect to the allocation of gasoline and any allocation of products which are allocated under section 203(a)(3) of the Economic Stabilization Act prior to promulgation of the regulations under this act) which are to be designed to meet the following objectives: (1) the protection of public health, safety, and welfare (including residential heating), and the national defense; (2) the maintenance of all public services and agricultural operations; (3) the preservation of an economically sound and competitive petroleum industry; (4) the allocation of suitable types, grades, and quality of crude oil to refineries in the United States to permit such refineries to operate at full capacity; (5) the equitable distribution of crude oil, residual fuel oil, and refined petroleum products at equitable prices among all regions and areas of the United States and sectors of the petroleum industry, including independent refiners, small refiners, nonbranded independent marketers, branded independent marketers, and among all users; (6) the allocation of residual fuel oil and refined petroleum products as necessary to maintain exploration for, and production of, fuels; (7) economic efficiency; and (8) the minimization of economic distortion, inflexibility, and unnecessary interference with market mechanisms.

Provides that in specifying prices the regulations shall provide for (1) a dollar-for-dollar passthrough of net increases in the cost of crude oil, residual fuel oil, and refined petroleum products to retail distributors and (2) the use of the same date in the computation of markup, margin, and posted price for all distributors at all levels;

Directs, to the extent practicable, allocations of each refined petroleum product to each independent branded and non-branded marketer, and of crude oil to each independent refiner, in an amount equal to that which they were able to obtain in calendar year 1972, such allocations to be equitably adjusted to provide for new market entry, a change of circumstances, or a pro rata sharing of any greater or lesser amount produced that produced in 1972 but does not require supply at 1972 levels if to do so would be inconsistent with the objectives outlined above, and expressly authorizes the President to depart from 1972 allocation patterns if necessary to meet priority needs; exempts the first sale of crude oil from stripper wells (those wells having an average daily production of crude oil not exceeding 10 barrels per well) from allocation and price regulations of this Act;

Provides that the regulations shall remain in effect until March 1, 1975, with certain exceptions whereby the President may exempt products; provides that compliance with requirements of this Act are a defense to certain actions which might otherwise violate the antitrust laws; directs the Federal Trade Commission to monitor the program and report on its effectiveness to the Congress within 60 days after implementation; authorizes the President to delegate any part of his authority under this Act to any Federal officer or agency or to any State or officer thereof;

And contains other provisions. S. 1570. Public Law 93–159, approved November 27, 1973. (162,465)

Energy conservation in Federal buildings

Declares the policy of the United States to insure that energy conservation practices are employed in the design of Federal and federally assisted facilities and encourages Federal agencies to analyze the cost of the energy consumption of each facility including a complete life-cycle cost analysis for each facility exceeding 50,000 square feet. H.R. 11565. P/H December 3, 1973. P/S amended December 20, 1973. (VV)

Energy Policy Act

Creates in the Executive Office of the President a three member Council on Energy Policy to be appointed by the President by and with the advice and consent of the Senate which shall serve as the principal adviser to the President on energy policy; be a focal point for the collection, analysis, and interpretation of energy statistics; coordinate the energy activities of the Federal Government and provide leadership for State governments and other persons involved in energy activities; prepare a long-range comprehensive plan (the Energy Plan), to be updated annually, for energy development, utilization, and conservation; and, is to review all legislative recommendations and reports sent to Congress and, if it disapproves, send to the President and the Federal agency involved a statement in writing of its position and reasons therefor; directs the Council to prepare and submit to the President and the Congress on or before January 1, 1974, and annually thereafter, an energy report to accompany the Energy Plan including estimates of energy needs for the ensuing ten-year period, discussion of sources of supply for meeting those needs, and an evaluation of trends in price, quality, management, and utilization of energy resources; authorizes the Comptroller General to monitor and evaluate the operations of the Council and report to Congress with respect to Federal energy programs including his recommendations; authorizes appropriations for the purposes of the act of $1 million for fiscal year 1974, $2 million for fiscal year 1975, and $4 million for each subsequent fiscal year; and contains other provisions. S. 70. P/S May 10, 1973. (123) (The provisions of this bill are contained in S. 2176, National Fuels and Energy Conservation Act.)

Federal Energy Emergency Administration Act

Establishes the Federal Energy Emergency Administration (FEEA) as an independent executive agency, to be headed by an Administrator to be appointed by the President with the advise and consent of the Senate; transfers to the Administration four existing agencies now in the Interior Department—the Offices of Petroleum Allocation, Energy Conservation, Energy Data and Analysis, and Oil and Gas; transfers the Energy Division of the Cost of Living Council into the new Administration and provides that additional Federal programs may be transferred to the Administration with Congressional approval; authorizes $75 million for fiscal year 1974 and $200 million annually for fiscal years 1975 and 1976; establishes, in Title II the "Energy Policy Act of 1973", a Council on Energy Policy in the Executive Office of the President, composed of three members to be appointed by the President with the advice and consent of the Senate, to assist the President with high-level coordination and policy development in the energy field for mid- and long-term energy policy issues, and authorizes therefore $1 million for fiscal year 1974, $2 million for fiscal year 1975 and $4 million for each fiscal year thereafter. S. 2776. P/S December 19, 1973. (580)

National Energy Emergency Act

Declares, by act of Congress, an energy emergency, and grants authority for 1 year to the President for the taking of specific actions to conserve scarce fuels, alleviate fuel shortages and increase domestic energy supplies, and for the development of emergency conservation and contingency plans at the national, State and local levels to reduce nonessential energy consumption and assure the continuation of vital services in the face of severe fuel shortages;

Requires the President to promulgate a plan for a nationwide energy rationing and conservation program within 15 days after the act becomes law and to assure that vital services will be maintained and unnecessary energy consumption reduced; also requires a plan to assure equitable geographic distribution of fuel; requires that the rationing and conservation program must have the capability of reducing energy consumption up to 10 percent within 10 days and 25 percent within 4 weeks; requires State and major metropolitan areas to develop within 10 weeks after enactment emergency energy conservation and contingency programs to implement the Federal program, in accordance with requirements to be set by the President within 2 weeks after enactment; provides, subject to certain exceptions, that the act confers no authority on the President to regulate or allocate natural gas not otherwise subject to the jurisdiction of the Federal Power commission "intrastate gas");

Authorizes certain Federal actions for fuel conservation, including action by the President to require powerplants and industrial facilities now burning oil and gas to convert to coal or other fuel if they have a ready capability to burn coal or other fuels, and authorizes the suspension of air quality requirements in such cases; empowers independent regulatory agencies (the Civil Aeronautics Board, the Interstate Commerce Commission and the Federal Maritime Commission) to adjust existing regulations for carriers within their jurisdiction to conserve fuel during the energy emergency; requires the development and implementation of Federal measures to provide incentives for the use of public transportation, including priority rationing of fuel for mass transit systems and Federal subsidies for fares and operating costs, and encouragement of carpools; suspends the requirements for a full environmental impact statement for Federal actions of less than 1 year's duration;

Authorizes the President to take certain other actions to increase available domestic petroleum supplies, including requiring existing domestic oil fields to produce at their maximum efficient rate and certain designated oil fields on land in which there is a Federal interest to produce in excess of their maximum efficient rate, and limiting the export of petroleum products;

Includes provisions regarding administrative procedure in order to insure accountability and due process, judicial review, and sanctions; contains safeguards and procedures to preserve the integrity of the antitrust laws and provides a limited defense under the antitrust laws for persons or companies acting in compliance with Federal directives under this act;

Amends the Clean Air Act to authorize the Administrator during the period November 15, 1973, through August 15, 1974, to temporarily suspend any emission limitation related to control of pollutants resulting from fuel burning, or schedule or timetable for compliance with emission limitations, Federal, State, or local, unless he determines a suspension would present a substantial endangerment to health; authorizes grants to States to offset costs incurred in implementing plans and programs directed or authorized by this act or by the Emergency Petroleum Allocation Act of 1973; provides assistance to persons adversely affected by this act with unemployment benefits, food stamps, reemployment assistance, and small business loans; contains provisions for protection of franchised dealers;

Requires the President to submit an interim report to the Congress 6 months after enactment, and provides that if, at any time following receipt of this report, the Congress agrees to concurrent resolution terminating the action taken under this act, all authority granted by this act shall expire 30 days thereafter; also requires detailed reports by the President to the Congress every 60 days on the administration of this act and the Emergency Petroleum Allocation Act of 1973; and contains other provisions. S. 2589. P/S November 19, 1973; P/H amended December 15, 1973; Conference report filed.

National Energy Emergency; Wild and Scenic Rivers

Amends the Wild and Scenic Rivers Act in various respects.

Declares that the current and imminent fuel shortages have created a nationwide energy emergency; calls for proposals for energy emergency rationing and conservation measures and authorizes specific temporary emergency actions to be exercised, subject to congressional review and right of approval or disapproval, to assure that the essential needs of the United States for fuels will be met.

Establishes a Federal Energy Emergency Administration (FEEA) until May 15, 1975, to be headed by an Administrator who will be appointed by the President with the advice and consent of the Senate; transfers powers and duties of the President under sections 4, 5, 6, and 9 of the Emergency Petroleum Allocation Act of 1973 to the Administrator of the FEEA; authorizes the President to promulgate a rule for the establishment of a program for the rationing and ordering of priorities among classes of end-users of crude oil, residual fuel oil, or any refined petroleum product, and to assignment rights of precedence to use and make such adjustments in the allocations made under this regulation as may be necessary; provides procedures by which any end-user may petition for review of priorities and entitlements.

Authorizes the Administrator of the FEEA to promulgate by regulations one or more energy conservation plans to reduce energy consumption to a level which can be supplied by available energy resources through transportation controls, including highway speed limits, or such other necessary and reasonable restrictions on the public or private use of energy, including limitations on energy consumption of businesses, which are authorized by this Act; provides that no energy conservation plan promulgated by regulation under this authority may impose rationing or any tax or user fee, or provide for a credit or deduction in computing any tax; terminates any such energy conservation plan on April 1, 1974; requires transmission of any plan to each House of Congress, and makes any plan which becomes effective on or after March 1, 1974, subject to Congressional disapproval; provides that energy plans proposed to be effective on or after April 1, 1974, must be approved by Act of Congress; provides procedures for Congressional review of the plans.

Authorizes the Administrator to prohibit, at its primary energy source, the burning of natural gas or petroleum products by any major fuelburning installation (including any existing electric power plant) which, on the date of enactment of this Act, has the capability and necessary plant equipment to burn coal.

Directs the Administrator, within 30 days after enactment, to make a contingency plan for allocation of supplies of materials and equipment for exploring, production, refinings, and required transportation of energy supplies and for the construction and maintenance of energy facilities, subject to Congressional approval; authorizes the Administrator to require production of oilfields to be designated by the Secretary of Interior or the Secretary of Navy at the maximum efficient rate of production and in certain cases, in excess of the maximum rate; contains provisions for the protection of franchied dealers; provides, in relation to antitrust provisions, for procedures to achieve the goals of this act while retaining the integrity of the anti-trust laws; authorizes certain restrictions on exports; provides for employment impact and unemployment assistance; provides for administrative procedures and judicial review; contains enforcement provisions.

Amends the Clean Air Act to give the FEEA Administrator the temporary authority, until November 1, 1974, to suspend any stationary source fuel or emission limitation; provides for implementation plan revisions; extends the interim standards for motor vehicles emissions to 1977; and contains other provisions. S. 921. P/S September 24, 1973: P/H amended December 3, 1973; Senate agreed to House amendment with an amendment December 21, 1973. House refused to suspend its rules and vote on S. 921 before adjournment.

National Energy Research and Development Policy Act

Authorizes $20 billion over the next 10 years to seek to develop the capability for the United States to become energy self-sufficient through the use of domestic energy resources by socially and environmentally acceptable means;

Establishes an interagency Energy Research Management Project headed by an independent chairman appointed by the President and assisted by representatives from Federal agencies involved in energy research (Interior, Atomic Energy Commission, Federal Power Commission, National Science Foundation, Environmental Protection Agency, National Aeronautics and Space Administration, and National Bureau of Standards) to undertake an aggressive start on a comprehensive research strategy pending completion of presently proposed Government reorganization for energy matters;

Provides for immediate research activities (through 1980) on the development of the folowing energy technologies: production of low sulfur boiler fuel, production of synthetic gas (as from coal gasification), production of syncrude and coal liquefaction, demonstration of geothermal technologies, development of oil shale, improved methods for extraction of petroleum and coal resources, demonstrations of solar energy for residential and commercial applications, improvement of environmental control systems, investigation of tidal power for electrical energy, and demonstration of energy conservation technologies; provides, for midterm (1980–2000), a continuation of the short term undertakings, plus improved transportation and storage by electricty, demonstration of the viability of hydrogen as a primary energy supply, demonstration of power generation from fuel cells, and development of synthetic energy supplies from agricultural products and wastes; provides for long term research (beyond 2000) including demonstration of fusion power and commercial aplication of previously demonstrated technologies;

Requires the chairman of the research project to recommend to Congress specific proposals for Federal assistance for the demonstration of new energy technologies; authorizes the chairman to select an appropriate mechanism for Federal assistance including: contractual arrangements with non-Federal entities, construction of federally owned facilties, Federal purchases or guaranted prices of demonstration products, and Federal loans and loan guarantees; provides that if the chairman proposes the establishment of a joint Federal-industry corporation, such a proposal must be submitted to Congress for approval on a case-by-case basis; authorizes for the project $2 million for fiscal year 1974 and $10 million each in fiscal years 1975 and 1976;

In Title II, "Geothermal Energy Act of 1973," authorizes the Secretary of the Interior to guarantee loans (up to 75 percent of the cost of the project) made by financial institutions to qualified borrowers for the purpose of geothermal energy development and provides that a Geothermal Resources Development Fund be established in the Treasury for the loan guarantee program; authorizes the Atomic Energy Commission, in cooperation with industry, to undertake a research and development program for the utilization of all forms of geothermal energy; authorizes for fiscal years 1974 through 1976 as follows: $10 million annually to the Secretary of the Interior, $35 million annually to the Atomic Energy Commission, and such amounts as required to NASA;

And contains other provisions. S. 1283. P/S December 7, 1973. (545)

National Fuels and Energy Conservation Act

Declares as a national policy the conservation of fuels and energy resources through more efficient conversion and use and directs all Federal agencies to review their policies and programs and to recommend changes needed to assure conformity with this act; establishes a Council on Energy Policy in the Executive Office of the President to coordinate all Federal activities dealing with energy (similar to S. 70, the Energy Policy Act); gives statutory authority to the Office of Energy Conservation in the Department of the Interior; authorizes the Director of the National Science Foundation to coordinate the energy conservation research and development programs of the Federal Government and specifically authorizes $8 million for the National Bureau of Standards program and $4 million for the Department of the Interior program; directs all Federal agencies to utilize energy conservation practices in the design of Federal and federally assisted building facilities and requires a life cycle cost analysis to be performed for new Federal facilities exceeding 50,000 square feet; directs the Secretary of Housing and Urban Development, in coordination with the National Bureau of Standards and the General Services Administration, to develop standards for efficient energy use in buildings;

Amends the Federal Trade Commission Act with "truth in energy" provisions to require the disclosure to customers, prior to purchase, of the estimated annual operating costs of major energy consuming household products which consume more than 200 kilowatt hours per year (refrigerators, air-conditioners, ranges, freezers, water heaters, and clothes dryers) as well as air-conditioning and heating systems; provides a procedure whereby labels containing estimated operating costs will start to appear 18 months after the date of enactment to be updated as more test results are developed over a 36-month period; requires that the estimated annual operating costs be included in all advertisements which mention the purchase price of the product; contains enforcement provisions including declaration of unfair deceptive trade practices, injunctions, and civil penalties;

Amends the Motor Vehicle Information and Cost Savings Act with the addition of a new Title V, the "Automobile Fuel Economy Act" which establishes a goal for improving the industrywide fuel economy for new automobiles by at least 50 percent over a 10-year period; directs the Secretary of Transportation to establish a single minimum fuel economy standard for the 1978 model year and to develop a plan to meet this goal; requires fuel economy information to be displayed on a show sticker and in advertisements which mention price; prohibits the sale of automobiles which do not meet the minimum standard; contains civil and criminal penalties for violation of this act;

Directs every gas and electric public utility to submit annual reports on energy conservation policies to the Federal Power Commission; requires each Federal agency which is involved in the production of electrical energy to prepare a study of the effect of its various policies on the consumption and conservation of energy; Directs the Secretary of Transportation to prepare and submit to Congress within 9 months after enactment a report examining the potential for energy conservation in the transportation sector;

Further amends the Motor Vehicle Information and Cost Savings Act with the addition of Title VI, the "Automotive Transport Research and Development Act of 1973," which authorizes grants and loan guarantees for research and development leading to production prototypes of an advanced automobile within 4 years, emphasizing new engine concepts to reduce exhaust emission and fuel consumption;

Authorizes $30 million to finance demonstration projects in urban areas involving fare-free and low-fare urban mass transit systems; amends the Federal-Aid Highway Act to permit use of certain highway moneys for the development and promotion of carpool incentive programs in urban areas; directs the Secretary of the Treasury to conduct a comprehensive study of possible modifications in the Federal tax structure designed to encourage energy conservation; requires that all products imported into this country must meet applicable requirements of this act but makes no such requirement for exports;

And contains other provisions. S. 2176. P/S December 10, 1973. (549)

Speed limits

Sets in this measure, the Emergency Highway Energy Conservation Act, a uniform nationwide maximum speed limit of 55 miles per hour; conditions continued approval of Federal-aid highway projects upon the establishment by a State within 60 days of its enactment of a maximum speed limit not in excess thereof; and contains other provisions. H.R. 11372. Public Law 93-239, approved January 2, 1974. (VV)

Strip mining

Establishes a nationwide program to prevent the adverse effect to society and the environment resulting from surface mining; places the authority for the administration of the Act with the Secretary of Interior who shall prepare and publish within 6 months regulations concerning coal surface mining and reclamation operations and a detailed description of actions to be taken by a State to develop an acceptable State program to regulate such operations; establishes the Office of Reclamation and Enforcement in the Department of the Interior which will be headed by a Director to be named by the President, with the advice and consent of the Senate; establishes the prerequisites for any State to continue to obtain financial assistance and to assume full responsibility for all regulation of surface mining and reclamation within the State, and provides for Federal regulation of strip mining and reclamation in any State which proves unwilling or unable to do so itself; establishes an interim surface mining permit program which is in effect until the deadline for approval of a State program; sets requirements for performance bonds which must be filed before a surface mining permit is issued, such bond to satisfy the costs for reclamation of the land mined; sets criteria to be met by all surface mining and reclamation operations under a State program, a Federal program, the Federal Lands Program or the State or Federal interim permit; provides for civil and criminal penalties for certain violations of the act; provides for citizen suits against persons violating the act or against the responsible regulatory authority; sets guidelines for the establishment of a process for designation of areas as unsuitable for surface mining; applies the requirements of the Act to public corporations, agencies, and utilities, including the Tennessee Valley Authority, which engage in surface mining; authorizes $100 million to create an "Abandoned Mine Reclamation Fund" to be used to reclaim abandoned land which has been subjected to the worst ravages of past mining activities; authorizes $4 million for studies concerning:

(1) surface mining for minerals other than coal, open pit mining, and reclamation standards,

(2) the impact of Federal control on contour surface mining,

(3) the means to maximize resource recovery and minimize environmental impacts, and

(4) the regulation of surface mining on Indian lands; authorizes for administration and Federal-State matching grants $10 million for fiscal year 1973 and $20 million for the following two years; authorizes the President to suspend any of the provisions of the Act under emergency conditions; provides that where the surface owner is not the owner of the mineral rights, written consent or waiver by the owner must be obtained, or the surface miner must execute a bond to secure payment to the surface owner of any damage in addition to the performance bond required except where the owner of the mineral rights is the Federal Government in which case surface and pit mining is prohibited; authorizes $100,000 (which is increased to $250,000 in the fourth and subsequent years) to be used on a matching basis for the establishment of mining and mineral research centers at one college or university in each State; directs to offset whatever additional production costs may result from the implementation of the Act; authorizes grants to States to assist persons who become unemployed as a result of the administration and enforcement of the Act; and contains other provisions. S. 425. P/S October 9, 1973. (450)

ENVIRONMENT

Automobile emission standards

Extends for an additional year the interim emission requirements which the auto industry must meet for the 1975 model year, and this has the effect of postponing for one year the statutory standards established by the 1970 Clean Air Amendments (Public Law 91-604) which required that all 1975 model cars achieve a reduction in emissions of hydrocarbons and carbon monoxide of 90 percent over the emissions from 1970 model cars. S. 2772. P/S December 17, 1973. (565)

Clean air act extensions

Extends for 1 year, to June 30, 1974, the Clean Air Act, as amended; authorizes the appropriation therefor of $475 million for fiscal year 1974; and contains other provisions. S. 498. P/S January 26, 1973. (VV)

Extends for 1 year to June 30, 1974, the provisions of the Clean Air Act of 1970 and extends, at constant dollar amounts, the authorization of appropriations in the act, which would otherwise expire June 30, 1973, in the total amount of $475 million. H.R. 5445. Public Law 93-15, approved April 9, 1973. (VV)

Endangered Species Act

Provides for conservation, protection, and propagation of endangered species of fish, wildlife and plants by Federal action and by encouraging the establishment of State endangered species conservation programs; authorizes the Secretaries of Interior and Commerce to list within their respective jurisdictions species which are either endangered or likely to become endangered within the foreseeable future with the Secretary of Interior to have sole responsibility for maintaining the list; directs the Secretary of Interior to use funds under the Land and Water Conservation Fund Act of 1956 for land acquisition necessary for the purpose of conserving, protecting, restoring, or propagating any endangered species; provides for a program of grants in aid to states which will have the initial responsibility for management of resident species; authorizes international endangered species programs; exempts Alaskan native Indians and any non-native resident of an Alaska Native village from the provisions of the bill thus allowing the State of Alaska to provide its own restrictions; imposes criminal and civil penalties for violations of this act; and contains other provisions. S. 1983. Public Law 93-205, approved December 28, 1973. (VV)

Interstate Environment Compact Act

Provides the congressional consent required for any two or more States to enter into interstate compacts in the field of air pollution as set forth in section 102(c) of the Clean Air Act, as amended, and in the field of water pollution by section 103(b) of the Federal Water Pollution Control Act, as amended, and gives advance consent to interstate agreements called for by the Solid Waste Disposal Act, as amended; permits signatories to enter into supplementary agreements not inconsistent with applicable Federal law with each other, with other interstate agencies, and with the Federal Government and its agencies for the purpose of controlling interstate environmental pollution problems in the fields of land use, coastal zone management, energy production and transmission, and related activities; provides that supplementary agreements are to become binding upon the signatory upon execution of the agreement by the chief executive and signatory legislative action to approve or condition the agreement, and provides that the Congress may by act of law expressly disapprove or condition the agreement within 90 days of congressional session following receipt of the agreement; provides for special supplementary agreements with foreign nations with the advance consent of Congress; provides that a signatory may withdraw from the compact by legislative enactment upon giving notice to all signatories a year in advance of its formal withdrawal; provides that nothing in this act shall affect Federal environmental protection legislation; and contains other provisions. S. 9. P/S June 22, 1973. (VV)

Land Use Policy and Planning Assistance Act

Establishes a national land use policy to encourage and assist the States to more effectively exercise their constitutional responsibilities for the planning and management of their land base through the development and implementation of State land use programs; establishes a grant-in-aid program to assist State and local governments and agencies to hire and train the personnel, collect and analyze the data, and establish the institutions and procedures necessary to develop and implement State land use programs; authorizes for grants to states $100 million a year for 8 years; establishes a grant-in-aid program to encourage cooperation among the States concerning land use planning and mnaagement in interstate regions and authorizes $15 million a year for 8 years therefor; authorizes $2 million a year for 8 fiscal years for training and research grants and contracts; establishes a grant-in-aid program to assist Indian tribes to develop land use programs for reservation and other tribal lands and to coordinate such programs with the planning and management of Federal and non-Federal lands adjacent thereto, and authorizes for this purpose $10 million a year for 8 years; authorizes the Executive Office of the President to issue guidelines to implement this act; authorizes the Secretary of the Interior to administer the grant-in-aid and other programs established under this act, to review, with the heads of other Federal agencies, statewide land use planning processes and State land use programs for conformity to the provisions of this act, and to assist in the coordination of activities of Federal Agencies with State land use programs; authorizes $10 million each year for five fiscal years to the Secretary for administration of this act; provides that the programs of this act be consistent with anti-pollution regulations and policies already enacted; establishes an Interagency Advisory Board on Land Use Policy to assist in the exchange of data and information pertinent to land use decisionmaking among all levels of government and the public and to recommend to the Congress such legislation it deems appropriate to establish land use policies and any requirement or procedures necessary to assure that such policies are implemented; and contains other provisions. S. 268. P/S June 21, 1973. (205)

Office of Environmental Quality Authorizations

Authorizes (in addition to the standing authorization of $1 million per fiscal year contained in Public Law 91-190) an appropriation of $1.5 million for fiscal year 1974 and $2 million for fiscal year 1975 for the operations of the Office of Environmental Quality and the Council on Environmental Quality. S. 1379. Public Law 93-36, approved May 18, 1973. (VV)

Oil Pollution Act Amendments

Amends the Oil Pollution Act to conform with the 1969 and 1971 amendments to the International Convention for the Prevention of the Pollution of the Sea by Oil, 1954, as amended dealing with intentional discharges of oil and oily wastes from vessels and expands the penalty provisions of the Act. H.R. 5451. Public Law 93-119, approved October 4, 1973. (VV)

Safe Drinking Water Act

Establishes a program within the Environmental Protection Agency (EPA) to regulate drinking water whereby the Federal Government will exercise a new responsibility to set standards and provide assistance in order to protect public water supplies from contamination by providing that (1) EPA establish minimum Federal drinking water standards prescribing maximum limits for contaminants as well as standards for the operation and maintenance of drinking water systems and surveillance, monitoring, site selection and construction standards for public water systems to assure safe dependable drinking water; (2) EPA establish recommended standards to assure esthetically adequate drinking water; (3) the States may establish standards which are more stringent than the Federal drinking water standards; (4) the States will be primarily responsible for enforcing the standards, with Federal enforcement if the States fail to act or in cases of imminent hazard; (5) a National Drinking Water Council be established to advise the administrator on scientific and engineering matters; (6) EPA conduct and promote research, technical assistance, and training of personnel for water supply occupations; (7) EPA conduct a rural water survey within two years of enactment; (8) EPA make grants for special study and demonstration projects with respect to water supply technology; (9) EPA make grants to the States to defray the costs of State programs; and (10) citizens be authorized to bring injunctive suits against violators of primary drinking water standards and against the Administrator for failing to perform mandatory duties. S. 433. P/S June 22, 1973. (VV)

Sewage treatment facilities construction

Authorizes an additional $600,000,000 under the Federal Water Pollution Control Act Amendments of 1972 for reimbursement on sewage treatment construction projects began prior to the 1972 amendments in anticipation of future availability of Federal funds before 1972; extends the deadline for filing reimburesment applications from October 18, 1973, to December 31, 1973; and provides for preliminary disbursement of funds to projects which can be easily approved on the basis of available documentation pending final processing of all projects. S.J. Res. 158. P/S October 11, 1973. (VV)

Continues through fiscal year 1974 the pilot operator training program for wastewater treatment plants (section 104(g) (1) of the Federal Water Pollution Control Act) at the same level of funding ($7.5 million) through fiscal year 1974; amends section 206 (e) of the Federal Water Pollution Control Act by increasing from $2 billion to $2.6 billion the authorization for reimbursement of up to 55 percent of project costs for eligible sewage treatment plants on which construction was initiated between June 30, 1966, and July 1, 1972, and permits applications for reimbursement to be filed until January 31, 1974; permits interim payments to projects with approved applications on the basis of maximum pro rata entitlement of all applicants; and contains other provisions. S. 1776. Public Law 93-207, approved December 28, 1973. (VV)

Provides a formula for the allocation of sewage treatment facility construction grant funds authorized for fiscal year 1975; requires the Environmental Protection Agency to conduct a new survey of the needs for publicly owned treatment works before fiscal year 1976 construction grant funds are allocated; and clarifies the intent of Congress in the 1972 amendment to the Federal Water Pollution Control Act (P.L. 92-500) to specifically approve the practice of phased funding of large waste treatment works. S. 2812. P/S December 4, 1973; P/H amended December 18, 1973; P/S with an amendment to the House amendment. (VV)

Solid Waste Disposal Act extensions

Extends for 1 year, to June 30, 1974, the Solid Waste Disposal Act, as amended; authorizes the appropriation of $216 million for fiscal year 1974 to the Administrator of the Environmental Protection Agency and $22.5 million for fiscal year 1974 to the Secretary of the Interior, to carry out the provisions of this act; and contains other provisions. S. 498. P/S January 26, 1973. (VV)

Extends for 1 year, to June 30, 1974, the Solid Waste Disposal Act of 1967 (as amended by the Resource Recovery Act of 1970) and extends for 1 year, at constant dollar amounts, the authorization for appropriations therefor in the total amount of $238.5 million. H.R. 5446. Public Law 93-14, approved April 9, 1973. (VV)

Toxic Substances Control Act

Prevents unreasonable threats to human beings or the environment from the use of chemical substances and products containing chemical substances; authorizes the Environmental Protection Agency (EPA) to restrict the use or distribution of such substances or products by providing that: (1) new chemical substances which may pose unreasonable threats to human health or the environment be tested by their manufacturer prior to commercial production and the test results reviewed by EPA prior to production and that notification be given to EPA prior to the commercial production of all other new chemicals; (2) EPA specify and require testing of those existing chemical substances which there is reason to believe may present unreasonable threats to human health or the environment; (3) EPA be given regulatory authority, to restrict use or distribution, to seize chemical substances in violation of certain requirements of the Act, and to take immediate action against the chemical substances creating imminent hazards; (4) manufacturers and processors of chemical substances be required to maintain certain records and reports to enable the Administrator of EPA to properly determine hazards; and (5) citizens be allowed to bring suits to enjoin certain violations of the act and to require the performance of mandatory duties of the Administrator of EPA; and contains other provisions. S. 426. P/S July 18, 1973; P/H amended July 23, 1973; In conference. (VV)

Water Resources Planning Act amendments

Authorizes an appropriation of $3.5 million annually for fiscal years 1974 and 1975 for the Water Resources Council to carry out certain functions assigned to it under the provisions of the Water Resources Planning Act of 1965, as amended. S. 1501. Public Law 93-55, approved July 1, 1973. (VV)

GENERAL GOVERNMENT

American Hospital in Paris, Inc.

Amends the Act incorporating the American Hospital in Paris by eliminating the maximum 20 member limitation on the Board of Governors. S. 1836. P/S November 28, 1973. (VV)

American Revolution Bicentennial Administration

Provides for the establishment of a temporary, independent Government agency, the American Revolution Bicentennial Administration, which would assume the functions and responsibilities of the present American Revolution Bicentennial Commission to be headed by a full time administrator and deputy administrator appointed by the President by and with the advice and consent of the Senate; give the Administrator the power to carry out the provisions of the act including the power to approve supplying services and property, make contracts and expand funds; creates an eleven member board to define basic policy and guidelines for the Administrator and a twenty-five member Advisory Council to advise the Board and the Administrator on all matters as provided for in the bill; define the functions and responsibilities of the new Administration and requires it to submit an annual report to the Congress; provides for annual authorizations, including the continuation of the annual grants to the States, territories, the Commonwealth of Puerto Rico, and the District of Columbia of $25,000 and matching grants to the States of not to exceed $200,000 per State from appropriated funds and a program of matching grants-in-aid financed from nonappropriated funds; and contains other provisions. H.R. 7446. Public Law 93-179, approved December 11, 1973. (VV)

American Revolution Bicentennial Commission

Authorizes an appropriation of $2,868,000 between February 16, 1973, and June 30, 1973, for expenses of the American Revolution Bicentennial Commission, of which not to exceed $1,200,000 would be for grants-in-aid to the States. H.R. 3694. Public Law 93-11, approved March 15, 1973. (VV)

American War Mothers, Inc.

Amends the Act incorporating the American War Mothers, Inc. to permit certain stepmothers and adoptive mothers to be members of that organization. S. 2441. P/S November 28, 1973. (VV)

Arctic Winter Games authorization

Authorizes an appropriation of $150,000 to the Secretary of Commerce for the purpose of assisting the financing of the Arctic Winter Games to be held in Alaska in 1974 and provides for disbursement of such funds on such terms and under such conditions as the Secretary deems appropriate. S. 907. Public Law 93-144, approved November 1, 1973. (VV)

Atomic Energy Commission authorizations, 1974

Authorizes a total appropriation of $2,429,055,000 for the Atomic Energy Commission for fiscal year 1974 of which $1,740,750,000 is for operating expenses and $688,305,000 for plant and capital equipment including construction, and land acquisition, and contains other provisions. S. 1994. Public Law 93-60, approved July 6, 1973. (206)

Amends Public Law 93-60, the Atomic Energy Commission Authorization Act for fiscal year 1974, by providing a supplemental authorization for appropriations of $10,700,000 for operating expenses and $30,000,000 for plant and capital equipment. S. 2645. Public Law 93-158, approved November 26, 1973. (VV)

Attorney General salary

Provides that the salary of the Attorney General shall be $35,000, instead of $60,000 as at present, until noon January 2, 1975 (the date Senator Saxbe's term of office in the Senate expires thereby seeking to remove the constitutional barrier against his nomination which prohibits a Senator or Congressman from being appointed to a Federal office for which the salary has been increased during his congressional term of office), and provides that any person aggrieved by any action of the Attorney General may challenge the constitutionality of his appointment in a three-judge Federal district court with direct appeal to the Supreme Court. H.R. 11710 (S. 2673). Public Law 93-178, approved December 10, 1973. (508)

Commission on Highway Beautification—extension

Extends to December 31, 1973, the date for the Commission on Highway Beautification to submit to the President and the Congress its final report concerning implementation of the Highway Beautification Act of 1965 and authorizes therefor an additional appropriation of $250,000. S.J. Res. 42. Public Law 93-6, approved February 16, 1973. (VV)

Council on International Economic Policy

Extends the authorization on the Council on International Economic Policy (CIEP) until June 30, 1977, and authorizes $1.4 million for fiscal year 1974; provides that, instead of serving as Chairman, the President shall designate a Chairman of CIEP; provides that any Executive Director of CIEP, other than the incumbent, shall be appointed by the President subject to confirmation by the Senate; and requires that the annual report by the President to Congress include comparative description and analysis of certain specific activities, policies, and programs of the United States, the European Community, Japan, and the U.S.S.R. as well as analysis concerning the relationship between the U.S. Government and American business and recommendations for programs and policies to insure that American business is competitive in international commerce. S. 1636. Public Law 93-121, approved October 4, 1973. (392)

Disaster relief

Emergency Disaster Bill

Authorizes and directs the President to make grants to units of local government and State and local public agencies for predisaster assistance for fire suppression, tree removal, and reforestation work on public and private lands in the counties of Alameda and Contra Costra, California, to reduce the fire threat caused by a freeze in December of 1972 which killed tens of thousands of eucalyptus trees throughout the area; provides for reimbursement to property owners for costs in removing trees on private property; and directs the President to exercise the authority conferred on him by section 221 of the Disaster Relief Act of 1970 to carry out the provisions of this act in order to avert or lessen the effects of a major disaster. S. 1697. P/S May 21, 1973. (VV)

Emergency Loan Program for Disaster Areas

Amends the Farmers Home Administration emergency loan program under the Consolidated Farm and Rural Development Act, which was curtailed by the Department of Agriculture by action announced on December 27, 1972, to provide a source of funds for farmers and ranchers in areas determined to be disaster areas by either the Secretary of Agriculture or the President; eliminates certain features, including the loan forgiveness feature and low interest rates, which became a part of the emergency loan program as a result of the Disaster Relief Act of 1970, Public Law 91-606, and the "Agnes-Rapid City" Act, Public Law 92-385; requires the Secretary to make, insure or guarantee loans to eligible applicants; sets the maximum interest rate on loans at 5 percent; requires that applicants be unable to obtain credit elsewhere at reasonable rates; makes it mandatory that the Secretary designate areas eligible for emergency loans where the criteria for such designation exists; repeals section 232 of the Disaster Relief Act of 1970, which, effective July 1, 1973, requires the Secretary of Agriculture to cancel a part or all of the principal amount of certain loans and charge interest at a rate to be determined by the Secretary of the Treasury; applies the same interest rate to and eliminates the forgiveness feature for Small Business Administration disaster loans made under the Small Business Act in connection with any disaster occurring on or after the date of enactment of this act; and contains other provisions. H.R. 1975. Public Law 93-24, approved April 20, 1973. (66)

Domestic Volunteer Service Act—Action

Provides for the operation of all domestic volunteer service programs by the ACTION Agency, which was established by Reorganization Plan No. 1 of July 1, 1971, in a single piece of enabling legislation; authorizes appropriations for fiscal years 1974 and 1975 for the ACTION Agency's programs: VISTA (Volunteers in Service to America), the Peace Corps, the Foster Grandparent Program, RSVP (Retired Senior Volunteer Program), UYA (University Year for ACTION Program), the Service Corps of Retired Executives and the Active Corps of Executives; provides for new voluntary activities to meet a broad range of human and social needs beyond the strict anti-poverty programs including programs to provide alternatives to the incarceration of youthful offenders, to promote educational and job opportunities for returning veterans and to provide community-based peer group counseling and outreach for drug abuses; provides for two new older American programs: "Senior Health Aides" and "Senior Companions" modeled on the Foster Grandparents program; and contains other provisions. S. 1148. Public Law 93-113, approved October 1, 1973. (VV)

Exemption of Federal Judiciary From Charges for Space and Services

Relieves the Federal Judiciary and the U.S. Tax Court from all administrative duties in the calculation of charges for service, maintenance, repair, space, quarters or other facilities as required by section 210(j) of the Federal Property and Administrative Services Act of 1949, as amended, by requiring the Administrator of the General Services Administration to provide such administrative services. S. 2079. P/S June 28, 1973. (VV)

Federal Fire Prevention and Control Act

Provides for the establishment, by the Secretary of Commerce, of a coordinated Program for Fire Prevention and Control, under the administration of a new Assistant Secretary of Commerce for Fire Prevention and Control, with the purpose of the Program to be to reinforce and support the fire prevention and control activities of State and local governments and volunteer fire companies through a research and development program, an annual conference of professionals in fire prevention, fire control, and treatment of burn injuries, the establishment of a National FIREPAC Academy, a national data center, a technical assistance program for State, local, and private fire services, a master-plans demonstration project, citizens' participation programs, and relevant studies; and contains other provisions. S. 1679. P/S November 2, 1973. (460)

Federal Reports Act Amendment

Places a limit on the broad authority given to the Office of Management and Budget (OMB) under the Federal Reports Act in reviewing the requests of government agencies for permission to elicit, through questionnaries, information from persons, firms and industries subject to their jurisdiction by requiring OMB to approve or deny such requests within 60 days after referral to that agency and in such cases where permission was denied, requires OMB to provide a full explanation of the reasons for disapproval. S. 1106. P/S November 26, 1973. (VV)

Flood Control Act

Authorizes development of flood control, multi-purpose and related projects and provides for studies and surveys to determine whether other plans should be developed. *NOTE:* (S. 4018 [92d-2d], a similar measure, was pocket vetoed by President Nixon on October 27, 1972.) S. 606. P/S February 1, 1973. (5)

Flood Disaster Protection

Increases available limits of both subsidized flood insurance coverage for all types of properties (doubles structure and contents limits on single-family dwellings as well as contents limits on multi-family residential property, triples limits on nonresidential structures, and increases limits on nonresidential contents from $5,000 to $100,000); requires the purchase of flood insurance in communities where Federal assistance for construction or acquisition purposes affecting a property located in a flood-prone area after the expiration of 60 days following the date of enactment; forbids all Federally supervised banks, savings and loan associations, and other similar institutions from making a loan in connection with a property in an identified flood hazard area after 60 days following enactment unless that property has the necessary flood insurance; defers until December 31, 1974 (or the effective date of the initial rate map published by the Secretary of Housing and Urban Development, whichever is later), the applicability of actuarial flood insurance premium rates to new construction; increases the Federal financial commitment in support of the insurance fund by increasing the Treasury borrowing authority to $500 million, plus an additional $500 million with the approval of the President; establishes an appeals process to challenge the Secretary's proposed determination of elevation standards; extends the emergency program authority for an additional two years until December 31, 1975; requires HUD to publish information on known flood-prone communities and notify them within 6 months of their tentative identification; prohibits Federal financial assistance or loans by Federally supervised lending institutions in connection with property within the identified flood-prone areas of communities that are not participating in the flood insurance program by July 1, 1975; requires the Secretary of HUD, in carrying out his land use responsibilities under the Act, to establish procedures insuring adequate consultation with appropriate local officials and citizens; and contains other provisions. H.R. 8449. Public Law 93-234, approved December 31, 1973. (VV) (The provisions of H.R. 8447 supersede those of S. 606 which passed the Senate on February 1, 1973.)

Flood Insurance

Amends the Housing and Urban Development Act of 1968 to increase from $2.5 billion to $4 billion the limitation on the face amount of flood insurance coverage authorized to be outstanding. S.J. Res. 26. Public Law 93-4, approved February 2, 1973. (VV)

Increases the authority for the Federal flood insurance program from $4 billion to $6 billion. S.J. Res. 112. Public Law 93-38, approved June 5, 1973. (VV)

Government Printing Office

Provides that certifying officers of the Government Printing Office be responsible for the vouchers they certify for payment to the disbursing officer in the same way as other certifying officers of the Government; and contains other provisions. S. 1795. P/S June 28, 1973. (VV)

Grants the Public Printer the authority to adopt an official Government Printing Office seal which would have judicial recognition, and to designate employees to administer and certify oaths. S. 1795. P/S June 28, 1973. (VV)

Amends the Act of October 30, 1965, 40 U.S.C. 759(e), known as the "Brooks Bill" to restore full authority to the Joint Committee on Printing in the field of printing and binding, and thereby continue the responsibility for the administration of the contract on marginally punched continuous forms in the Government Printing Office under the direction of the Joint Committee on Printing. S. 1802. P/S June 28, 1973. (VV)

Provides the Government Printing Office, the Public Printer, and all officers and employees of the Government Printing Office with immunity from civil or criminal liabiltiy in connection with any printing, binding, or distribution services performed at or through the Government Printing Office in accordance with provisions of title 44, U.S.C. S. 2399. P/S October 8, 1973 (VV)

Headstart Fee Schedule

Postpones the implementation of the Headstart fee schedule until July 1, 1975. H.R. 11441. Public Law 93-202, approved December 28, 1973.

Hobby Protection Act

Provides protection for coin, token, and other collectors by requiring the marking of domestic or imported numismatic items as a "copy" and political items with the calendar year of their manufacture in order to prevent their being sold or traded as originals, and contains other provisions. H.R. 5777. Public Law 93-147, approved November 29, 1973. (357)

Housing, Housing Assistance, and Community Development Programs Funding

Expresses the sense of the Congress that until the Congress terminates or replaces existing housing, housing assistance, and community development programs, funds authorized and appropriated for the purpose of carrying out these programs should be obligated or expended, to the extent current appropriations or other obligational authority permit, at rates which are not less than the rates at which funds were obligated or expanded for such programs during calendar year 1972. S. Con. Res. 57. Senate adopted November 20, 1973. (VV)

Joint Funding Simplification Act

Eliminates some of the red tape and duplication in our present categorical grant in aid system by simplifying funding and other procedures in those cases where an applicant for Federal assistance receives that assistance from two or more different Federal agencies or programs within an agency. S. 2299. P/S November 19, 1973. (VV)

Micronesian Claims Act Amendments

Enlarges the class of persons eligible to receive benefits under the Micronesian Claims Act of 1971 (Public Law 92-39) to include those who have taken up permanent residency and become citizens of the United States, and permits the Secretary of the Interior to make some payments prior to the adjudication and certification of all claims in order to prevent an inflationary effect on the economy of Micronesia. H.R. 6628. Public Law 93-131, approved October 19, 1973. (VV)

Mint Buildings

Increases from $45 million to $95 million the authorization to the Department of the Treasury for the construction of mint facilities, such funds to be appropriated as may be necessary for each fiscal year beginning after June 30, 1963, and ending before July 1, 1983, with the provision that aggregate of such sums shall not exceed the $95 million authorization. S. 1901. P/S June 27, 1973. (VV)

NASA Authorization

Authorizes appropriations totaling $3,064,500,000 to the National Aeronautics and Space Administration for fiscal year 1974, as follows: for Research and Development, $2,245,500,000, including for space flight operation, $555.5 million, space shuttle, $75 million, advanced missions, $1.5 million, physics and astronomy, $63.6 million, lunar and planetary exploration, $311 million, launch vehicle procurement, $17.4 million, space applications, $161 million of which $2 million is provided for NASA to formulate a long-term energy program that would explore options for energy generation and management from the many technologies the agency has developed, aeronautical research and technology, $180 million, space and nuclear research and technology, $72 million, tracking and acquisition data, $244 million, and technology utilization, $4.5 million; for Construction of Facilities, $112,000,000; and for Research and Program Management, $707,000,000; and contains other provisions. H.R. 7528. Public Law 93-74, approved July 23, 1973. (195)

National Commission on Productivity—Extension

Extends for an additional 2 months, to June 30, 1973, the President's Commission on Productivity. S.J. Res. 93. Public Law 93-34, approved May 14, 1973. (VV)

National Commission on Productivity and Work Quality

Renames the President's National Commission on Productivity as the National Commission on Productivity and Work Quality; sets the promotion of the productivity of the American economy and improvement of worker morale and work quality as objectives of the Commission and defines its functions; and contains other provisions. S. 1752. P/S May 10, 1973. (VV)

National Foundation on the Arts and Humanities Amendments

Authorizes appropriations at an increased level of funding for the National Endowment for the Arts and the National Endowment for the Humanities, grants-in-aid to States by the National Endowment for the Arts, and matching funds for gifts to the Endowments, in the total amount of $145 million, $200 million, and $252 million for fiscal years 1974, 1975, and 1976, respectively. S. 795. Public Law 93-133, approved October 19, 1973. (107)

National Historic Preservation Act

Amends the National Historic Preservation Act of 1966; increases authorizations to $15.6 million, $20 million, and $24.4 million for fiscal years 1974, 1975, and 1976 respectively for matching Federal grants to States and the National Trust for Historic Preservation; extends authorizations of $100,000 for each of fiscal years 1974 and 1975 and authorizes $125,000 for fiscal year 1976 for United States participation in the activities of the Rome Centre; and provides that the Advisory Council on Historic Preservation shall continue in existance until December 31, 1985. S. 1201. Public Law 93-54, approved July 1, 1973. (VV)

National Science Foundation Authorization Act

Authorizes appropriations to the National Science Foundation for fiscal year 1974 in the amount of $632.6 million, and in foreign currencies which the Treasury Department determines to be excess to the normal requirements of the United States. $3 million for fiscal year 1974. H.R. 8510. Public Law 93–96, approved August 16, 1973. (VV)

Nursing Homes

Amends section 232 of the National Housing Act to authorize the Secretary of Housing and Urban Development to insure loans for fire safety equipment in nursing homes and intermediate care facilities necessary to meet the 1967 Life Safety Code or to meet other fire safety requirements approved by the Secretary of Health, Education, and Welfare as a condition of participation under Title XVIII (Medicare) or Title XIX (Medicaid) of the Social Security Act, S. 513. Public Law 93–204, approved December 28, 1973. (VV)

Older Americans Comprehensive Services Amendments

Extends and amends the Older Americans Act of 1965 to enlarge the scope of the Services provided therein; improves the organizational structure at the Federal, State, and local level of the agencies having responsibility for the delivery of such services; creates a Federal Council on the Aging to act as an advocate for the elderly with respect to Federal government policies and programs relating to their particular needs and problems; places the Administration on Aging in the Office of the Secretary of Health, Education, and Welfare and assigns primary responsibility for carrying out the act to the Commissioner on Aging; expands the existing program of formula grants to the States by providing funding for a range of social services in accordance with approved State plans; authorizes funds for direct grants to model projects with priority to projects in the areas of housing, education, and special transportation and other services for the physically and mentally impaired elderly; authorizes grants for multi-disciplinary centers of gerontology and for multi-purposes senior centers; authorizes grants for training programs for personnel and for research and development projects in the field of aging; provides for a special study and demonstration projects on transportation problems of older Americans; makes surplus commodities available for nutrition programs; authorizes grants to States for older readers services; establishes an Older American Community Service Employment program and contains other provisions. *NOTE:* (H.R. 15657 [92d–2d], a measure containing similar provisions, was pocket vetoed by President Nixon on October 30, 1973.) S. 50. Public Law 93–29, approved May 3, 1973. (17

Preservation of Historical and Archeological Data

Amends a 1960 law under which the Secretary of the Interior through the National Park Service, conducts archeological salvage programs at reservoir construction to broaden the scope of activity to include all Federal or federally assisted or authorized construction projects which result in alteration of the terrain; authorizes the Secretary to conduct a survey and salvage program upon notification not only by the instigation agency but also by any other Federal or State agency or responsible private organizations or individuals; authorizes construction agencies to use or transfer up to one percent of funds appropriated for a project to the Secretary for survey and salvage work; provides that the costs incurred in connection with public works projects for archeological work under this act would become non-reimbursible project costs; and contains other provisions. S. 514 P/S May 22, 1973. (VV)

Program Information Act

Provides needed information on Federal domestic assistance programs to intended beneficiaries by publication of a catalog of Federal assistance programs designed to (1) identify the program, (2) describe the program structure, (3) provide financial information, (4) identify the appropriate officials to contact, (5) provide a general description of the application process, and (6) identify closely related programs. S. 928. P/S November 16, 1973. (VV)

Public Works and Economic Development Act Amendments

Extends the Economic Development Administration (EDA) programs authorized by the Public Works and Economic Development Act of 1965 to enable disadvantaged local and regional areas to put in place the public facilities essential to economic development, for one fiscal year through June 30, 1974, with a total authorization of $430 million as follows: $200 million for grants under title I for public works and development facilities, of which not less than 25 percent nor more than 35 percent is for newly defined redevelopment areas under section 401(a)(6); $55 million for loan assistance under title II for financing public works and facilities and redevelopment area projects; $35 million for technical assistance under title III for alleviating conditions of excessive underemployment in certain areas; $45 million under title IV for projects in economic development centers and for an increase in grant assistance for projects to redevelopment areas; and $95 million for title V Regional Action Planning Commissions; continues the moratorium on changing the designation of economic development districts for one year; provides for up to 100 percent instead of up to 75 percent funding for administrative expenses of Indian tribes eligible for certain grants-in-aid under title III; and contains other provisions. H.R. 2246. Public Law 93–46, approved June 18, 1973. (117)

Recreation and Public Purposes Act Amendment

Amends the Recreation and Public Purposes Act by deleting acreage and site limitations as to lands conveyed by the Secretary of the Interior to States, their political subdivisions, or nonprofit organizations for recreational or public purposes and authorizes sales and leases for recreational purposes without monetary consideration but limits the application of this provision to State and local governments. S. 2013. P/S October 16, 1973. (VV)

Recreation Use Fees

Amends the Land and Water Conservation Fund Act of 1965 to provide that there will be no charge for the day use or recreational use of certain facilities in recreational areas which most visitors might use. S. 1381. P/S May 16, 1973. (VV)

Amends the Land and Water Conservation Fund Act of 1965 to provide that there will be no charge for the day use or recreational use of certain facilities in recreational areas which most visitors might use; provides that there will be no charge for access to or use of any campground not having certain specified sanitary and convenience facilities; and defines the term "single visit" for purposes of charging admission fees as the length of time a visitor remains within the boundary of a designated fee area from the day he arrives to the day he leaves except that on the same day such admission is paid, the visitor may leave and re-enter the same area without payment of an additional fee. H.R. 6717. Public Law 93–81, approved August 1, 1973. (VV)

Renegotiation Act Amendments; Social Security Benefit Increase

Extends to June 30, 1974, the Renegotiation Act of 1951, as amended, which authorizes the Government to recapture excessive profits on certain Government contracts and subcontracts; provides a social security cost of living benefit increase of approximately 5.6 percent effective June 1, 1974; increases the monthly income guaranteed under the Federal Supplemental Security Income (SSI) program for aged, blind and disabled persons from $130 to $140 for an individual and from $195 to $210 a month for a couple for months after June 1974; increases the earnings limitation for persons drawing social security from $2,100 to $2,400; raises taxable wages under social security from $12,000 in 1974 to $12,600; contains provisions to assure that aged, blind, and disabled persons now receiving cash assistance or eligible for Medicaid are protected from a reduction in benefits or loss of Medicaid eligibility when the SSI program becomes effective next January 1975; suspends for 4 months the Department of Health, Education, and Welfare's authority to issue new social services regulations scheduled to become effective July 1, 1973, unless new changes are proposed by the Department and approved by the Senate Finance Committee and the House Ways and Means Committee; and contains other provisions. H.R. 7445. Public Law 93–66, approved July 9, 1973. (225)

Service Contract Act Extension to Canton Island

Amends section 8(d) of the Service Contract Act of 1965 (which provides labor standards and prevailing wage requirements for employees working under Government service contracts) to extend the jurisdiction of the act to Canton Island in the central Pacific which, in 1939, the United States and the United Kingdom jointly agreed to administer until 1989. H.R. 5157. Public Law 93–57, approved July 6, 1973.

Small Business Act Amendments

Amends section 4(c)4 of the Small Business Act to increase the total amount of loans, guarantees, and other obligations or commitments outstanding by the Small Business Administration (SBA); consolidates and expands the present authorities in the Small Business Act provided by the Coal Mine Safety Act of 1969, the Occupational Safety and Health Act of 1970, and the Egg Product Inspection Act of 1970, into a new section and authorizing loans to help small business concerns comply with standards imposed under any Federal law in order to provide a uniform approach and single framework for the extension of economic disaster loans to aid small business firms in complying with new Federal environmental consumer, pollution, and safety standards; provides that Farmers Home Administration (FHA) and Small Business Administration disaster loans made in connection with disasters occurring after December 26, 1972, and prior to April 20, 1973, the enactment date of Public Law 93–24 which amended the emergency loan programs, are to be made on the same loan terms; provides disaster relief assistance through the SBA and FHA programs which is retroactive to April 20, 1973, and is to terminate on July 1, 1975, whereby borrowers may obtain a $2,500 forgiveness on their loan and finance the balance at 3 percent or may choose not to accept any forgiveness and finance the entire loan at 1 percent; makes victims of erosion eligible for disaster relief; authorizes loans to persons engaged in the business of raising livestock who suffer substantial economic injury as a result of animal disease; authorizes loans to small businesses which suffer substantial economic damage as a result of the closing or reduction in the scope of operation of military bases; and contains other provisions. S. 1672. Vetoed September 22, 1973. Senate sustained veto September 25, 1973. (140,407)

Increases the Small Business Administration's (SBA) loan authority; authorizes SBA loans to meet regulatory standards; specifies that Farmers Home Administration disaster loans made in connection with disasters occurring after December 26, 1972, when the program was curtailed, and prior to April 20, 1973 the enactment date of Public Law 93–24 which amended the emergency loan programs, are to be made under the terms of the law then in effect, as are SBA loans, and not under Public Law 93–24, thus putting FHA and SBA loans on the same footing with regard to the lower interest and forgiveness features for that period deletes the requirement that applicants for FHA loans for disasters occurring on or after December 27, 1972, must be unable to obtain credit elsewhere at reasonable rates and terms, thus placing availability of FHA loans on a par with SBA disaster loans, and also deletes the "credit elsewhere" requirement for FHA loans in Public Law 93–24 in regard to disasters occurring on or after April 20, 1973, thus making the 5 percent rate under Public Law 93–24 uniformly available; authorizes SBA loans for adjustment assistance in base closings; and contains other provisions. S. 2482. Public Law 93-237, approved January 2, 1974. (VV)

Travel Agents Registration

Amends the Travel Agents Registration Act to require persons "engaged in the business of conducting a travel agency" to secure, by January 1, 1974, registration certificates from the Secretary of Transportation through the Director of a Bureau of Travel Agents Registration to be established in the Department of Transportation. S. 2300. P/S October 11, 1973. (VV)

Trust Territory of the Pacific Islands

Authorizes $60 million for fiscal years 1974 and 1975 for the Trust Territory of the Pacific Islands for civil works and administrative programs and an additional sum of not to exceed $10 million for each of these fiscal years to be used if necessary to offset reduction in or termination of Federal grant-in-aid programs or other funds made available to the territory by other Federal agencies; extends the authority of the Federal Comptroller for Guam to the Trust Territory of the Pacific Islands and prescribes his duties and responsibilities; and contains other provisions. S. 1385. Public Law 93–111, approved September 21, 1973. (VV)

Uniform Relocation Assistance and Real Property Acquisition Policies Act Amendments

Amends the Uniform Relocation Assistance and Real Property Acquisition Policies Act of 1970 to provide, until July 1, 1976, for full Federal funding of the first $25,000 for any single relocation payment for persons displaced by federally assisted programs and projects; expands coverage of the act to persons displaced by eight specified Federal programs; authorizes, through June 30, 1973, the head of a Federal agency to pay a State not in compliance with the act such funds as are necessary, in excess of the first $25,000 of cost, to make all payments and provide all benefits required by the act; and contains other provisions. S. 261. P/S February 2, 1973. (VV)

United States Travel Service Authorization

Authorizes an aggregate amount of not to exceed $15 million, $20 million, and $25 million for fiscal years 1974, 1975, and 1976 respectively, for the United States Travel Service which is charged with promoting foreign tourism to the United States, and transfers the authority of the Secretary of the Interior under the Act of July 19, 1940 (54 Stat. 773; 16 U.S.C. 18–18d), to encourage travel throughout the United States to the Secretary of Commerce. S. 1747. Public Law 93–193, approved December 19, 1973. (VV)

Virgin Islands Legislature

Amends the Revised Organic Act of the Virgin Islands so that the Legislature of the Virgin Islands is empowered and directed to provide the procedure for filling any vacancy in the office of a member of the legislature which under present law is filled by appointment by the Governor. H.R. 7699. Public Law 93–130, approved October 19, 1973. (VV)

Wagner-O'Day Act Amendment

Amends the Wagner-O'Day Act of 1938, as amended by Public Law 92–28, to increase the authorization to the Committee for Purchase of Products and Services of the Blind and Other Severely Handicapped for fiscal year 1974 from $200,000 to $240,000. S. 1413. Public Law 93–76, approved July 30, 1973. (VV)

Waiver-of-Claims Authority

Extends the same waiver-of-claims authority as that granted to the Executive Branch for overpayments of pay and certain allowances to all agencies of the Legislative Branch except the House of Representatives. S. 1803. P/S July 24, 1973. (VV)

War Claims—Vietnam Conflict

Increases the rate of detention benefits payable under the War Claims Act of 1948, as amended, to civilian American citizens held as prisoners in Southeast Asia, from $60 per month to $150 per month. S. 1728. P/S October 8, 1973. (VV)

White House Conference on Library and Information Services

Requests the President to call a White House Conference on Library and Information Services in 1976 to develop recommendations for the further improvement of the Nation's libraries and information centers and their use by the public. S.J. Res. 40. P/S November 20, 1973. (VV)

White House Conference on the Handicapped

Declares that it is the sense of Congress that the President call a White House Conference on the Handicapped within 2 years from the date of enactment of the resolution in order to make recommendations for further research and action in this field, and contains other provisions. S.J. Res. 118. P/S July 18, 1973. (VV)

Youth Conservation Corps

Authorizes the expansion of the Youth Conservation Corps Program and establishes it on a permanent basis to be administered by the Departments of Interior and Agriculture at an annual authorization of $100 million; permits the establishment of a new program of Federal support to States in their administration of Youth Conservation Corps to utilize surplus and/or unused Federal property; and make available for off-season use by local educational institutions Youth Conservation Corps facilities. S. 1871. P/S October 8, 1973. (VV)

GOVERNMENT EMPLOYEES

Central Intelligence Agency Retirement Act Amendments

Amends section 236 of the Central Intelligence Agency Retirement Act of 1964 for certain employees to (1) increase the quota on retirements from 800 to 2,100 for the period July 1, 1969, to June 30, 1974, and (2) establish a quota of 1,500 for retirements between July 1, 1974, and June 30, 1979. S. 1494. Public Law 93–31, approved May 8, 1973. (VV)

Amends the Central Intelligence Agency Retirement Act of 1964 for certain employees to incorporate in such act the changes recently made by Public Law 93–136 which provides that all civil service retirees who retire after the effective date of a cost-of-living increase, but before the next cost-of-living increase becomes effective, may be entitled to the earlier increase, and increases the pay and allowances of certain retired officers of the Armed Forces to reflect changes in the Consumer Price Index. S. 2714. P/S November 16, 1973. (VV)

Civil Service retirement

Amends section 8340(c), title 5, United States Code, to correct an anomaly regarding employee and survivor's annuities occasioned by the provisions of the present law whereby an employee retiring after the effective date of a cost-of-living increase may receive a smaller annuity than an employee retiring just before the effective date of the increase, retroactively effective to immediate annuities which commence on or after July 2, 1973, the first day after the effective date of the last preceding cost-of-living increase. H.R. 3799. Public Law 93–136, approved October 24, 1973. (VV)

Civil Service retirement annuities

Establishes a minimum civil service retirement annuity equal to the social security minimum primary insurance amount; excludes any individual receiving benefits under title II of the Social Security Act from receiving the civil service retirement annuity benefit; provides minimum amounts to survivors in an amount not less than the monthly minimum allowed under social security and in the case of a surviving child, in an amount not less than three-fourths of the minimum monthly amount allowed under social security; increases annuity payments from the Civil Service Retirement Fund by $240 to an annuitant and $132 to the surviving spouse of an annuitant (resulting in monthly increases of $20 and $11 respectively) whose separation from service occurred prior to October 29, 1969; makes effective immediately upon enactment of this act the social security cost-of-living increase, which under present law (Public Law 93–66) would become effective in June of 1974, in an amount based on "the percentage by which the Consumer Price Index prepared by the Department of Labor for the month of June 1973 exceeds such index for the month of June 1973"; and contains other provisions. S. 1866. P/S September 11, 1973. (379)

Civil Service survivors benefits

Amends the Civil Service Retirement Act to change the 2 year marriage requirement regarding eligibility for survivor benefits under the Federal retirement system to a 1 year requirement. S. 2174. Public Law 93–211, approved December 28, 1973. (VV)

Executive, legislative, and judicial salaries

Provides that the Commission on Executive, Legislative, and Judicial Salaries submit its report to the President every other year instead of every four years and that the President likewise make his salary recommendations to the Congress biennially, by August 31, in the odd numbered years beginning in 1973; provides for such recommended pay increases to become effective on the first day of the first pay period which begins after 30 calendar days of continuous session of Congress unless disapproved by Congress by specific legislation changing the pay rates or by passage of a disapproval resolution by either body; and contains other provisions. S. 1989. P/S July 9, 1973. (VV)

Federal employees health insurance

Increases the Government's contribution for Federal employees health benefit plans from 40 to 50 percent beginning in 1974 and from 50 to 60 percent beginning in 1975 and each year thereafter; allows Federal employees retired prior to January 1, 1960, who are now covered under the Retired Federal Employees Health Benefits Program to change to the Federal Employees Health Benefits Program; and requires a carrier to pay or provide health benefits in individual cases where the Commission makes a determination that the covered employee, annuitant, or family member is entitled to the benefit under the terms of the contract. H.R. 9256. Public Law 93——, approved 1973. (VV)

Federal employee leave system

Permits employees to accumulate leave beyond the current maximums if they lost leave through no fault of their own through administrative error, exigencies of public business, or illness; provides for improved administration of the Federal employee leave system by permitting employees to take leave during the first 90 days of employment, by providing for lump-sum payment for leave beyond present maximums in the year of separation, and by adding new provisions for recovery from employees for excess leave; and provides for restoration of annual leave forfeited under section 6304 of title 5, U.S.C. for employees of the Federal Government in a missing status on or after January 1, 1965, giving such employees the option, within 90 days following the date of enactment or within 90 days following the termination of his missing status, whichever is later, to credit the annual leave to a separate account until used, or to receive payment for the accrued leave at the employees basic rate of pay in effect at the time the leave was forfeited. H.R. 1284. Public Law 93–181, approved December 14, 1973. (VV)

Federal employees pay adjustments

Expresses the disapproval of the Senate of the President's alternative pay plan sent to the Congress September 5, 1973, which would postpone a pay adjustment for Federal employees under the Federal Pay Comparability Act from October 1, to December 1, 1973, thus nullifying the President's postponement so that Federal employees would receive an October 1, 1973, pay adjustment. S. Res. 171. Senate adopted September 28, 1973. (422)

Federal employees retirement

Allows Federal employees, who meet the present requirements for retirement upon involuntary separation of 25 years of service, or 20 years of service at age 50, to retire at their own option during a period when the employing agency is undergoing a major reduction in force. H.R. 6077. Public Law 93–39, approved June 12, 1973. (VV)

Foreign Service Institute language instructors retirement credit

Authorizes credit under the Civil Service Retirement System for certain Foreign Service Institute Language instructors erroneously employed under non-personal service contracts between 1948 and 1960 when in fact functioning as Federal employees and provides that such employees will be required to deposit to the Retirement Fund amounts equal to the amounts they would have contributed had they been on the Federal rolls. S. 2264. P/S December 14, 1973. (VV)

Insurance coverage for U.S. nationals

Extends coverage of Federally employed noncitizen nationals under the Federal Employees' Group Life Insurance Plan and the Federal Employees' Health Benefits Plan which is now limited to those in the United States and the Canal Zone, to all Federally employed noncitizen U.S. nationals outside the United States. H.R. 3801. Public Law 93–160, approved November 27, 1973. (VV)

Library of Congress

Provides pay increases for members of the police force of the Library of Congress. S. 1904. P/S June 28, 1973. (VV)

Provides pay increases for members of the police force of the Library of Congress thereby placing the Library's pay scale in a position superior to that of GSA and equating Library police compensation with that received by the National Zoological Park police force. H.R. 10840. Public Law 93– , approved 1973. (VV)

National Guard technicians' retirement

Changes, retroactively, from January 1, 1969, the crediting pre-1969 technician service as follows: (1) grants retirement credit for technician service performed before 1969 to all former technicians serving in any position subject to the retirement law or after January 1, 1969; (2) allows credit for 100 percent of pre-1969 technician service for annuity computation purposes; and (3) permits eligible technicians to pay the full amount rather than 55 percent otherwise owed as a deposit for pre-1969 technician service. S. 871. P/S July 31, 1973. (VV)

Selective Service pay and position classification

Includes employees of the Selective Service System local boards and appeal boards under the position classification and General Schedule pay provisions of title 5 of the United States Code thus giving them the same rights as other statutory employees, and removes the existing 10 year maximum limit on the appointment of executive secretaries of local boards. H.R. 6334. Public Law 93–176, approved December 5, 1973. (VV)

Survivor annuities of Civil Service retirees

Amends chapter 83, title 5, U.S.C. by eliminating the reduction in annuity that a retiree takes to provide survivor benefits for his spouse during periods of nonmarriage allowing in effect, full annuity to an annuitant during these periods. S. 628. P/S July 31, 1973. (VV)

Training report requirements

Eliminates present detailed reporting requirements to Congress by the Civil Service Commission through the President on each Federal employee trained for more than 120 days in a non-Government facility and on each Federal employee who receives an award or contribution resulting from his training in a non-Government facility and provides instead that the Commission shall annually send to Congress an analysis of the administration and operation of the Government employees' training program. H.R. 5692. Public Law 93–156, approved November 21, 1973. (VV)

HEALTH

Child Abuse Prevention and Treatment Act

Provides financial assistance for demonstration programs for the prevention, identification, and treatment of child abuse and neglect through the creation of a National Center of Child Abuse and Neglect within the Office of Child Development in the Department of Health, Education, and Welfare; creates a National Commission on Child Abuse and Neglect to study the effectiveness of existing laws and of programs to prevent, identify, and treat child abuse and neglect, its extent and causes, and the adequacy of Federal, State and local funding for child abuse programs; and contains other provisions. S. 1191. Public Law 93– , approved 1973. (282)

Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment and Rehabilitation Act Amendments

Extends for 2 years through fiscal year 1976 the State formula grant program originally authorized by the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act of 1970, Public Law 91–616, maintaining the annual authorization level at $80 million; extends the contract and project grant authority of the Act of 1970 for an additional 3 years through fiscal year 1976, and authorizes therefor appropriations of $90 million for fiscal year 1974, $100 million for fiscal year 1975, and $110 million for fiscal year 1976; adds a new special grant authority providing an additional allotment of $100,000 plus 10 percent of its formula allotment for each State which adopts the Uniform Alcoholism and Intoxication Treatment Act, or legislation substantially similar to that Act, which requires intoxication to be treated as a responsibility of the community's public health and social service agencies rather than of its criminal justice system; prohibits public or private general hospitals receiving funds from Federal agency sources from discriminating in their admissions or treatment policies against any person solely because of his alcohol abuse or alcoholism; deletes the language of the Act of 1970 placing the National Institute on Alcohol Abuse and Alcoholism within the National Institute of Mental Health and substitutes language placing it within the Department of Health, Education, and Welfare, thereby permitting, not requiring, the Secretary to place the Institute elsewhere within the Department; gives the National Institute on Alcohol Abuse and Alcoholism authority for eleven top level positions; places alcoholism project and contract authority under the Comprehensive Alcohol Abuse and Alcoholism Prevention, Treatment, and Rehabilitation Act; eliminates duplication by deleting section 247 of the Community Mental Health Centers Act; and contains other provisions. S. 1125. P/S June 21, 1973. (VV)

Diabetes mellitus

Amends the Public Health Service Act to provide for greater and more effective efforts in research and public education with regard to diabetes mellitus. S. 2830. P/S December 19, 1973. (VV)

* *Emergency Medical Services Systems Act*

Adds a new title XII to the Public Health Service Act authorizing for public and nonprofit private entities three separate programs of grant and contract assistance (1) for projects which include both feasibility studies and planning for emergency medical services systems; (2) for the establishment and initial operation of such systems, and (3) for expansion and improvement of such systems, and a new program in the present title VII of the act for training programs, especially those that afford clinical experience in systems assisted under the new title XII.

Requires an applicant for a grant or contract for the establishment and operation or for expansion or improvement of an emergency medical services system (EMS) to demonstrate that the system will meet each of specified component requirements within certain time limitations; provides that applications for grants and contracts for feasibility studies and planning shall include a showing of the need of the area for such a system, the applicant's planning qualifications and willingness to conduct the planning in cooperation with the areawide health planning agency and with the entity responsible for evaluation of the provision of such services in the areas of State health planning; provides that applications for grants and contracts for research in an amount in excess of $35,000 must be recommended for approval by an appropriate peer group review panel designated or established by the Secretary; provides that special consideration shall be given to applications for grants and contracts for establishment and initial operation of systems which will coordinate with statewide systems; contains requirements for emergency medical services systems' components including provisions for: an adequate number of health professions and allied health professions personnel, appropriate training (including clinical training) for its personnel and continuing education programs, a central communications system interconnected within the system and with other appropriate EMS systems, a transportation system, easily accessible facilities capable of providing services on a continuous basis and access to specialized critical medical care units in the system's service or neighboring area (including transportation); necessary emergency medical services (without prior inquiry as to ability to pay) to all patients requiring such services; the transfer of patients for follow-up care and rehabilitation (including vocational rehabilitation), public education and information programs, periodic, comprehensive, and independent review and evaluation of the system, the capability for providing emergency medical services in its service area during mass casualties, natural disasters, or national emergencies, reciprocal arrangements for services with other or similar systems serving neighboring areas, and "consumers" (persons without professional training or financial interest in the provision of health care) to have adequate opportunity to participate in the making of policy for the system;

Establishes an interagency Committee on Medical Services to coordinate all Federal programs and activities which relate to emergency medical services and make recommendations to the Secretary respecting the administration of the new title XII, authorizes appropriations therefor for fiscal years 1974–1976 of $45 million, $65 million, and $75 million respectively, for a total of $185 million for those three fiscal years;

Directs the Secretary to continue the operation of the Public Health Service hospitals in Seattle, Boston, San Francisco, Galveston, New Orleans, Baltimore, Staten Island, and Norfolk at the level in effect on January 1, 1973, and prohibits the Secretary from closing or transferring control of a hospital or reducing its services or activities unless specifically authorized by law enacted after the date of enactment of this legislation. S. 504. Vetoed August 1, 1973; Senate overrode veto August 2, 1973; House sustained veto September 12, 1973. (134, 294, 358)

Reintroduced with the deletion of the provisions concerning Public Health Service Hospitals and passed with certain relatively minor changes. S. 2410. Public Law 93–154, approved November 16, 1973. (390)

Health Maintenance Organization Act

Authorizes grants and contracts for public or nonprofit private entities for feasibility surveys or other activities, and for planning projects to establish Health Maintenance Organizations (HMO's) or expand present HMO's and loan guarantees for private profit-making entities for planning projects to establish or expand HMO's which serve medically underserved populations; limits any single grant or contract for feasibility survey to $50,000 and for a planning project to $125,000, with a second grant permitted if necessary, and the aggregate amount of assistance for any project to 90 percent of the costs or 100 percent for entities serving medcally underserved populations; authorizes grants and contracts with public or nonprofit private entities for projects to initially develop HMO's and loan guarantees to those serving medically underserved populations; provides, in regard to initial operating assistance, for loans (from revolving fund) for public and nonprofit HMO's to assist them in meeting for three years a portion of initial operating costs in excess of gross revenues, and authorizes loan guarantees for private profit HMO's for such costs where the HMO will serve medically underserved areas;

Authorizes an aggregate appropriation for grants and contracts for feasibiltiy surveys, planning, and initial development for fiscal years 1974–1976 of $25 million, $55 million, and $85 million respectively; authorizes for fiscal year 1977 an additional $85 million for initial development grants and contracts; and authorizes for capitalization of the initial operating loan revolving fund the appropriation of $75 million in the aggregate for fiscal years 1975 and 1976;

Provides, in regard to rural areas, that, in any fiscal year, 20 percent of the funds appropriated for making grants or contracts, or available for making loans, must be set aside for projects for HMO's at least 66 percent of whose members can or could reasonably be expected to be residents of nonmetropolitan areas, which applies to funds for feasibility studies, planning and initial development, and for initial operations;

Authorizes the Secretary of Health, Education, and Welfare to contract with private or other non-Federal health agencies or organizations to provide health services to Indians on a fee-for-service basis, or a prepayment or other similar basis, with the consent of the Indian people serviced, and to arrange for the provision of health services to domestic agricultural migratory and seasonal workers and their families through HMO's;

Requires continued regulation of assisted HMO's for compliance with the terms of this act in regard to services, organization and operation; prohibits the transfer of funds appropriated under any other part of the Public Health Sevice Act for programs under this part; requires a report by the Secretary on medically underserved and non-metropolitan areas, and a program evaluation by the Comptroller General; and an annual report to the Congress by the Secretary on the programs under this act;

Provides for a health care quality assurance programs study by directing the Secretary to contract for a health care quality assurance program study, including a study of health care providers assisted under the Public Health Service Act and the Mental Retardation Facilities and Community Mental Health Centers Construction Act, with a nonprofit private organization with a national reputation for objectivity, the ready capacity to make such a study, a history of interest and activity in health policy issues related to such study, and with extensive existing contracts with interested public and private agencies and organizations;

And contains other provisions. S. 14. Public Law 93–222, approved December 29, 1973. (132,581)

Health Programs Extension Act

Extends the 12 expiring health authorities in the Public Health Service Act, the Community Mental Health Centers Act, and the Developmental Disabilities Services and Facilities Construction Act, for health research and development; health statistics; public health training; migrant health; comprehensive health planning and services; medical libraries; Hill-Burton facilities construction; allied health training; regional medical programs; family planning; community mental health centers; and developmental disabilities for 1 year to June 30, 1974, at a total authorization level of $1,270.6 million; restricts the authorization for project grants under section 304(e)d of the Public Health Service Act to programs respecting neighborhood health centers, family health centers, lead-based paint poisoning prevention, and rodent control, by prohibiting the funding under this section of programs for which an alternative authority is contained in title I of this act; denies any court, public official, or public authority the right to require individuals or institutions to perform abortions or sterilizations contrary to their religious beliefs or moral convictions because an individual or institution had received assistance under the Public Health Service Act, the Community Mental Health Centers Act, or the Developmental Disabilities Act; and extends to June 30, 1974, the provisions of section 601, title VI, the Medical Facilities Construction and Modernization Amendments of 1970 (Hill-Burton amendments) designed to assure availability of appropriated health funds. S. 1136. Public Law 93–45, approved June 18, 1973. (63,163)

Little Cigar Act

Amends the Federal Cigarette Labeling and Advertising Act (15 USC 1331–1340) as amended by the Public Health Cigarette Smoking Act of 1969 by expanding the prohibition on advertising media to include "little cigars"; defines the term "little cigar" to mean any roll of tobacco wrapped in leaf tobacco or any substance containing tobacco (other than cigarettes) and weighing not more than 3 pounds per 1,000 units; and provides that it shall be unlawful to advertise little cigars on any medium of electronic communication subject to the jurisdiction of the Federal Communications Commission. S. 1165. Public Law 93–109, approved September 21, 1973. (VV)

National Institute of Health Care Delivery Act

Amends the Public Health Service Act to establish a National Institute of Health Care Delivery as a separate agency within the Department of Health, Education, and Welfare to carry out an accelerated multidisciplinary research and development effort to improve the organization and delivery of health care in the nation; authorizes up to eight regional centers and two National Special Emphasis Centers, a Health Care Technology Center, and a Health Care Management Center; authorizes, for both the Institute and the Centers, $115 million, $130 million, and $145 million for fiscal years 1974, 1975, and 1976 respectively; establishes a 21 member National Advisory Council on Health Care Delivery to advise the Institute on the development, priorities, and execution of its programs, and contains other provisions. S. 723. P/S May 15, 1973. (VV)

National Research Service Awards and Protection of Human Subjects Act

In title I, the National Research Service Award Act, consolidates the existing research training and fellowship programs into a single National Research Service Awards authority which would be the major element in the training programs of the National Institutes of Health (NIH) and National Institute of Mental Health and would increase their capability of maintaining a superior national program of research, and provides a revised procedure whereby awards would be provided through the Office of the Director of NIH by the Secretary of Health, Education, and Welfare in consultation with the Directors of NIH and the National Institute for Mental Health;

Establishes, in title II, the Protection of Human Subjects Act, a National Commission for the Protection of Human Subjects of Biomedical and Behavioral Research within the Department of Health, Education, and Welfare, to be composed of 11 members appointed by the President for 4 year terms, with not more than five members to have been engaged in biomedical or behavioral research involving human beings; provides that the Commission is first to undertake a comprehensive investigation and study to identify the basic ethical principles and develop guidelines which should underlie the conduct of biomedical and behavioral research involving human subjects, and second, to develop and implement policies and regulations to assure that research is carried out in accordance with the ethical principles they have identified, develop procedures for certification of Institutional Review Boards and also develop procedures for and make recommendations to the Congress in the areas of sanctions, compensation for injuries or death, and appropriate mechanisms to extend the scope of the Commission's jurisdiction;

Provides protection for individuals and institutions in matters of religious beliefs or moral convictions; prohibits research and experimentation on human fetuses until such time after certification of Institutional Review Boards has been established and the Commission develops policies with regard to the conduct of research on the living fetus or infants;

Contains interim provisions denoting that, until the certification of Boards has been established, it is the responsibility of each institution engaged in such research to determine that the rights and welfare of the subjects involved are fully protected, that the risks are outweighed by the potential benefits to the subject or the importance of the knowledge to be gained, and that informed consent is to be obtained by adequate methods in all but exceptional cases as specified in this act;

Calls for the Commission, in title III, the Special Study of Biomedical Research Act, to make a comprehensive investigation and study of the ethical, social, and legal implications of advances in biomedical research and technology, with a report to be sent to the President and the Congress at least every 2 years together with recommendations for needed legislation or appropriate action by public or private organizations or individuals;

And contains other provisions. H.R. 7724. P/H May 31, 1973; P/S amended September 11, 1973; Senate requested conference September 11, 1973. (382)

Research in Aging Act

Amends title IV of the Public Health Service Act to provide for the establishment by the Secretary of Health, Education, and Welfare (HEW) of a National Institute on Aging (NIA) in the National Institutes of Health (NIH) for the conduct and support of biomedical, social, and behavioral research and training related to the aging process and the diseases and other special problems and needs of the aged, as authorized under section 301 of the Public Health Service Act and presently focused in the National Institute of Child Health and Human Development; provides that the Director of NIH shall assign functions to NIA or another institute when the activities overlap; directs the Secretary of HEW to:

(1) conduct scientific studies, through the Institute, for the purpose of measuring the impact on the biological, medical, and psychological aspects of aging, of all programs conducted or assisted by HEW to meet the needs of the aging in order to obtain data for assessment of the programs by the Institute;

(2) carry out public information and education programs to disseminate information developed by the Institute which may aid in dealing with, and understanding, the problems associated with aging; and

(3) prepare a comprehensive aging research plan within 1 year after enactment for presentation to the Congress and the President, along with a statement of the staffing and funding requirements necessary to implement the plan; and contains other provisions.

NOTE.—(H.R. 14424 [92d-2d], a similar measure, was pocket vetoed by President Nixon on October 30, 1972.) S. 775. P/S July 9, 1973. (VV)

School lunch and child nutrition programs

Amends section 6 of the National School Lunch Act which authorizes expenditures for commodities to provide a means to enable the Department of Agriculture, to meet school lunch and breakfast program needs for this fiscal year only, to make an estimate as of March 15 of the amount of commodities which the Department will deliver to schools; requires the Secretary (if this estimate is less than 90 percent of the value of the amount the Department originally planned to deliver to schools) to pay the States, no later than April 15, a cash amount equal to the difference between the initial estimate and the amount to be delivered this fiscal year as determined by the March 15 estimate, and to distribute the money to the States according to their ratio of meals served under the school lunch and breakfast program; directs the Secretary to use section 32 funds and funds from section 416 of the Agricultural Act of 1949 for the purposes of this act to request, if necessary, a supplemental appropriation; waives the matching requirements for the funds distributed under this act; and contains other provisions. H.R. 4278. Public Law 93-13, approved March 30, 1973. (VV)

Increases the present 8 cent Federal cash reimbursement for the school lunch program to 10 cents per lunch and sets the school breakfast program reimbursement at 8 cents; provides for an automatic adjustment in Federal reimbursement rates for both the school lunch and school breakfast program for January 1, 1974, and semi-annually thereafter, to reflect changes in the cost of operating such programs; makes permanent the requirement that the Secretary of Agriculture make cash payments to the States of any funds programmed for the purchase of commodities but not expended for that purpose; extends the authorization for the Special Supplemental Food Program to June 30, 1975, and increases the authorization for fiscal year 1975 to $40 million; makes agencies of Indian tribes eligible to administer the Special Supplemental Food Program; requires that the Special Milk Program be available to any school or non-profit child care institution that requests it and requires that children who qualify for free lunches shall also be eligible for free milk; increases the membership of the National Advisory Council on Child Nutrition from 13 to 15 members by adding an urban and rural school lunch program supervisor; changes the method of apportioning funds for free and reduced-price lunches and makes eligible for reduced price lunches those students whose parents' income is 75 percent, instead of 50 percent as presently provided, above the income poverty guideline prescribed to receive free lunches; and contains other provisions. H.R. 9639. Public Law 93-150, approved November 7, 1973. (403)

Sudden Infant Death Syndrome Act

Provides financial assistance to identify the causes and preventive measures needed to eliminate Sudden Infant Death Syndrome and provides information and counseling services to families affected by Sudden Infant Death Syndrome and to personnel who come in contact with the victims or their families. S. 1745. P/S December 11, 1973. (VV)

INDIANS

American Indian Policy Review Commission

Provides for a Congressional Commission of bipartisan composition from both the Senate and House of Representatives and five members from the Indian community to be selected by the Commission; charges the Commission with reviewing all of the treaties, statutes, judicial decisions, and executive orders, as well as the Constitution itself, to determine the legal-historical basis for the unique relationship that Indian people maintain with the Federal Government in order to bring a fundamental reform of such relationship; provides the authority to conduct an in-depth management study of the Bureau of Indian Affairs; requires the Commission to submit its recommendations to the Congress; and authorizes $2 million for the purposes of carrying out this Act. S.J. Res. 133. P/S December 5, 1973.

Assistant Secretary for Indian Affairs

Establishes within the Department of the Interior an additional Assistant Secretary of the Interior who will be responsible only for Indian Affairs, and amends the Alaska Native Claims Settlement Act (85 Stat. 688) to establish a thirteenth region for Alaska Natives who are not residents of Alaska. H.R. 620. P/H October 1, 1973; P/S amended December 14, 1973; House disagreed to Senate amendments December 19, 1973; Senate requested conference December 19, 1973. (VV)

Choctaw, Chickasaw, and Cherokee Nations

Grants the consent of the United States for the Choctaw Nation, the Chickasaw Nation, and the Cherokee Nation to sue each other and other persons or entities to quiet title to certain portions of the bed of the Arkansas River in eastern Oklahoma. H.R. 5089. Public Law 93-195, approved December 20, 1973. (VV)

Glen Canyon National Recreation Area Concession Operations

Directs that the annual franchise fee received by the Secretary of the Interior from the concessioner in connection with the Rainbow Bridge floating concession operation in Glen Canyon National Recreation Area be placed in a separate fund of the Treasury, and authorizes the Secretary to transfer annually such fees from the fund to the Navajo Tribe of Indians, in consideration of the tribe's continued agreement to the use of former Navajo Indian Reservation lands for the purpose of anchoring the Rainbow Bridge floating concession facility. S. 1384. P/S May 23, 1973. (VV)

Indian Claims Commission

Authorizes not to exceed $1.2 million for the expenses of the Indian Claims Commission for fiscal year 1974, and an additional $900 million for the expense assistance revolving loan fund. S. 721. Public Law 93-37, approved May 24, 1973. (VV)

Indian Financing Act

Provides to Indian organizations and individual Indians capital in the form of loans and grants that is needed to promote their economic development; authorizes a $50 million increase for the Revolving Loan Fund; provides a Loan Guarantee and Insurance Program which could generate as much as $200 million in new private capital; authorizes an Interest Subsidy Program; and provides an Indian Business Development Grant Program. S. 1341. P/S July 28, 1973. (VV)

Indian Judgment Distribution Act

Provides that if neither House of Congress, within 60 calendar days (excluding adjournments of more than 3 days) from the date of submission of a recommended plan by the Secretary of the Interior regarding the distribution of funds awarded to Indian Tribal groups by the Court of Claims, passes a committee resolution disapproving such plan and thus requires authorizing legislation, the plan will become effective and the distribution of such funds made upon the expiration of the 60 day period or earlier if waived by committee resolutions by both the House and the Senate Committees on Interior and Insular Affairs, thereby relieving the Committees of the necessity of having to legislate on all judgment awards except for the most complicated. S. 1016. Public Law 93-134, approved October 19, 1973. (VV)

Joint Committee on Navajo-Hopi Administration—abolishment

Abolishes the Joint Committee on Navajo-Hopi Indian Administration created during the 81st Congress to consider the problems peculiar to the Navajo and Hopi Tribes and oversee the expenditure of funds appropriated for the development of their reservations, construction of facilities, and other needed improvements, work which was principally completed in 1964. S. 267. P/S February 5, 1973. (VV)

Klamath Indian tribal land acquisition

Directs the Secretary of Agriculture to acquire by condemnation the remainder of the Klamath Indian Forest lands, for inclusion in the Winema National Forest, which the Klamath Tribe has directed the United States National Bank of Portland, a private trustee, to sell by the terms of its trust agreement and authorizes for this purpose an amount not to exceed $70 million. H.R. 3867. Public Law 93-102, approved August 16, 1973. (VV)

Knife River Indian Village National Historic Site

Authorizes the Secretary of the Interior to acquire a cluster of 5 archeological sites located near the Knife and Missouri Rivers together with additional lands as may be necessary and to administer the area as the Knife River Indisn Villages National Historical Site. S. 1468. P/S November 30, 1973. (VV)

Menominee Restoration Act

Reinstates the act terminating supervision over the affairs of the Menominee Indian Tribe of Wisconsin; makes available to the tribe the Federal services lost through termination; and provides for the reestablishment of tribal self-government. H.R. 10717. Public Law 93–197, approved December 22, 1973. (VV)

National Trail Act amendment

Provides for the addition of an Indian Nations Trail to the trials to be studied for possible inclusion in the national scenic trails system. S. 1976. P/S November 30, 1973. (VV)

Publication of material relating to the constitutional rights of Indians

Amends, for technical reasons, section 701(c) of title VII of Public Law 90–284 to authorize the appropriation of such sums as may be necessary for the Secretary of the Interior (1) to annually revise and republish the document entitled "Indian Affairs, Laws and Treaties," (2) to revise and republish the treatise entitled "Federal Indian Laws," and (3) to have prepared and printed as a government publication an accurate compilation of the official opinions of the Solicitor of the Department of the Interior relating to Indian affairs. S. 969. P/S June 27, 1973. (VV)

INTERNATIONAL

Atlantic Union delegation

Authorizes the creation of a delegation of 18 eminent citizens (6 each to be appointed by the House of Representatives, the Senate, and the President) to meet with similar unofficial delegations "from such North Atlantic Treaty parliamentary democracies as desire to join in the enterprise" in order to explore the possibility of agreement on a "declaration that the goal of their peoples is to transform their present relationship into a more effective unity based on Federal principles," and empowers the convention to invite other parliamentary democracies to participate in the process, which would also explore the possibilities for a timetable and a commission to move toward the goal by stages. S.J. Res. 21. P/S March 26, 1973. (VV)

Board for International Broadcasting Act

Authorizes $50,209,000 for fiscal year 1974 for the operation of Radio Free Europe and Radio Liberty and creates a new Board for International Broadcasting charged with making grants to the radios and overseeing their operations, which shall take over the role presently performed by the State Department of administering grants to the radios. S. 1914. Public Law 93–129, approved October 19, 1973. (369)

Department of State Authorization Act

Authorizes a total of $682,036,000, including $4.5 million for the U.S. share of expenses of the International Commission on Control and Supervision in Vietnam; prohibits the use of funds on or after August 15, 1973, for further involvement of U.S. forces in hostilities in North Vietnam, South Vietnam, Laos, or Cambodia or direct or indirect aid to North Vietnam unless specifically authorized hereafter by Congress; establishes a new Bureau of Oceans and International Environmental and Scientific Affairs in the Department of State to be headed by an additional Assistant Secretary; requires that military base agreements with foreign countries be submitted to the Congress where they can be approved either by passage of a concurrent resolution by both the House and the Senate or by the Senate giving its advice and consent to the agreement; requires that funds be cut off for foreign affairs agencies which do not comply within 35 days with requests for information by the Senate Committee on Foreign Relations or the House Committee for Foreign Affairs, and amends section 634(c) of the Foreign Assistance Act containing similar provisions concerning access to information by the Congress and the General Accounting Office, to eliminate the President's privilege of waiving its provisions except with regard to Presidential communications; prohibits the use of funds appropriated pursuant to the act to be used for publicity or propaganda to attempt to influence the outcome of legislation pending before Congress or the outcome of a political election; requires by law the listing by rank order of Foreign Service personnel selected for promotion; states the sense of Congress that the United States and Russia seek agreement on specific mutual reductions in military expenditures; and contains other provisions. H.R. 7645. Public Law 93–126, approved October 18, 1973. (191)

Diplomatic relations between Sweden and the United States

Expresses the sense of the Senate that "the United States Government and Sweden should restore their normal friendly relation, and confirm this return to normalcy by appointing and dispatching ambassadors to their respective capitals on an immediate basis." S. Res. 149. Senate adopted October 4, 1973. (VV)

Environmental modification as a weapon of war

Expresses as a sense of the Senate that the United States Government should seek the agreement of other governments, including all permanent members of the Security Council of the United Nations, to a proposed treaty for the complete cessation of any research experimentation or use of any environmental or geophysical modification activity as a weapon of war, including weather, climate, earthquake, and ocean modification activity. S. Res. 71. Senate adopted July 11, 1973. (266)

Euratom Cooperation Act of 1958 amendment

Amends section 5 of the EURATOM Cooperation Act of 1958, as amended, by increasing the amount, from 215,000 kilograms to 583,000 kilograms, of contained uranium 235 which the United States Atomic Energy Commission is authorized to transfer to the European Atomic Energy Community under the Agreements for Cooperation between the United States and EURATOM. S. 1993. Public Law 93–88, approved August 14, 1973. (VV)

Foreign Assistance Act

Authorizes appropriations for economic assistance to foreign countries comprised of grants and loans of $1,218,200,000 divided among five development assistance categories, Food and Nutrition, Population Planning and Health, Education and Human Resources Development, Selected Development Programs, and Selected Countries and Organizations, instead of, as formerly, providing funds for development loans, technical cooperation and development grants, and the Alliance for Progress; provides for greater transferability of funds among the five categories than is now permitted among present funding categories, whereby the President may transfer not to exceed 15 percent of the funds under one category to another in an amount which does not increase the funds in the other category by more than 25 percent; requires that the country receiving assistance provide at least 25 percent of the total costs of the project or program, which may be on an "in kind" basis, if necessary; repeals section 203 of the Foreign Assistance Act of 1961, thereby eliminating the loan repayment revolving fund administered by the Agency for International Development, from which loan repayment dollar receipts were used to make further development loans, and making all such loans subject to the regular authorization and appropriation process of the Congress; cuts off all funds for the continued involvement of U.S. military forces in hostilities in Indochina by prohibiting the use of funds under this or any other law for military or paramilitary operations by the U.S. in or over Vietnam, Laos, or Cambodia, thus requiring specific Congressional action to authorize and fund any renewal of American involvement in war in these countries; prohibits U.S. funding or support for any military or paramilitary activities by third country military personnel in Laos, Cambodia, North Vietnam, South Vietnam, or Thailand, unless specifically authorized by act of Congress enacted after this bill becomes law; contains a sense of the Congress resolution that the United States should not furnish aid to South Vietnam or any other party to the Vietnam cease-fire agreement if that party does not comply with the agreement; and contains other provisions. S. 2335. P/S October 2, 1973; P/H amended October 10, 1973, (442) (Comparable provisions are contained in S. 1443.)

Foreign Assistance Act of 1973

Authorizes $1,429,734,000 for foreign economic assistance and $962,500,000 for foreign military assistance, with a total of $2,392,234,000 for fiscal year 1974; adds the following five new categories for development assistance: Food and Nutrition; Population Planning and Health; Education and Human Resources Development; Selected Development Programs; and Selected Countries and Organizations, instead of, as formerly, providing funds for development loans, technical cooperation and development grants, and the Alliance for Progress; requires that the country receiving grant assistance provide at least 25 percent of the total costs of the project or program, which may be on an "in kind" basis, if necessary; prohibits the use of funds to pay for the performance of abortions or to motivate or coerce any person to practice abortion;

Prohibits the use of funds made available under this Act for police training and related programs in any foreign country; repeals, effective July 1, 1975, section 203 of the Foreign Assistance Act of 1961, and provides that not more than 50 percent of the dollar receipts scheduled for repayment thru the loan repayment revolving fund administered by the Agency for International Development would be available; authorizes $512.5 million for military assistance including military training, for fiscal year 1974 and reduces the number of countries eligible to receive military grant assistance, other than training in the United States, from forty to thirty-one;

Places a ceiling on the amount of military assistance and sales that can be made or furnished to Latin America and Africa in any fiscal year; transfers effective June 30, 1974, the authorization for military assistance and sales program for Laos, from the Department of Defense to the Foreign Assistance and Military Sales Acts; amends the act in a technical nature to assure that the Cambodia ceiling would not apply to assistance furnished under this Act; authorizes $125 million for security supporting assistance of which not less than $50 million is to be available solely for Israel; modifies section 620(e)(1) of the Foreign Assistance Act—the Hickenlooper amendment—by permitting the President to waive upon notification to the Congress its sanctions when he determines that such a waiver was important to the national interests of the United States; requires the submission of semiannual reports on the status of each outstanding loan, contract of guaranty or insurance, credit sale of defense articles, defense services, or agricultural commodities, and each Export-Import Bank Loan, guaranty, or insurance for transactions in excess of $1 million, and annual reports showing the debt-servicing problems of foreign countries, debt relief granted by the United States, and the consequences thereof; authorizes $25 million for relief for African Sahel and endorses international planning for relief of the West African famine;

Authorizes $504 for postwar reconstruction in South Vietnam, Cambodia, and Laos; authorizes $325 million for military sales credits for fiscal year 1974, establishes an aggregate ceiling on military credit sales of $730 million for fiscal year 1974 of which $300 million shall be available only for Israel; prohibits the use of funds authorized or appropriated under this or any other law to finance military or paramilitary operations by the U.S. in or over Cambodia, Laos, or South Vietnam; (similar provisions are contained in Public Laws 93–50, 52, 126, and 155); prohibits the use of funds to finance directly or indirectly "military or paramilitary combat operations" by third country forces in Laos, Cambodia, North Vietnam, South Vietnam, or Thailand, unless specifically authorized by legislation; prohibits assistance to the Government of North Vietnam unless that assistance is specifically authorized by legislation; prohibits the use of any foreign currency, including principal and interest, which accrues in connection with any sale for foreign currency under any provision of law, under any agreement to aid any foreign country to procure equipment for defense entered into after the enactment of this Act or revision of an existing agreement, unless such agreement is specifically authorized by legislation enacted after such date; S. 1443; Public Law 93–189, approved December 17, 1973. (226, 537)

Foreign Service Building Act Amendments

Authorizes a total of $59,611,000 for fiscal years 1974 and 1975 for the Foreign Buildings program administered by the Department of State of which $13,811,000 is for new construction, acquisition and development, and $45,800,000 is for operations. H.R. 5610. Public Law 93–47, approved June 22, 1973. (VV)

International Monetary Fund and International Bank for Reconstruction and Development

Amends subsection (b) of section 3 of the Bretton Woods Agreements Act to authorize the President, by and with the advice and consent of the Senate to appoint different individuals to serve as alternates for the governor of the International Monetary Fund and of the International Bank for Reconstruction and Development. S. 1887 Public Law 93–94, approved August 15, 1973. (VV)

International Voyage Load Line Act

Repeals the Foreign Load Lines Act, 1929, as amended, and substitutes this act, which provides the necessary legislation to implement the provisions of the International Convention on Load Lines, 1966, to which the United States is a party and which came into force on July 21, 1968, making it unlawful for a vessel to be so loaded as to submerge the prescribed load line or the point where an appropriate load line should be marked. S. 1352. Public Law 93–115, approved October 1, 1973. (VV)

Intervention on the High Seas Act

Incorporates into statutory law the rights, duties, and responsibilities of the United States under the International Convention Relating to Intervention on the High Seas in Cases of Oil Pollution Casualties, signed November 29, 1969, at Brussels, which permits a coastal nation to take whatever action it deems necessary to prevent, mitigate, or eliminate a threat of oil pollution resulting from a maritime accident beyond that coastal nation's territorial limits by vesting such authority in the Secretary of the Department in which the Coast Guard is operating; gives the Secretary the authority to determine the extent of danger resulting from a collision, stranding, or other disablement of a vessel carrying oil, and to remove and, if necessary, destroy the ship and cargo which is the source of the danger; incorporates general guidelines for determining the permissible scope of intervention actions; authorizes actions against the United States in the Federal courts by persons claiming compensation; creates a mechanism for settling controversies between signatory nations, or between such nations and claimants relating to compensation for excessive measures; authorizes the Secretary to issue rules and regulations to carry out the purposes of this act; imposes criminal penalties to insure full compliance with the legislation; and extends the right of intervention now inherent in the Federal Government for vessel incidents in territorial waters to incidents on the high seas involving potential oil pollution damage. S. 1070. P/S November 5, 1973. (VV)

Israel, Assistance To

Authorizes to be appropriated to the President $2.2 billion for emergency military assistance or foreign military sales credits, or for both as the President may determine, for Israel, of which $1.5 billion may be used only if the President (1) determines it to be important to our national interest that Israel receive assistance exceeding $1.5 billion and (2) reports to Congress each such determination at least twenty days prior to date on which funds are obligated or expended in excess of $1.5 billion; provides that the 20 day notification requirement shall not apply if hostilities are resumed in the Middle East; provides that the President may use sums authorized herein to pay the United States share of the expenses of the United Nations Emergency Force in the Middle East; and contains other provisions. H.R. 11088. Public Law 93–, approved 1973. (587)

Middle East crisis

States as a sense of the Senate that we deplore the outbreak of hostilities in the Middle East and support the use of the offices of the United States by the President and Secretary of State to urge the participants to bring about a cease-fire and a return of the parties involved to lines and positions occupied by them prior to the outbreak of current hostilities, and further, that the Senate expresses its hope for a more stable condition leading to peace in that region. S. Res. 179. Senate adopted October 8, 1973. (VV)

National security

States as a sense of the Senate that other nations should not construe domestic events as adversely affecting our resolve to uphold world peace nor seize upon them as an opportunity to undermine the security of the United States or as impairing the full commitment of our Government to achieve a just and durable peace in the Middle East and calls upon all friendly nations to join us in pursuance of these vital common objectives, which have as their goal respect for law and a stable and secure peace throughout the world. S. Res. 200. Senate adopted November 9, 1973. (VV)

Peace Corps Act amendments

Continues the Peace Corps program on a one year authorization of $77,001,000 for fiscal year 1974, and places the Peace Corps under Federal procurement law. H.R. 5293. Public Law 93–49, approved June 25, 1973. (VV)

People's Republic of China—Diplomatic privileges

Authorizes the President to extend to the Liaison Office of the People's Republic of China in Washington and to the members thereof the same privileges and immunities subject to corresponding conditions and obligations as are enjoyed by diplomatic missions accredited to the United States and by members thereof. S. 1315. Public Law 93–22, approved April 20, 1973. (VV)

Privileges and immunities

Organization of American States (OAS)

Reenacts the 1985 Organization of American States Act to authorize the President to extend diplomatic privileges and immunities to a newly established group, the Permanent Observers to the OAS, which consists of nonmember American States and non-American States participating in OAS programs. H.R. 5943. Public Law 93–149, approved November 7, 1973. (VV)

Organization of African Unity (OAU)

Amends the International Organization Immunities Act of 1945 making the provisions of that Act applicable to the OAU in the same way as they may be extended to a public international organization in which the United States participates. S. 1526. P/S October 23, 1973. (VV) (Comparable provisions are contained in H.R. 8219 which became Public Law 93–161.)

Amends the International Organization Immunities Act of 1945 making the provisions of that Act applicable to the OAU in the same way as they may be extended to a public international organization in which the United States participates. H.R. 8219. Public Law 93–161, approved November 27, 1973. (VV)

Prohibition of intervention in foreign political affairs

Prohibits any citizen or resident of the United States from offering a contribution to any agency or employee of the United States for the purpose of influencing the outcome of an election for public office in a foreign country; makes it unlawful for any officer, employee, or agent of the United States to solicit or accept contributions to candidates or political parties to influence an election for public office in a foreign country; and contains other provisions. S. 2239. P/S July 26, 1973. (VV)

Radio Free Europe and Radia Liberty supplemental authorization, 1973

Authorizes additional fiscal year 1973 appropriations of not to exceed $1.5 million for Radio Free Europe and Radio Liberty to provide for increased costs resulting from the devaluation of the dollar on February 12, 1973. S. 1972. Public Law 93–59, approved July 6, 1973. (VV)

Rhodesian chrome importation

Amends the United Nations Participation Act of 1945 so as to provide that full United Nations sanctions will be legally observed by the United States and the importation of chrome from Rhodesia will be halted. S. 1868. P/S December 18, 1973. (571)

Shrimp Fisheries Act

Provides the necessary legislation to implement the agreement (Ex. P, 92d–2d) between the United States and Brazil concerning shrimp which establishes a basis for regulating the conduct of shrimp fishing in a defined area off the coast of Brazil. H.R. 8529. Public Law 93–242, approved January 2, 1974. (VV)

Southeast Asia Collective Defense Treaty

Directs the Senate Committee on Foreign Relations to conduct a full and complete review of U.S. participation in the Southeast Asia Collective Defense Treaty (SEATO) including a "re-examination of the basic foreign policy considerations which originally led the United States to join the SEATO Organization and reassessment of those considerations in the light of subsequent developments relating to that Organization and the foreign policy interests of the United States" and report its findings and recommendations to the Senate no later than March 31, 1974. S. Res. 174. Senate adopted November 2, 1973. (VV)

Transfer of trust funds to the Republic of the Philippines

Authorizes the Secretary of the Treasury to transfer to the Government of the Republic of the Philippines, sixty days after the date of enactment, the money then held in a special trust account in the Treasury for making payment on certain Philippine bonds issued before 1934, all of which have matured, thus terminating U.S. liability for them. S. 1398. P/S November 15, 1973. (VV)

Treaties

Agreement With Canada for the Promotion of Safety on the Great Lakes

Terminates and replaces a similar agreement between the United States and Canada providing for safety on the Great Lakes; requires that, effective January 1, 1975, all vessels covered by the agreement must have very high frequency radiotelephonic equipment operating in a certain band; designates a uniform distress, safety and calling frequency; and updates the technical regulations to conform with modern radio practices and capabilities. Ex. U, 93d-1st. Resolution of ratification agreed to October 1, 1973. (422)

Amendment to Article 61 of the Charter of the United Nations

Amends article 61 of the United Nations Charter relating to the composition of the Economic and Social Council (ECOSOC) and the election to membership thereon by the General Assembly which would increase the size of the council from 27 to 54 members and provide for an interim procedure to achieve this new size. The primary function of ECOSOC, whose powers are recommendatory and advisory, is to promote economic and social progress, cultural cooperation and universal respect for human rights, and to coordinate the activities of the various U.N. specialized agencies and the International Atomic Energy Agency. Ex. L, 93d-1st. Resolution of Ratification agreed to September 5, 1973. (366)

Consular Convention With Hungary

Establishes consular relations between the United States and the People's Republic of Hungary which will afford American citizens in Hungary a greater degree of consular protection and guarantee quick and unhindered communication between a citizen and his consul and prompt notification to the consul of any detention or other limitation, and provides for the establishment of consulates and the exchange of consular appointments according each country the facilities, privileges, and immunities afforded under similar bilateral consular conventions in force with a number of other countries. Ex. W, 92d-2d. Resolution of Ratification agreed to March 27, 1973. (58)

Consular Convention With Poland

Establishes consular relations between the United States and the Polish People's Republic; guarantees early notification of detention of a country's nationals and access thereto; describes consular functions and responsibilities in such fields as the issuance of visas and passports and the performance of notorial services; provides for the inviolability of consular personnel with regard to legal proceedings in the host country; and contains other provisions afforded under similar bilateral consular conventions in force with a number of other countries. Ex. U, 92d-2d. Resolution of Ratification agreed to March 27, 1973. (56)

Consular Convention With Romania

Replaces the convention currently in existence between the United States and the Socialist Republic of Romania; improves consular services in both countries to include the issuance of passports and visas, performance of notorial services, and representation of the interests of nationals in estate matters; assures that consuls whose nationals are detained or whose personal freedom is limited will be notified promptly and will have the right to visit and communicate with such nationals; and contains other provisions afforded under similar bilateral consular conventions in force with a number of other countries. Ex. V, 92d-2d. Resolution of Ratification agreed to March 27, 1973. (57)

Convention Concerning the Protection of the World Cultural and Natural Heritage

Provides a means for the identification and protection of natural and cultural areas of outstanding universal value considered as the common heritage of mankind through the establishment of a World Heritage Committee to develop and maintain lists of areas of outstanding importance and a World Heritage Fund to provide international assistance for the protection and conservation of these areas. Ex. F, 93d-1st. Resolution of ratification agreed to October 30, 1973. (458)

Convention for the Protection of Producers of Phonograms

Provides that contracting states, under their respective domestic laws, will protect the nationals of other contracting states against the making or importation of duplicate phonograms (records and tapes) without the consent of the producer if the intent is to distribute them to the public. Ex. G, 93d-1st. Resolution of ratification agreed to October 1, 1973. (429)

Convention for the Safety of Life at Sea Amendments

Provides for improved radio-telephonic watch procedures, more modern radiotelephonic devices, more detailed procedures for the operation of radiotelephonic equipment, and new regulations concerning traffic separation schemes. Ex. I, 93d-1st. Resolution of Ratification agreed to August 3, 1973.

Convention on Endangered Species

Establishes a system by which governments may strictly control the international trade in specimens of species which are, or may be, in danger of becoming extinct as a result of that trade. Ex. H, 93d-1st. Resolution of Ratification agreed to August 3, 1973. (360)

Convention on the Prevention of Marine Pollution

Establishes in each country party to the Convention a national system for regulating the ocean disposal of wastes comparable to the system provided for the United Saes by Title I of Public Law 92-532, the Marine Protection, Research and Sanctuaries Act of 1972. Ex. C, 93d-1st. Resolution of Ratification agreed to August 3, 1973. (359)

Convention With Japan for the Protection of Birds and Their Environment

Provides for the protection of species of birds which are common to the United States and Japan or which migrate between them, and provides that each country will develop programs to preserve and enhance the environment of the birds protected by this agreement. Ex. R, 92d-2d. Resolution of Ratification agreed to March 27, 1973. (60)

Exchange of Notes With Ethiopia Concerning the Administration of Justice

Terminates the notes exchanged on September 7, 1951, concerning the administration of justice and constituting an integral part of the Treaty of Amity and Economic Relations Between the United States and Ethiopia. Termination of the notes, which set forh special commitments on the part of the Ethiopian Government regarding the trial of cases involving American citizens, would be in conformity with the U.S. policy of basing international agreements, in general, on the principles of equality and reciprocity. Ex. B, 93d-1st. Resolution of Ratification agreed to March 27, 1973. (59)

Extradition Treaty With Italy

Terminates and replaces the extradition treaty between the United States and Italy signed at Washington on March 23, 1968, as later amended and supplemented; provides for the extradition of persons charged with any of 30 specified offenses including offenses relating to narcotic drugs and aircraft hijacking or in the case of conspiracy to commit any of the specified offenses; defines territorial application to include all territory under the jurisdiction of either party including territorial waters and airspace as well as registered aircraft in flight; and permits refusal of extradition unless assurances are received that the death penalty will not be imposed for an offense not punishable by death in the country from which extradition is requested. Ex. M, 93d-1st. Resolution of ratification agreed to October 1, 1973. (430)

Extradition Treaty With Paraguay

Terminates and supersedes the Extradition Treaty between the United States and the Republic of Paraguay done at Asuncion on March 26, 1913; provides for the extradition of persons charged with any of 30 specified offenses including offenses relating to narcotic drugs and aircraft hijacking or in the case of conspiracy to commit any of the specified offenses; defines territorial application to include all territory under the jurisdiction of either party including territorial waters and airspace as well as registered aircraft in flight; and permits refusal of extradition unless assurances are received that the death penalty will not be imposed for an offense not punishable by death in the country from which extradition is requested. Ex. S, 93d-1st. Resolution of ratification agreed to October 1, 1973. (431)

Extradition Treaty With Uruguay

Terminates a 1905 treaty between the United States and Uruguay except that crimes listed in that treaty and committed prior to the entry into force of the present treaty shall be subject to the provisions of the 1905 treaty; provides for the extradition of persons charged with any of 30 specified offenses including offenses relating to narcotic drugs and aircraft hijacking or in the case of conspiracy to commit any of the specified offenses; defines territorial application to include all territory under the jurisdiction of either party including territorial waters and airspace as well as registered aircraft in flight; and permits refusal of extradition unless assurances are received that the death penalty will not be imposed for an offense not punishable by death in the country from which extradition is requested. Ex. K, 93d-1st. Resolution of ratification agreed to October 1, 1973. (432)

International Coffee Agreement of 1968, as Extended

Extends the International Coffee Agreement of 1968 for 2 years, to September 30, 1975, deleting all operative provisions but preserving the structure of the International Coffee Organization. Ex. O. 93d-1st. Resolution of ratification agreed to October 1, 1973. (427)

International Convention on Load Lines Amendments

Amends the 1966 Load Lines Convention (which established uniform rules concerning the limits to which ships on international voyages may be loaded and brought international load line regulations into accord with modern developments and techniques in ship construction) by correcting a number of errors and ambiguities which have become apparent in such matters as technical terminology, geographic reference points, and cross references. Ex. D. 93d-1st. Resolution of Ratification agreed to August 3, 1973. (361)

Patent Cooperation Treaty and Annexed Regulations

Simplifies the procedure for applying for patents on the same invention in a number of countries by providing, among other things, a centralized filing procedure and a standardized application format. Ex. S. 92d-2d. Resolution of ratification agreed to October 30, 1973. (455)

Protocol Amending the 1928 Convention on International Expositions

Amends the 1928 Convention on International Expositions placing the rules and procedures governing international expositions in line with current techniques, including a reduction in the frequency of international expositions and a simplification of categories, and modernizes the provisions concerning the activities of the Bureau of International Expositions. Ex. N, 93d-1st. Resolution of ratification agreed to November 26, 1973. (495)

Protocol to the International Civil Aviation Convention

Increases the size of the Air Navigation Commission of the International Civil Aviation Organization (ICAO) from 12 to 15 members. Ex. Q, 93d-1st. Resolution of ratification agreed to November 26, 1973. (496)

Statutes of the World Tourism Organization

Transfers the International Union of Official Travel Organizations (IUOTO), a nongovernmental organization, into the World Tourism Organization (WTO), an inter-governmental tourist organization, for the purpose of promoting and developing international tourism to further the economic, social, and cultural progress of all nations. Ex. R, 93d-1st. Resolution of ratification agreed to October 30, 1973. (457)

Strasbourg Patent Classification Agreement

Adopts a common world-wide system of international classification for patents for inventions, inventors' certificates, utility models and utility certificates providing that each contracting party shall have the right to use the classification as a principal or as a subsidiary system and that the classification shall be solely of an administrative character. The agreement is similar in purpose to the Nice Agreement Concerning International Classification of Goods and Services to Which Trademarks are Applied (Ex. M, 91st-2d), and the Locarno Agreement Establishing an International Classification for Industrial Designs (Ex. I, 92d-2d), which were approved by the Senate on December 11, 1971. Ex. E, 93d-1st. Resolution of ratification agreed to October 30, 1973. (456)

United Nations Environment Program Participation Act

Authorizes an appropriation of $40 million for the total U.S. contribution to the United Nations Environment Fund and limits the fiscal year 1974 contribution to $10 million. H.R. 6768. Public Law 93-188, approved December 15, 1973. (VV)

U.S. Information Agency authorization

Authorizes $216,775,00 for fiscal year 1974 for the United States Information Agency to carry out international informational activities under the authority of the United States Information and Educational Exchange Act of 1948, the Mutual Educational and Cultural Exchange Act of 1961, and Reorganization Plan Number 8 of 1953, including $56,063,000 for Voice of America operations; prohibits the obligation of funds if the USIA does not make information requested by the Senate Committees on Commerce or Foreign Relations and the House Committee on Foreign Affairs available within 35 days; and contains other provisions. S. 1317. Vetoed October 23, 1973. Senate sustained veto October 30, 1973. (151,452,459)

Replaces the vetoed bill, S. 1317, without access to information provisions; authorizes $215,614,000 for fiscal year 1974 for the United States Information Agency to carry out international informational activities under the authority of the United States Information and Educational Exchange Act of 1948, the Mutual Educational and Cultural Exchange Act of 1961, and Reorganization Plan Number 8 of 1953; prohibits the use of any appropriation for which there is not an authorization or the use of any appropriation above the amount authorized; and contains other provisions. S. 2681. Public Law 93-168, approved November 29, 1973 (VV)

United States oceans policy

Endorses the ocean policy objectives which were envisioned in the President's Ocean Policy Statement of May 23, 1970, and which are now being pursued by the United States delegation to the United Nations Seabed Committee preparing for the Law of the Sea Conference with regard to: (1) Protecting the freedoms of the high seas, beyond a twelve mile territorial sea, for navigation, communication, and scientific research, and free transit through and over international straits; (2) recognizing certain international community rights; (3) providing for the orderly and just development of mineral resources of the deep seabed as the common heritage of mankind; and (4) for the conservation and protection of living resources with regulation of fisheries, coastal State management of coastal species, and international management of such migratory species as tuna; and commends the United States delegation for its excellent work and encourages its efforts for an early agreement on an ocean treaty embodying these goals. S. Res. 82. Senate adopted July 9, 1973. (VV)

LABOR

Emergency Employment Act amendments

Extends for 2 years, through fiscal year 1975, the Emergency Employment Act of 1971 (public employment program) and authorizes $1.25 billion for fiscal year 1974 and such sums as may be necessary for fiscal year 1975; focuses the legislation to those in greatest need and for whom the government has the clearest responsibility: the disabled and Vietnam-era veterans, the economically disadvantaged, those unemployed for 15 weeks or more, and persons unemployed as a result of the closing of or a reduction in activities at a Defense Department facility; seeks assurance that sponsors will fill at least half of the public service jobs with disabled or Vietnam-era veterans; and contains other provisions. S. 1560. P/S July 31, 1973. (346) (Comparable provisions are contained in S. 1559, Job Training Employment Opportunities (Manpower Revenue Sharing).)

Fair labor standards amendments (minimum wage)

Extends coverage to include under the definitions of employer and employee: the United States and any State or political subdivision of a State or political subdivision of a State or intergovernmental agency, with the exemption of elected officials, their personal staff, appointees on the policy making level, or immediate advisors in State and local governments; includes within coverage, employees whose vocation is domestic service;

Establishes, for employees in activities covered by the Act prior to the 1966 amendments, an hourly minimum of $2.00 during the period ending June 30, 1974, and $2.20 thereafter; establishes, for employees in agriculture, an hourly minimum of $1.60 during the period ending June 30, 1974, $1.80 during the year beginning July 1, 1974, $2.00 an hour the year beginning July 1, 1975, and $2.20 an hour after June 30, 1976; establishes, for employees newly covered by the 1966 amendments and by the 1973 amendments, an hourly minimum of $1.80 during the period ending June 30, 1974, $2.00 during the year beginning July 1, 1974, and $2.20 thereafter;

Provides for presently covered employees in Puerto Rico and the Virgin Islands effective on the effective date of the legislation: (A) increases of 12 cents an hour if their wage order rates are less than $1.40 an hour; and (B) an increase of 15 cents an hour if their wage order rates are $1.40 an hour or higher; provides that newly covered employees (including commonwealth and municipal employees) are to have their wage rates set by special industry committees, and that this wage rate may not be less than 60 percent of the otherwise applicable or $1.00 an hour, whichever is greater; and that all employees (other than commonwealth and municipal employees) will receive, beginning one year after the effective date of this legislation, yearly increases of (A) 12 cents an hour per year if their wage order rates are less than $1.40, and (B) increases of 15 cents an hour per year if their wage order rates are $1.40 an hour or higher; provides that the following employees in Puerto Rico and the Virgin Islands are to have their rates set as if they were employed in the U.S. mainland: hotel, motel, restaurant and food services employees and U.S. employees and employees of the government of the Virgin Islands; And contains other provisions. H.R. 7935. Vetoed September 6, 1973. House sustained veto September 19, 1973 (229,355).

Job training—Employment opportunities

Provides job training and employment opportunities for economically disadvantaged, unemployed, and underemployed persons; authorizes the Secretary of Labor to provide financial assistance under the terms of existing law repealed by this act until July 1, 1974, and makes special provisions for the continuation of the summer youth job program for the summer of 1974; establishes a program to provide comprehensive manpower services throughout the Nation to assure that training and other services lead to maximum employment opportunities and enhance self-sufficiency by establishing a flexible and decentralized system of Federal, State and local programs; make special provisions regarding prime sponsors and special manpower target groups; contains provisions relating to manpower programs for Indians and for migrant and seasonal farmworkers; establishes within the Department of Labor a "Job Corps" to assist low-income disadvantaged young persons in becoming more employable and productive citizens; establishes a National Commission for Manpower Policy to cooridnate manpower programs; and contains other provisions. S. 1559. Public Law 93-203, approved December 28, 1973. (314, 346)

Labor-Management Relations Act amendments

Amends section 302(c) of the Labor-Management Relations Act of 1947 to add legal service programs for employees, their families, and dependents for counsel or plan of their choice to the specified employer financed fringe benefits which may be established through joint labor-management administration, with the provision that legal services funds may not be used in suits against contributing employers except in workmen's compensation cases, suits against participating labor organizations, or suits against any employer or labor organization where the matter arises under the National Labor-Relations Act or this act or where a labor organization would be prohibited from defraying the costs of legal services by the provisions of the Labor-Management Reporting and Disclosure Act of 1957. S. 1423. Public Law 93-95, approved August 15, 1973. (136)

Penn Central Rail dispute

Provides for Federal intervention to bring about a temporary halt in the strike of certain employees of the United Transportation Union against the Penn Central Transportation Company arising out of the Penn Central's plan to eliminate approximately 5,700 train crew positions by applying the final paragraph of section 10 of the Railway Labor Act (45 USC 160) and extends the 30-day period provided for in section 10, to 12:01 A.M., May 9, 1973, in order to secure additional time for an agreement to be reached; requires the Secretary of Transportation, not later than 45 days following enactment, to file a report to the Congress providing a full and comprehensive plan for the preservation of essential rail transportation services in the northeast section of the Nation; requires the Secretary of Labor, not later than 30 days following enactment, to submit to Congress a report detailing the progress, if any, of all negotiations, and any recommendations for a proposed solution; and contains other provisions. S.J. Res. 59. Public Law 93-5, approved February 9, 1973. (VV)

**Rehabilitation Act of 1972*

Amends the Vocational Rehabilitation Act to provide for more services to handicapped individuals; places greater emphasis on research and training of rehabilitation personnel and the development of innovative rehabilitation techniques, equipment, and devices which would make employment more feasible for a handicapped individual; establishes an Office for the Handicapped within the Department of Health, Education, and Welfare; creates a Federal Interagency Committee on Employment of the Handicapped, a National Commission on Transportation and Housing, and an Architectural and Transportation Barriers Compliance Board to continue and expand services to the handicapped and provides for an order of priority to serve those individuals with the most severe handicaps; and contains other provisions. *NOTE:* (A similar measure, H.R. 8395 [92d-2d], was pocket vetoed by President Nixon on October 27, 1972.) S. 7. Vetoed March 27, 1973. Senate sustained veto April 3, 1973. Senate sustained veto April 3, 1973. (24, 74)

Rehabilitation Act of 1973

Repeals the existing Vocational Rehabilitation Act (29 U.S.C. 31-42) ninety days after the date of enactment of this act; provides, in title I, the administrative provisions for vocational rehabilitation services and includes State plan provisions; includes in the State plan requirements provisions to insure that special emphasis is given to serving those individuals with the most severe handicaps; requires that an individualized written rehabilitation program be drawn up for every handicapped individual served in consultation with that individual; directs the Secretary of Health, Education, and Welfare to undertake a comprehensive study of the feasibility of the methods designed to prepare individuals with the most severe handicaps for entry into vocational rehabilitation programs and report his findings and any recommendations to the Congress by February 1, 1975; consolidates, in title II, Research and Training, all research and training authority in existing law, to be administered by the Secretary through the Commissioner of the Rehabilitation Services Administration (RSA), providing a statutory basis for the RSA and the appointment of the Commissioner by the President; emphasizes applied research and the development of technology and devices to aid in solving rehabilitation problems of handicapped individuals and directs the establishment of Rehabilitation Engineering and Research Centers in order to aid in such development; includes a program of international research and exchange of personnel and technical assistance; contains, in title III, all special programs, grants, and related service activities which are not carried out by the State rehabilitation agency; includes a consolidated special project authority, with special emphasis on projects for spinal cord injured, severely handicapped deaf and older blind individuals, and an earmarking of money under special projects for migratory agricultural workers; combines, in title IV, provisions of existing law, with changes and additions, relating to Secretarial responsibilities for administration and evaluation; directs the Secretary to ensure that maximum coordination and consultation takes place with the Veterans' Administration at the national and local levels with respect to rehabilitation services and related programs for disabled veterans; directs the Secretary to prepare, in consultation with other agencies, handicapped individuals and public and private organizations, a long-range projection for the provision of comprehensive services to handicapped individuals; includes, in title V, Miscellaneous Provisions, the creation of a Federal Interagency Committee on Handicapped Employees and an Architectural and Transportation Barriers Compliance Board; and contains other provisions. H.R. 8070. Public Law 93-112, approved September 26, 1973. (384)

Caspar W. Weinberger, of California, to be Secretary of Health, Education, and Welfare: Nomination confirmed February 8, 1973. (14)

PROCLAMATIONS

Digestive Disease Week

Designates the week of May 20–26, 1973, as "Digestive Disease Week." S.J. Res. 114. P/S May 17, 1973. (VV)

Grandparents Day

Designates the fourth Sunday in May of each year as "Grandparents Day." S.J. Res. 126. P/S November 15, 1973. (VV)

Honor America Day

Declares the twenty-one days from Flag Day, June 14, 1973, to Independence Day, July 4, 1973, as a period to honor America. S. Con. Res. 27. Senate adopted May 31, 1973; House adopted June 13, 1973. (VV)

International Clergy Week in the United States

Designates the week of January 28, 1973, as "International Clergy Week in the United States". H.J. Res. 163. Public Law 93–2, approved January 26, 1973. (VV)

Jim Thorpe Day

Designates April 16, 1973, as "Jim Thorpe Day". S.J. Res. 73. Public Law 93–19, approved April 16, 1973. (VV)

John C. Stennis Day

Designates Monday, October 15, 1973, as "John C. Stennis Day". S. Res. 180. Senate adopted October 9, 1973. (VV)

Johnny Horizon '76 Clean Up America Month

Designates the period of September 15, 1973, through October 15, 1973, as "Johnny Horizon '76 Clean Up America Month". H.J. Res. 695. Public Law 93–108, approved September 19, 1973. (VV)

Mississippi River

Designates June 17, 1973, as a day of commemoration marking the 300th anniversary of the opening of the upper Mississippi River by Jacques Marquette and Louis Jolliet. S.J. Res. 102. Public Law 93–41, approved June 14, 1973. (VV)

National Arthritis Month

Designates the month of May 1973 as "National Arthritis Month". H.J. Res. 725. Public Law 93–21, approved April 20, 1973. (VV)

National Autistic Children's Week

Designates the week which begins on June 24, 1973, as "National Autistic Children's Week". H.J. Res. 296. Public Law 93–42, approved June 15, 1973. (VV)

National Clean Water Week

Designates the period beginning April 15, 1973, as "National Clean Water Week". H.J. Res. 437. Public Law 93–18, approved April 14, 1973. (VV)

National Consumer Effort to Save Gas and Arrive Alive

Calls for all motor vehicle operators traveling on high-speed roads on week-ends and holidays, between the date of passage of this resolution and Labor Day, September 3, 1973, to: (1) travel at speed no greater than 10 miles per hour less than the posted speed limit, and (2) turn on headlights to encourage fellow travelers to join in the nationwide campaign to slow down, save gas, save lives and save money. S. Res. 138. Senate adopted August 2, 1973. (VV)

National Employ the Older Worker Week

Designates the second full calendar week in March 1973 as "National Employ the Older Worker Week". H.J. Res. 334. Public Law 93–10, approved March 15, 1973. (VV)

National Historic Preservation Week

Designates the calendar week beginning May 6, 1973, as "National Historic Preservation Week". S.J. Res. 51. Public Law 93–30, approved May 5, 1973. (VV)

National Hunting and Fishing Day

Designates the fourth Saturday of September 1973 as "National Hunting and Fishing Day". H.J. Res. 210. Public Law 93–23, approved April 20, 1973. (VV)

National Legal Secretaries' Court Observance Week

Designates the second full week in October of each year as "National Legal Secretaries' Court Observance Week". H.J. Res. 466. Public Law 93–104, approved August 16, 1973. (VV)

National Moment and Day of Prayer and Thanksgiving

Designates the moment of 7:00 pm. E.S.T., January 27, 1973, a national moment of prayer and thanksgiving for the peaceful end to the Vietnam war and the 24 hours beginning at the same time as a national day of prayer and thanksgiving, and contains other provisions. H.J. Res. 246. Public Law 93–3, approved February 1, 1973. (VV)

National Next Door Neighbor Day

Designates the fourth Sunday in September 1978 as "National Next Door Neighbor Day". S.J. Res. 25. Public Law 93–103, approved August 6, 1973. (VV)

National Nurse Week

Designates the period from February 10 to February 16, 1974, as "National Nurse Week." S.J. Res. 168. P/S November 15, 1973. (VV)

National Nutrition Week

Designates the period from March 3, 1974, through March 9, 1974, as "National Nutrition Week." S.J. Res. 99. Public Law 93– , approved 1973. (VV)

National Prayer Day

Designates April 30, 1974, as a National Day for Humiliation, Fasting, and Prayer. S.J. Res. 83. P/S December 20, 1973. (VV)

Nicolaus Copernicus Week

Designates the week of April 23, 1973, as "Nicolaus Copernicus Week" marking the quinquecentennial of his birth. H.J. Res. 5. Public Law 93–16, approved April 9, 1973. (VV)

Vietnam Veterans' Day

Designates March 29, 1974, as "Vietnam Veterans' Day." H.J. Res. 865. Public Law 93–232, approved 1973. (VV)

Walk a Mile for Your Health Day

Designates the last Sunday of May of each year as "Walk a Mile for Your Health Day". S.J. Res. 159. P/S December 14, 1973. (VV)

Warsaw Ghetto Uprising

Proclaims April 29, 1973, as a day of observance of the 30th anniversary of the Warsaw ghetto uprising. H.J. Res. 303. Public Law 93–20, approved April 20, 1973. (VV)

Women's Equality Day

Designates August 26 of each year as Women's Equality Day in commemoration of that day in 1920 on which the women of America were first guaranteed the right to vote. H.J. Res. 52. Public Law 93–105, approved August 16, 1973. (VV)

TRANSPORTATION—COMMUNICATIONS

Aircraft hijacking

Amends the Federal Aviation Act of 1958 to provide a more effective program to prevent aircraft piracy on both the international and domestic levels; implements, in Title I, the Convention for the Suppression of Unlawful Seizure of Aircraft (Hague Convention—Ex. A [92d–1st] to which the United States is a party and which came into effect on October 4, 1971; provides the President authority to suspend air service between the United States and any foreign nation he determines is not acting consistently with the provisions of the Hague Convention, in effect imposing, unilaterally, a U.S. air transport boycott; permits the Secretary of Transportation, with the approval of the Secretary of State, to restrict, limit, or revoke the operating authority of any foreign air carrier failing to afford necessary security safeguards to the traveling public; provides, in Title II, for the screening of all passengers and carry on baggage by weapons detecting devices prior to their being boarded on the aircraft; establishes under the Administrator of the Federal Aviation Administration an Air Transportation Security Force to provide a Federal law enforcement presence at the nation's major airports; and contains other provisions. S. 39. P/S February 21, 1973. (21)

Airport Development Acceleration Act

Amends the Airport and Airway Development Act of 1970 and the Federal Aviation Act of 1958 to increase Federal financial assistance for airport development throughout the United States; increases the present minimum annual authorization for airport development grants to air carrier and reliever airports to $27 million, and to general aviation airports to $35 million, for each of fiscal years 1974 and 1975, and the five year limit on obligational authority for the fiscal years 1971–1975 to $1.46 billion, funds which will come from the Airport and Airway Trust Fund; provides that the maximum 50 percent Federal share of project costs will be determined by the total number of passengers enplaned for all air carrier airports operated by the same sponsor and raises the maximum Federal share to 75 percent for general aviation or reliever airports; prohibits the levying by State and local governments of passenger "head" taxes or use taxes on the carriage of persons in air transportation; and contains other provisions. *NOTE*: (An earlier measure, S. 3755 [92d–2d], was pocket vetoed by President Nixon on October 27, 1972.) S. 38. Public Law 93–44, approved June 18, 1973. (9)

AMTRAK Improvement Act

Amends the Rail Passenger Act of 1970 to upgrade the quality of rail passenger service and put it on a par with quality rail passenger systems operating in other countries; increases the $22.7 million authorization in existing law to $334.3 million and increases the ceiling on federally guaranteed obligations of the National Railroad Passenger Corporation from $200 million to $500 million; restructures the Corporation's board of directors; authorizes the Corporation to make all reasonable efforts to insure that elderly and handicapped individuals are given equal opportunity to utilize intercity transportation on passenger trains operated by or on behalf of the Corporation; gives the Corporation the power of eminent domain in order to acquire from owners other than governments and railroads right-of-way land, or other property, and authorizes an Interstate Commerce Commission (ICC) proceeding through which the Corporation can acquire interest in property owned by a railroad; provides that quality of service must be considered by the ICC in fixing the compensation the Corporation must pay to railroads providing it with passenger service; requires the Corporation to initiate one new experimental route each year, and to operate it for a two year period and provides a means of discontinuing such service if it proves unsuccessful; vests jurisdiction over safety-related matters in the Department of Transportation and grants the ICC full and adequate power to assure that adequate service, equipment, tracks, and other facilities are provided for intercity rail passenger service; confirm's the Corporation's authority to institute auto-ferry service as part of the intercity rail passenger service authorized in existing law and limits the right of any person to compete with the Corporation on its basic rates in providing auto ferry service; prohibits any preclearance of budget requests, legislative recommendations, proposed testimony, or comments on legislation before submission to the Congress; and contains other provisions. S. 2016. Public Law 93–146, approved November 3, 1973. (VV)

Bicentennial Advanced Technology Transportation System Demonstration Act

Authorizes the Secretary of Transportation to make an investgation and study for the purposes of determining the feasibility, social advisability, environmental impact, and economic practicability, of (1) a tracked air-cushioned vehicle or other high-speed ground transportation system between Washington, D.C., and Annapolis, Maryland, and (2) a surface effect vessel or other high-speed marine transportation system between the Baltimore-Annapolis area in Maryland and the Yorktown-Williamsburg-Norfolk area in Virginia for use as part of the Bicentennial celebration and authorizes therefor an appropriation of not to exceed $300,000; directs the Secretary to report the results of such investigation and study, together with his recommendations, to the President and the Congress, no later than 9 months after enactment of this act; and authorizes the Secretary to enter into such contracts and other arrangements as necessary for the construction and operation of such systems if such study demonstrates their feasibility; and contains other provisions. S. 797. P/S June 14, 1973. (VV)

Corporation for Public Broadcasting authorizations, 1973

Amends the Communications Act of 1934 to authorize appropriations for the Corporation for Public Broadcasting to an increased level for fiscal years 1974 aind 1975 of 50 million and up to an additional $5 million in matching funds for gifts for fiscal year 1974 and $60 million and up to an additional $5 million in matching funds for gifts for fiscal year 1975; authorizes appropriations of $25 million for fiscal year 1974, and $30 million for fiscal year 1975 for construction of educational television and radio broadcasting facilities; requires radio and television stations receiving Federal assistance to make audio recordings of programs involving discussions of important public issues and make them available to the public at cost; and contains other provisions. *NOTE*: (H.R. 13918 [92d–2d], a similar bill, was vetoed by President Nixon on June 30, 1972.) S. 1090. Public Law 93–84, approved August 6, 1973. (113)

Delta Queen

Extends until November 1, 1978, the existing exemption of the steamboat "Delta Queen" from certain vessel laws relative to the construction standards of the Safety at-Sea act (Public Law 89–777). H.R. 5649. Public Law 93–106, approved August 16, 1973. (VV)

Emergency commuter relief

Authorizes not to exceed $800 million ($400 million for fiscal year 1974, and an aggregate of not to exceed $800 million for fiscal year 1975) for fiscal years 1974 and 1975 for the Secretary of Transportation, on such terms and conditions as he may prescribe, to make grants or loans to State or local public bodies in order to assist them in maintaining adequate transportation services in urban areas by providing financial assistance (requiring one-third local contribution) to pay operating expenses incurred as a result of providing such services; provides for the establishment of a reasonable fare structure for each area according to its particular local needs; authorizes an additional $20 million for each of fiscal years 1974 and 1975 for research and development, establishment, and operation of demonstration projects to determine the feasibility of fare-free urban mass transportation systems; and contains other provisions. S. 386. P/S September 10, 1973; P/H amended October 3, 1973; in conference. (376)

Emergency Rail Services Act amendments

Assures the continuance of essential rail service in the Northeast and Midwest by authorizing the Secretary of Transportation to contract with the trustees of any railroad in reorganization under section 77 of the Bankruptcy Act for the continued provision of service in the case of actual or threatened cessation of such services; allows the Secretary to acquire by purchase, lease, or other transfer any equipment, facilities, or operating rights over the tracks of such a railroad; and contains other provisions. S. 2060. P/S July 27, 1973. (332)

Essential Rail Services Continuation Act

Assures the continuance of essential rail service in the Northeast and Midwest in the event that one or more of the seven railroads presently in reorganization under section 77 of the Bankruptcy Act ceases operations by authorizing the Interstate Commerce Commission to direct one carrier by railroad to operate over the lines of a non-operating carrier; requires the Commission to issue just and reasonable directions to the operating carrier which cover the handling, routing, and movement of traffic of the non-operating carrier; limits the duration of such directions to sixty days unless extended by the Commission for a period of not to exceed 180 days; authorizes funds to be appropriated in such amounts as may be necessary to reimburse a directed carrier for losses incurred because of operations it is directed to engage in by the Commission; and contains other provisions. S. 1925. P/S July 14, 1973. (VV)

Federal-Aid Highway Act

Authorizes, in title I, the Federal-Aid Highway Act of 1973, for the Interstate highway program $2.6 billion for fiscal year 1974, $3 billion each for fiscal years 1975 and 1976, and $3.25 billion each for fiscal years 1977, 1978, and 1979;

Eliminates the present signal authorization for the primary and secondary systems and their urban extensions and substitutes a separate authorization for the rural and urban portions of these systems as follows: primary system in rural areas, $680 million for fiscal year 1974 and $700 million for each fiscal year thereafter, secondary systems in rural areas funded at $390 million and $400 million per fiscal year thereafter; authorizes for the urban system, $780 million for fiscal year 1974 and $800 million per fiscal year thereafter, with extensions of the primary and secondary system in urban areas funded at $290 million for fiscal year 1974 and $300 million per fiscal year thereafter; for forest development trails, $140 million per fiscal year; for parkways, $60 million for fiscal year 1974 and $75 million thereafter; for Indian reservation roads and bridges, $75 million per fiscal year; for economic growth center development highways, $50 million for fiscal year 1974, $75 million for 1975, and $100 million for 1976;

Extends the time for completion of the Interstate system until June 30, 1979;

Expands the urban system as presently designated to encompass all urban areas and to include collector streets and access roads to airports and other transportation terminals, with the urban system to be established as the State highway department may designate, and with the routes to be selected by local officials with the concurrence of the State highway departments;

Permits the Secretary to approve as a project on any Federal-aid system the construction of exclusive or preferential bus lanes, highway traffic control devices, bus passenger loading areas and facilities (including shelters) and fringe and transportation corridor parking facilities; permits, beginning with funds authorized for fiscal year 1975, the Secretary to approve as a project on the urban system the purchase of buses, and beginning with funds atuhorized for fiscal year 1976 for the urban system, to approve projects for the construction, reconstruction, and improvement of fixed rail facilities including the purchase of rolling stock for fixed rail; provides that not more than $200 million of urban system funds for fiscal year 1975 shall be expended for the Federal share for the purchase of buses;

Increases the Federal share payable on account of any non-Interstate project from 50 to 70 percent with respect to all obligations incurred after June 30, 1973;

Provides that urban system funds apportioned to a State that are attributable to urbanized areas of 200,000 population or more shall be made available for expenditure in the State in accordance with a formula developed by the State and approved by the Secretary, and in the event a formula has not been developed and approved for a State, to be allocated among such urbanized areas within the State in the ratio the population of such urbanized area bears to the population of all such urbanized areas or parts thereof within that State;

Authorizes the Secretary to promulgate noise level standards for the control of highway noise levels for Federal-aid projects approved prior to July 1, 1972; provides that buses must meet Environmental Protection Agency standards under the Clean Air Act and the Noise Control Act of 1972, and, wherever practicable, the equipment must meet special criteria for low-emission products; requires that the planning and design of mass transportation facilities must be such as to meet special needs of the elderly and handicapped;

Authorizes under title II, entitled the Highway Safety Act of 1973, $100 million for fiscal year 1974, $125 million for 1975, and $150 million for 1976, from the Highway Trust Fund, for highway safety programs to be carried out by the National Highway Traffic Safety Administration, $42.5 million for fiscal year 1974, $55 million for 1975, and $65 million for 1976, for highway safety research and development to be carried out by the Administration, and $25 million for 1974, $30 million for 1975, and $35 million for 1976 for highway safety programs to be carried out by the Federal Highway Administration;

Authorizes programs for the elimination of hazards at rail highway crossings, the elimination or reduction of high hazard locations on highways and the elimination of roadside obstacles; provides for various studies concerned with safety; requires curb ramps for the handicapped for curbs constructed or replaced at all pedestrian crosswalks after July 1, 1976;

Increases, in title III, the Federal share of capital grants under the Urban Mass Transportation Act of 1964, as amended, to 80 percent, and increases from $3.1 billion to $6.1 billion contract authority under the Act;

And contains other provisions. S. 502. Public Law 93-87, approved August 13, 1973. (40,351)

Federal-Aid Highway Act amendment

Amends Section 164(a) of the Federal-Aid Highway Act of 1973 to authorize the Secretary of Transportation to make agreements with certain applicants for Federal assistance under that act and the Urban Mass Transportation Act, to assure that the financial assistance will not enable public bodies and operators to foreclose private operators from the inter-city charter bus industry. H.R. 10511. (VV) (Pocket vetoed during adjournment.)

Federal Railroad Safety Act authorization, 1973

Authorizes appropriations of $19,440,000 for implementation of the railroad safety functions and $1,200,000 for implementation of the hazardous materials control functions of the act for fiscal year 1974. S. 2120. Public Law 93-90, appdoved August 14, 1973. (VV)

Highway Safety Act

Authorizes $455 million for fiscal year 1974 and $475 million for fiscal year 1975 for highway safety programs, including $100 million for each of fiscal years 1974 and 1975 for the bridge replacement program, establishes a Federal-aid safer roads system, and authorizes $200 million of the total amounts authorized for each of fiscal years 1974 and 1975, to be available on a 90 percent Federal, 10 percent State matching basis, for the correction of highway hazards on that system; requires States to identify, by June 30, 1974, projects on the Federal-aid safer roads system which have to be corrected and assign priority to the correction of hazards falling within the following three major categories: (1) projects to improve highway marking and signing, (2) elimination of roadside obstacles, and (3) elimination of hazards at railroad-highway grade crossings; includes bicycle safety in the areas to be covered by highway safety standards and adds bicycle safety to required driver education programs; authorizes the use of appropriated funds for State highway safety programs for use in developing and implementing manpower training and demonstration programs; increases the minimum apportionment to any State for highway safety programs from one-third of one percent to one-half of one percent; authorizes the Secretary to carry out research on the relationship between the consumption of drugs and highway safety and to promulgate a highway safety program standard on drug use and highway safety; and contains other provisions. S. 893. P/S April 12, 1973. (VV) (Similar provisions are contained in the Federal-Aid Highway Act which became Public Law 93-97.)

Interim apportionment of interstate and other highway funds

Directs the Secretary of Transportation to apoprtion, as provided in the act, $1 billion of the sums authorized to be apportioned for fiscal year 1974 for immediate expediture for the National System of Interstate and Defense highways, and authorizes the appropriation of $500 million from the Highway Trust Fund for fiscal year 1974 funding of the Federal-aid primary and secondary systems and their urban extensions, such funds to be available as follows: 45 percent for projects on the primary system; 30 percent for projects on the secondary system and 25 percent for projects on extensions of the primary and secondary systems in urban areas. S. 1808. Public Law 93-61, approved July 6, 1973. (VV)

Interstate apportionment

Directs the Secretary of Transportation to apportion out of the Highway Trust Fund, $1 billion of the funds authorized for fiscal year 1974 for expenditure on the Interstate and Defense Highway systems. S. Con Res. 6. Senate adopted March 6, 1973. (VV)

Maritime authorization, 1974

Authorizes $531,315,000 for fiscal year 1974 for programs of the Maritime Administration within the Department of Commerce, and amends title XI of the Merchant Marine Act, 1936, as amended, to increase the loan guarantee authority of the Maritime Administration from $3 billion to $5 billion. H.R. 7670. Public Laws 93-70, approved July 10, 1973. (VV)

Ocean transportation in noncontiguous States and territories

Amends section 607(k)(8) of the Merchant Marine Act, 1936, as amended, to expressly include within the definition of "noncontiguous trade" trade between two or more points within Alaska, Hawaii, Puerto Rico, or any other territory or possession of the United States for the purpose of insuring that vessels trading between points within such States and insular territories and possessions are eligible for assistance from capital construction funds (tax deferred reserve funds) generated by the deposits made by eligible vessel operators under agreements with the Secretary of Commerce, and to make it clear that a vessel which has been built with such funds is legally permitted to between such points. S. 902. Public Law 93-116, approved October 1, 1973. (VV)

Rail freight car shortage

In view of the current railroad transportation crisis caused by a freight car shortage and other factors, declares it to be the sense of the Senate that (1) the Commodity Credit Corporation should make available to farmers the option to reseal loans on farm-stored wheat and feed grains with respect to the 1971 and 1972 crops; and (2) the President is urged and requested to appoint a special committee to conduct a study of the railroad freight car shortage problem and to submit to the President and the Senate Committees on Agriculture and Forestry and Commerce, within thirty days after its appointment, a report along with its recommendations for the most effective and practical means of (A) delivering adequate quantities of wheat to millers and feed grains to farmers and stockmen in the United States dependent upon such grain for feeding their livestock, and (B) alleviating the backup at those ports where numerous ships and railroad cars are waiting to be loaded and unloaded. S. Res. 59. Senate adopted February 19, 1973. (15)

Rail Transportation Act

Authorizes and directs the maintenance of adequate and efficient rail services in the Midwest and Northeast region of the United States; provides, in order to salvage the rail services operated by seven insolvent class I railroads in the Midwest and Northeast region, which are threatened with cessation, for their replacement with a new and viable rail services system; establishes a non-profit United States Railway Association to plan and finance the acquisition, rehabilitation, and modernization of the new system and establishes a private Consolidated Rail Corporation to operate the system. H.R. 9142. Public Law 93-236, approved January 2, 1974. (554, 588)

Railroad Retirement Act and Interstate Commerce Act amendments

Increases the tax which railroads are required to pay under the Railroad Retirement Act; provides for retirement eligibility for men at age 60 with 30 years of service; provides for an extension to December 31, 1974, of the temporary railroad retirement benefit increases presently scheduled to expire July 1, 1973; provides for a pass-through of social security benefit increases which might be enacted between July 1, 1973, and December 31, 1974; provides for the establishment of a labor management committee to recommend a restructuring of the railroad retirement system to insure its actuarial soundness with a final report and recommendations to be submitted to the Congress by April 1, 1974; declares the intent of Congress to enact legislation in 1974, effective not later than January 1, 1975, which will assure the long-term actuarial soundness of the railroad retirement system; amends the Interstate Commerce Act to provide that the Interstate Commerce Commission shall, by informal rule-making under the Administrative Procedure Act, establish the requirements for petitions for adjustments of rates of common carriers occasioned by the tax increases prescribed in this act or by other law on or before January 1, 1975, and provides for expedited freight-rate making procedures applicable to interstate and intrastate rates; and contains other provisions. H.R. 7200. Public Law 93-69, approved July 10, 1973. (VV)

Reduced rate transportation

Amends the Federal Aviation Act and the Interstate Commerce Act to authorize air carriers and surface carriers to offer reduced rate transportation to the handicapped on a positive-space basis and to persons 65 years of age and older and persons 21 years of age and younger on a space-available basis. S. 2651. P/S November 5, 1973. (VV)

Amends the Federal Aviation Act of 1958 to expand the authority of air carriers to offer free or reduced rate transportation to widows, widowers and minor children of employees killed in the line of duty to include survivors of those who have died after having been employed for 20 years or more by such air carriers. S. 1432. P/S November 5, 1973. (VV)

Rolling Stock Utilization and Financing Act

Establishes an Obligation Guarantee Board in the Department of Transportation as an independent agency, and an Obligation Guarantee Fund to insure obligations incurred for the acquisition of rolling stock and equipment or facilities; provides for Federal efforts to improve utilization of freight cars and other rolling stock by means of a national rolling stock information system, development and quarterly publishing of an index measuring freight-car utilization, a study by the Secretary on the utilization of freight cars and means to improve such utilization, and action under existing authority to improve utilization; provides, in the event of failure to solve the shortage problem, for potential direct government action to attempt to do so; provides for a railroad equipment corporation to acquire rolling stock and to manage rolling stock as a pool; and contains other provisions. S. 1149. P/S July 23, 1973. (306)

Ship construction

Amends section 502(a) of the Merchant Marine Act, 1936, as amended, to extend from June 30, 1973, to June 30, 1976, the authority of the Secretary of Commerce to award subsidies for the construction of vessels on which the price has been established by negotiation between the prospective ship owner and the shipyard. H.R. 6187. Public Law 93–71, approved July 10, 1973. (VV)

TV blackout—professional sports

Provides that if any game of professional sports club is to be televised pursuant to a league television contract and all tickets for seats made available 120 hours (5 days) or more before the scheduled beginning time of the game have been purchased 72 hours (3 days) or more before such time, no agreement preventing the televising of such game at the same time and in the same area in which the game is being played would be valid; requires the Federal Communications Commission to conduct a continuing study of the effect of this act and to report, not later than April 15 of each year, the results of its study to the Committees of Commerce and Interstate and Foreign Commerce of the Senate and House respectively. S. 1841. Public Law 93–107, approved September 14, 1973. (369)

Water carrier barge rule legislation

Removes outmoded restrictions upon the application and scope of the qualified exemption from regulaton contained in section 303(b) of the Interstate Commerce Act which stands as a bar to the realization of greater efficiency of operations in the transportation of commodities by barge on inland waterways. S. 2267. Public Law 93——, approved 1973. (VV)

West Coast Corridor Feasibility Study Act

Directs the Secretary of Transportation to make an investigation and study for the purpose of determining the social advisability, technical feasibility, and economic practicability of a high-speed ground transportation system between Tijuana, Mexico, and Vancouver, Canada, including the various means of providing such transportation, the cost, usage, environmental impact, and energy utilization and impact on energy resources; directs the Secretary to report the results of his study and investigation together with his recommendations to the Congress and the President no later than January 30, 1976, and submit an interim report to Congress on January 30, 1975; authorizes therefor an appropriation of not to exceed $8 million to carry out the provisions of this act; and contains other provisions. S. 1328. P/S July 11, 1973. (VV)

VETERANS

Drug and Alcohol Treatment and Rehabilitation Act

Provides for a fully-funded, comprehensive drug and alcohol treatment and rehabilitation program for addicted veterans regardless of service connection or the nature of their discharge; establishes a special medical treatment and rehabilitative services program for any veteran with a drug dependence or drug abuse disability, stressing highly individualized community-based, multimodality, in-house and contract services, including a wide range of vocational and educational counseling and rehabilitative services and job placement assistance; requires the Administrator to carry out a program of vocational rehabilitation for those Vietnam era veterans with addiction disabilities; broadens the eligibility for basic V.A. hospital care and medical services for service-connected disabilities; and contains other provisions. S. 284. P/S March 6, 1973. (31)

GI bill benefits during the energy crisis

Amends Chapter 36 of title 38, United States Code, to authorize the Administrator to continue to pay educational benefits to eligible veterans, wives, widows, and children during periods when educational institutions are temporarily closed pursuant to an established policy proclaimed by the President, such as closings to conserve energy, or are closed due to emergency conditions. S. 2794. Public Law 93- —, approved ——— 1973. (VV)

Health Care Expansion Act

Improves the ability of the Veterans' Administration (VA) to deliver quality medical care to its beneficiaries by widening the scope of treatment (particularly for ambulatory and nursing care); expands coverage to certain dependents of beneficiaries or former beneficiaries; provides for a voluntary, comprehensive sickle cell anemia screening and counseling program; expands the primary function of the Veterans Administration Department of Medicine and Surgery to include assisting in providing an adequate supply of health care manpower; provides for a contract to be made with the National Academy of Sciences for a study of staffing with a view to improving the staff-to-patient ratio in V.A. medical facilities; ensures that V.A. facilities are structurally safe; and contains other provisions. *Note:* (H.R. 10880 [92d–2d], a similar measure, was pocket vetoed by President Nixon on October 27, 1972.) S. 59. Public Law 93–82, approved August 3, 1973. (29)

National Cemeteries Act

Establishes within the Veterans' Administration (V.A.) a National Cemetery System consisting of those cemeteries presently under the jurisdiction of the V.A. and those to be transferred by September 1, 1973, to the V.A. from the Department of Army with the exception of certain specified cemeteries, including Arlington National Cemetery and those located at the service academies; directs the V.A. to conduct a comprehensive study and submit its recommendations on or before January 3, 1974, as to what our National Cemetery System and national burial policy should be; authorizes the Administrator of Veterans' Affairs to permit the flying of the American flag at cemeteries in the national cemetery system 24 hours a day; authorizes a special burial plot allowance of $150 (in addition to the present V.A. allowance for burial and funeral expenses of $250) in any case where a veteran is not buried in a national or other Federal cemetery; authorizes the burial of an unknown soldier from the Vietnam Conflict at Arlington National Cemetery; and contains other provisions. *NOTE:* (H.R. 12674 [92d–2d], a similar measure, was pocket vetoed by President Nixon on October 27, 1972.) S. 49. Public Law 93–43, approved June 18, 1973. (30)

Veterans' Administration flexible GI interest rate authority

Restores the authority of the Administrator of the Veterans' Administration to set flexible interest rates on loans to veterans, which expired June 30, 1973; authorizes the Administrator to consult with the Secretary of Housing and Urban Development in order to set flexible interest rates on guaranteed, insured, and direct loans in excess of 6 percent as he determines the current loan market demands; and establishes that, to the maximum extent practicable, the Administrator shall carry out a coordinated policy on interest rates and loans insured by the Federal Housing Administration and the Veterans' Administration. H.R. 8949. Public Law 93–75, approved July 26, 1973. (VV)

Veterans' benefits

Amends title 38 U.S.C., to increase the monthly rates of disability and death pensions and dependency and indemnity compensation and to increase income limitations relating thereto, and contains other provisions. H.R. 9474. Public Law 93–177, approved December 6, 1973 (VV)

NOTIFICATION TO THE PRESIDENT

Mr. MANSFIELD. Mr. President, I send a resolution to the desk and ask unanimous consent for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The second assistant legislative clerk read the resolution (S. Res. 223) as follows:

> *Resolved*, That a committee of two Senators be appointed by the Presiding Officer to join a similar committee of the House of Representatives to notify the President of the United States that the two Houses have completed their business of the session and are ready to adjourn unless he has some further communication to make to them.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

The ACTING PRESIDENT pro tempore. Pursuant to the resolution just agreed to, the Chair appoints the Senator from Montana (Mr. MANSFIELD), the Senator from Pennsylvania (Mr. HUGH SCOTT), the Senator from West Virginia (Mr. ROBERT C. BYRD), and the Senator from Michigan (Mr. GRIFFIN) as the members of the committee on the part of the Senate to notify the President.

THANKS OF THE SENATE TO THE VICE PRESIDENT

Mr. MANSFIELD. Mr. President, I send a resolution to the desk and ask unanimous consent for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be read.

The second assistant legislative clerk read the resolution (S. Res. 224) as follows:

> *Resolved*, That the thanks of the Senate are hereby tendered to the Honorable GERALD R. FORD, Vice President of the United States and President of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the first session of the Ninety-third Congress.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

THANKS OF THE SENATE TO THE PRESIDENT PRO TEMPORE

Mr. HUGH SCOTT. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The second assistant legislative clerk read the resolution (S. Res. 225) as follows:

Resolved, That the thanks of the Senate are hereby tendered to the Honorable JAMES O. EASTLAND, President pro tempore of the Senate, for the courteous, dignified, and impartial manner in which he has presided over its deliberations during the first session of the Ninety-third Congress.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

THANKS OF THE SENATE TO THE ACTING PRESIDENT PRO TEMPORE

Mr. ROBERT C. BYRD. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The second assistant legislative clerk read the resolution (S. Res. 226) as follows:

Resolved, That the thanks of the Senate are hereby tendered to the Honorable LEE METCALF, Acting President pro tempore of the Senate, for the courteous, dignified, and impartial manner in which he has presided over the deliberations during the first session of the Ninety-third Congress.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

AUTHORITY FOR THE PRESIDENT OF THE SENATE TO MAKE APPOINTMENTS TO COMMISSIONS AND COMMITTEES

Mr. GRIFFIN. Mr. President, I send a resolution to the desk and ask for its immediate consideration.

The ACTING PRESIDENT pro tempore. The resolution will be stated.

The second assistant legislative clerk read the resolution (S. Res. 227) as follows:

Resolved, That notwithstanding the final adjournment of the present session of the Congress, the President of the Senate be, and he is hereby, authorized to make appointments to commissions or committees authorized by law, by concurrent action or the two Houses, or by order of the Senate.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

AUTHORITY FOR THE PRESIDENT OF THE SENATE, THE PRESIDENT PRO TEMPORE, OR THE ACTING PRESIDENT PRO TEMPORE TO SIGN ENROLLED BILLS AND JOINT RESOLUTIONS AFTER SINE DIE ADJOURNMENT

Mr. MANSFIELD. Mr. President, I send to the desk another resolution and ask for its immediate consideration.

The PRESIDING OFFICER. The resolution will be stated.

The second assistant legislative clerk read the resolution (S. Res. 228) as follows:

Resolved, That, notwithstanding the sine die adjournment of the two Houses, the President of the Senate, the President's pro tempore, or the Acting President pro tempore be, and they are hereby, authorized to sign enrolled bills and joint resolutions duly passed and found truly enrolled.

The ACTING PRESIDENT pro tempore. Is there objection to the immediate consideration of the resolution?

There being no objection, the resolution was considered and agreed to.

AUTHORIZATION FOR SECRETARY OF THE SENATE TO RECEIVE MESSAGES FROM THE HOUSE DURING ADJOURNMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Secretary of the Senate be authorized to receive messages from the House of Representatives during the adjournment of the Senate.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

AUTHORIZATION FOR INSERTIONS IN THE RECORD FOLLOWING ADJOURNMENT

Mr. MANSFIELD. Mr. President, I ask unanimous consent that Senators may be permitted to make Extensions of Remarks insertions in the RECORD following the adjournment of Congress until the last edition authorized by the Joint Committee on Printing is published; but this order shall not apply to any subject matter which may have occurred or to any speech delivered subsequent to the adjournment of Congress. I wish to advise that the time for filing information to be included in the RECORD will be up to January 14, 1974.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

PRINTING OF COMMITTEE ACTIVITY REPORTS

Mr. MANSFIELD. Furthermore, Mr. President, with reference to the printing of committee activity reports for the first session, I state, on behalf of the chairman of the Joint Committee on Printing, that the Joint Committee has very properly ruled that the printing of such reports, both as committee prints and in the RECORD, is duplication, the cost of which cannot be justified.

It is requested that committee chairmen decide whether they wish these reports printed as committee prints or in the RECORD, since the Government Printing Office will be directed not to print them both ways.

EXPRESSION OF APPRECIATION BY THE MAJORITY LEADER

Mr. MANSFIELD. Mr. President, before the joint leadership departs to place a call to the President of the United States, I wish to express to all of the leaders, the distinguished Senator from Michigan, the distinguished Republican leader, with whom I have worked so long and whom I have known so long—we both served in the House together—to the distinguished assistant majority leader, who has been a workhorse and has put in of his time and talent more than anyone will ever understand, a man who makes a tremendous contribution to this side of the aisle and the Senate as a whole—to all of them and to all 99 Senators—my deepest thanks for what they have done in the way of making this job a little easier and the functioning of the Senate a little more careful.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

REPORT FROM COMMITTEE TO NOTIFY THE PRESIDENT

Mr. MANSFIELD. Mr. President, from the committee appointed by the Senate to notify the President of the United States that the Congress has concluded its business and is ready to adjourn unless he has further communications to give to it, on behalf of the distinguished Republican leader, the Senator from Pennsylvania (Mr. HUGH SCOTT), the distinguished assistant majority leader, the Senator from West Virginia (Mr. ROBERT C. BYRD), and the distinguished assistant Republican leader, the Senator from Michigan (Mr. GRIFFIN), I wish to report that the committee has performed its duty and that the President has informed us that he has no further communications to give to the Congress at this session and is looking forward to seeing us on January 21.

Mr. HUGH SCOTT. Mr. President, I do not think I can add anything except to say that we expressed our regrets that we were unable to finish in time to call the President the half time intermission, and we still have hopes that the outcome of the game will be favorable to those still present in the Government in Washington.

Other than that, I have nothing to say except to again express my thanks to all of our colleagues and to the leadership on both sides.

Mr. ROBERT C. BYRD. Mr. President, I wish to express my gratitude to the distinguished majority leader for his consideration, his kind understanding, and his leadership that have been an inspiration to me throughout this session.

I also was appreciative of the opportunity to have been among those who talked with the President and to wish him a happy holiday and to assure him that Congress, as far as the Senate leadership is concerned, stands ready to continue to cooperate with him in transacting the business of the Senate and the business of the people.

The ACTING PRESIDENT pro tempore. The Senator from Michigan is recognized.

Mr. GRIFFIN. Mr. President, I shall not prolong this moment. However, I do want to join with the distinguished majority whip in expressing the appreciation that I have for the graciousness and the cooperation and the wonderful attitude always of the distinguished majority leader and the distinguished minority leader, both of whom I have an opportunity to work with on a day-to-day basis.

It says a great deal for both of them that they share the leadership responsibilities with us and give us opportunities to participate just as they did a few moments ago to participate in the call to the President of the United States at this particular time.

I am very glad that the distinguished Senator from Louisiana (Mr. Long) said what he did about the majority leader: That there was this opportunity before we adjourned to pay our respects particularly to him, and that the minority leader expressed what we all feel on this side of the aisle; namely, that our job is made a great deal easier by the kindness, generosity, and understanding of the distinguished majority leader.

Everything has been said, I wish to underline, to emphasize, and to say that I agree with it wholeheartedly.

Mr. MANSFIELD. Mr. President, that sounds like backslapping on the part of a Senate quartet; but that is all right.

EXECUTIVE SESSION

Mr. MANSFIELD. Mr. President, I ask unanimous consent that the Senate go into executive session to consider a convention on the Executive Calendar.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE P. 93D CONGRESS, 1ST SESSION, THE CUSTOMS CONVENTION ON THE INTERNATIONAL TRANSIT OF GOODS

Mr. MANSFIELD. Mr. President, as announced 2 days ago, there will be a rollcall vote on Executive P, 93d first session, the Customs Convention on the International Transit of Goods. The vote will occur at 3 p.m. on Monday, January 21, 1974.

So that Senators may have background information on the convention, I ask unanimous consent to have printed in the Record the letter of the President transmitting the convention to the Senate and the letter of submittal from Acting Secretary of State Kenneth Rush to the President.

There being no objection, the letters were ordered to be printed in the Record, as follows:

Letter of Transmittal

The White House,
July 23, 1973.

To the Senate of the United States:

I am transmitting herewith, for the advice and consent of the Senate to ratification, the Customs Convention on the International Transit of Goods (ITI Convention) opened for signature at Vienna June 7, 1971.

For the information of the Senate, I am also transmitting the report of the Department of State with respect to the Convention.

The Convention is designed to meet the present need to facilitate international transport while, at the same time, providing the customs control arrangements necessary for such transport. The Convention provides for new, uniform control and documentation procedures which carriers of Governments party to the Convention would be able to use at their option.

The Convention would help open the way for United States exporters and carriers to benefit in Western Europe and other markets of the world from the simplified and uniform procedures for which it provides.

I recommend that the Convention be given early and favorable consideration by the Senate.

Richard Nixon.

Letter of Submittal

Department of State,
Washington, D.C., July 5, 1973.

The President,
The White House.

I have the honor to submit to you the Customs Convention on the International Transit of Goods (ITI Convention) opened for signature at Vienna on June 7, 1971 and signed by the United States on June 5, 1972. I recommend that you transmit the Convention to the Senate for advice and consent to ratification.

The Convention is designed to meet the present need to facilitate international transport, particularly by international containers, while, at the same time, providing the mechanics of customs control necessary for such transport. This control is maintained by a guarantee system that covers a carrier for a stated period of time instead of the journey-by-journey guarantee heretofore required in international customs procedures under the carnet system. It will provide greater flexibility for carriers in transporting goods and should result in lower costs.

The documentation system provided by the Convention is based on the use of a declaration accompanying the shipment for the entire journey. The format of the declaration is patterned on the layout key developed by the United Nations Economic Commission for Europe. The declaration can be used by itself, or its manifest portion can be replaced by an acceptable commercial document, thus adding to the flexibility afforded the carriers.

The Convention also provides other advantages such as the mutual acceptance of customs seals and procedures where participating countries are members of customs or economic unions.

United States carriers would not be obligated to use the ITI system in place of any other international procedures for a particular shipment. They would be free to choose whichever system seemed most advantageous under the circumstances.

This Convention will enter into force three months after five of the States members of the Customs Cooperation Council, the United Nations or its specialized agencies have signed without reservation of ratification or have deposited their ratifications or accessions.

Bringing the Convention into force at an early date would help open the way for United States exporters and carriers to benefit in Western Europe and other markets of the world from the simplified and uniform procedures provided therein. It is hoped that the Convention will be given early and favorable consideration by the Senate.

Respectfully submitted.

Kenneth Rush,
Acting Secretary of State.

Mr. MANSFIELD. Mr. President, I ask unanimous consent to have printed in the Record an excerpt from the report of the Committee on Foreign Relations which recommends that the Senate give its advice and consent to ratification of the convention.

There being no objection, the excerpt from the report (No. 93–27) was ordered to be printed in the Record, as follows:

The Committee on Foreign Relations, to which was referred the Customs Convention on the International Transit of Goods (ITI Convention) opened for signature at Vienna June 7, 1971, having considered the same, reports favorably thereon without reservation and recommends that the Senate give its advice and consent to ratification thereof.

PURPOSE

According to the State Department, the Customs Convention on International Transit of Goods (ITI Convention) is designed to meet the present need to facilitate international transport, particularly by international containers, and provide the mechanics of customs control necessary for such transport. This control is maintained by a guarantee system that covers a carrier for a stated period of time instead of the journey-by-journey guarantee heretofore required in international customs procedures under the carnet system. It will provide greater flexibility for carriers in transporting goods and should result in lower costs.

MAJOR PROVISIONS

The ITI Customs Convention will facilitate international transport of bonded trailers, railway cars, vessels and large containers by providing simplified customs control mechanisms and uniform documentation procedures for such transport. Carriers may opt to use ITI procedures or another system if more advantageous.

The documentation system uses a standardized declaration form in English or French which accompanies the shipment for its entire trip. The declaration alone can be used or its manifest portion can be replaced by an acceptable commercial document.

The Convention also contains provisions dealing with—

Setting up ITI regional areas where customs or economic unions exist;

Mutually accepting administrative procedures, customs seals, etc.;

Relaying customs information, regulations etc., between signatories;

Accommodations between ITI signatories and non-signatories;

Taking care of irregularities caused by a breach of regulations or accidents in transit;

Allowances for future amendments, revisions and the settling of differences; and

Limitations on customs administraitve charges (as opposed to duties and taxes).

DATE OF ENTRY INTO FORCE

The ITI Convention will enter into force three months after five of the States members of the Customs Cooperation Council, the United Nations or its specialized agencies have signed without reservation or ratification or have deposited their ratifications or accessions. As of this date, Algeria is the only country which has ratified the Convention.

COMMITTEE ACTION

The Customs Convention on the International Transit of Goods was transmitted to the Senate on July 23, 1973. A public hearing was held on the convention on November 29, 1973, at which time Mr. Glenn R. Dickerson of the U.S. Customs Service testified on behalf of the Administration. Mr. Dickerson's statement is reprinted below.

During an executive session on December 14, 1973, the Committee on Foreign Relations, by a voice vote, ordered the convention favorably reported with the recommendation that the Senate give its advice and consent to ratification.

Mr. President, I ask unanimous consent that Executive P, 93d Congress, first session, the Customs Convention on the

International Transit of Goods, be laid before the Senate and carried to its final reading before the vote.

There being no objection, the Senate, as in Committee of the Whole, proceeded to consider the Convention (Executive P, 93d Congress, First Session), the Customs Convention of the International Transit of Goods, which was read for the second time, as follows:

CUSTOMS CONVENTION ON THE INTERNATIONAL TRANSIT OF GOODS

(ITI Convention)

Preamble

The CONTRACTING PARTIES to this Convention, established under the auspices of the Customs Co-operation Council,

Desiring to facilitate the international transport of goods,

Recognising the growing importance of through international transport operations,

Convinced that the facilitation of such transport operations would be of considerable benefit to international trade.

Have agreed as follows:

CHAPTER I

DEFINITIONS

ARTICLE 1

For the purposes of this Convention:

(a) The term "transport-units" means:

(i) Containers having an internal volume of one cubic metre or more.

(ii) Road vehicles, including trailers and semi-trailers,

(iii) Railway wagons, and

(iv) Lighters, barges and other vessels suitable for use on inland waterways,

which are used for the transport of goods, are identifiable and are constructed, equipped and approved in accordance with paragraph 1 of Article 5 of this Convention;

(b) The term "exceptional load" means one or more heavy or bulky objects which because of their weight, size or nature are not normally carried in a closed transport-unit, provided that they can be readily identified;

(c) The term "import duties and taxes" means Customs duties and all other duties, taxes, fees or other charges which are collected on or in connection with the importation of goods, but not including fees and charges which are limited in amount to the approximate cost of services rendered;

(d) The term "ITI operation" means the transport of goods from an office of departure to an office of destination under the procedure (ITI procedure) laid down in this Convention;

(e) The term "office of loading" means any Customs office of a Contracting Party under whose authority transport-units are placed under Customs seal in order to facilitate commencement of an ITI operation at an office of departure;

(f) The term "office of departure" means any Customs office of a Contract Party at which an ITI operation commences;

(g) The term "office *en route*" means any Customs office of a Contracting Party where a transport-unit is imported or exported in the course of an ITI operation;

(h) The term "office of destination" means any Customs office of a Contracting Party at which an ITI operation is terminated;

(ij) The term "Goods manifest" means the document which is used to describe goods carried in transport-units, or exceptional loads, and which contains the following:

(i) Marks, numbers, number and kind of packages or items;

(ii) Description of goods;

(iii) Gross weight of each consignment;

(iv) Identification of the transport-unit(s);

(v) Name and address of the person responsible for the accuracy of the manifest;

(vi) Details of any appended documents;

(vii) Reference number;

(viii) Space for recording the office of loading, particulars of the Customs seals and the date on which they were affixed;

(k) The term "ITI declaration form" means a form conforming to the model reproduced at Annex 1 to this Convention;

(l) The term "ITI declaration" means the ITI declaration form duly completed, together with the Goods manifest or manifests to which it refers;

(m) The term "ITI area" means the territories of Contracting Parties having concluded an agreement for the purposes specified in Article 26 of this Convention;

(n) The term "guaranteeing association" means an association approved by the Customs authorities of a Contracting Party to act as surety for persons using the ITI procedure;

(o) The term "guaranteeing chain" means the international organisation to which guaranteeing associations are affiliated;

(p) The term "guarantee card" means a card conforming to the model reproduced at Annex 3 to this Convention, issued by a guaranteeing association as evidence that the holder is covered by a guarantee;

(q) The term "declarant" means the person who signs an ITI declaration or on whose behalf it is signed;

(r) The term "person" means both natural and legal persons, unless the context otherwise requires;

(s) The term "ratification" means ratification, acceptance or approval;

(t) The term "the Council" means the Organisation set up by the Convention establishing a Customs Co-operation Council, done at Brussels on 15th December, 1950.

CHAPTER II

Scope

ARTICLE 2

1. This Convention is applicable to the transport of—

(a) Goods in transport-units,

(b) Exceptional loads.

in the territories of two or more Contracting Parties provided that transport from the office of loading (or, in the case of an exceptional load, from the office of departure) to the office of destination crosses at least one frontier.

2. The provisions of paragraph 1 of this Article shall apply notwithstanding that the transport operation includes an international journey by sea or air, or a journey across the territory of a State which is not a Contracting Party to this Convention.

3. References in this Convention to transport-units shall be taken to include exceptional loads, unless it is expressly stated to the contrary or specific provision is made in respect of exceptional loads.

ARTICLE 3

For the ITI procedure to become operative:

(a) except in the case of exceptional loads, transport must be performed by means of transport-units which fulfill the conditions specified in Article 5 of this Convention;

(b) the loaded transport-unit with the ITI declaration must be presented to the Customs authorities at the office of departure;

(c) when a Contracting Party requires a guarantee, the declarant must be the holder of a valid guarantee card or, if permitted by the Contracting Party concerned, be covered by some other form of guarantee.

ARTICLE 4

1. Provided that the conditions laid down in this Convention are fulfilled then, for the purposes of this Convention, the goods:

(a) Shall not be subjected to the payment or deposit of import duties and taxes at the office of departure or at offices *en route;*

(b) Shall not, as a general rule, be subjected to Customs examination at offices *en route;*

(c) Shall not, as a general rule, be subjected by the Contracting Parties to any Customs transit formalities additional to those laid down in this Convention. However, nothing in this Convention shall prevent the application of regulations relating to other matters, for example, those concerning public morality or security, public hygiene or health, or based on veterinary or phytopathological considerations.

2. The provisions of paragraph 1(b) of this Article shall not apply to exceptional loads.

CHAPTER III

Technical conditions applicable to transport-units

ARTICLE 5

1. Transport-units used for the transportation of goods under this Convention must be constructed and equipped in such a manner that:

(a) Customs seals can be simply and effectively affixed to them;

(b) no goods can be removed from, or introduced into, the sealed part of the transport-unit without leaving visible traces of tampering or without breaking the Customs seal;

(c) they contain no concealed spaces where goods may be hidden;

(d) all spaces capable of holding goods are readily accessible for Customs inspection.

and must be approved for the transport of goods under Customs seal.

2. Transport-units approved for the transport of goods under Customs seal for the purposes of the international instruments referred to below shall not be required to be separately approved for the purposes of this Convention:

(a) containers which have been approved under the Customs Convention on Containers, done at Geneva on 18th May 1956;

(b) road vehicles and containers which have been approved under the Customs Convention on the International Transport of Goods under cover of TIR carnets, done at Geneva on 15th January 1959;

(c) railway wagons owned or registered by a railway administration which is a member of the International Union of Railways (UIC) and which have been approved by that administration under the terms of the *Unité Technique des Chemins de fer* concluded at Berne in May 1886, 1960 edition;

(d) transport-units approved under any international instruments that may supersede those specified in sub-paragraphs (a) to (c) above.

3. The provisions of paragraph 2 of this Article may be extended to transport-units approved under other international instruments, in respect of transport operations which are performed wholly within the territories of the Contracting Parties to such instruments.

4. Any State which is not a Contracting Party to any of the international instruments referred to in paragraph 2 of this Article may declare at the time of signing, ratifying or acceding to this Convention, or notify the Secretary General of the Council after becoming a Contracting Party to this Convention, that it does not accept the transport-units referred to in paragraph 2 as apt for the transport of goods under this Convention without separate approval. Such notification shall take effect three months after the date of its receipt by the Secreary General. Any Contracting Party having entered such a reservation may at any time withdraw it by notifying the Secretary General.

5. The Contracting Parties meeting in accordance with Article 55 of this Convention shall, when necessary, make Recommendations specifying the conditions and procedure for the approval of transport-units which:

(a) have not been approved under the instruments referred to in paragraph 2 of this Article; or

(*b*) require approval for use outside the territories of the Contracting Parties to the instruments referred to in paragraph 3 of this Article; or

(*c*) require separate approval because of a reservation entered under paragraph 4 of this Article.

As regards containers and road vehicles, such conditions shall meet the standards laid down in the instruments referred to in paragraph 2 of this Article.

CHAPTER IV

Customs seals and fastenings

ARTICLE 6

1. Customs seals and fastenings used in the application of this Convention shall fulfil the minimum requirements laid down in Annex 2 to this Convention.

2. Whenever possible, Contracting Parties shall accept Customs seals and fastenings meeting the minimum requirements laid down in Annex 2 to this Convention affixed by Customs authorities of other Contracting Parties and shall refrain from adding their own seals and fastenings.

3. When Customs seals and fastenings affixed in the territory of a Contracting Party are accepted by another Contracting Party, they shall be afforded the same legal protection in the territory of the latter as national seals and fastenings.

4. The Customs authorities of a Contracting Party may authorise persons to affix Customs seals and fastenings, on condition that those Customs authorities take adequate steps to prevent abuse and accept the obligations arising out of this Convention as though they had affixed the seals and fastenings themselves. Customs seals and fastenings affixed under this paragraph shall be accepted by all Contracting Parties in the same way as Customs seals and fastenings affixed by the Customs authorities themselves.

ARTICLE 7

A Contracting Party shall, at the express request of another, send to it specimens or photographs of the Customs seals and fastenings it uses.

CHAPTER V

Guarantees and guaranteeing associations

ARTICLE 8

1. Subject to such conditions as it shall determine, each Contracting Party may approve associations to act as guaranteeing associations.

2. An association shall not be approved unless its guarantee covers the liabilities incurred in the country in which it is established in connection with ITI operations carried out by the holder of a guarantee card issued by:

(*a*) That association;

(*b*) Foreign members of the guaranteeing chain to which that association is affiliated;

(*c*) Members of other guaranteeing chains with which that association has reciprocal arrangements.

3. The instrument of approval may specify the maximum financial liability of a guaranteeing association in respect of any transport-unit load or exceptional load carried under the ITI procedure.

ARTICLE 9

1. Each guaranteeing association shall issue a guarantee card, or cards, to persons it has approved.

2. At each stage of an ITI operation where guarantee cover is provided by a guaranteeing association, a guarantee card shall be available for production to the Customs authorities. However, the production of a guarantee card shall not be required if the Customs authorities at a preceding office, at the request of the declarant, have certified on the ITI declaration that the details of the guarantee given on that declaration are correct. The presentation of such a certification shall have the same effect as the presentation of the guarantee card itself.

3. A guaranteeing association may withdraw approval from a person by withdrawal of the guarantee card or cards issued to that person.

ARTICLE 10

1. The guaranteeing association shall undertake to the Customs authorities of the country in which it is established to pay any import duties and taxes falling due in the case of non-compliance with the conditions prescribed in respect of goods transported in that country under the ITI procedure under cover of guarantee cards issued in accordance with paragraph 2 of Article 8 of this Convention. It shall be liable jointly and severally with the persons from whom the sums mentioned above are due, for payment of such sums.

2. No payment shall be required from the guaranteeing association in cases where it has been established to the satisfaction of the Customs authorities that the goods have been exported, re-exported or presented at the office of destination, without having been used during the ITI operation, and that:

(*a*) the person concerned has failed, through accident, force majeure, and inadvertent error or a slight fault, to comply with any time-limit for exportation, re-exportation or presentation at the office of destination or any prescribed itinerary;

(*b*) any discrepencies discovered between particulars given in the Goods manifest and the contents of the transport-unit are due to an inadvertent error in the loading or dispatch of the goods or in the drawing up of the Goods manifest.

3. The guaranteeing association shall not be liable for the payment of any pecuniary penalties incurred by persons using the ITI procedure.

4. Notwithstanding the provisions of paragraph 3 of this Article, when the laws and regulations of a Contracting Party do not provide for the payment of import duties and taxes in the case referred to in paragraph 1 of this Article the guaranteeing association shall undertake to the Customs authorities to pay an amount equal to the import duties and taxes.

5. The liability of the guaranteeing association shall cover not only the goods listed in the Goods manifest, but also goods which, though not listed therein, are carried in the sealed part of the transport-unit or with the exceptional load.

ARTICLE 11

1. The liability of the guaranteeing association to the Customs authorities in the country where the office of departure is situated in respect of goods transported under cover of a guarantee card issued in accordance with paragraph 2 of Article 8 of this Convention shall commence at the time when the relevant ITI declaration is accepted by the Customs authorities of that country.

2. The liability of the guaranteeing association to the Customs authorities of a country of transit or the country in which the office of destination is situated shall commence at the time when the transport-unit is imported into that country or, where the transport-unit is not imported under cover of a guarantee card issud in accordance with paragraph 2 of Article 8 of this Convention, from the time when the relevant III declaration, accompanied by a guarantee card, is accepted by the Customs authorities of that country.

3. In the cases referred to in paragraphs 1 and 2 above, the liability of the guaranteeing association shall not be affected if the period of validity of the guarantee card has expired or the card has been withdrawn before the goods concerned have been exported, re-exported or presented at the office of destination.

CHAPTER VI

Irregularities

ARTICLE 12

1. In the case of irregularity, any action to recover import duties and taxes falling due shall be taken by the Customs authorities of the Contracting Party in whose territory the irregularity occurred.

2. When it is not possible to establish the territory in which an irregularity occurred, it shall be deemed to have occurred in the territory of the Contracting Party where it is detected.

ARTICLE 13

In the case of irregularity, Contracting Parties are recommended to request payment from the person from whom any sums are due before making a claim against the guaranteeing association.

ARTICLE 14

In the case of fraud, abuse or any other breach of the provisions of this Convention, the Contracting Party in whose territory the offence was committed, or was deemed to have been committed under Article 12 of this Convention, shall, notwithstanding any other provision of this Convention, be free to take proceedings against the offender for the recovery of the import duties and taxes and other sums payable and also for the imposition of any penalties prescribed by the law of that Contracting Party.

CHAPTER VII

Claims upon guaranteeing associations in cases of irregularity

ARTICLE 15

1. When the Customs authorities of a country have certified on the ITI declaration that the part of the ITI operation taking place in their territory has been satisfactorily completed they may no longer claim from the guaranteeing association payment of the sums referred to in Article 10 of this Convention unless the certificate was obtained improperly or fraudulently or there was a breach of the provisions of this Convention.

2. The Customs authorities shall in no circumstances require from the guaranteeing association payment of the sums referred to in Article 10 of this Convention unless they have made a claim against that association within a period of eighteen months from the date on which the relevant ITI declaration was accepted by the Customs authorities of the Contracting Party involved. The claim shall be accompanied by details of the ITI operation concerned and of the nature and circumstances of the irregularity and shall, except as provided for in paragraph 3 of this Article, state the amount due.

3. In cases which become the subject of legal proceedings, the amount due shall be notified to the guaranteeing association within one year of the date when the decision of the Court becomes enforceable.

ARTICLE 16

1. When a claim is made under Article 15 of this Convention, the guaranteeing association shall have a period of six months from the date of the claim to prove to the satisfaction of the Customs authorities that no irregularity has taken place.

2. If such proof is not furnished within the time allowed the guaranteeing association shall forthwith deposit, or pay provisionally, the sums claimed under Article 15 of this Convention. This deposit or payment shall become final after a period of twelve months from the date of the deposit or payment. During the latter period the guaranteeing association may still furnish the proof referred to in paragraph 1 of this Article with a view to the recovery of the sums deposited or provisionally paid.

3. When the laws and regulations of a Contracting Party do not provide for the

deposit or provisional payment of the sums referred to in paragraph 2 of this Article, such sums shall be paid outright, but they shall be refunded if the proof referred to in paragraph 1 of this Article is furnished within twelve months of the date of payment.

ARTICLE 17

When as a result of a claim made in respect of an ITI operation payments need to be made between guaranteeing associations to refund sums paid under the provisions of this Convention, facilities shall be granted, where appropriate, by the Contracting Parties for the necessary transfer of currency.

CHAPTER VIII

Formalities to be accomplished at the offices of loading and departure

ARTICLE 18

1. Transport-units which are likely to enter the ITI procedure at a later stage shall, whenever possible, be sealed at a Customs office at the request of the person presenting the transport-unit and the Goods manifest to the Customs authorities.

2. The office where the seals were affixed (office of loading), details of the Customs seals affixed and the date on which they were affixed shall be recorded on the Goods manifest.

3. The Customs authorities at the office of loading shall, at their discretion, take whatever steps are appropriate within the context of national legislation and practice to satisfy themselves of the accuracy of Goods manifests completed in respect of transport-units presented to them, and of the security of such transport-nuiots. However, this provision shall not be taken as obliging the Customs authorities at that office to verify the accuracy of Goods manifests by checking them against other documents or by examination of the goods.

4. The provisions of this Article shall not apply to exceptional loads.

ARTICLE 19

1. At the office of departure loaded transport-unit with the ITI declaration relating to the goods shall be presented to the Customs authorities.

2. The Customs authorities at the office of departure shall satisfy themselves that:

(*a*) The ITI declaration is in order;

(*b*) The transport-unit is secure and that any Customs seals and fastenings previously affixed are intact;

(*c*) Where required, a guarantee is in force;

and shall endorse the ITI declaration.

3. If the Customs seals and fastenings are not intact, or if Customs seals and fastenings have not been affixed or have been removed by the Customs authorities at the office of departure, those atuhorities shall affix Customs seals and fastenings and record particulars thereof on the ITI declaration.

4. The Customs authorities at the office of departure shall, whenever possible and notwithstanding their general right to examine the goods, limit such examination to random checks.

5. The ITI declartaion shall be registered and returned to the person concerned who shall ensure that it is available for Customs control purposes at any stage of the ITI operation. The Cutsoms authorities at the office of departure shall retain a copy of the ITI declaration.

6. With regard to exceptional loads:

(*a*) The provisions of paragraphs 2(b), 3 and 4 of this Article shall not apply;

(*b*) Authority to use the ITI procedure shall be granted only if, in the opinion of the Customs authorities, the exceptional loads and any accessories thereto can be readily identified, for example, by reference to the manufacturers' marks or numbers or to the description given or by affixing identification marks or Customs seals, so that such loads and accessories cannot be replaced in whole or in part by others and that nothing can be removed from them, without it being evident;

(*c*) The Customs authorities may require packing lists, photographs, blueprints, etc. of the goods to be appended to the ITI declaration. In this case they shall authenticate these documents, and the ITI declaration shall incorporate a reference to such documents.

ARTICLE 20

The functions laid down in Articles 18 and 19 of this Convention may be performed by one Customs office acting both as an office of loading and as an office of departure.

CHAPTER IX

Formalities to be accomplished at offices en route

ARTICLE 21

1. At each office of entry *en route*, the loaded transport-unit, with Customs seals and fastenings intact, and the ITI declaration relating to the goods shall be presented to the Customs authorities.

2. The Customs authorities at each office of entry *en route* shall satisfy themselves that:

(*a*) The ITI declaration is in order;

(*b*) The transport-unit is secure and the Customs seals and fastenings intact, or, in the case of an exceptional load, that it complies with the conditions of paragraph 6(b) of Article 19 of this Convention;

(*c*) Where required, a guarantee is in force;

and endorse the ITI declaration.

3. The Customs authorities at each office of entry *en route* shall retain a copy of the ITI declaration containing the particulars required for the purposes of national control.

ARTICLE 22

1. At each office of exit *en route*, the loaded transport-unit, with Customs seals and fastenings intact, and the ITI declaration relating to the goods shall be presented to the Customs authorities. Those authorities shall satisfy themselves that the transport-unit has not been interfered with and that any Customs seals and fastenings or identification marks are intact, and shall endorse the ITI declaration.

2. The Customs authorities at each office of exit *en route* may retain a copy of the ITI declaration.

ARTICLE 23

When the Customs authorities remove a Customs seal in order to examine a loaded transport-unit at an office *en route* or in the course of the journey, they shall record on the ITI declaration accompanying the transport-unit particulars of the new Customs seal affixed.

ARTICLE 24

1. If Customs seals and fastenings are broken or good are destroyed or damaged accidentally during an ITI opeartion the person performing the transport shall report the facts to the nearest Customs office without delay. The Customs authorities at this office shall draw up a report, if possible using an accident report form conforming to the model reproduced at Annex 4 to this Convention, and shall take any necessary measures to permit continuation of the ITI operation. A copy of the report shall be attached to the ITI declaration.

2. If it is not possible to approach a Customs authority immediately, other competent authorities shall be approached. The authority called in shall draw up a report, if possible using an accident report form conforming to the model reproduced at Annex 4 to this Convention and attach it to the ITI declaration. This report shall be produced together with the transport-unit and the ITI declaration to the next Customs office. The Customs authorities at that office shall take any necessary measures to permit continuation of the ITI operation.

3. In the event of imminent danger necessitating immediate unloading of the whole or part of the load, the person performing the transport may take appropriate action on his own initiative. Subsequently, the procedure laid down in paragraph 1 or 2 of this Article, as the case may be, shall be followed.

4. When the breakage of a Customs seal or fastening or damage or destruction of goods did not take place in the territory of a Contracting Party, the Customs authorities at the next office of entry *en route* shall take action to ensure that the necessary report is drawn up and to permit continuation of the ITI operation.

CHAPTER X

Formalities to be accomplished at the office of destination

ARTICLE 25

1. At the office of destination, the loaded transport-unit, with Customs seals and fastenings intact, and the ITI declaration relating to the goods shall be presented to the Customs authorities.

2. The Customs authorities at the office of destination shall undertake any control deemed necessary to ascertain whether the declarant or declarants have complied with all their obligations.

3. The Customs authorities at the office of destination shall certify on the ITI declaration the date of presentation of the loaded transport-unit and the results of any control. The ITI declaration bearing this certificate shall be returned to the person concerned.

4. The Customs authorities at the office of destination shall retain one copy of the ITI declaration containing the particulars required for the purposes of national control. They may also require the presentation of an additional copy of that declaration.

CHAPTER XI

ITI areas

ARTICLE 26

Contracting Parties may, by bilateral or multilateral agreements, form ITI areas in order to simplify, in accordance with Articles 27 to 31 of this Convention, the formalities applied to goods transported under the ITI procedure in their territories.

ARTICLE 27

1. The control of an ITI operation taking place wholly or in part in an ITI area shall be undertaken by the office of departure, where situated in the ITI area or, otherwise, by the first office of entry *en route* in the ITI area. The Customs authorities at the office which undertakes control may prescribe a time-limit for accomplishment of the ITI operation in that area. When such a time-limit is prescribed the provisions of paragraph (a) of Article 38 of this Convention shall not apply.

2. If the loaded transport-unit is to be exported from the ITI area, the last office of exit *en route* of the ITI area shall, whenever possible, be specified in the ITI declaration when it is delivered to the Customs office which undertakes control under paragraph 1 of this Article.

3. For the purposes of the control referred to in paragraph 1 of this Article, an additional copy of the ITI declaration shall be available for production at any stage of the journey in the ITI area. This copy shall indicate the Customs office which undertakes control under paragraph 1 of this Article and, when appropriate, the last office of exit *en route* of the ITI area.

ARTICLE 28

The Customs authorities at the offices of exit *en route* of an ITI area, other than the office referred to in Article 30 of this Convention, shall not require a copy of the ITI declaration to be deposited, and shall dispense with the formalities prescribed in Article 22 of this Convention, except in special cases to be specified in agreements establishing the ITI areas.

ARTICLE 29

1. The Customs authorities in an ITI area may, at the request of the person concerned:

(*a*) Extend any time-limit prescribed under paragraph 1 of Article 27 of this Convention;

(*b*) Permit goods being transported under the ITI procedure to be exported from the ITI area at a Customs office other than that specified in the ITI declaration as the last office of exit *en route* of the ITI area.

2. Modifications authorised under paragraph 1 of this Article shall be recorded on the copy of the ITI declaration referred to in paragraph 3 of Article 27 of this Convention by the Customs authorities concerned and shall be notified by them to the Customs office specified in paragraph 1 of Article 27 of this Convention.

ARTICLE 30

The Customs authorities at the office of destination where situated in the ITI area or, otherwise, at the last office of exit *en route* of the ITI area, shall inform the Customs office which undertakes control under paragraph 1 of Article 27 of this Convention of the completion of the ITI operation in the ITI area.

ARTICLE 31

When notification under Article 30 of this Convention is not received by the Customs office which undertakes control under paragraph 1 of Article 27 of this Convention, the Customs authorities at that office shall take any necessary regularisation action and, if appropriate, inform the other Customs authorities within the ITI area who are directly concerned, of the action taken and its results.

ARTICLE 32

Contracting Parties which have set up ITI areas are recommended, where appropriate, to make every effort to merge such areas.

CHAPTER XII

Mutual administrative assistance

ARTICLE 33

1. On express written request by the Customs authorities of a Contracting Party who are investigating any breach or suspected breach of the provisions of this Convention, the Customs authorities of another Contracting Party shall communicate as promptly as possible:

(*a*) Any available information relating to Goods manifests completed or accepted in their territory which are suspected of being false:

(*b*) Any available information enabling the authenticity of seals claimed to have been affixed in their territory to be verified.

2. Requests for information under paragraph 1(a) of this Article shall be made only in cases of a serious nature and when enquiries through other channels have proved unsatisfactory.

ARTICLE 34

1. When the Customs authorities of a Contracting Party discover a serious inaccuracy in a Goods manifest, or any other serious irregularity in connection with a transport operation performed under the provisions of this Convention, they shall spontaneously and without delay notify the Customs authorities of the other Contracting Parties concerned, if they consider that the information will be of use to those authorities.

2. Notifications under paragraph 1 of this Article to Contracting Parties whose territories constitute an ITI area shall be made to the Customs office which undertakes control under paragraph 1 of Article 27 of this Convention.

3. The provisions of paragraph 1 of this Article shall not require the Customs authorities of any Contracting Party to exercise any measures beyond those deemed necessary for national purposes.

CHAPTER XIII

Miscellaneous provisions

ARTICLE 35

In the course of an ITI operation:

(*a*) No additional goods may be loaded into a transport-unit unless a new ITI operation is started;

(*b*) Goods may be unloaded at more than one Customs office in the country of destination. In such a case an additional copy of the ITI declaration shall be lodged at each intermediate Customs office. The Customs authorities at these offices shall record on the ITI declaration the details of the goods unloaded and take the necessary measures to permit continuation of the ITI operation.

ARTICLE 36

At the request of the person concerned, an ITI operation may be terminated at a Customs office other than that specified in the ITI declaration as the office of destination, the Customs authorities which authorise the change recording it on the ITI declaration.

ARTICLE 37

Transfer of responsibility for a loaded transport-unit from the declarant to another person during an ITI operation may take place only at Customs offices competent for this purpose. Until an ITI declaration by the new declarant has been accepted by the Customs authorities, responsibility for compliance with the conditions under which Customs transit was allowed remains with the previous declarant. A copy of the ITI declaration showing the results of any control shall be furnished to the previous declarant at his request.

ARTICLE 38

When it is considered necessary, Contracting Parties may, for the completion of that part of an ITI operation taking place in their territories:

(*a*) Prescribe a time-limit;

(*b*) Require transport-units to follow prescribed itineraries;

(*c*) Require transport-units to be transported under Customs escort.

ARTICLE 39

1. The Goods manifest may be completed in any language acceptable to the Customs authorities of the country where the office of loading is situated. The Customs authorities of Contracting Parties may require a translation of that document. It is recommended that the use of foreign languages be permitted by Contracting Parties if this will facilitate the transport operation.

2. Contracting Parties are recommended to make known as widely as possible their requirements regarding the languages in which Goods manifests may be completed and accepted and their requirements regarding the production of translations.

3. Contracting Parties shall recommend to persons using the ITI procedure that weights and other measurements be expressed in units of the metric system.

ARTICLE 40

1. The ITI declaration form shall be printed in English or French and it may also be printed in a second language.

2. However, by agreement between Contracting Parties ITI declaration forms printed in a language other than English or French may be used for ITI operations taking place wholly in their territories.

ARTICLE 41

1. When an ITI declaration presented at a Customs office of a Contracting Party in accordance with the provisions of this Convention was signed in the territory of another Contracting Party, a countersignature shall not be required.

2. Notwithstanding the provisions of paragraph 1 of this Article, a countersignature may be required where there is no handwritten signature on the ITI declaration.

ARTICLE 42

Exemption from payment of the import duties and taxes normally chargeable shall be granted when it is established to the satisfaction of the Customs authorities that goods being transported under the provisions of this Convention:

(*a*) Have been destroyed or irrecoverably lost by accident or by force majeure;

(*b*) Are short for reasons due to their nature.

ARTICLE 43

1. Each Contracting Party shall designate the Customs offices which are competent to perform the functions laid down in this Convention.

2. As far as possible, Contracting Parties shall:

(*a*) Ensure that the time required for completion of Customs formalities at offices *en route* is reduced to a minimum;

(*b*) Ensure that priority is given to the clearance of perishable goods, livestock and other goods for which rapid transport is essential;

(*c*) Facilitate the execution outside normal working days and hours of Customs formalities at offices *en route*.

3. Contracting Parties having adjacent territories shall endeavour to correlate the powers and working hours of corresponding Customs offices.

ARTICLE 44

As regards the Customs formalities referred to in this Convention, no charge shall be made for Customs attendance, save where it is provided on days or at times or places other than those normally appointed for such formalities.

ARTICLE 45

1. Each of the Contracting Parties shall have the right to exclude temporarily or permanently from the operation of this Convention any person guilty of a serious offence against Customs laws or regulations.

2. Any exclusion under paragraph 1 of this Article shall be notified without delay to the Customs authorities of the Contracting Party in whose territory the person concerned is established or resident.

3. The Customs authorities of Contracting Parties who exclude a person from the operation of this Convention shall notify the relevant guaranteeing associations established in their territories.

ARTICLE 46

Nothing in this Convention shall be construed as preventing the controls laid to the Customs authorities of a Contracting Party under Articles 18 to 24, 27 to 31 and 36 of this Convention from being accomplished with the assistance of the railway administration of that Contracting Party.

ARTICLE 47

When goods are carried in the territory of a Contracting Party which applies, in respect of the mode of transport concerned, arrangements under which all Customs transit formalities are waived, that Contracting Party may:

(*a*) Defer the commencement of an ITI Operation until carriage by that mode of transport is terminated;

(*b*) Suspend an ITI Operation which has already commenced provided that such suspension does not hinder the resumption of that operation.

ARTICLE 48

The provisions of this Convention set out the minimum facilities to be accorded and do not prevent the application of greater facilities which certain Contracting Parties grant or may grant in the future by unilateral provisions or in virtue of bilateral and multilateral agreements, provided that the grant of such greater facilities does not hinder the accomplishment of operations carried out under this Convention.

ARTICLE 49

Guarantee cards and blanks thereof, sent to guaranteeing associations by corresponding foreign associations or by guaranteeing chains, shall be admitted free of import duties and taxes and free of import prohibitions and restrictions.

CHAPTER XIV

Final provisions

ARTICLE 50

1. Any State Member of the Council and any State Member of the United Nations or its specialised agencies may become a Contracting Party to this Convention:

(*a*) By signing it without reservation of ratification;

(*b*) By depositing an instrument of ratification after signing it subject to ratification; or

(*c*) By acceding to it.

2. This Convention shall be open until 30th June, 1972, for signature at the Headquarters of the Council in Brussels, by the States referred to in paragraph 1 of this Article. Thereafter, it shall be open for their accession.

3. Any State, not being a Member of the Organisations referred to in paragraph 1 of this Article, to which an invitation to that effect has been addressed by the Secretary General of the Council at the request of the Contracting Parties, may become a Contracting Party to this Convention by acceding thereto after its entry into force.

4. The instruments of ratification or accession shall be deposited with the Secretary General of the Council.

ARTICLE 51

1. This Convention shall enter into force three months after five of the States referred to in paragraph 1 of Article 50 thereof have signed it without reservation of ratification or have deposited their instruments of ratification or accession.

2. For any State signing without reservation of ratification, ratifying or acceding to this Convention after five States have signed it without reservation of ratification or have deposited their instruments of ratification or accession, this Convention shall enter into force three months after the said State has signed without reservation of ratification or deposited its instrument of ratification or accession.

ARTICLE 52

1. Any State may, at the time of signing this Convention without reservation of ratification, or of depositing its instrument of ratification or accession or at any time thereafter, declare by notification given to the Secretary General of the Council that this Convention shall extend to all or any of the territories for whose international relations it is responsible or for which it assumes international responsibility. Such notification shall take effect three months after the date of the receipt thereof by the Secretary General of the Council. However, the Convention shall not apply to the territories named in the notification before the Convention has entered into force for the State concerned.

2. Any State which has made a notification under paragraph 1 of this Article extending this Convention to any territory for whose international relations it is responsible or for which it assumes international responsibility may notify the Secretary General of the Council, in accordance with Article 54 of this Convention, that the territory in question will no longer apply the Convention.

ARTICLE 53

1. Any State may declare, at the time of signing, ratifying or acceding to this Convention, or notify the Secretary General of the Council after becoming Contracting Party to this Convention, that it will apply the present Convention only if part of the ITI operation takes place outside its territory. Such notification shall take effect three months after the date of its receipt by the Secretary General. Any Contracting Party having entered such a reservation may at any time withdraw it by notifying the Secretary General.

2. Apart from the reservations provided for in paragraph 1 of this Article and in paragarph 4 of Article 5 of this Convention no other reservation to this Convention shall be permitted.

ARTICLE 54

1. This Convention is of unlimited duration. However, any Contracting Party may denounce it at any time after the date of its entry into force under Article 51 thereof.

2. The denunciation shall be notified by an instrument in writing, deposited with the Secretary General of the Council.

3. The denunciation shall take effect six months after the receipt of the instrument of denunciation by the Secretary General of the Council.

4. When a Contracting Party denounces this Convention in accordance with paragraph 1 of this Article, or makes a notification under paragraph 4 of Article 5, under paragraph 2 of Article 52 or under paragraph 1 of Article 53 of this Convention, that Contracting Party shall continue to be bound by the provisions of this Convention in respect of any transport operation dealt with by its Customs authorities under the provisions of this Convention before the date on which the denunciation or notification takes effect. In addition, the validity of any guarantee card issued before that date shall not be affected by the denunciation or notification.

ARTICLE 55

1. The Contracting Parties shall meet together when necessary in order to consider the operation of this Convention and, in particular, in order to consider measures to secure uniformity in the interpretation and application of this Convention.

2. Such meetings shall be convened by the Secretary General of the Council at the request of any Contracting Party and, unless the Contracting Parties otherwise decide, shall be held at the Headquarters of the Council.

3. The Contracting Parties shall lay down the rules of procedure for their meetings.

4. Decisions of the Contracting Parties shall be taken by a majority of not less than two-thirds of the Contracting Parties present at the meeting and voting. Only Contracting Parties casting an affirmative or negative vote shall be deemed to be voting.

5. The Contracting Parties shall not take a decision on any matter unless more than half of them are present.

ARTICLE 56

1. Any dispute between Contracting Parties concerning the interpretation or application of this Convention shall so far as possible be settled by negotiation between them.

2. Any dispute which is not settled by negotiation shall be referred by the Contracting Parties in dispute to the Contracting Parties, meeting in conformity with Article 55 of this Convention, which shall thereupon consider the dispute and make recommendations for its settlement.

3. The Contracting Parties in dispute may agree in advance to accept the recommendations of the Contracting Parties as binding.

ARTICLE 57

1. Amendments to this Convention may be proposed either by a Contracting Party or by the Contracting Parties meeting in accordance with Article 55 of this Convention.

2. The text of any amendment so proposed shall be communicated by the Secretary General of the Council to all the Contracting Parties, to all other signatory States and to the Secretary General of the United Nations.

3. Within a period of six months from the date on which the proposed amendment is so communicated, any Contracting Party may inform the Secretary General of the Council:

(*a*) That it has an objection to the proposed amendment, or

(*b*) That, although it intends to accept the proposed amendment, the conditions necessary for such acceptance are not yet fulfilled in its country.

4. If a Contracting Party sends the Secretary General of the Council a communication as provided for in paragraph 3(b) of this Article, it may, so long as it has not notified the Secretary General of its acceptance of the proposed amendment, submit an objection to that amendment within a period of nine months following the expiry of the six-month period referred to in paragraph 3 of this Article.

5. If an objection to the proposed amendment is stated in accordance with the terms of paragraph 3 or 4 of this Article, the amendment shall be deemed not to have been accepted and shall be of no effect.

6. If no objection to the proposed amendment in accordance with paragraph 3 or 4 of this Article has been stated, the amendment shall be deemed to have been accepted as from the date specified below:

(*a*) If no Contracting Party has sent a communication in accordance with paragraph 3(b) of this Article, on the expiry of the period of six months referred to in paragraph 3;

(*b*) If any Contracting Party has sent a communication in accordance with paragraph 3(b) of this Article, on the earlier of the following two dates:

(i) The date by which all the Contracting Parties which sent such communications have notified the Secretary General of the Council of their acceptance of the proposed amendment, provided that, if all the acceptances were notified before the expiry of the period of six months referred to in paragraph 3 of this Article, that date shall be taken to be the date of expiry of the said six-month period;

(ii) The date of expiry of the nine-month period referred to in paragraph 4 of this Article.

7. Any amendment deemed to be accepted shall enter into force either six months after the date on which it was deemed to be accepted or, if a different period is specified in the proposed amendment, on the expiry of that period after the date on which the amendment was deemed to be accepted.

8. The Secretary General of the Council shall, as soon as possible, notify all the Contracting Parties and other signatory States of any objection to the proposed amendment made in accordance with paragraph 3(a), and of any communication received in accordance with paragraph 3(b), of this Article. He shall subsequently inform all the Contracting Parties and other signatory States whether the Contracting Party or Parties which have sent such a communication raise an objection to the proposed amendment or accept it.

9. Independently of the amendment procedure laid down in paragraphs 1 to 8 of this Article, Article I (ij) and the Annexes to this Convention may be modified by a decision of the competent administrations of all the Contracting Parties; such a decision shall be deemed to have been taken unless the competent administration of a Contracting Party informs the Secretary General of the Council, within a period of three months from the date on which the Secretary General of the Council has circulated the proposed amendment, that it has an objection to the proposed amendment. Such a decision shall also specify the date of entry into force of the amendment and may provide that during a transitional period the unmodified provision

shall remain in force, wholly or in part, concurrently with the modified provision.

10. Any State ratifying or acceding to this Convention shall be deemed to have accepted any amendments or modifications thereto which have entered into force at the date of deposit of its instrument of ratification or accession.

ARTICLE 58

Any agreement setting up an ITI area in accordance with Article 26 of this Convention, any amendment thereto or any modification of the territorial application of such an agreement shall be notified to the Secretary General of the Council by the Contracting Parties concerned.

ARTICLE 59

For the purposes of Article 2 and paragraph 1 of Article 53 of this Convention, Contracting Parties which form a Customs or Economic Union may agree that their territories are to be taken as a single territory. The Contracting Parties concerned shall notify the Secretary General of the Council of any such agreement.

ARTICLE 60

The Annexes to this Convention shall be construed to be an integral part of the Convention.

ARTICLE 61

The Secretary General of the Council shall notify all the Contracting Parties, the other signatory States and the Secretary General of the United Nations, of:

(*a*) Signatures, ratifications and accessions under Article 50 of this Convention;

(*b*) The date of entry into force of this Convention in accordance with Article 51;

(*c*) Notifications received in accordance with Article 52;

(*d*) Declarations and notifications made in accordance with paragraph 4 of Article 5 and paragraph 1 of Article 53 and the date on which reservations or withdrawals of reservations take effect;

(*e*) Denunciations under Article 54;

(*f*) Any amendment deemed to have been accepted in accordance with Article 57 and the date of its entry into force;

(*g*) Notifications received in accordance with Article 58 and 59.

ARTICLE 62

In accordance with Article 102 of the Charter of the United Nations, this Convention shall be registered with the Secretariat of the United Nations at the request of the Secretary General of the Council.

In witness whereof the undersigned, being duly authorised thereto, have signed this Convention.

Done at Vienna this seventh day of June nineteen hundred and seventy-one, in the English and French languages, both texts being equally authentic, in a single original which shall be deposited with the Secretary General of the Council who shall transmit certified copies to all the States referred to in paragraph 1 of Article 50 of this Convention.

The Secretary General of the Customs Co-operation Council certifies that this is a true copy of the original deposited in the archives of the Customs Co-operation Council.

CHEVALIER ANNEZ DE TABOADA,
Secrétaire Général.

ANNEX 1

ITI Declaration Form

The margins, column widths and spacing of ITI declaration forms shall correspond as closely as possible to the model form reproduced in the Annex.

The copy of the ITI declaration which is to accompany the transport-unit to the office of destination shall be marked "ORIGINAL" at the office of departure.

The size of the ITI declaration form shall be 210 × 297 mm.

ANNEX 2

Minimum requirements to be met by Customs seals and fastenings.

Customs seals and fastenings shall meet the following minimum requirements:

1. General requirements in respect of seals and fastenings:

The seals and fastenings, together, shall:

(*a*) Be strong and durable;

(*b*) Be capable of being affixed easily and quickly;

(*c*) Be capable of being readily checked and identified;

(*d*) Not permit removal or undoing without breaking or tampering without leaving traces;

(*e*) Not permit use more than once;

(*f*) Be made as difficult as possible to copy or counterfeit.

2. Physical specification of seals:

(*a*) The shape and size of the seal shall be such that any identifying marks are readily legible;

(*b*) Each eyelet in a seal shall be of a size corresponding to that of the fastening used, and shall be positioned so that the fastening will be held firmly in place when the seal is closed;

(*c*) The material used shall be sufficiently strong to prevent accidental breakage, early deterioration (due to weather conditions, chemical action, etc.) or undetectable tampering;

(*d*) The material used shall be selected by reference to the sealing system used.

3. Physical specifications of fastenings:

(*a*) The fastening shall be strong and durable and resistant to weather and corrosion;

(*b*) The length of the fastening used shall not enable a sealed aperture to be opened or partly opened without the seal or fastening being broken or otherwise showing obvious damage;

(*c*) The material used shall be selected by reference to the sealing system used.

4. Identification marks:

The seal or fastening, as appropriate, shall be marked:

(*a*) To show that it is a Customs seal, by application of the word "Customs" preferably in one of the official languages of the Council (English or French);

(*b*) To show the country which applied the seal, preferably by means of the sign used to indicate the country of registration of motor vehicles in international traffic;

(*c*) To enable the Customs office by which the seal was affixed, or under whose authority it was affixed, to be identified, for example, by means of code letters or numbers.

ANNEX 3

Guarantee card

The guarantee card shall be printed in English or French, and may also be printed in a second language.

The reverse of the guarantee card may be used by the issuing association for its own purposes (e.g. giving instructions to the user).

The size of the guarantee card shall be 80 × 160 mm.

ANNEX 4

Accident report form

The accident report form shall be printed in English or French and may also be printed in a second language.

The margins, column widths and spacing of accident report forms shall correspond as closely as possible to the model form reproduced in this Annex.

Its size shall be 210 × 297 mm.

In the event of an accident the following provisions of the ITI Convention must be complied with:

Article 24

1. If Customs seals and fastenings are broken or goods are destroyed or damaged accidentally during an ITI operation the person performing the transport shall report the facts to the nearest Customs office without delay. The Customs authorities at this office shall draw up a report, if possible using an accident report form conforming to the model reproduced at Annex 4 to this Convention and shall take any necessary measures to permit continuation of the ITI operation. A copy of the report shall be attached to the ITI declaration.

2. If it is not possible to approach a Customs authority immediately, other competent authorities shall be approached. The authority called in shall draw up a report, if possible using an accident report form conforming to the model reproduced at Annex 4 to this Convention and attach it to the ITI declaration. This report shall be produced together with the transport-unit and the ITI declaration to the next Customs office. The Customs authorities at that office shall take any necessary measures to permit continuation of the ITI operation.

3. In the event of imminent danger necessitating immediate unloading of the whole or part of the load, the person performing the transport may take appropriate action on his own initiative. Subsequently, the procedure laid down in paragraph 1 or 2 of this Article, as the case may be, shall be followed.

4. When the breakage of a Customs seal or fastening or damage or destruction of goods did not take place in the territory of a Contracting Party, the Customs authorities at the next office of entry en route shall take action to ensure that the necessary report is drawn up and to permit continuation of the ITI operation.

The ACTING PRESIDENT pro tempore. Without objection, the convention will be considered as having passed through its various parliamentary stages up to and including the presentation of the resolution of ratification, which will be stated.

The second assistant legislative clerk read as follows:

Resolved (*Two-thirds of the Senators present concurring therein*), That the Senate advise and consent to the ratification of the Customs Convention on the International Transit of Goods (ITI Convention) Opened for Signature at Vienna June 7, 1971.

LEGISLATIVE SESSION

The ACTING PRESIDENT pro tempore. Without objection, the Senate will resume the consideration of legislative business.

THE SENATE'S RECORD IN 1ST SESSION OF 93D CONGRESS

Mr. MANSFIELD. Mr. President, in my opinion, the Senate has made a very productive record this year. Its membership, both Democratic and Republican, has acted responsibly. It is my opinion that if there has been any year when the Senate has proved its worth, it is this year, this most troublesome of years.

ADJOURNMENT SINE DIE

Mr. MANSFIELD. Mr. President, with that accolade to the Senate—and it is well deserved—I move, pursuant to House Concurrent Resolution 412, as amended by the Senate, that the Senate stand adjourned sine die.

The motion was agreed to; and at 2:54 p.m. the Senate adjourned sine die.

EXTENSIONS OF REMARKS

UNITED STATES MUST BOLSTER MERCHANT MARINE

HON. WILLIAM L. HUNGATE

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 18, 1973

Mr. HUNGATE. Mr. Speaker, while the debate goes on about women being assigned along with men to sea duty, the recent bestowal of an admiral's title on one of Missouri's and our Nation's great ladies should bring a quick end to any question of women's rights to the high seas. Mrs. Leonor K. Sullivan, chairman of the House Merchant Marine and Fisheries Committee, and my distinguished colleague from Missouri, was selected to receive the Admiral of the Ocean Sea Award by the United Seamen's Service.

I would like to call the attention of my colleagues to the following article and editorial from the St. Louis Globe-Democrat of December 17 and 18, 1973, respectively:

United States Must Bolster Merchant Marine, Representative Sullivan Warns

Washington.—The United States is in the frightening position of depending on foreign ships to carry 94 percent of its international trade, Rep. Leonor K. Sullivan (Dem.), St. Louis, has warned.

This vulnerability must be reversed, she said, by revival and expansion of the American merchant marine, which in turn will come through "hard accommodations" by maritime management and labor.

Mrs. Sullivan, as chairman of the House Merchant Marine Committee, was selected to receive the AOTOS award by United Seamen's Service, an industry organization.

The award carries the rank of Admiral of the Ocean Sea and is for outstanding contributions to the American merchant marine. She is the first member of Congress to be so honored.

The symbol of the award is a silver statue of Christopher Columbus, the only seaman to be given the rank of Admiral of the Ocean Sea.

In her acceptance speech at the award ceremony in New York. Mrs. Sullivan said the United States is risking "international blackmail in carrying less than 6 percent of its own foreign commerce."

"The suddenness of the energy crisis brings home to us the precarious position of the American economy when we depend, for even a small share of essential needs, on the personal whim or nationalistic zealousness of leaders of autocratic regimes," she said.

"If we are in such pervasive economic dislocation because of an arbitrary shutoff of 6 or 11 or 17 or whatever percent it is of our oil needs by the concerted action of a few small nations. Where would we be if the 94 percent of the ocean shipping we use were to be suddenly withdrawn or sharply curtailed for political or other reasons?"

Admiral Sullivan Sounds Warning

If the Navy Department were on the ball, it would offer Congresswoman Leonor K. Sullivan of St. Louis a direct commission as admiral and let her run the merchant marine program, a Navy responsibility in time of war and a loosely affiliated fleet in time of peace.

Ms. Sullivan is so well versed in merchant marine affairs that no one could challenge the selection.

Although the Navy isn't likely to do this, the United Seaman's Service has given her an award which carries the rank of Admiral of the Ocean Sea. The award by the industry organization, given for outstanding contributions to the American merchant marine, is the first to a member of Congress.

As chairman of the House Merchant Marine Committee, Mrs. Sullivan has been vociferous in warning of the dangers the United States faces in allowing its merchant marine to deteriorate to the point where it now handles only 6 per cent of our own foreign commerce. To some extent the slide has been halted by passage in 1970 of President Nixon's 10-year, $4 billion program to build an anticipated 300 efficient new ships, but even this step may be too little, too late.

As the St. Louis Democrat points out, it is folly for the United States, which is responsible for about one-third of world trade, to have to rely on "the personal whim of nationalistic zealousness of leaders of autocratic regimes" for "even a small share of essential needs." If we think the oil embargo is bad, she said, it is minor compared to what could happen with a shipping boycott.

The United States must depend upon its own cargo and passenger fleet in time of war, and it should depend upon its own shipping resources in time of peace. This country was once the world leader in shipping, but now it has fallen to a dismal sixth place, while Russia, for one, has tripled its merchant fleet in the past dozen years.

Congresswoman Sullivan's warning should be heeded by her colleagues, and by all Americans.

Mrs. Sullivan, Globe-Democrat Woman of Achievement, richly deserves the title Admiral of the Ocean Sea, and she appears to be discoverer of the fountain of youth as well. Lee Sullivan has served the people of Missouri in Congress for 21 years, but she gets younger and lovelier looking with each term.

Mrs. Sullivan, the first Member of Congress to receive this award, is to be commended for her great contribution to the merchant marine industry and to all of us who benefit from her efforts in furthering worldwide shipping.

GOOD MAN TO CALL IT QUITS

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. DERWINSKI. Mr. Speaker, the retirement of many of Illinois' outstanding Members has already been announced, including one of my distinguished colleagues, and my great friend and political neighbor, Harold R. Collier.

At the time, Harold announced his retirement, a number of publications serving the district he has so ably represented for 18 years, took the time to call to the attention of its readers, Harold's outstanding record.

In his column, Editor Paul Coffman of the Star-Sentinel Newspapers, who has known Harold throughout his political career, personally thanked Harold Collier for the service be has performed to his constituents:

The Way It Looks to Me: Good Man To Call It Quits

(By Paul D. Coffman)

Congressman Harold R. Collier of the Sixth District of Illinois has announced that he will not seek reelection to the office of U.S. Representative in 1974. Congressman Collier will have completed nine two-year terms in the house upon his retirement.

In my opinion, Congressman Collier has performed yeoman service on behalf of the residents of our West Suburban area and his presence as our representative in national matters will be sorely missed by his constituents.

Although a lifelong Republican, Congressman Collier has represented all of the residents of his district in a non-partisan manner and has always made himself available at all times to discuss legislation and even personal problems of those whom he represents.

Congressman Collier has stated that "shuffling back and forth between Washington and Illinois for eighteen years" has been a long time, and we thoroughly agree with him. We do feel, however, that the sacrifices he has made on our behalf should be rewarding to such a dedicated man.

The congressman has stated that he would like to spend his remaining active years in the private, rather than the public sector, and we wish him well in whatever pursuit he wishes to follow.

To those of us in the print media, who have grown to know Congressman Collier over the years, we have found him to be one of the most cooperative persons we have chanced to meet in public life. No matter how busy he might be, he has always been willing to take the time to discuss government matters which have been of importance to his constituents.

I would like to personally thank Congressman Collier for his eighteen years of public service and feel that I am reflecting the thoughts of the thousands of citizens in the Sixth District who have returned him to office for 9 consecutive terms. Finding a replacement for such a devoted man will take quite a bit of doing.

A GOOD MAN

HON. GOODLOE E. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. BYRON. Mr. Speaker, recently my good friend, Charles Francis Wilding, was presented the Eastern Montgomery-Kensington-Wheaton Democratic Club "Citizen of the Year" award. The award, a silver cup, was presented by Selig Freedman, president of the club.

Charles Francis Wilding has contributed many years of service to the Democratic Party in Montgomery County as well as his efforts as columnist for the Suburban Record. I want to join his many friends in congratulating him for this achievement, and I would like to share with my colleagues an editorial from the Suburban Record:

A Good Man

We were pleased to learn that the Eastern Montgomery-Kensington-Wheaton Democratic Club had recently honored Suburban

Record Democratic columnist Charles Francis Wilding as its "Citizen of the Year."

By the very nature of the political opinion writing field into which Wilding has dared to venture, he has not pleased all of the people all of the time; it is even possible that he has pleased some of the people none of the time. But we know he has a large readership and we are confident that even among those who disagree with him most often there is an underlying respect for his fairness.

The side of Wilding which only the Record could know about is his conscientiousness in coming forth with his column every week in every year—and year after year. We know he has not missed a column deadline in the last 10 years and only once during a number of prior years.

Not only has he been dependable from the deadline point of view, but he has always been considerate about informing the editor when there was the need to change the submission schedule by even an hour or two.

You are a good man, Charlie Francis, and we are happy to share that knowledge with the Eastern Montgomery-Kensington-Wheaton Democratic Club.

NEW "CAR POOL" CATCHES ON

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. FRENZEL. Mr. Speaker, a recent article in the Christian Science Monitor did a good job of highlighting the excellent promotional work being done by the transit officials in the Twin Cities to encourage bus ridership.

While the Metropolitan Transit Commission's particular promotional techniques may not be right for every city, they illustrate the point that public transit must become far more market oriented if it is to make substantial increases in ridership.

The Metropolitan Transit Commission has succeeded in turning transit patronage around. Hopefully more cities will get the message and become more aggressive in selling their transit product.

The article follows:

NEW BUS—PARDON, CAR POOL—CATCHES ON—SUBURBANITES LURED TO TWIN CITIES BUSES WITH NEW IMAGE—PAINTED TO LOOK LIKE CARS

(By Michael W. Fedo)

MINNEAPOLIS.—More people like accountant Eric Wilson are riding the bus here these days—and the fuel crisis is not the only reason.

Early last week, Mr. Wilson hung a "for sale" sign on his 1972 Mustang and stopped driving 16 miles each morning from his home in suburban Burnsville to his office in downtown Minneapolis.

He claims he no longer needs the second car since he has joined "The Greater Metropolitan Car Pool," which now carries him to and from work.

This newly conceived "car pool" is becoming a Twin Cities euphemism for bus. The Metropolitan Transit Commission (MTC) bus formerly was an anathema to middle- and upper income people here, where automobile usage is the highest per capita in the country, and where more money per family is spent on cars than on food.

The Greater Metropolitan Car Pool, a slogan coined by a local advertising agency in an attempt to woo Twin Cities drivers from their cars and into buses, is creating a new image of the bus and its potential riders.

Buses here are painted to look like cars. Some have the classic Duesenberg painted on the sides. Others have station wagons or Volkswagens. The gimmick, according to Frank Kroncke, a spokesman for the agency handling the campaign, is that bus riders still can have "their" car, while riding the bus.

Doubtless the fuel shortage has contributed to increased ridership here, but significantly, many professionals say they are no longer embarrassed to be seen riding the bus.

"I really didn't relish the idea of not driving," Mr. Wilson said. "I'd commuted for 11 years, and didn't like the traffic snarls and noxious fumes, but I still felt I had freedom with the car. I guess I could have taken the bus before, but like a lot of other people, I assumed buses were for the poor, the old, or the handicapped.

NEIGHBOR RODE BUS

"I started using the bus because I saw a neighbor riding one. He owns his own business and there are three cars in his family. Anyway, seeing him ride the bus helped me get rid of the stigma attached to them. Now I wouldn't go back to driving—fuel shortage or not. It's more convenient and cheaper by bus."

While riders have increased on several Twin Cities runs in recent weeks, other metropolitan companies report little noticeable increases.

Mr. Kroncke says this is due to the negative attitude most Americans have toward public mass transit and buses in particular.

"People with good jobs, especially, are concerned about losing status if they ride a bus," he says. "The guy riding the bus is on the skids, they think. Market research shows this time and again. What our agency has done is simply to try and upgrade the image of the bus and the rider."

TV CAMPAIGN

The television campaign geared to undermine the commuter's love affair with his car has been under-way for several weeks.

Commercials show executives, suburban housewives, and dancing girls singing the praises of the Greater Metropolitan Car Pool, and providing the audience with the phone number where information concerning stops and schedules may be obtained.

Says an MTC spokesman. "We don't hate cars. We just think the public would be happier riding one of ours."

A public corporation since 1970, the MTC has gone beyond advertising promotions, initiated with a "we're getting there," campaign, which told bus patrons new buses would be arriving with more comfortable seating and more convenient schedules and that expanded service could be expected.

ROUTE MILES DOUBLED

The MTC has moved into the suburbs and doubled its route miles to almost 2,400. Several express buses run from suburbs along normally crowded freeways and soon will be given preference over automobiles. Cars will be metered according to traffic load and not allowed on certain entrance ramps until the the existing load diminishes.

Harry Springer, general manager of the MTC says, "It's difficult to know exactly how effective advertising has been in getting more people to ride the bus, but it had to have made some inroads. It has certainly helped form public opinion about bus service."

Another company official maintains that changing the image of the bus can turn mass transit around.

THE NEW YORK YEARLY MEETING OF THE RELIGIOUS SOCIETY OF FRIENDS CALLS FOR THE IMPEACHMENT OF RICHARD M. NIXON

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. RANGEL. Mr. Speaker, in parliamentary organizations, the political party in power is always subject to a vote of confidence whenever its administration of the government is considered unacceptable to a large segment of the people it represents. If the party in power fails to pass the vote then immediately the government is dissolved and new elections are held.

The American counterpart to the parliamentary vote of confidence is impeachment. The use of impeachment as a political tool to oust the opposition administration has, fortunately, not taken place in the development of American government. The spirit of cooperation that has developed between the opposing political parties has always been one of the strong glues that has bonded America into a strong Republic.

In the case of President Nixon, however, this longstanding spirit of cooperation has many Members of Congress convinced that they cannot impeach the President. We must not forget why the Founding Fathers of this Nation put this procedure into the Constitution—they foresaw the failings of humanity that might one day overtake the Nation's Chief Executive. It is now time for this House, as the representatives of the people, to accept our constitutional responsibility to move forward with impeachment proceedings to determine if President Nixon should be charged with impeachable crimes and removed from office.

In support of this call to constitutional responsibility I am submitting a humble appeal issued at the New York yearly meeting of the Religious Society of Friends:

MINUTE ON THE IMPEACHMENT OF RICHARD M. NIXON

It is fundamental to the Friends testimony that we speak out against injustice and the corruption of power in government; that we be active in the struggle to maintain in government men of honesty, integrity, and good will; and that we do these in the spirit of conciliation and humility.

Richard Nixon and members of his Administration have indulged in acts which render them suspect of betrayal of our democracy. We believe that the American people bear responsibility in the present corruption, for it is the responsibility of all—the leaders and the people—to make representative government work.

We therefore ask that the House of Representatives proceed with the impeachment of Richard Nixon in the belief that by so doing the House will be fulfilling its obligation to the democratic process as embodied in the Constitution, to the Presidency, and to the American people.

We of the Religious Society of Friends pray that this course of action will be a step toward resolving the present dilemma of

Richard Nixon and will strengthen representative government. We seek that of God in everyone, and the will of God in all areas of life.

Approved by the Legislative Committee (Walter Ludwig, Chairman) New York Yearly Meeting of the Religious Society of Friends (Quakers)[*] December 1, 1973.

CODES AT U.S. ACADEMIES TERMED ILLEGAL

HON. ANDREW YOUNG

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. YOUNG of Georgia. Mr. Speaker, the New York Times carried an article on December 16 regarding a study of the five U.S. military academies' codes of conduct, honor, and ethics.

One very disturbing conclusion is that the academy codes, in many cases, violate the constitutional rights of the cadets.

The article raises serious questions that deserve the attention of Congress, especially when one understands that, as the article points out, as many as 85 percent of the Nation's highest ranking officers in the Army and Navy are academy graduates. If in fact the academies are indoctrinating our military leaders to the extent that in the name of "patriotism" they can accept a Mylai massacre, or rationalize the use of chemical warfare on innocent civilians, or excuse any inhumane military practices as protection of our national security, then, my colleagues, it is indeed our responsibility to initiate some action that brings the conduct, honor, and ethics codes of the U.S. military academies within the boundaries of the Constitution.

Mr. Speaker, because of the seriousness of its implications and because of its timeliness in light of the involvement of all my distinguished colleagues at this time in the nomination of young men to the academies, I am inserting the text of the article in the Record:

Military Codes Termed Illegal—Study Declares All Five U.S. Service Schools Violate Cadets' Legal Rights

(By James Feron)

A two-year study of legal practices at the nation's five military academies has found what are alleged to be extensive violations of constitutional guarantees in maintaining conduct, honor and ethics codes.

Soon to be published by the New York University School of Law, the survey cites hundreds of examples of cadets being deprived of the due process of law in seeking to defend themselves against disciplinary charges.

According to the study, made by a 26-year-old graduate of the Air Force Academy, the examples include unfair expulsion, high attrition rates and, most serious, the fostering of a contempt for the law that leads to justification of "undesirable military practices."

An alleged disdain for "legal technicalities." such as lack of sufficient evidence, is combined with an exaggerated sense of honor and integrity to produce an attitude of moral superiority, the study says.

FIVE ACADEMIES STUDIED

This, in turn, enables the nation's highest-ranking officers, 85 per cent of whom in the Army and Navy are academy graduates, "to accept a Mylai massacre or 14 months of secret bombing, of Cambodia as protection of the nation," according to Capt. Michael T. Rose, the author of the report. Captain Rose is currently assigned to the judge advocate general's office at McGuire Air Force Base in New Jersey.

"What the honor code really does is inculcate values that are socially undesirable," Captain Rose said in an interview. "Military honor has traditionally bound the officer corps together, but it has been redefined to contain a super loyalty that forbids any deviation from the norm."

The survey explores the nature of adjudicatory systems at the nation's five service academies: the United States Military Academy, West Point, N.Y.; the Air Force Academy, Colorado Springs; the United States Naval Academy, Annapolis, Md.; the Coast Guard Academy, New London, Conn., and the Merchant Marine Academy, Kings Point, L.I.

THREE SYSTEMS ANALYZED

Captain Rose visited each academy twice, and with the help of other editors of The Law Review and law students, some of whom also were academy graduates, compiled the documentation listed in 1,300 footnotes.

Although the study analyzes all three systems—conduct, administered by the officers, and honor and ethics, controlled by the cadets themselves—it is the honor code as practiced at West Point and the Air Force Academy that receives most of the attention.

Captain Rose argues that because the cadets are under military control they are entitled to the constitutional protection of due process. The academies say cadet codes are administrative and part of a separate jurisdiction.

The counter-argument, as offered in the study, is that academy officials have created the systems, support them and are therefore responsible for them. Court decisions over the years have supported both points of view and new rulings can be expected with the litigation that the survey is expected to provoke.

UNIFORM CODE CITED

Captain Rose says that cadets often are deprived of many legal safeguards, such as rights to counsel, to confront witnesses and to cross-examine, when they are being accused of an honor violation—lying, stealing or cheating (and, at the Air Force Academy and West Point, toleration of these offenses.)

The academies, he adds, will impose four and five times the maximum punishment allowed by the Uniform Code of Military Justice, which sets a limit of 60 days' restriction without a court-martial, for violation of the conduct code.

Cadets, similarly, are punished for alleged offenses committed while on leave—civil authorities normally handle such offenses—in violation of a jurisdictional statute that sets limits on such prosecution.

The cadets also are subject to double jeopardy, denied equal protection, prosecuted for insubstantive offenses, such as sitting in a parked car, and subjected to pressures intended to thwart their rights to appeal.

The "silence," or shunning of West Point cadets in alleged violation of the honor code, was recently discontinued following disclosure by the New York Times of the case of Cadet James J. Pelosi. Captain Rose's study analyzes the legal aspects of the case of Cadet Pelosi, who had been found guilty of completing an answer on a quiz after the order to stop writing.

Although the cadet denied the charge and produced witnesses on his behalf, and although the case was dismissed by the academy's superintendent, the silence was instituted. It continued for a year and a half, until his graduation in June this year.

This ostracism—physical as well as social—had been imposed by the cadet honor committee after the superintendent, Lieut. Gen. William A. Knowlton, ordered Cadet Pelosi returned to the corps in good standing.

"The silence is a blatant example of cadets learning that no matter what the law requires, if their personal value judgment dictates otherwise, the law can be ignored," Captain Rose said.

A dramatic example of the procedural aspects of the honor system at the Air Force Academy was uncovered by Captain Rose during a cheating scandal in 1971. Within 48 hours after the initial discovery of large-scale cheating, the honor board conducted 40 honor hearings, 39 of which resulted in separation from the academy.

One of the former cadets, now an enlisted man due to be discharged from the Air Force next May, provided this account of how the investigation was conducted:

"They got us up at 0300 hours, isolated us, refused to let me sit down, stood me facing the corner, refused to give me a blanket. The honor committee interrogated us continuously, refused any phone calls, did not advise us of our rights, refused to inform me of my charges. . . .

"During the first hour or so the wing commander had me in a brace [exaggerated posture of attention], screaming at me from approximately three inches in front of my face. He lied, saying [another] cadet had 'spilled the beans on me' and that another group would 'crack me' with their interrogation methods."

Violations differ from academy to academy, Captain Rose said. The sea academies, he added, were more tolerant than the Air Force and West Point, although there were exceptions.

The solution, Captain Rose says, is codification of the honor and ethics codes, having honor boards bound by precedents and adopting procedures developed by qualified lawyers in accordance with constitutional requirements. The Congress, he added, must initiate these moves because the academies, highly inbred, are unable to do so.

"MURDER BY HANDGUN: THE CASE FOR GUN CONTROL"—NO. 60

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. HARRINGTON. Mr. Speaker, again the abundance of guns in our society has resulted in another senseless death. Today, I am inserting into the Record from the December 18 New York Times the text of an article about a man who shot two of his neighbors to death in front of their house, because of a dispute over the raking of leaves. I am convinced that strict regulations on the sale of guns would prevent many of these tragic killings.

The text of the article follows:

Couple Slain by Neighbor in a Leaf-Raking Dispute

Chicago, December 17.—A 35-year-old man shot his two neighbors to death in front of their townhouse yesterday in a dispute over raking leaves, the police said.

---

[*] Constituent Meetings: New York, Northern New Jersey, Southwest Connecticut, and Western Vermont.

Harry Curtis, 35 years old, was jailed on charges of murdering his neighbors, Clyde Steele, 30, and his wife, Ruth Steele, 27.

After the shootings, the police said Mr. Curtis barricaded himself in his own townhouse, but surrendered minutes later without a shot being fired.

REMARKS OF GEN. ROBERT J. DIXON

HON. THOMAS N. DOWNING

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. DOWNING. Mr. Speaker, on November 16 of this year, it was my privilege to be present at the U.S. Air Force Association chapter dinner at the Langley Air Force Base, Va. I found the remarks Gen. Robert J. Dixon, commander, Tactical Air Command, made at that time most interesting and I am pleased to make them available to my learned colleagues so that they may have the opportunity to profit from them as I have:

REMARKS BY GEN. ROBERT J. DIXON, COMMANDER, TACTICAL AIR COMMAND, AT LANGLEY AFA CHAPTER DINNER, LANGLEY AFB, VA., NOVEMBER 16, 1973.

This is surely a gala night at Langley:

I see out there a real and heart-warming gathering of the clan—those who have come from a distance in time—others from distance in space—and some from both time ago and far away.

I sense in the gathering a purpose, a message—an upswell—and of course, a warm welcome to my family and to me. We are touched by your presence—and Tactical Air Command is honored.

In that context, let me say at the outset that the Langley Chapter of the Air Force Association deserves the highest praise for the remarkable progress it has made since its organization in 1964. Mr. Fowler—Tom—you and your predecessors, and the many who have labored so diligently through the years to give the Langley chapter the national prestige it enjoys, are to be congratulated.

This is one kind of the broad, vigorous, imaginative support the whole Air Force must have if the United States is to maintain the air power necessary to insure our security.

Your role is indispensable in this process and you clearly know it and do it.

When Tom Fowler asked me to say a few words tonight, he suggested that I express my views on the future of tactical air power. I am delighted to do so—very briefly—but I owe you the compliment of not doing so in a narrow tactical air command sense, but rather in the framework of the larger future of your Air Force.

In a recent speech General George Brown, our Air Force Chief of Staff, put our overall task in clear perspective. He emphasized the vital importance of the Air Force mission as it relates to the defense of this nation and our security commitments around the world.

"This mission," he said, "means that the deterrence of war rides in the cockpits of our aircraft and dwells in the control rooms of our missile force. It means that wherever and whenever conflict might occur, the Air Force must be qualitatively second to none. It means the Air Force must be prepared to act in concert with Allied Air, Army and Navy forces in the sky, on land, and at sea.

"Finally, our mission means that the freedom, the security and welfare of America and other free nations around the world depend on the Air Force to a greater extent than is generally realized. That is the Air Force mission as I view it: Broad in scope, complex in execution, and absolutely essential."

In that capsule, General Brown charted the future for the Air Force—stressing the awesome responsibility we have as we meet our obligations with diminishing resources.

Those who may be skeptical about our "diminishing resources" need to look hard at the record to understand.

Twenty years ago, 59 cents of every budget dollar was spent on defense; this year we are spending 30 cents for national defense.

A similar shift has occurred in manpower. Twenty years ago, half of all government workers—local, State and Federal—were employed by the Department of Defense. Today, there are almost four times as many government employees in other agencies than in defense—including our uniformed personnel. Now I don't mean we ought to get more money or more people in government—I do mean we are using less.

Which means, of course, that we must—and we can—continue to maintain adequate defense forces with reduced resources. It means better management by every individual in the defense establishment; now, especially, in the use of energy. And although defense accounts for a small portion of energy consumption—2.4 per cent of the total energy consumed in the United States—and 3.6 per cent of national petroleum consumption—we consider conservation of all energy resources a priority responsibility for all of our people.

Although austerity cannot be a crutch—and we do not complain—this is clearly a big challenge and it must be met.

Now, with that larger scene as a backdrop, let me speak of the future of tactical air power. While, as the commander of Tactical Air Command, the present is my first concern, you know that we inherit our past—and you know that the future begins today, every day. Let me capsule Tactical Air Command's past, present and future to give you a reference point.

Very few people, in or out of the Air Force, remember that in the late 1950's Tactical Air Command was a very small organization, comprising about 50,000 personnel and only 11 fighter, reconnaissance and airlift wings. Its main function was to train combat aircrews and units to support our overseas air forces. Its resources were limited and aging. But in 1961, the situation changed dramatically, with greater emphasis on Tactical Air and Tactical Air Command.

That year tactical air command became a component of a newly established unified command at MacDill Air Force Base in Florida, now known as the United States Readiness Command. That same year, tactical air command responded to the Berlin crisis, quickly deploying recalled reserve fighter and reconnaissance units to Germany.

The following year—1962—tactical air command planned and executed the response to the Cuban contingency. Tactical air command, in fact, supplied much of the evidence of the Russian missile sites that led to their removal.

I don't think it is necessary for me to dwell on the history of tactical air command's contributions to the Southeast Asia conflict. Suffice it to say that tactical air command weapons, manpower and professionalism made American tactical air power a visible, living instrument of national policy.

And, I deliberately add here, tactical air command performed brilliantly over the past five years under the superb leadership of General Spike Momyer, whose dedication to tactical air operations coincided with an era of great progress in tactical air power.

We had the opportunity to see the results of past training when we recently deployed three squadrons, consisting of 72 aircraft to Thailand in three days. The day the last squadron arrived in Thailand, we flew our first combat mission. All aircraft arrived as scheduled to include the airlift support that hauled 665 tons of equipment and 1572 support personnel.

It's interesting to use the history of the same tactical fighter wing to measure the progress that has been made through the years in the deployment of tactical aircraft. During World War II, the same tactical fighter wing embarked from the port of New York, crossing the Atlantic to England. After departing the United States, 39 days transpired before the wing flew its first combat mission. By comparison, this unit, 29 years later, departed the United States on 10 October 1972 flew half way around the world to a Royal Thai Air Force Base, and 39 days later, had flown a total of 1892 combat sorties.

Fighter pilots do great—but they don't do it alone—we've got to be proud of the support provided by tactical air command airlift and military airlift command who moved this unit en masse, the strategic air command tankers who provided air-to-air refueling, the technology, the research, and the American industrial competence that gave us the trained people, aircraft, and weapons for this extraordinary feat. Not least, but most, we've got to credit the citizens, and their Congress, who gave us the wherewithal.

More recently, as you know, the Air Force was called upon to respond to a national decision to provide material support to Israel—support designed to bring about a cease-fire and to stabilize the Middle East. Tactical Air Command was very much involved in that historic mission.

Within 16 hours after the word "go," the first eight Tactical Air Command F-4 Phantoms were airborne and on their way to Israel. They completed the 5680-mile nonstop flight in slightly more than eleven hours, requiring a number of in-flight refuelings from Strategic Air Command KC-135 tankers. The remaining F-4's followed quickly behind in a superb demonstration of the rapid, global ability of land-based Tactical Air to get where it's needed.

I might add here that the C-130's we provided reacted with superb responsiveness—all of our C-130's, loaded, arrived within 12 hours of the first delivery—and with the same degree of professionalism by our people that is the hallmark of the Air Force.

All of these actions, from Southeast Asia to the Middle East, are measures of Tactical Air Command's growth—in responsiveness and in resources—over recent years.

Today, Tactical Air Command is authorized slightly more than 95,000 people and we operate more than 2,000 aircraft. Our capital investment is valued at more than 9 billion dollars and our annual operating budget is approximately one-and-a-quarter billion dollars. This is substantial growth over the past ten years—growth that reflects the hard reality of need—National need.

As I look to our future, my crystal ball is no clearer than yours. You and I can hope—but we cannot delude ourselves into relaxing.

While a head-on confrontation between the United States and another major power is unlikely, we simply have to keep the forces to discourage this and/or to meet lesser conflicts. This includes the support of our allies, to the degree determined by national policy.

In this context I am convinced and I hope you are convinced that tactical air power is a tremendously important and absolutely vital element of our defense structure in the years ahead. Tactical air command is the spearhead of fast, mobile readiness. The more there are pressures to withdraw our overseas forces, the more we must have a reasonable—and adequate—reservoir of tactical air command forces—including our reserve resources—equipped, trained and poised for deployment to any corner of the world within a matter of hours.

This is not to imply that tactical air command bears sole responsibility, naval forces play a vital role; marine and army forces are also essential.

I will not go into a detailed discussion of the hardware and special capabilities we need to enable us to meet our obligations. As most of you know, we are struggling to acquire better means—the F-15, the airborne warning and control system, the A-10, the advanced medium short takeoff transport, and improved command and control systems. We must keep pushing to increase the momentum for change and progress. In fact we must run hard to stay in place—and no races are won in place.

We cannot, under any circumstances, rest on our laurels comforted by past achievements and learning old lessons instead of new. We have to learn the right lessons from Vietnam and from the Middle East war—we have to face up to NATO problems and tomorrow's world.

In the case of tactical air power, the burden will rest on tactical air command shoulders—the shoulders of a group of the finest and most professionally skilled and dedicated people the Air Force has ever known.

But, we just cannot do it alone.

We must have—and earn—the understanding and support of the American public. We must somehow tear down any barriers that exist between the civilian and military communities in this country—whether real or imaginary. We must be more articulate, more realistic and more deserving of respect. It is a hard and vital task. With your help—the help of the Air Force Association and other friends—I am confident we can do it—and do it well.

Listen for a second to how our secretary, Dr. John McLucas, sees it:

"I think I have cause for optimism when I stand here . . . after the end of perhaps one of the most divisive wars in our nation's history, when the military was held in low esteem—the Air Force received at least its share of criticism—and tell you that working without a draft, we are meeting our recruiting goals 100 per cent, with 95 per cent high school graduates.

Doesn't that tell you that we're doing something right? Doesn't it tell you that the American people still have a large reservoir of respect for the military in general and the Air Force in particular? Doesn't it tell us the Air Force emphasis on offering our people a good education and a skill which they can use outside the Air Force is a policy which pays off for the Air Force and for the country? Doesn't it say that perhaps we should get off the defensive once in a while and go out and tell our story to the American people?"

I hope you say yes to these questions, because I do.

In those words, Dr. McLucas has taken off the wraps—you can bet that Tactical Air Command is going to be seen and heard, in balance with the United States Air Force, in this process.

WE NEED A NEW MINIMUM WAGE BILL

HON. JOHN N. ERLENBORN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. ERLENBORN. Mr. Speaker, Christmas is almost upon us, and Christmas never fails to bring to mind Charles Dickens' immortal "Christmas Carol" the familiar tale of Ebenezer Scrooge, the miserly meany who kept Bob Cratchett working almost every day of the year in order to make ends meet. He had a change of heart, however, when the Ghosts of Christmas Past, Present, and Future impressed their truths upon him.

Not a believer in ghosts, I, nevertheless, cannot help but hope that the Spirit of Christmas will bring a change of heart to the present-day Meany who, like Scrooge, compels today's Bob Cratchetts to continue working at bare minimum wages because he insists on his own version of a minimum wage bill.

If the Spirit of Christmas reaches George Meany, a passable bill will be at the top of his list of New York's resolutions.

ALFRED S. MILLS: A CITIZEN WHO CARES

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. RANGEL. Mr. Speaker, every once in a while there is found a person who is working quietly and effectively for those less fortunate than himself. Such a man is Alfred S. Mills, chairman of the New York Bank for Savings. Without any fanfare or publicity he has involved himself and his bank in the development and building of 11 housing projects with 643 dwelling units and 3-day care centers which have replaced run down tenements in the upper Park Avenue area or New York. His original investment and idea continues to work for another four projects which are under construction and are the basis for eight more projects which are in the preliminary stages of planning. The community has complete control over the whole process.

The New York Daily News recently published a fine article on this warm-hearted man which I hope will be read by all of us for the benefit of its example of what one man can do for other people:

ONLY HUMAN: A NEW KEY FOR THE BANKER

(By Sidney Fields)

Alfred S. Mills once had the rather naive notion of buying old, abandoned and gutted tenements and building some decent houses in their place, an unlikely notion for a banker.

But he learned quickly that no matter how noble his intentions it wasn't all that simple. To begin with, when he told the FHA and City housing people, "I want to build some houses in Harlem," they asked, "Where's your land? Where are your plans?" Then he discovered that the people who lived in the area knew what they needed; he didn't. The only way to find out was to go to them and work with them.

"Not through subordinates," said Mills in his office at the New York Bank for Savings. "If it was to succeed the top man has to be involved." He got involved. He still is.

Mills is chairman and chief officer of the bank, which has assets of $2.8 billion. It's the oldest savings bank in the state, founded in 1819 by a group calling themselves "The Society for the Prevention of Pauperism," whose first office was the old alms house, behind the present City Hall.

A BEGINNING

So far Mills has helped erect 11 projects with 643 dwelling units plus three day care centers. "It's a beginning," he said, and he's frank about his motives. "We're not doing this for charity. We're part of the city. We must keep it a good place to live in. That's good for all of us."

But it's unusual for him. He's an upper caste Brahmin, who went to Philips Exeter prep and Princeton. His father, a lawyer, became head of a bank and a Judge of the N.J. Superior Court. Mills was born in Morristown, N.J., began his real schooling as a mortgage clerk for Prudential Insurance and got to be one of its mortgage appraisers before he came to the New York Bank for Savings to straighten out all the problems generated by the big depression. The bank held a lot of real estate and $100 million in mortgages that were in arrears or excessive in relation to the property covered.

It took him four years to straighten all that out. In between he was in the World War II Navy, commanding a convoy subchaser and an LST at Omaha Beach on D Day. He came out with a Bronze Star, the rank of Lt. Cmdr., and returned to the Bank.

He's 64 now, tall, soft-spoken, slightly rumpled, and looks more like a silver-haired schoolteacher eager to get back to his grandchildren. He has nine. One granddaughter was graduated from Philips Exeter and just entered Princeton. His two sons, Edward and Alfred are business executives, his daughter, Mrs. Henrietta Mead is studying urban affairs at Vassar, a passionate interest of Mills.

"It stems from a lifelong concern with the city's future," he said. "I believe that there are people in depressed areas who deserve the help, encouragement and cooperation of anyone in a position to give it to them."

He recalled with open admiration the first two he worked with, housewives, Mrs. Margaret Jenkins and Mrs. Mary Iemma, a working widow. The ladies formed the Upper Park Avenue Community Association to change the face of their neighborhood, 117th to 124th Streets between Park and Lexington Avenues and needed a mere $578,000 mortgage to convert three miserable tenements into one livable building. Mills arranged it and advanced the money for the plans and architects fees. UPAC approved the plans, the contractor, the size of the rooms and even the color of the paint.

"We bought the land," Mills said, "but the key was the people I worked with. It's a good feeling to know I'm among friends when I'm with them. The key is always the people."

Mortgages for the first 11 projects came to $18.2 million, all paid back when it was turned over to permanent investors and the City Housing Administration. Mills conceived that ingenious idea so the original "seed" money could continue working. It sure is. Another four projects with 562 dwelling units are now under construction; two more with 109 units will soon be started; and plans are ready for six others with 2,628 units, plus three more day care centers.

BUILT BY BLACKS

Black architects plan them and black contractors build them. UPAC's first project was the first apartment house built by Fred Eversley. "He's now the biggest black contractor in the country," Mills said. "What's more important, he's a good friend."

He must be aware that there are other serious urban problems besides housing: drug addiction, crime, education.

"I am. But I decided to concentrate on what I know something about and that's housing."

But privately and quietly he has a hand in the other problems. He's treasurer of the National Urban Coalition, a director of the Community Service Society and the Protestant Welfare Agency. In the bank he's moved minority members into the officers rank, and

Cornelius McDougald, one of the five Harlem residents who advise him on minority affairs, is a board member of the bank.

His proudest moment came when UPAC named one of its buildings. The Alfred S. Mills House. A nice thumbprint on time.

"I'd rather have it there than anywhere else," he said.

IS PROFIT A DIRTY WORD?

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. DERWINSKI. Mr. Speaker, a front page article in the News, a publication serving Harvey, Dolton, Riverdale, and South Holland, Ill., written by its editor, Michael O'Hearn, concerns the subject of energy crisis and the oil industry. Mr. O'Hearn conducted an interview with general manager, George Masolgites of the Harvey, Ill., Atlantic-Richfield Research and Engineering Center.

I believe that the article is not only timely and pertinent but also quite enlightening. I recommend it to all the Members, especially those who sound off on the subject of the energy crisis without doing some elementary research.

The article follows:

ASK A SILLY QUESTION—IS PROFIT A DIRTY WORD?

(By Michael O'Hearn)

United States Senator Adlai Stevenson has called for an investigation of the oil industry. Dillon Smith, a Chicago television executive charged an industry-government conspiracy concerning the energy crisis. He stated in his editorial that blaming the consumer for the shortage was not only ridiculous but also erroneous. Smith further stated that government tax breaks to the oil industry have gone to build refineries in Europe.

At the Atlantic-Richfield research and engineering center in Harvey general manager George Masolgites claims the reasons are much less sinister than the American public is being led to believe. Masolgites points out that the Chase-Manhattan Bank has published a couple of very informative booklets outlining the causes of an energy crisis.

"The incentives are just not there to dig for new sources, or to build new refineries. The price of crude oil has been government controlled at the well head."

Masolgites pointed out that federal and state taxes account for a major portion the consumer pays per gallon at his station.

"Gasoline has been a convenient whipping boy for more and more tax load with the government more than any other party feeling a cheap supply of energy was inexhaustible. Looking at these figures (George had several booklets on his desk) you can see we have a large amount of oil discovered, but haven't been able to dig for it yet due to lack of capital. The Alaskan pipeline is a good example of the lack of concern energy has meant to the American government and people."

Masolgites feels the American people have been led down a garden path when it comes to ecology.

"We have a huge supply of coal in this country, but we are not allowed to touch it. Oil shale can be recovered from the ranges of Colorado to supply this nation with oil for years to come, but the cost to extract the oil from the rock is more than Americans have been willing to pay. The American people can not allow a foreign government to dictate our energy needs. We're going to have to become self-sufficient with energy, but the American people are going to have to face the fact that energy costs money."

What kind of changes do you expect to come out of this crisis?

"Small cars are going to take over the highways of this country. Wiser use of energy is already taking place due to our present shortage, and that has got to be good."

A tour of the facilities at ARCO provided me with a little more understanding of the kind of sophisticated research taking place in American industry. I asked George if we still led the world in technology.

"Right now we do. Japan is eagerly learning all they can from us. I've been over there twice this year. They're buying our technology constantly, and putting it to good use."

I asked about Venezuela's policy of price hikes on their oil which so far this year has totaled 11 increases.

"All the oil producing countries are wising up with regard to their price of oil. We've seen the last of cheap foreign oil."

Thornton Bradshaw, ARCO's president was a recent guest on the Dick Cavett show in which Barry Commoner and Ralph Nader matched wits with Secretary of the Interior Rogers Morton and Bradshaw. George was a little disappointed in the way the show progressed . . .

"I just wished I was there to answer some of those lightweight questions posed by Professor Commoner."

George Masolgites made a strong case for American capitalism. The word profit is not and should not become a dirty word in America. If the incentives are greater for the oil companies in other parts of the world than right here in the United States, it's time our leaders in Washington faced up to these new facts and started to do something about such a situation. This country became a world leader, the envy of the world, by its capitalistic economy. A profit is the crux of the whole system. Healthy thriving activity will go where profits are the greatest. Thornton Bradshaw made an eloquent appeal to the American people on the Cavett show declaring that the United States government has lagged in the leadership required to encourage the development of our own energy needs.

Chuck Welch of ARCO put it best when he said, "Remember when you knock an industry for wanting a reasonable return on investment, you're knocking the American way.

CANADA PROTECTS HERSELF

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. GAYDOS. Mr. Speaker, our neighbor to the north may be pointing the way for us in the needed protection of our industries and businesses from foreign takeovers.

As we are all aware, Canada long has had a problem concerning foreign investments there. Our own firms are deeply entrenched in that country. British capital had much to do with building Canada into a viable industrial state.

But now Canada wants to be more on its own. And Canadians, too, fear, as reports from Ottawa stress, that any marked increase now in foreign ownership will threaten their nation's independence and tend to dilute Canada's national character.

So Canada has new legislation being enacted to control foreign investments and the machinery for doing this is simply rigged. Hereafter, the Government will have veto power over efforts by foreign firms to start new businesses in Canada or to take over additional Canadian companies. Such plans will be screened by a government agency to determine if they will benefit Canada. If not, they won't be permitted.

Times magazine quotes Alastair Gillespie, minister of industry, as saying:

> Now we're going to be more than a mere appendage of foreign corporate giants south of the border.

While the new Canadian action is aimed mainly at encroachment by U.S. investors, we also have a growing problem of the same order. The Japanese are steadily buying up companies here and building U.S. plants for their own big corporations which are in head-to-head competition with our firms, all with excess dollars obtained through their past favorable trade relations with us. So, too, are Europeans with their hoards of those notorious "Eurodollars" piled up from our giveaway programs and the multibillion dollar injection of U.S. tax money into their economies by our NATO forces stationed there.

I am a sponsor of legislation here to do for our country what the Canadians are doing for theirs—legislation to limit and control foreign investments in the overall interest and for the strict benefit for the American people. It is high time, certainly, that we act in this matter before we find outsiders so deep into our business affairs that we no longer will be in the driver's seat. Canada is not the only country looking out for itself these days. The United States is alone in taking the idealistic global view that the concerns of others are equal or superior to its own.

THE FUTURE OF THE REPUBLICAN PARTY

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. CRANE. Mr. Speaker, there is much discussion at the present time about the future of the Republican Party. The American people are clearly dismayed about the evidence of the abuse of power by some in Washington, and their faith not only in the Republican Party but in our political system itself is in a state of disarray.

The Republican Party must make it clear that it condemns the unfortunate activities which have come to be known by the collective term of "Watergate." Our party has long been in the forefront of opposing the centralization of executive power, which was an essential element of every Democratic administration since the New Deal. Now, it should be plain to all Americans that our fear of centralized power was justified.

There is some danger that the public disaffection with the men responsible for Watergate will cause some in our political arena to seek to change the clearcut mandate of the 1972 election. That election gave the American people the unique opportunity to choose between a philosophy of limited government and national strength and a policy of national weakness, redistribution of wealth, and blatant statism. The candidate who advocated the latter policies carried only a single State. The American people made it clear that they had rejected his program.

It is true that the Republican administration has, in a number of instances, veered away from that platform and program. It has imposed wage and price controls, it has signed the SALT agreements, and it has encouraged East-West trade. I, and many other Republicans, have expressed disagreement with these digressions from our party's principles. The fact remains, however, that the traditional principles of our party are the ones the American people overwhelmingly supported in the last election. To the extent that we remain true to those principles, to that extent we will merit the continued support of the majority of voters.

In a recent speech concerning the future of the Republican Party, Senator JAMES L. BUCKLEY, of New York, noted that:

> Faced with that clear choice, the majority of the American people in 1972 overwhelmingly chose the Republican approach to solving our Nation's problems. Americans chose decentralization and a return of power to the people and the states and the communities rather than the ever-increasing centralization of power in Washington. They chose peace with honor in Vietnam rather than the kind of peace achieved through begging on our knees. They chose Republican fiscal responsibility to Democratic big spending. They chose a strong military to drastic cuts in the military budget.

Senator BUCKLEY declared that:

> Nothing has happened in the intervening period, nothing that has come out of Watergate, in any way distorts or negates that mandate.

Senator BUCKLEY said:

> The Republican Party will become a majority party when Republicans realize that their strength lies in political principles and not in various charismatic figures or slick public relations contrivances.

I wish to share with my colleagues the text of the address by Senator JAMES L. BUCKLEY to the Winnebago County Republican Committee in Rockford, Ill., on "The Future of the Republican Party" and insert it into the RECORD at this time:

BUCKLEY SPEAKS ON FUTURE OF REPUBLICAN PARTY; SAYS GOP HAS ITS OWN ENERGY CRISIS

Declaring there is "a kind of energy crisis in the Republican Party," Senator James L. Buckley tonight announced that he would take on a new responsibility in the years ahead to speak out and explain "what the real issues are and what we as Republicans can do about them."

Sen. Buckley said that Republicans cannot sit back and "wait for some political messiah to solve our party's problems."

He said that the Republican Party will become a majority party when Republicans realize their strength lies in political principles and not in various charismatic figures or slick public relations contrivances.

The 50-year-old Conservative-Republican Senator from New York addressed a fund-raising dinner of the Winnebago County Republican Committee in Rockford, Illinois on "The Future of the Republican Party."

Tomorrow night (Thursday, December 6) he will repeat his theme before a fund-raising dinner of the Wisconsin State Republican Committee in Milwaukee, Wisconsin.

Sen. Buckley, who as a member of the Senate Interior Committee has spent considerable time in recent months concentrating on the energy crisis, said:

"I think I can say that I recognize an energy problem when I see one. I mention this only to point out that it appears to me there is a kind of energy crisis in the Republican party today and it is one that cannot be met by merely turning down thermostats.

"Each Republican has to speak out wherever he or she may have the opportunity," Sen. Buckley told the gathering and added:

"I plan to do that in the coming years as often as I can and I urge all of you and all Republicans everywhere to join me."

He said his task of speaking out on the "complex truth" of the important issues of the day has been made difficult "by the events of the past year, by the bias of the media and by our minority status." But he urged that it is a "task that must be completed not just for the party but for the country."

The text of Sen. Buckley's speech follows:

Tonight I want to talk to you about some problems we Republicans seem to be facing and how we might go about solving them.

Let me begin by saying I am a member of the Senate Interior and Insular Affairs Committee and I have spent considerable time in recent months concentrating on the energy crisis. I think I can say that I recognize an energy problem when I see one. I mention this only to point out that it appears to me there is a kind of energy crisis in the Republican Party today and it is one that cannot be met by merely turning down thermostats.

Slightly more than one year ago, President Nixon was reelected by a landslide. He received an overwhleming 61% of the popular vote; his popular vote plurality was over eighteen million, by far the largest in American history. There was widespread comment in the press that we were about to witness an emerging Republican majority.

Yet only three weeks ago, George Gallup told a meeting of Republican Governors that Republican candidates in 1974 would probably attract so low a vote that President Nixon could lose his power even to sustain a veto. Pollster Lou Harris has found that our party has fallen so sharply that we are already a third party, lagging behind even the percentage of voters who regard themselves as Independents. In recent gubernatorial elections in New Jersey and Virginia, Republicans stayed away from the polls to an alarming degree.

Mr. Gallup has even more bad news. The essential Democratic element of what was in 1972 termed the "emerging Republican majority" is drifting back to the Democrats. Whatever you may call them—peripheral urban ethnics, urban conservatives, or blue-collar workers—today they would, according to Gallup, vote far more overwhelmingly Democratic than they did in 1972. A recent headline tells the story: "New Majority Seen Drifting to Democrats."

The precipitous decline in the fortunes of the Republican Party is a fact of life. While it is necessary and useful to point out the obvious fact that the Republican Party as such had no connection with Watergate, it is idle to speculate on what might have been if Watergate had never occurred. Our task now is to look at things clearly, to recognize both our real strengths and our weaknesses and to do what a political party should do: bring our message to the people. At the risk of being accused of Pollyanna-ism, I venture to suggest that despite the recent pessimistic predictions, the future of the Republican Party, given certain conditions, can be very bright.

At this point some of you might be thinking that I am embarked upon a pep-talk, the kind of locker-room oration inspirational football coaches give at half-time to teams that are losing by three touchdowns. Let me assure you that it is not my purpose to play the role of a political Knute Rockne. I can think of no worse service to our party than to gloss over unpleasant facts and engage in soothing fantasies. No, what I have to say is based on my observations of the realities of where we stand. I believe that, despite recent unpleasantness, the Republican party stands on rock-solid political principles, and that on this foundation Republicans can—and will—build a new majority. But this will take the time and effort—and the energy—of every Republican. I mean by this not merely those usually spoken of as "party spokesmen" but each individual in the party. My task and your task is to bring before our fellow citizens the complex truth about the really important issues of the day. It is a task made difficult by the events of the past year, by the bias of the media and by our minority status. But it is a task that must be successfully completed, not just for the party but for the country. For the Republican party alone has the foundation of solid philosophic principles upon which to continue to build the kind of country most Americans want.

There are many in the media and in the other party who would like Americans to forget the fact that the election of 1972 was one of the most clear-cut choices ever to confront the American people. The Presidential Election was not just between two men but between two clearly identifiable political philosophies.

I don't want to get into a semantic tangle concerning what those philosophies might be called. Some might say that it was Conservatism versus Liberalism. Others might say it was a struggle between the forces of decentralization and those of centralization. Whatever the name of the philosophies involved, one thing is clear: the President was clearly identified with the kind of political philosophy that has been historically associated with the Republican party and Senator McGovern was just as clearly identified as being the spokesman for the philosophical principles of the Democratic party.

Faced with that clear choice, the majority of the American people in 1972 overwhelmingly chose the Republican approach to solving our nation's problems. Americans chose decentralization and a return of power to the people and the states and the communities rather than the ever-increasing centralization of power in Washington. They chose peace with honor in Vietnam rather than the kind of peace achieved through begging on our knees. They chose Republican fiscal responsibility to Democratic big spending. They chose a strong military to drastic cuts in the military budget. They chose to keep the control of local schools in their own hands and not in the grasping hands of Washington bureaucrats. In short, the majority of the voters overwhelmingly chose Republican principles.

Now here is the essential fact: nothing that has happened in the intervening period, nothing that has come out of Watergate, in any way distorts or negates that mandate.

In fact, a recent survey taken by the Senate Subcommittee on Inter-Governmental Relations confirms what most observers have intuitively concluded: the American people agree with the basic Republican principle that government close to the people is best.

The report of the Subcommittee states, and I quote:

"The public underscores its belief in shared governmental responsibilities with an overwhelming endorsement of two policy propositions:

"(1) State and local governments should be strengthened; and

"(2) The Federal government should have power taken away from it."

On nine problems of major concern to Americans, those polled chose non-federal government solutions in seven times. Seventy-two percent say they trust state and local government and private organizations to handle problems of health care for the family as against eighteen percent favoring the Federal government approach in this area. Sixty-six percent chose those same non-Federal government groups to handle problems of help for the elderly. Sixty-one percent said that local government should be made stronger—and forty-two percent said government should have power taken away.

Ladies and Gentlemen, I suggest that these figures are not the sort to warm the hearts of big-government, big-spending Democrats whose fiscal and bureaucratic excesses created the big government syndrome we now endure.

Yet because of the power of incumbency and political habit, the Congress today is still dominated by the big government syndrome that an over-regulated, over-taxed public is coming to reject. In the Congress today, only the Republican minority consistently fights for those policies and principles for which an overwhelming majority of Americans voted for a year ago. Let me illustrate: . . .

It is clear that instead of spending time looking for scapegoats or casting stones, each of us should concentrate our energies on closing the gap between the public's obvious approval of Republican principles and the public's lack of identification with the party that espouses these principles.

Let us not delude ourselves that it will be an easy job. We have to struggle against the reluctance of the media to concentrate on any political story that cannot be dramatized or sensationalized. We have to combat the widespread disillusionment with politics in general that has been one of the terrible legacies of the Watergate affair.

Republicans in positions of responsibility must be prepared to live by their principles, if their party is to regain its credibility. We must abandon political expediency and stand by the often hard position that in the longer run will prove to be and will be seen to be the right position.

The months immediately ahead will give us ample opportunity to test our mettle. I mentioned earlier that I serve on the Interior Committee. In that capacity, I have listened to endless hours of testimony on every facet of our snowballing energy problems. The one inescapable conclusion to be drawn from all that I have heard is that our current shortages are largely self-inflicted. They have resulted from governmental intervention in the workings of the marketplace. Nowhere is this more clinically demonstrable than in the case of natural gas. In 1954, when the Federal Power Commission first began to regulate the wellhead price of natural gas committed to interstate pipelines, we had a vigorous natural gas industry that was developing reserves at a rate faster than they were being consumed.

The result is a classic demonstration of what happens when government attempts to control the price structure. Despite the facts that geologists estimate we have enough gas yet to be found and developed in this country to supply our needs for one hundred years at current levels of consumption, by 1972 potential gas customers in more than twenty-one states were denied service. The waiting list in Chicago in 1971 included the following potential customers: 14,000 residences; 2,000 businesses; and 800 industrial users. The list is far larger today.

By holding the price of natural gas to less than half the price it would take to make it economically feasible for natural gas producers to develop gas fields for sales in inter-state commerce, the FPC in the name of consumerism has condemned consumers in Illinois and New York to do without the most desirable form of energy at any rate.

In the meantime, because intrastate sales are exempt from regulation, three major producing states—Louisiana, Texas and Oklahoma—are currently experiencing vigorous exploration, and natural gas is being sold in a free, competitive market to customers within each state at prices substantially higher than the FPC permits for sale to an interstate pipeline.

It is easy for politicians from consumer states to play games with their constituents and promise that the line will be held on the price of commodities in short supply. The inevitable result of such a policy is to guarantee that those shortages will become chronic. Republicans know better. They know that the market-place and the pricing mechanism is the most effective method for allocating resources and encouraging new sources of supply to meet demand. This is why the only sound policy, the only Republican policy, the only one that will meet the needs of states like Illinois and New York is to abolish FPC price controls on new gas committed to interstate markets. I ask all of you here tonight, all Republicans in Illinois to join me in working to free producers to find the resources needed to meet our needs.

Another hard one involves the specter of gasoline rationing. Oh yes, it is politically easy to say that the government will take charge and assure equity. Anyone whose memory reaches back to the early 1940's will understand the horrors of rationing. They will remember the Black Markets, the bootleg gasoline, the hordes of regulators, the counterfeiting of ration coupons, the guidelines and regulations, and the lying and cheating. The Congressional mania for regulation is nevertheless pressing on with Pavlovian zeal for government rationing of gasoline. Such a move was only narrowly averted a week or so ago in the Senate, but irresistible forces seem to be building to achieve what the Wall Street Journal has described as the "best political solution and the worst economic one."

Walter Heller, Chairman of the Council of Economic Advisors under the Kennedy and Johnson Administrations, has suggested that a fifteen to twenty percent increase in the price of gasoline would decrease consumption by ten percent—more than the estimated seven percent shortfall in gasoline predicted for the coming year. Yet rather than simply allowing the price mechanism to equitably provide gasoline to those who need it most while encouraging all to conserve, the Democrats would saddle us all with yet another legion of bureaucrats. Rationing is not a solution to the energy shortage—it is an expression of the very point of view that created this mess in the first place.

If we are to restore confidence in the Republican party and Republican positions we, public officials as well as workers in the political vineyards, must be willing to point out the hard truths, and to do so consistently.

I have been a Senator for three years. Looking back in midpassage, I see that I have engaged in two major duties. I have attended to my Senatorial responsibilities on the Floor and in Committee. And I have attended to the problems of the people of New York State whom it is my privilege to represent. I plan to continue working in both these areas for the years to come.

But I understand now that I have another responsibility, and that is to help spread these truths, to help the American public gain a better understanding of the major issues that face them. I'm here tonight to tell you that I intend to take on this new responsibility and to ask that each one of you join me in this task. Each Republican has to speak out wherever and whenever he or she may have the opportunity, and explain what the real issues are and what we as Republicans intend to do about them. I plan to do that in the coming years as often as I can, and I urge all of you and all Republicans everywhere to join me. Remember: in debates on the real issues confronting America, Republicans have nothing to lose and everything to gain.

As Republicans, we are the inheritors of political principles that have helped to create the greatest, most prosperous, most politically free nation in all history. As Republicans we know from experience that reliance on the free market—the essential economic tool—is far superior to reliance on big government spending and intervention—the major Democratic economic tool. We know from experience that government close to the people is best. We know from experience that in a world of increasing tension only a strong defense can guarantee peace. We know that centralized government poses the greatest threat to individual freedom. And we know the American people agree with us.

Therefore, each Republican must now see himself not just as a party member, but as a party spokesman. We simply cannot afford to sit back and wait for some political messiah to solve our party's—or our nation's—problems. We will become a majority only when we realize that our strength lies in our political principles and not in various charismatic figures or slick public relations contrivances. If you seek the future of the Republican party, look into your own heart and mind: what you find there will determine the future of the party for a generation.

As we approach a New Year, then, Republicans have every reason to do so with hope and confidence.

In order to help clarify what I think we must do in the year to come and beyond, let me offer, a bit early perhaps, the following New Year's resolutions for Republicans:

Let each of us resolve to bring the Republican message to the American people wherever and whenever we can. This is not a time to hide our light under a bushel. This is a time to speak out on the issues of the economy and energy and peace in the world. This is a time to show our fellow Americans that we are proud of our party and confident of its ability to serve all of the American people.

Let us resolve to apply Republican principles to the problems confronting America. It is pointless, for example, to pay lip service to the idea of faith in free enterprise and then demand economic controls. It is scandalous to speak the rhetoric of fiscal responsibility and then support superfluous programs, that will either produce inflationary deficits or require still heavier taxation. Let us practice what we preach, lest we wake up one day and find out that the American people are no longer listening.

Let us resolve to tell the American people the cold, hard facts about the realities of international affairs. Let us seek detente but let us also recognize that we mean one thing by detent while the Russians and the Chinese mean something else. While we seek a relaxation of tensions, let us also remember to keep our powder dry.

Let us resolve as Republicans to bring our message to those who traditionally have had other political allegiances. We know that we can attract Americans of every age and background. I know from my own experience in New York in 1970 that traditionally Democratic voters will align themselves with the candidate, regardless of party, who represents the values they embrace.

Let us resolve, finally, always and everywhere to adhere to our principles.

A VISION OF PEACE IN THE MIDDLE EAST

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. HAMILTON. Mr. Speaker, one of the most important, first ingredients needed in building a structure of real peace in the Middle East will be to create a new psychology in the region—a way of thinking about problems that reflects a vision of a better tomorrow, a mood that things can be improved and that compromises can be reached which will not force any party to forego vital interests.

In recent days, a few writers observing the Middle East scene have reflected such a vision of peace. Arie Eliav, a member of the Israeli Knesset and former Secretary General of the Labour Party, is one of them. In a December 15 New York Times article, he imparts considerable wisdom on the issues of peace in the Mideast. I commend his remarks to my colleagues:

WHEN PEACE COMES TO THE MIDDLE EAST

(By Arie Eliav)

JERUSALEM.—I believe that peace will come to Israel and her Arab neighbors in the present generation.

Is it possible that we have reached one of the last stations along the terrible path of affliction trodden by our people for the last two thousand years, and that we are now on the road to life and redemption? It is emphatically possible.

We must look ahead. Military victory is ours in yet another dreadful war that the Arabs forced upon us. Israel's armed forces have once more confounded the designs of those Arabs who seek to destroy us.

I believe that there are other Arabs, especially among those living in our midst and our immediate neighborhood, who, like ourselves, are sick and tired of slaughter and who desire to be reconciled to our existence as a people and a state within their world. I believe that now more than ever, in the twilight of war, without for one moment desisting from strengthening our armed forces, we must issue a declaration of peace to today's enemies, who will be tomorrow's neighbors.

We must tell the great Egyptian people without yet budging one inch that in return for a real peace—negotiations, the signing of a peace agreement, mutual guarantees and stages of implementation, the establishment of relations, development of trade, tourism and cultural relations—for such a peace we shall restore Egyptian sovereignty over Sinai, stage by stage, after negotiations and as part of an interim settlement, along with the complete demilitarization of the peninsula, under joint Egypto-Israeli supervision, and with an Israeli presence at the Straits.

We must turn to the Palestinian Arabs and to Jordan, where the root of the conflict lies, and say that in return for real peace we will share with them the inheritance of our fathers—this Israel—from sea to desert, on both sides of the Jordan River.

We must be prepared to negotiate with their legitimate representatives so as to create a basis for a state, or perhaps states, of their own, consisting of the land east of the Jordan River and most of the area of the West Bank and the Gaza strip, the latter two being demilitarized under joint supervision.

Together we must find a special solution for Jerusalem, so that the city may continue as the undivided capital of Israel, while at the same time furnishing the Arabs a corridor to their holy places. We must offer to help find imaginative solutions for the settlement of the Arab refugees in territories that will be restored to them once peace is established.

We must turn to the Syrians and offer in return for real peace to divide the Golan, and, after negotiations, to proceed to the stage-by-stage settlement of their (Syrian) refugees, demilitarization and joint supervision of the parts restored.

I know a declaration of this sort is not yet going to bring peace or an immediate settlement, and that there is still a long way ahead. But I do believe it will serve to dispel the tension prevailing in the Middle East. A declaration of this sort neither requires nor necessitates any retreat from any position we now hold; and it will not materialize unless we have partners among the Arabs who are prepared to conduct negotiations with us, without any victorious trumpetings but with the mutual respect of proud peoples.

I believe that while maintaining Israel's friendship with the United States we can begin to think of renewed and improved relations between us and the Soviet Union. In the future, as the processes of peace begin, we shall also be able to reach various arrangements with the Soviet Union for the large-scale immigration of Jews from that country.

When settlements begin to prevail, I envision an age of peace for Israel that she has never known before.

When that age comes, we shall be at leisure to attend to our truly great tasks. While maintaining a deterrent and unconventional army, we shall devote our energies to the upbuilding of a Jewish society, setting an example of justice, equality and dignity. I believe that Israel will one day be a spiritual center for the entire Jewish people, and a medical and scientific center for the entire world. It will export the know-how needed by the developing world in the fields of health, food and water production. Israel will re-establish its ties and relations with Africa and Asia. It will send brigades of engineers and divisions of doctors to every part of the world where they might be needed.

All this will not happen at a single stroke. But it is on such a vision of peace that we must educate the finest of our sons, the soldiers of the Yom Kippur War. Then they will be well aware of what they are fighting for and why they are at this moment standing near Damascus and in the outskirts of Suez.

CONGRESS OF THE HUNGARIAN ASSOCIATION OF CLEVELAND

HON. WILLIAM E. MINSHALL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. MINSHALL of Ohio. Mr. Speaker, the Hungarian Association of Cleveland at its 13th annual congress this year, under the able leadership of Dr. John B. Nadas, has adopted the following memorandum, which is also endorsed by the American Hungarian Federation of which it is an active member:

The material follows:

HUNGARIAN ASSOCIATION,
Cleveland, Ohio, December 19, 1973.

Hon. RICHARD M. NIXON,
President of the United States, the White House, Washington, D.C.

DEAR PRESIDENT NIXON: Enclosed you will find a memorandum accepted by our annual Congress at Cleveland on November 26, 1973.

Our Congress is attended by prominent American Hungarian intellectuals and artists both from the United States and Canada and also by some intellectuals and artists of Hungarian descent from Western Europe and Australia.

We would greatly appreciate if the thoughts and concepts contained in the memorandum would strike a positive chord in charting the course of American policies toward Hungary and East Central Europe.

Wishing you Godspeed in your responsible and difficult efforts to secure world peace, we are with best wishes for a merry Christmas and a happy New Year.

Respectfully yours,

DR. JANOS NADAS,
President.

MEMORANDUM

(1) The Congress of the Hungarian Association is greatly concerned about the continued presence of Soviet occupation forces in Hungary. The presence of the Red Army in Hungary is not authorized by covenants freely entered into by the Hungarian people and its government.

The 1947 Peace Treaty with the Allied and Associated Powers provided expressly for the withdrawal of Soviet forces 90 days after the ratification of the Austrian State Treaty. Between 1956 and 1962 the United Nations General Assembly requested in twelve resolutions adopted by ⅔ majority votes, the withdrawal of Soviet forces from Hungary. The May 27, 1957 Soviet-Hungarian Agreement on the Provisional Stationing of Soviet Forces in Hungary was signed by a Hungarian government imposed upon the Hungarian people by direct Soviet military intervention, a government which, even according to Socialist legal theory, failed to attain authorization from a Parliament at that date.

We are appalled by the May 14, 1973 compromise at the Vienna preliminary conference on MBFR. The compromise excluded Hungarian territory from the zone of mutual forces reductions and reduced Hungary to an observer status at the main conference. This was done despite the fact that Hungary serves as an important depot and glacis for Soviet forces both toward Central Europe and the Middle East. The recent Middle East crisis, during which Soviet airborne troops were concentrated in Hungarian airfields in anticipation of their use in Egypt clearly demonstrates the dangerous implication of continued Soviet presence in Hungary to the West, and the United States in particular.

Since the compromise was a temporary one, we trust that the United States Government will utilize all the diplomtaic means at its disposal at the present main conference at Vienna to achieve the withdrawal of Soviet forces in Hungary in coming agreements.

(2) The Congress is also concerned about the indirect, but eminently effective constraints on the sovereignty of Hungary and on her freedom to conduct an independent foreign policy. Hungary today is completely dependent upon Soviet goodwill, militarily as well as economically and politically.

We trust that the United States Government, both by means of bilateral diplomacy and by its efforts within the framework of the Geneva CSCE Conference will promote the restoration of full sovereignty and a free foreign and foreign trade policy by the Hungarian nation and its government.

(3) The Congress recalls that the Peace Treaties after World War I and II were concluded in the atmosphere of postwar hysteria and caused great damage to Hungary. More than 3½ million Magyars now live in the neighboring countries as without any plebiscites minorities, and if the emigres of 1945 and 1956 are added to this total, one out of every three Magyar lives abroad. We hope for the understanding of our Government of the dire consequences of these treaties for these people and we trust that whenever the opportunity arises, our Government will work for the alleviation of these injustices.

(4) The Congress is appalled by the absence of free elections and political constraints still in force upon the freedoms of speech, assembly and religion in Hungary. It requests our Government to promote in its bilateral diplomacy and at the CSCE conference the widest extension of democratic principles in Hungary.

(5) The Congress feels deep solidarity with Hungarians in Hungary the neighboring states of East Central Europe and other states. It calls upon our Government to submit positive proposals at the CSCE Conference in order to achieve a guarantee under international law for human rights and cultural, religious and educational autonomy of these minorities.

(6) Education and culture are the twin pillars of the development of any nation and/or any ethnic group. The Congress expresses its opinion that such development is only fully possible if not limited by state frontiers and suggests free cultural and educational exchange without concommitant political, ideological and nationality considerations.

In doing so, it calls upon our Government to submit detailed proposals on the freedom of cultural and educational exchanges for majority and minority nations in Europe, to be guaranteed under international law at the CSCE conference. This principle is already operative in Europe since 1955. Cultural and educational freedom, in the opinion of the Congress, included also the official use of the minority language.

REPORTS SAY NO SHORTAGE OF FUEL

HON. EDWARD YOUNG

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. YOUNG of South Carolina. Mr. Speaker, we believe that the energy crisis in this country can be settled by the free enterprise system. We get reports that oil tankers are sitting in the harbors waiting to unload; they cannot unload because all the tanks are filled with fuel. We get reports that additional tanks are being manufactured so that more people can hoard fuel. There is a direct parallel between this energy crisis and the beef crisis. The beef crisis found empty shelves, the hoarding of beef in freezers that had been purchased, cattlemen keeping their cattle on the farm. When the Cost of Living Council released controls on the beef industry, meat filled the shelves again, the price of beef came down, and there was no shortage of beef.

We would like to advocate a 90-day trial moratorium on all controls on the oil industry. The 90-day period would put us beyond the winter months and at that time we would have an understanding of how this system would work. We may feel it necessary then to extend further the moratorium. This would mean removing all trade restrictions by the Federal Trade Commission and the Cost of Living Council. During the debate on the floor of the House, it was pointed out that wells had been capped, and wells were not being pumped simply because they were not operating in a free market.

We feel that the free enterprise system has made this Nation great. The free enterprise system worked in the beef industry; the free enterprise system can work in the oil and fuel industry. Mr. Speaker, we ask for the chance to let this industry operate without bureaucratic interference.

THE DOWNFALL OF SALVADOR ALLENDE

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. HARRINGTON. Mr. Speaker, there has been much discussion of the events in Chile that led to the military overthrow of the Allende regime. The following article by Dieter Kroner, South American correspondent of the Neue Zurcher Seitung, a Swiss publication, is one which dispassionately and fairly analyzes the reasons for Allende's overthrow. I would like to insert it in the RECORD at this time for the information of my colleagues:

THE DOWNFALL OF SALVADOR ALLENDE

(By Dieter Kroner)

Salvador Allende failed not only as president but as politician—for the only thing that counts in politics is success. The idea that "it had to happen this way" is naturally being uttered today all too lightly by those who from the outset, and more secretly than openly, desired the failure of Chile's "road to socialism." Such a statement is far too simplistic and makes the wish (which has now been fulfilled) father to the thought. The left too, and particularly the extreme left, now accuse the late Chilean president of failure in their own terms. And there are those, some motivated by understandable emotions and others by political opportunism, who would puff up the image of the unfortunate Allende into that of a martyr, a victim of the dark machinations of international capitalism.

The conditions for success, or at least partial success, could hardly have been better. They were, of course, by no means ideal, but during the first half of his brief period in office Allende masterfully set about improving them. The causes of the ultimate fiasco must thus be sought not only in the admittedly deliberate obstructionism of the opposition, but even more in the ideological and tactical disunity of the left and a complete misestimation of the actual power relationships.

It was thanks to the deeply rooted democratic consciousness of the Chilean people and the traditional political neutrality of the country's armed forces that Allende was able to come to power at all. His election victory, on the basis of a chance plurality of about 36% of the vote, led at first to a state of shock, and the final months of the Frei government threatened to degenerate into a dangerous state of chaos. A small group, gripped not by paralysis but by panic, launched the spectacular attempt to kidnap General Schneider, then Supreme Commander of the army, in order to provoke a military intervention and thus prevent the wheel of history from turning. The attempted blackmail failed and the armed forces maintained their discipline. But the general, who during the critical days after Allende's election victory continued to insist on the doctrine of political neutrality by the military leadership, died as a result of the wound sustained during his abduction.

Fearful of a split in his Christian Democratic Party, President Frei relinquished his ambivalent attitude and decided to throw his weight behind the country's traditional political fair play; in Congress, where Allende's Popular Front had only a minority, the Christian Democrats tipped the scales in favor of Allende's victory. This was in keeping with the Chilean custom—for which, however, there is no compelling legal necessity—of giving parliamentary approval to the candidate winning a plurality of the vote.

By constitutionally anchoring guarantees of freedom which up to then had been safeguarded at best by common law, the new president gave proof of his democratic orientation, which no one had seriously called into question. For their part the Christian Democrats, who had remained the strongest party in the country despite the election defeat of their presidential candidate Radomiro Tomic, believed that they were thus secure against the accusation of having opened the floodgates to totalitarian Marxism.

Under the influence of Tomic, the outlines of whose election program had been nearly identical with that of Allende's *Unidad Popular*, collaboration between the new government and the Christian Democrats seemed by no means impossible, especially since Frei's party, during its six years in power, had had ample experience of the consequences of an obstructive opposition. This period of relative political harmony reached its visible climax in July 1971 with unanimous congressional approval of the nationalization of the country's large copper mines. The National Party, which represented the right wing of the opposition, seemed at first paralyzed before the specter of Marxism; it was only later, but then with marked decisiveness, that it was to regain its full capacity to act.

In the early months Allende, who was thus relieved of some of the burden of inter-party political maneuvering, concentrated largely on the armed forces and on preparations for communal elections. The first nationwide test election, held in April 1971, brought the new regime respectable gains, but Allende still failed to clear the 50% hurdle and so continued to bear the stigma of representing only a minority of the people, a situation which was amply exploited by the opposition. Nevertheless the government had shown that since taking office it had begun to gain support at grass roots level. In the many subsequent parliamentary by-elections, however, the *Unidad Popular* failed to gain any new ground, with both camps successfully defending their percentage of the vote.

At the same time Allende showed great skill in gaining the sympathy or at least the benign neutrality of the military, a success to which the right-wing opposition made a substantial contribution through its sometimes massive campaign of defamation against the armed forces. Allende took advantage of every opportunity to praise the military for their loyalty to the constitution. He appeared at all important military ceremonies and in every major speech expressed his reverence for General Schneider, who had "given his life for the democratic traditions of the country." Allende did not do anything to alter the top military leadership and confirmed General Schneider, despite the fact that the appointment had been made by President Frei. General Prats, who remained as Supreme Army Commander until 18 days before the coup, became one of Allende's principal supporters.

Economic successes, reflected in spectacular growth rates for domestic production, reinforced the political consolidation. During Allende's first year in office Chile experienced a boom which, at least optically, seemed to lead its economy out of years of stagnation. An initial massive wage increase, followed up by rigorous price controls, suddenly created an enormous spurt in consumer demand, and after initial hesitation private enterprise responded with an equally strong increase in production and range of goods. But the end of the boom could be foreseen. The existing reserve capacity of the country's industries was soon exhausted and, faced with the Damocles' sword of nationalization or illegal occupation by the workers, business circles had no interest in undertaking new investments. Even during the first so-called "golden year" gross investments dropped drastically and soon the economy's growth rates began to dwindle.

Developments were even graver in agriculture, where an agrarian reform which deteriorated increasingly into arbitrariness completely paralyzed broad areas of production. The supply situation grew steadily worse. After the synthetic freezing of prices an explosive inflationary spiral suddenly burst forth which, coupled with hoarding purchases stimulated largely by fear, created a black market which threatened to totally choke off normal channels of supply and distribution.

It was primarily the politicians who were disturbed by the deterioration of the economic situation, which could no longer be masked. The masses, on the other hand, seemed to accept with incredible calmness the increasingly chaotic supply situation, which forced many people to spend most of their time standing in line in front of shops whose shelves were virtually empty. Last October, when the first major strike of truckers and retail merchants led to an almost complete collapse of supply lines, a dense network of self-help organizations sprang up with the support of the government and the aid of countless volunteers and kept the chaos within somewhat bearable limits. To the surprise and amazement of even the *Unidad Popular*, the parliamentary elections of last March again yielded favorable results for the regime; the governing parties even managed to gain a few seats, but without endangering the absolute majority of the two opposition parties in both chambers of Chile's legislature.

The election also yielded no resolution of the conflict which was then openly being carried out between the coalition parties. Allende's Socialists, urging a more radical course, did only slightly better than the pragmatic Communists who repeatedly tried in vain to persuade Allende to compromise with the Christian Democrats and the military. At the same time the opposition felt stymied and disillusion set in among rightist factions. Shortly before the amateurish attempt at a coup by Colonel Souper last June, the conviction seemed widely held in leading opposition circles that the regime could no longer be ousted by democratic means.

The conflict between the government and the opposition assumed harsher forms, with the confrontation increasingly shifting away from democratic institutions and political parties to fighting in the streets, subversion and political murder. When the radical rightist paramilitary organization *Patria y Libertad* (Fatherland and Liberty) went underground this past summer in order to topple the Allende government with the weapons of murder and violence, the situation had reached a point of "no exit."

To an increasing degree Chile's political parties, both right and left, saw themselves forced into a peripheral position. The Congress, the heart of the expression of democratic will, was no longer in a position to enforce its decisions. The three branches of government—the legislature and judiciary in the hands of the opposition, and the structurally strong executive in the hands of the *Unidad Popular*—were in a state of stalemate. Into the inevitably resulting power vacuum, new forces flowed from both the right and the left.

The middle class, which suffered the most under Allende's regime, more and more turned away from the traditional political parties from which it could no longer expect any genuine assistance. The result was the creation of a movement known as *Gremialismo*, which used a number of existing middle-class professional organizations to take direct action against the regime. The strength of this new movement, which for tactical reasons never revealed a visible top-echelon leadership, was fully recognized by the politicians only last October, when truckers, retail merchants, bank workers, doctors and engineers declared a well-organized strike campaign which drove the government to the edge of the abyss. The Christian Democrats found themselves outmaneuvered and forced to support the strike against their will, although it was aimed at toppling a legal government by undemocratic means. They also faced the danger of losing leadership of the opposition camp to the National Party, whose concept of the corporate state was in many respects congruent with that of *Patria y Libertad* and *Gremialismo*.

The professional, middle-class movement on the anti-Marxist side was balanced on the left by the systematic organization of the masses. While Allende and his coalition partners pushed on down their road to socialism within the framework of existing legislation, at least formally, the extreme left was never prepared to accept this path. Often called upon to cooperate, it deliberately remained outside the government camp and built up a dense network of cells among the workers, the rural population and in the slums. But it never aroused much of an echo among the masses; in elections to student and worker committees the radical left had to content itself with a very small percentage of the vote.

But its preparatory work paid dividends during the great October crisis, when the *Movimiento de Izquierda Revolucionario* (MIR) quickly assumed leadership of the newly created self-help organizations and, together with the radicalized part of the governing Socialists, organized the mass occupations of factories. So-called *cordones industriales* were systematically established around the capital and other major urban agglomerations, surrounding the cities like belts and controlling not only factory production but also the access roads into these centers. Thus, with the knowledge and tacit consent of the government, a state within the state had been created which operated outside the reach of legal government power and had already established its own judicial organs. Like the Christian Democrats to the right, the Communists, facing decimation by extremists in their own camp, were late to recognize the incursion into their own domain. The *cordones industriales* quickly became a far more active instrument than the traditional, Communist-dominated trade unions.

The division of the country took on the most extreme forms. The economy, schools and universities, the administrative apparatus, were all paralyzed by the daily political conflicts and power struggles. The seed of class hatred had sprouted. The armed forces were the only government institution which remained intact. The specter of civil war, masterfully conjured by Allende as a means of exerting tactical pressure, threatened to materialize. It was evident that, should the military finally be drawn into the "class struggle," a civil war of Spanish dimensions would be unavoidable. The MIR and the hotheads within the government coalition on the one hand, and right-wing radicals on the other, were determined to push on regardless of the bloody consequences.

Allende's position first became completely hopeless when the split began to spread to the armed forces and left-wing extremism threatened to steamroller the country's democratic institutions. Up to then the president had consistently refused to take up a clear position in the now-evident ideological conflict within his heterogeneous coalition. This attitude not only forced him into a dangerous and ultimately fatal immobility, it also endangered his final goal as well as that which had been achieved so far. There is no telling whether he failed to offer resistance to left-wing extremism out of loyalty to his principles or whether his passivity resulted merely from a mis-estimation of the actual conditions of power in the country. The truth will doubtless remain a secret of history.

Allende's indecisiveness, which he tried to mask during his final months by means of a hectic shifting of ministers intended to demonstrate a dynamism in government, robbed the so-called legalists at the head of the military of the last remnants of their influence. General Prats and Generals Pickering and Sepúlveda, who had been labelled "Allendists," resigned. Even their apparent sympathy for the socialist cause had its limits. They stuck to military discipline and, according to all available reports, did not let themselves be lured into attempting the intervention for which the leftists were obviously hoping. Until nearly the end, however, a political way out of the crisis remained open to Allende which, for whatever reasons he may have had, he failed to take advantage of. The arrangement between the moderate wing of Allende's coalition, particularly the Communists, and the Christian Democrats—an arrangement strongly supported by the military—did not materialize. Its precondition would have been a "freezing" of the revolution. Thus the possible solutions were reduced to either civil war or a putsch. Allende, a full-blooded politician, pushed the situation to a non-political resolution.

Whether or not Allende violated Chile's constitution is now rather an academic question. Presumably he could be convicted of this only by the strictest legalistic standards. But there is no denying that he violated the unity of spirit and letter of the law in applying legislation and the constitution, and for the most part hid behind a formal legalism in pushing through his structural reforms. Above all he deliberately refrained from carrying out his constitutional mandate to insure that existing legislation and the decisions of the courts were observed. Chile's military did not make its move in order to punish Allende for his legal violations; they have more fundamental and realistic motives with which to justify their decision.

The political scene in Chile has not grown clearer because of the coup. In fact, it is more obscure than ever. The country's wounds are deep and they affect not only a small minority. For the time being a political solution seems virtually out of the question. And there is hardly any likelihood that the soldiers will quickly return to their barracks, as has been the case in Chile's relatively rare military interventions in the past. Much will depend upon where the military leaders stand ideologically. But whether direct or indirect, in all probability Chile will not be able to do without the political presence of the military for some time to come.

NEA AND EDUCATION

HON. JOHN M. ASHBROOK

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. ASHBROOK. Mr. Speaker, the National Education Association, originally formed as a professional association of teachers, has taken on all the trappings of a union. NEA President Helen Wise has stated flatly:

> Let's face it, we're a union and have been for quite a while.

As part of this transformation, the NEA has become deeply involved in politics. It is actively working for the election of officials and the passage of legislation at all levels of government.

The goals and increasing militancy of the NEA are spelled out in an article by Solveig Eggerz in the November 24 issue of Human Events. The following is an excerpt from that article:

THE LABOR CRISIS IN EDUCATION—THE NATIONAL EDUCATION ASSOCIATION—NEA HAS A STRANGLEHOLD ON THE NATION'S TEACHERS

(By Solveig Eggerz)

What might be the most appropriate way to start another year of low achievement in the public schools? A teacher strike, of course. "We are the biggest potential striking force in this country and we are determined to control the direction of education," boasted Catherine Barrett, outgoing president of the National Education Association (NEA) recently.

Like a teachers union official's dream come true, strikes broke out in Michigan, Ohio, Wisconsin and Pennsylvania this fall, putting 500,000 students out of school. Statistics show a continuing upward curve in NEA teacher militancy as "teacher power" replaces an almost forgotten concern with the quality of education.

Last year's 145 strikes marked a 63 per cent increase over the previous year's teacher work stoppages. The NEA was responsible for 112 of those strikes while the "real" union, the American Federation of Teachers (AFT), caused 23 strikes through its locals. Merged AFT–NEA unions caused the rest.

Prior to 1967–68 the term "strike" was not part of NEA vocabulary. Emerging militancy expressed itself in the imposition of "sanctions" or NEA-mandated boycotts by teachers of school districts which didn't cough up the demanded pay hike. Thus when Florida Gov. Claude Kirk Jr. refused to raise teachers' salaries in 1967, the NEA told its members to boycott Florida schools. Failure to do so could lead to expulsion from the NEA.

In 1968 the first statewide teachers' strike in the nation was called by the Florida Education Association with NEA support. In 1961–62 the NEA reported only one teacher work stoppage, but by 1968–69 the number of NEA-ordered strikes rose to 107, as compared with the AFT's 23.

Today the NEA's primary goals are definitely not of a scholastic nature. They include: increased federal aid—making the federal government responsible for at least one-third of education expenditures, a big leap from the present 7.8 per cent; the placement of "friends of education" in political office; the passage of a collective bargaining bill for public employes. The pot of gold at the end of this rainbow of goals appears to be an unlimited reservoir of funds for teachers at a time when teachers are in surplus.

The increase in teacher strikes might lead one to assume that teachers are in progressively dire straits financially. The exact opposite is true. Since 1966 average teacher salaries have increased by about 8 per cent annually, one-third faster than salaries in general. When teacher salaries are figured as if teachers worked a 12-month year, they average in the $9,000-a-year category, the equivalent of starting salaries for men in industry and more than the beginning business administrators or liberal arts graduate is paid by industry. Teacher salaries have increased by 90 per cent during the same time that industry raised salaries by 74 per cent.

MILITANT STANCE

The NEA's switch to militancy and the use of hardline union tactics puts the 1.4 million NEA members in the same league with the 400,000-member AFL–CIO-affiliated AFT, long noted for raucous gatherings and violence-prone strikes. At this moment the only difference between the two groups appears to be that while both are grasping for more funds than most legislatures can bear, the NEA continues an interest in controlling the substance of education.

While the NEA meddles with textbooks, content, the AFT goes for carving out more minor comforts for teachers such as excusing them from playground supervision. Both unions are milking school districts of every penny they can get and then lobbying for federal aid to provide what the local area lacks in funds. Both NEA and AFT argue that higher teacher salaries will somehow benefit children.

Weary taxpayers don't agree and their disenchantment with the idea of more funds for less performance can be measured by the pocketbook. In 1965 almost 80 per cent of school-bond referendums for elementary and secondary public schools were approved by taxpayers. In 1972 only 47 per cent were.

During the past decade the NEA's entry into politics has included not only support for germane legislation but all-out backing for political candidates. "The NEA has helped to get the education 'train' started and the NEA will work to see that it never gets stopped," wrote the *NEA Journal* prophetically, following passage of the 1965 Elementary and Secondary Education Act. Much of the NEA's political activity has been through political action groups. For instance:

The Emergency Committee for Full Funding of Education Programs, formed in 1969 with the NEA as a key group, persuaded the House of Representatives to add $894.5 million to the President's budget, half of which went toward that dubious reservoir of education funds—"impact aid."

CAPE (Coalition of American Public Employes) was formed to circumvent the ban on union political activity and is channeling its energies into lobbying for HR 8677, the Public Employes Relations Act, which would permit public employes to strike against the public.

In addition to the NEA, CAPE includes the American Federation of State, County and Municipal Employees, the International Association of Firefighters and the National Association of Internal Revenue Employes. A cause of some chagrin to the AFT, which hopes to merge with the NEA, is the rumor that CAPE may become a union, which would make it the biggest public employes' union in the world. This could create a stranglehold on public services.

NEA-PACE is a political action fund formed last year to permit NEA to fund political elections without violating the 1925 Federal Corrupt Practices Act, a circumvention that has the same effect on elections as the law seeks to prohibit. NEA-PACE made its debut in the 1972 elections by supporting 184 national races. Of the 1965 NEA-supported House candidates, 128 won. Thirteen of the 19 candidates supported for the Senate won, which Catherine Barrett called "clear evidence that teachers have become activists in the political process."

Despite an almost even political division by party among NEA members, most NEA-supported candidates were Democrats. Many are key figures in education committees on Capitol Hill such as Sen. Claiborne Pell (D.-R.I.), who heads the Senate Education subcommittee.

Said Pell at the NEA convention in Portland, Ore., last July: "Before teachers began to help me, I was a 2-to-1 underdog. My election is a victory for teacher power." NEA's Rhode Island local and its political action committee, RIPACE, received an award at the convention for "outstanding political activity in the cause of quality education."

The American School Board Journal reports that teacher union political funds are providing strong support for school board candidates in grassroots elections as well. "In California," says the *Journal*, "teacher union-backed candidates won local school board office in 60 per cent of the 114 elections they entered. The political arm of the California Teachers Association, the Association for Better Citizenship, contributed more than $100,000 to 258 candidates, who won 152 board seats." The *Journal* points to the union's attempt to impress the state legislature with teacher political muscle in the hope of pressing through a collective bargaining bill.

Zealous political activity on the part of the NEA caused raised eyebrows in the late '60s with regard to the NEA's tax-exempt classification under Section 501(C) (3) of the Internal Revenue Code, which applies largely to foundations organized for religious, charitable, scientific, literary or education purposes. As a result, the NEA's tax-exempt status was changed to 501(C) (6), which applies to business leagues, and thereby lost its right to charitable deduction on contributions. As the NEA steps up its collective bargaining practices, it might be more appropriate to change its tax-exempt status to 501(C) (5), which is that of labor unions.

"Let's face it, we're a union and have been for quite a while," said incoming NEA President Helen Wise, a social studies teacher from Pennsylvania, at the Portland convention, and she reiterated her predecessor's interest in a "war chest" of funds for the 1976 election. Sounding like a fusion of George Meany and a welfare rights leader, Wise said further:

"In the meantime, we will continue to drive for a federal collective bargaining law for public employes and for a substantial increase in the federal share of the total public school dollar expenditure. To show the politicians and the White House we mean business, we'll put teachers on the Capitol steps if we must. If it is necessary to mount a march on every state capitol, we will do it."

SENATOR SAM J. ERVIN, JR.

HON. WILMER MIZELL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. MIZELL. Mr. Speaker, today the distinguished senior Senator from North Carolina, Senator SAM J. ERVIN, JR., announced that he would be retiring at the end of his current term, in January 1975.

Senator ERVIN has served his State and his country with dedication and distinction for more than half a century.

While the Senator and I have had our honest differences on some issues of public policy, I hold nothing but the highest respect for him personally, and I have always appreciated his kindness and his thoughtfulness toward me.

Though it is a sad occasion to see a long and distinguished career in public service come to an end, Mrs. Mizell and I wish Senator and Mrs. Ervin much happiness and fulfillment as they return to North Carolina and home.

A TIMELY THOUGHT

HON. EDWARD J. PATTEN

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. PATTEN. Mr. Speaker, at a time when the U.S.S.R. is continuing to increase its military strength and presence in many areas of the world and when the Arab countries are practicing oil blackmail and toying with the European economy, the need for a strong and unified NATO is more than ever necessary.

The News Tribune, a major newspaper in the 15th Congressional District, carried a timely lead editorial on the importance of the role of NATO and its support by the United States. A strong American participation in NATO makes for a strong NATO. I recommend this editorial to my colleagues who I think will find it very thought provoking.

[From the Woodbridge (N.J.) News Tribune, Dec. 13, 1973]

What Is Russia Up To?

A lesson from the past was underlined by Joseph A. Luns, secretary-general of the North Atlantic Treaty Organization (NATO) in an address before the opening session of NATO foreign ministers in Brussels.

He warned the alliance that "the Soviets may be talking softly but they are still carrying a big stick."

He recalled the years before World War II when, "then, as now, a country was piling up armaments while signing non-aggression pacts. But those whose ideological views were opposed to Nazism were also most reluctant to draw the necessary lessons."

Referring to the Russian military buildup and a weakening of NATO ties in Europe as a result of the Arab-induced oil shortages, Luns appealed for unity of purpose and strength within the NATO organization.

"If the balance of conventional strength is upset," he warned, "and if the direct involvement of the United States in European defense is reduced, the day is brought closer when the Russians might be tempted to believe that the dangers of military adventures are not as high as in the past."

The remarks were intended for those in this country and elsewhere who would reduce the strength of American forces or their own in Europe while at the same time curtailing military expenditures in general.

Pointing to Rusisa's massive efforts in the opposite direction, Luns said "countries do not equip themselves with vast armaments and devote enormous resources to the acquisition of immense military strength if they do not contemplate exploiting it."

The warning was explicit and the lesson should be clear.

WHITE HOUSE NATIVITY SCENE

HON. WALTER E. POWELL

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. POWELL of Ohio. Mr. Speaker, I would like to take this opportunity to express my dismay at a recent decision by the U.S. Court of Appeals for the District of Columbia. The court ruled that the Nativity scene which traditionally appears on the Ellipse behind the White House during the annual National Pageant of Peace at Christmas, could no longer be financed by the National Park Service. The court held that the erection of the Nativity scene on park grounds constituted a breach of the doctrine of separation of church and state, which is required by the first amendment to the Constitution.

In my view, the court has made a shocking and regrettable misinterpretation of the fundamental precepts of the Constitution. The establishment of a Nativity scene on the White House Ellipse in no way infringes on the right of any individual to exercise his religious freedom. The presence of the Nativity scene coerces no one to subscribe to a religious faith to which he does not agree.

Notwithstanding the views of many individuals who would like to see every vestige of the Nation's religious heritage expunged from its traditional observances, it must be pointed out that the Christian heritage has played a strong and fundamental role in both the founding of our country and in its historical development.

The erection of the Nativity scene on the White House Ellipse merely takes cognizance of that heritage. Only a very distorted view of the language of the first amendment and the intent of the framers of the Bill of Rights could have led to the unfortunate decision of the Federal appeals court.

FINANCIAL STATEMENT OF REPRESENTATIVE ELWOOD H. HILLIS

HON. ELWOOD HILLIS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. HILLIS. Mr. Speaker, when I made the decision to run for public office, I also made the decision to make myself responsible to the public I was elected to represent. I respect the public's right to know more fully the person they choose to elect as their representative. In keeping with this personal belief, I am submitting a copy of my personal financial statement:

Elwood H. Hillis—Unaudited Financial Statements, December 31, 1972

ACCOUNTANT'S COMMENTS

The accompanying Balance Sheet of Elwood H. Hillis as of December 31, 1972 and the related statement of Cost and Market Values of Investments for the period then ended were not audited by us and accordingly we do not express an opinion on them.

Jasper W. Kendall.

October 26, 1973.

ELWOOD H. HILLIS, UNAUDITED BALANCE SHEET, DEC. 31, 1972

	Cost	Depreciation	Net value	
Assets:

FUELS RECYCLING AT ANNISTON ARMY DEPOT IN ALABAMA

HON. BILL NICHOLS

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. NICHOLS. Mr. Speaker, throughout the Nation Americans are realizing that the oil shortages are real and not contrived. Men and women in all parts of the country are using their ingenuity to develop techniques of saving and conserving our precious energy supplies.

In Alabama, there is a group of men at one of America's finest Army depots, the Anniston Army Depot, who started a conservation process more than a month before the oil embargoes started.

These men, Mr. Joel Douglas Pelham, depot chemist, Mr. Harold C. Wisener, quality inspector, Mr. K. V. Liphan, quality inspector, and Mr. Clifton Bourg, Jr., value engineer manager, all Federal employees at the Anniston Army Depot, began the project as a cost reduction method by reclaiming contaminated fuels from vehicles sent to the Alabama installation. Since beginning the reclamation process on September 12, the Anniston Army Depot has saved 94,000 gallons of petroleum fuels at a savings to the American people of $18,583.

I would like to submit to the CONGRESSIONAL RECORD the Anniston Army Depot's report on this project and hope that all Members of Congress will take note of the outstanding work that is being done by Col. Robert L. Bergquist, commanding officer, Anniston Army Depot, and his energy-conscious personnel. The report follows:

THE ANNISTON ARMY DEPOT TAKES ACTION TO SAVE MONEY, TIME, EFFORT, AND FUEL

The Anniston Army Depot is saving a lot of dollars in all categories. In support of saving fuels, the Depot obtained three fuel separators and during the period 12 September through 12 December, 1973, has saved 94,000 gallons of gasoline. The process of purifying the fuels provides for reuse in heating and vehicle operation at the Depot.

Prior to the present procedure, diesel fuel and gasoline was drained from the vehicles which had been returned to the Depot for rebuild and from rebuilt vehicles after test operations. The drained fuel from these vehicles was stored in storage tanks and sold as contaminated fuels through the Property Disposal activity. The contaminated fuels could not be reused in combat vehicles due to inadequate filtering equipment.

The Depot Value Engineering Manager, Mr. Cliff Bourg, began research for high quality filtering equipment and found the required items through Department of Defense excess materiel listings. The idea of purifying contaminated fuels for reuse in depot operations was coordinated between Mr. Bourg, Mr. Harold C. Wisener, quality inspector, Mr. K. V. Liphan, quality inspector, and Mr. Douglas Pelham.

JAMES J. ROWLEY—35 YEARS OF FAITHFUL PUBLIC SERVICE

HON. JOHN J. ROONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. ROONEY of New York. Mr. Speaker, it was with deep regret that I read of the decision of James J. Rowley to retire as Director of the U.S. Secret Service after 35 years of matchless service to his country and to six Presidents of the United States. It was the rare good fortune of our Government to have secured the remarkable talents and outstanding ability of a man of as high a caliber as Jim Rowley.

Jim joined the Secret Service in 1938 after 1 year as an FBI agent. His talents, skill and good judgment soon earned him a transfer to Washington and to the job of protecting the life of the President of the United States.

During the years of World War II Jim Rowley made many trips with President Franklin D. Roosevelt and was responsible not only for his protection but also for all of the painstaking security operations necessary during President Roosevelt's many trips overseas.

Under President Harry S Truman, Jim Rowley was made special agent in charge of the protection of the President. He accompanied President Truman to the Potsdam Conference. In addition, he went with President Dwight D. Eisenhower to Korea.

His promotion to the Directorship of the U.S. Secret Service was made by President John F. Kennedy on September 1, 1961. After the tragedy of the death of President Kennedy, Jim initiated an extensive reorganization and expansion of the role of the Secret Service. He also helped initiate the Federal Law Enforcement Training Center and the Executive Protection Service.

During his long and illustrious career, Mr. Speaker, Jim Rowley won many honors and awards, including the Outstanding Federal Government Employee Award from the National Civil Service League, the United States Treasury Exceptional Service Award, and the Presidential Distinguished Federal Civilian Service Award.

It was with deep regret that I saw Jim step down as the Director of the Secret Service. It was a post he filled well and honorably under six Presidents of these United States. We shall miss him in the Government service but we are all better off both as individuals and as a country that Jim Rowley chose to serve his country as his life's work.

IN PRAISE OF AMERICA

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. CARTER. Mr. Speaker, too often, too many people fail to see the basic and good qualities of our Nation. I believe that is a mistake to forget the long history of good will and understanding that the United States has exhibited. The free world has depended heavily on our strength and ability to face serious crises, and our Nation has built a superior record in the recognition of responsibility toward the needs of others.

I feel that the following editorial provides an interesting view on this subject:

IN PRAISE OF AMERICA

NOTE.—The following editorial was broadcast over Toronto radio by commentator Gordon Sinclair.

This Canadian thinks it is time to speak up for the Americans as the most generous and possibly the least appreciated people on all the earth.

Germany, Japan and, to a lesser extent, Britain and Italy were lifted out of the debris of war by the Americans who poured in billions of dollars and forgave other billions in debts.

When the franc was in danger of collapsing in 1956, it was the Americans who propped it up, and their reward was to be insulted and swindled on the streets of Paris.

I was there. I saw it.

When distant cities are hit by earthquakes, it is the United States that hurries in to help. . . . This spring, 59 American communities (were) flattened by tornadoes. Nobody helped.

The Marshall Plan and the Truman Policy pumped billions of dollars into discouraged countries. Now newspapers in those countries are writing about the decadent, warmongering Americans . . .

Why does no other land on earth even consider putting a man or woman on the moon?

You talk about Japanese technocracy, and you get radios. You talk about German technocracy, and you get automobiles.

You talk about American technocracy, and you find men on the moon—not once but several times—and safely home again.

You talk about scandals, and the Americans put theirs right in the store window for everybody to look at . . .

When the railways of France, Germany and India were breaking down through age, it was the Americans who rebuilt them. When the Pennsylvania Railroad and the

New York Central went broke, nobody loaned them an old caboose. Both are still broke.

I can name you 5,000 times when the Americans raced to the help of other people in trouble. Can you name me even one time when someone else raced to the Americans in trouble? I don't think there was outside help even during the San Francisco earthquake.

Our neighbors have faced it alone, and I'm one Canadian who is damned tired of hearing them kicked around. They will come out of this thing with their flag high. And when they do, they are entitled to thumb their noses at the lands that are gloating over their present troubles.

I hope Canada is not one of these.

IMPEACHMENT

HON. SAMUEL H. YOUNG

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. YOUNG of Illinois. Mr. Speaker, Members of the House are fully aware, as was Alexander Hamilton, that the issue of Presidential impeachment is a mixed one of politics and legality.

Impeachments, as Hamilton noted in Federalist No. 65, published in the New York Packet on March 7, 1788, involve offenses "of a nature which may with peculiar propriety be denominated political (sic), as they relate chiefly to injuries done immediately to the society itself."

Hamilton continued:

> The prosecution of them, for this reason, will seldom fail to agitate the passions of the whole community, and to divide it into parties more or less friendly or inimical to the accused. In many cases it will connect itself with the pre-existing factions, and will enlist all their animosities, partialities, influence, and interest on one side or on the other; and in such cases there will always be the greatest danger that the decision will be regulated more by the comparative strength of parties, than by the real demonstration of innocense or guilt.

Mr. Speaker, I commend to my colleagues a more up-to-date newspaper article on this same subject and dealing with a current situation. It is an article by Mr. George Anastaplo, a lecturer in the liberal arts at the University of Chicago and published in the University's campus newspaper, the Maroon, on November 30. On December 9, it was reprinted by the Chicago Sun-Times.

Mr. Anastaplo's approach to the issue is philosophical. It is by no means one favorable to the incumbent President. His thesis is that we may be going too far, that we may be "playing with fire" on the impeachment issue because in his opinion it is not good for the country.

Since Mr. Anastaplo's views present a somewhat different perspective on Presidential impeachment than the majority of those being offered, I insert the article for the benefit of my colleagues.

The article follows:

IMPEACHMENT IS PLAYING WITH FIRE

(By George Anastaplo)

I believe it unlikely, despite all the agitation of this subject we have had, that Mr. Nixon will ever be impeached by the present House of Representatives. I am confident, moreover, that if he should happen to be impeached by the House, he cannot readily be convicted by the Senate on the curiously flimsy (yet genuinely disquieting) evidence now available. But I am also confident that further available revelations of executive misconduct in recent years can revive serious impeachment talk from time to time. Both partisanship and curiosity can keep the pot boiling through 1974. What, then, is the best way for us to proceed now?

Is this not the time, before civil discord shakes the country even more than it has already, for the leaders of Congress and the executive (with the support of the responsible press) to settle the prolonged crisis which has been generated by the unseemly Watergate exposures? Should it not be kept in mind, in the interests of moderation, that the harm done to this country by the acknowledged conduct (especially with respect to foreign policy) of the last four Democratic administrations in Washington has been no less serious than the harm done by the criminal conspirators of the present Republican administration? That is, should we not restore among ourselves a sense of proportion about what the Nixon administration has and has not done and, even more important, about what it can reasonably be expected to do hereafter?

I believe there are, in our present circumstances, three prudential courses of action to choose among. That is, domestic tranquility seems to me to require, well before the end of January 1974, one of these three settlements of a constitutional crisis which is both nightmarish and ludicrous: (1) the removal of Mr. Nixon from office, or (2) his resignation for the good both of the country and of himself, or (3) the firm and announced determination by all our principal political leaders to close accounts on the 1972 presidential campaign and to let bygones be bygones.

Immediate removal of the President from office requires more efficiency, self-assurance and toughness than Congress seems capable of at this time, unless much more evidence than is likely to be available should be brought forward to implicate Mr. Nixon personally in "bribery, or other high crimes and misdemeanors," or unless he should become so disturbed as to make his removal appear obviously necessary to everyone with whom he comes into contact.

Resignation would be, of course, the simplest of the three prudent settlements I have listed. But this action may be more self-sacrificing than Mr. Nixon is capable of—unless he should become even more depressed than he has sometimes appeared to have been in recent months. Were Mr. Nixon selfless enough to resign for the good of the country, it might be argued by his more cynical critics, there would never have developed around the White House the grasping attitudes which have spawned the present general distrust of the President. I, however, do not consider his resignation unthinkable. Certainly, he could well resign if he should happen to be impeached by the House of Representatives.

But since we cannot count on Congress acting expeditiously or on Mr. Nixon conveniently resigning, the third course I have suggested (that of "closing accounts") seems to me the most sensible for the country to rely upon. It is a course which does lie within the capacities both of Congress and of informed citizens to pursue responsibly in the present circumstances. Indeed, it is a course which utilizes those political skills of self-restraint and compromise which seasoned politicians are good at.

Thus, it seems to me prudent to propose at this time, Congress should, with all deliberate speed, terminate its public investigations of the 1972 campaign and permit the Department of Justice to return to its normal functions. Public speculation about possible impeachment should be firmly discouraged. This means that Mr. Nixon should be tacitly granted an amnesty of sorts, an amnesty which both recognizes his abilities and his foreign policy contributions and guards against his character and his domestic shortcomings. He should be allowed, that is, to finish the remainder of his term "on probation." By early 1975 we and a chastened President will already be looking ahead to the election and inauguration of a new Chief Executive.

It is salutary to remind ourselves that the immediate causes of trouble for the Nixon administration have not been its financial shenanigans and farcical burglaries but rather the subsequent ill-conceived official attempts to conceal the ramifications of such criminal misbehavior. (Does not this mean that unless an administration is in the position to proceed ás effectively as President Johnson's seems to have been in covering up the ramifications of the Bobby Baker scandal, it is far safer not to try at all?)

I am reminded, by the crowd of incompetents around Mr. Nixon at the time of the Watergate burglary, of the crowd of incompetents around Mr. Kennedy at the time of the Bay of Pigs invasion. That Kennedy crowd exhibited the reckless side of Democratic crusading. This Nixon crowd exhibited the seamy side of Republican law-and-ordering.

We continue to pay a high price for the 1961 Bay of Pigs debacle. Indeed, was not the 1972 Watergate burglary team itself, with its dedicated Cuban-American participants and with its absurd campaigns against subversion, rooted in the 1961 debacle? It should be emphasized, on the other hand, that little damage would have been done to the country by the amateur efforts of the Nixon crowd if they had never been exposed. Perhaps, however, this chance exposure can be somewhat helpful if it induces us both to cut a long-exalted presidency down to constitutional size and to reform our overly-permissive election laws. These corrections we see some signs of already, as well as the resurrection of an independent Department of Justice. That being so, we should quit while we are still ahead—before our politics become truly desperate and nasty.

Desperation may already be evident in Mr. Nixon's erratic reversals with respect to the release of the White House tapes—those mischievous tapes which (for all the fuss which have been made about them) are not likely to do much more than confirm our worst suspicions about the way Richard Nixon has always conducted his political affairs. Has not the self-righteous Nixon administration been sufficiently exposed, humiliated and even crippled? Do we dare continue to play with fire?

Responsible leaders of the country (in government and out) should, it seems to me, make some such appeal as this to American public opinion:

"We play with fire if we use, or appear to use, the courts and congressional committees to second-guess the American electorate, especially when its verdict is as massive as it was in the 1972 election. That election, we should remember, concluded with about as honest a count as any we have had in recent years, despite the misguided efforts of the overfinanced and underbrained Committee to Reelect the President. It is likely to be suspected and hence resented, when public passions cool, that the implacable critics of Mr. Nixon eagerly exploited one last chance to 'get' him. Mr. Nixon is indeed a man who makes it easy (if not even fashionable) to dislike him. The depth of the animus against him is reflected in the fact that not even a spectacular Mideast war or the unprecedented disgrace of a vice-president can long keep presidential scandals out of the headlines. But the temptation to settle old scores with Mr. Nixon should be resisted, lest new and even more serious grievances be created with which we will all have to live for a generation.

"We play with fire if we ever establish in this country the precedent of using a Congress dominated by one political party to undermine by plausible threats of impeachment an administration of another party. We should be careful, that is, not to stumble into a de facto parliamentary form of government, a constitutional arrangement which requires that the executive retain the 'confidence' of the legislature. There are for us advantages in having fixed terms of office, especially as protection for those presidents who are obliged to sacrifice popular support while pursuing the common good. (The experience of President Lincoln in disciplining his generals comes to mind, as does that of President Truman after he fired the temporarily popular but clearly insubordinate General Douglas MacArthur.) That is, we don't have, nor are we likely to develop soon, the pervasive social checks on a volatile public opinion which are needed to make parliamentary government work responsibly.

"We play with fire if we allow our television-heightened taste for theatrical excesses to influence our politics. We the people are on the verge of believing that nothing is significant if it is not outlandish. Are we compensating ourselves, by staged experiments in impeachment, for the boring character both of the 1972 election and of the Nixon administration? And, even more important, are we using a dramatic hounding of the President as a means of purging ourselves of the killing we should never have permitted in Vietnam? However that may be, we should moderate our fevered public discussion and thereby make less likely any recourse to foolish measures aboard or at home by a desperate President or by his indignant critics.

"In short, the fire which threatens to get out of hand should be deliberately covered up and smothered, lest unrelenting political warfare and demagogic manipulation of the Constitution become routine among us."

This is, it seems to me, the sort of public appeal that responsible leaders, with the concurrence of a repentant President, should make to the mature citizens of this country—an appeal which recognizes shortcomings and mistakes and, if need be, even corruption in high places. Impeachment, it should never be forgotten, is not intended primarily to punish past misdeeds but to prevent future misgovernment. The political health of the country always depends on sensible Congressional determinations as to which (if any) "high crimes and misdemeanors" should be taken seriously for impeachment purposes.

The time to have talked seriously about presidential impeachment, I should add, was during our ruinous involvement in the Vietnam war, not after a President's secretary of state has been awarded the Nobel peace prize. There is, after all, a limit to how seriously such crimes as burglary should be taken, even when they have been aggravated by an attempted obstruction of justice.

I should also add that everyone who is concerned about the sanctity of the rule of law among us should be reassured that there will be, within the five-year period provided by the statute of limitations, time enough when a new administration takes charge in January 1977 to expose and indict any unpunished criminals of the 1972 presidential campaign. In the meantime, much more than enough has already happened (without the need for actual impeachment) to impress upon presidents, present and future, that the laws of the land are not to be trifled with. However that may be, a responsible public should be concerned both about the moral fitness of its leaders and about a measured response to revelations of moral failings.

Thus, it should be recognized that there may be, in the current demands for investigation and impeachment, a considerable amount of silliness and self-indulgence, if not even hysteria. There may be as well too much of the political paranoia which has, for a quarter of a century, corrupted the crowd around Mr. Nixon. Some of Mr. Nixon's crowd have long seen foreign subversion lurking behind every domestic dissenter. Some of his critics, on the other hand, now manage to see an incipient dictator even in a president who is very much on the run. Both camps of extremists should be counselled, along with the American people and the American press, to "take it easy"—a most salutary prescription for the perpetuation of constitutionalism in the United States.

FINAL ACTION, BEFORE ADJOURNMENT, ON SOCIAL SECURITY BENEFIT INCREASES AND OTHER PRIORITY MEASURES IS IMPERATIVE IN THE NATIONAL INTEREST

HON. HAROLD D. DONOHUE

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. DONOHUE. Mr. Speaker, on the eve of ending this first session of the 93d Congress, there are innumerable measures still waiting upon final legislative action, and they are all, of course, of real importance.

However, if the time element makes it physically impossible to process every pending bill, I most earnestly believe that we should and I hope that we will unite in concentrating our efforts for the completion of action on those bills that obviously and tremendously affect the basic spiritual morale and material welfare of the average American individual and family.

In this regard, I would particularly mention, among others, the imperative urgency of finalizing our action upon such pending measures as those designed to grant an immediate social security increase to the economically harassed millions of our citizens trying to exist on fixed incomes; to overcome the afflictions of our short- and long-range energy crisis by creating a special Federal Energy Administration, insuring against unconscionable profiteering by oil suppliers and making certain that energy conservation sacrifices will be equally imposed upon each individual and every segment in our society; to establish a comprehensive employment program with expanded and extended unemployment insurance compensation and providing retraining and relocation costs to avoid the real personal and family tragedy of widespread unemployment resulting from the energy crisis, military base closings and other causes; and also to effect the operating reorganization of the several bankrupt railroads involved in providing essential rail passenger and freight services to the millions of people in our Northeast section of the country.

Mr. Speaker, these are some of the priority, fundamental measures that I believe are imperative to the retention and the strengthening of our national unity and stability during this historical emergency period, and I sincerely hope that any thought of adjournment will be suspended until and unless the Congress, in seasonal good spirit and good will, completes action on them in the national interest.

THE PRICE OF INDEPENDENCE

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. LONG of Maryland. Mr. Speaker, on September 25, I addressed my colleagues suggesting that if we move quickly and wisely, the United States need never be at the mercy of black oil blackmail. My position has been that the United States should never let other nations shape U.S. foreign policy.

I submit the following article by Joseph Alsop, published in the Washington Post, December 17, on the subject of the significant interrelationship between total independence in energy and drawbacks to rationing:

THE PRICE OF INDEPENDENCE

(By Joseph Alsop)

The sharpness of the energy bind has just been uncomfortably dramatized by the price of $17.40 a barrel recently bid for good quality Iranian crude oil. To show what this means, remember how it was just two years ago.

At that time, other government experts said it was a sign of madness, when the two U.S officials who were right about energy, Jack Bridges, then of the joint Atomic Energy Commission, and James Akin, now U.S. ambassador to Saudi Arabia, predicted a future price of more than $5 a barrel for Arabian crude! The astonishing bid for Iranian crude therefore means that things are likely to get a lot worse, before they get much better.

To be sure, that dazzling negotiator, Secretary of State Henry A. Kissinger, has a hole-card which he has no doubt played for all it was worth on his arduous travels. Only he, as representative of the United States, can possibly offer the Arabs anything like an acceptable settlement with Israel. To do so, even Kissinger will have to deal with Israel on the rule of "an ultimatum a day keeps the doctor away."

With the Arabs, therefore, Dr. Kissinger can say, and no doubt has said in effect, "If you want a settlement with Israel, you have got to come to me. There is no use coming to me, until I am not being asked to negotiate under duress. Until the oil boycott is ended, I shall be under duress. So if you really want a settlement, you must first end the oil boycott."

This approach just may work, which would mean an earlier end than most people expect to the acute phase symbolized by the recent Iranian oil price! It is known that King Faisal of Saudi Arabia is not unsympathetic to Dr. Kissinger's arguments, although Faisal cannot easily change his stand except in concert with other Arabs such as the Kuwaitis. But it is a good sign that the hot-headed and doctrinaire Algerians said they would restore diplomatic relations with the United States after Dr. Kissinger's visit there.

Meanwhile, however, the United States has had a harsh and salutary lesson. This reporter was publicly mocked a good many months ago for saying that an energy crisis was bound to come eventually, and adding that this country's actual independence and freedom of action would depend on dealing boldly with the crisis. The crisis came sooner than was anticipated, and it has proved the point about national independence to the hilt. We are now being subjected to oil blackmail, in fact.

The blackmail is much, much uglier, moreover, than is generally supposed. The states of the Arabian peninsula, with no serious military power of their own, would never have dared to seize the rest of the world by the throat, and to squeeze with all their might, if they did not have external protection. That external protection, unmentioned but always there, is the heavily superior Soviet naval power in the Red Sea-Indian Ocean-Persian Gulf area.

This makes such counter-measures as economic blockade of the Arabian peninsula wholly impractical. Down the road, moreover, if Dr. Kissinger gets his Mideast settlement, the first consequence will be the reopening of the Suez Canal. Thereby, Soviet naval supply lines to the Red Sea-Indian Ocean-Persian Gulf area will be shortened from 11,000 miles to 2,000 miles.

The U.S. naval staff therefore predicts that with the canal re-opened, Soviet naval power in the area will be promptly multiplied by at least four. Instead of 20 vessels on station, there will be 80. So the little, unpopulated, powerless Arab states that own the main oil resources, will spend their nights and days staring down the throats of rows of missile launchers on Soviet cruisers.

In short, there is a lot more to the problem of national independence, posed for the United States by the energy crisis, than now appears on the surface. This is one reason for opposition to rationing. Significantly, rationing is also opposed by the wise chairman of the House Ways and Means Committee, Rep. Wilbur Mills (D-Ark.).

The fact is that high energy prices are positively desired by Chairman Mills, and also by the new and able energy boss of the Nixon administration, Deputy Secretary of the Treasurer William Simon. Paying high energy prices will be a grating way of facing the music in this country, which has always been accustomed to abnormally low energy prices. But it is still the only possible road to national self-dependence in energy, and therefore to avoidance of any threat to national independence.

We need high prices of the sort that would come from a guaranteed price of $10 a barrel for crude oil. Such prices are necessary, in turn, in order to induce the capital investments of up to $100 billion over 10 years that are required for full exploitation of oil shale, coal gasification and so on and on. And if this is the only sure way to national independence, it is better to pay up and look pleasant.

YOUTH ADVISORY COUNCIL

HON. JAMES W. SYMINGTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. SYMINGTON. Mr. Speaker, 3 years ago I formed a youth advisory council to serve me in my congressional district of St. Louis County consisting of one student from each high school in the district. During this council's existence, several important and relevant reports have been produced covering a range of legislation before the Congress. At the beginning of the 1973-74 youth council, this past September, I presented to the council, for their review, two pieces of legislation: H.R. 1807, the House Runaway Youth Act, and S. 645, the Senate Runaway Youth Act, sponsored by Senator BAYH.

I submitted these bills for the council's review, and the Subcommittee on Juvenile Justice has just completed a report on their opinion of these two bills. I present their findings to you with pride in the intelligence and dedication with which they have addressed the questions.

The material follows:

JUVENILE JUSTICE COMMITTEE: COMPARISON REPORT ON H.R. 1807 AND S. 645

FINDINGS AND RECOMMENDATIONS

While these two bills deal with the same problem, Runaway youth, we found several major differences in both policy and funding. The following are our findings and recommendations concerning specific points covered in these two bills.

1. Concerning H.R. 1807, Title I, we find it inappropriate to assign authority for making grants for runaway youth reporting services to the Administrator of the Law Enforcement Assistance Administration. This diversity in funding, we feel, can lead only to confusion. We agree with S. 645, which assigns authority for grants to both Runaway Houses and Reporting services to the Secretary of Health, Education and Welfare.

2. Concerning appropriations of funds, we find that the funding of H.R. 1807, which provides $2,000,000 for each year (1974, 1975, and 1976) for Runaway Houses, and $2,000,000 for reporting, is entirely inequitable. The Runaway House should be the principal object of planning and funding under this bill.

The funding provided under S. 645 is, while rather vague, somewhat more acceptable. It provides $10,000,000 for each year (1974, 1975, and 1976) with no provisions for allotment to the two separate programs, Runaway Houses and Reporting services.

3. We agree with provisions in both bills which provide for aftercare, once the runaway has left the care of the Runaway House.

4. We find that the provision in S. 645 requiring that each Runaway House have a maximum capacity of no more than 20 children is unnecessary. In certain areas in which the runaway problem is great and facilities for runaways are not sufficient, this number may serve to lock out youths who need counselling.

5. Concerning that part of Section 102(b) which provides "that records maintained on individual runaways shall not be disclosed without parental consent to anyone other than another agency compiling statistical records or a governmental agency involved in the disposition of criminal charges against an individual runaway," we question whether sole responsibility for disclosing these records should rest with the parent; and while we agree that there should be some provision for protecting these records, we feel that the runaway himself should have a voice in whether these records should be disclosed.

6. While both bills provide for a study to be made by the Secretary of Health, Education and Welfare to determine the problems, needs, and methods of dealing with runaways, only S. 645 provides that records gathered for the study shall not be disclosed to any individual or agency.

7. We find that requirements under H.R. 1807, which provide that Runaway Houses must contact authorities to determine if a runaway is being sought by law enforcement agencies within 48 hours, and which require that the runaway under 18 must contact his parents within 36 hours, are reasonable and necessary. Such requirements are not set forth in S. 645.

8. One addition which we feel should be studied is a provision for some kind of communications system between Runaway Houses. Such a system would aid in exchanging information on runaways who might have been to other Houses, and also would assist in exchanging new methods being used by a Runaway House.

In conclusion, we find the Senate Bill 645 to be a more acceptable program. Both the provisions for Runaway Houses and other services for runaways, as well as the funding for these programs, are much more serviceable.

Although neither bill is entirely free from discrepancies, we find that S. 645 is basically sound, and if certain minor problems are eliminated, the bill will adequately fill the pressing need for runaway facilities.

ADDENDUM

To gain further insight to these bills, we interviewed Mr. Joseph Palozolla, Director of the Youth Emergency Service, who has studied H.R. 1807 and S. 645, and as the operator of a facility such as would be financed in the Runaway Youth Acts, he has developed definite opinions on the provisions of these bills.

On almost all points, Mr. Palozolla feels that the Senate bill deals with the problem of runaways much more effectively. The House bill, he feels, just doesn't seem to have the fate of the runaway as its primary interest.

In the matter of funding, he feels that allocating equal amounts for Runaway Houses and reporting services, as is done in H.R. 1807, is entirely inequitable. In fact, he questions the need for any reporting service at all, as described in these bills. By handing out two million dollars for reporting services, he said, the bill isn't dealing with the problem.

Also pertaining to funding, Mr. Palozolla agreed with our Committee that by assigning some of the fund allocating responsibility to the Law Enforcement Assistance Administration, H.R. 1807 is only adding to the bureaucracy which will be handling the money. "I see no reason to fund anything through LEAA," he said. He also said that 10,000,000 dollars is a more realistic figure in dealing with the runaway problem.

Mr. Palozolla said that he was against any requirement for the Runaway Houses to report all runaways to the authorities. He feels that if the runaway knows that the police will be told where he is as soon as he walks in the door, he probably won't come in at all. He does, however, agree that all runaways should attempt to contact their parents within 36 hours, as required in the House bill.

In conclusion, he said that he would favor passage of S. 645, but that any bill which placed the restrictions on individual Houses such as H.R. 1807 did, would not be acceptable to him, and if such a bill were passed, his house would probably not even apply for funds.

COMING OF VARIOUS ENERGY SHORTAGES

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. WOLFF. Mr. Speaker, with the coming of various energy shortages in areas across the country, there can be little doubt of the need to develop a strong, Federal energy policy. Herbert P. Becker, P.E., has drawn up a comprehensive statement about setting goals for efficient energy consumption. The statement draws on his experience in energy systems engineering, and I would like to place the following summary of his statement in the RECORD for the attention of my colleagues:

A COMPREHENSIVE SUMMARY OF A STATEMENT ON THE URGENT NEED FOR A NATIONAL APPROACH TO THE ENERGY CRISIS

The shortage of clean energy mandates consideration of a strong, Federal Department of Energy with full, legislative authorization to establish and enforce a national energy policy that would set goals for the sources and consumption of energy; set guidelines for desirable and attainable energy consumption levels in all applications; devise legislation for achieving such goals through economic inducements and restraints; finance its activities through an Energy Fund, with revenue generated from, (1) an equitable balancing of energy costs throughout the nation, and between the small and large-block users, (2) rational penaltes, surcharges and taxes against recalcitrant decision-makers who manufacture, design, purchase, produce, apply and operate the energy hardware and systems which waste energy.

Rather than depend upon the groups and individuals affecting the energy problem, to seek their own, self-interested solutions, which may or may not coincide with those of the public at large, this national agency would coordinate a broad policy in the national interest to penalize waste and reward conservation, with a minimum of repression against freedom of action. Any existing situations which tend to perpetuate waste and indiscriminate use of energy would be modified to make such actions economically unattractive, while choices which move in the direction of the desirable goals would be broadened by appropriate economic inducements.

Legislation would be structured from a philosophy of energy conservation and pollution control affecting the supplier, producer and consumer of energy, throughout all sectors of commerce and industry. Statutes governing Utilities, rate schedules and taxes would be modified to reduce or eliminate those characteristics which encourage undesirable action.

Proposed treatment of restraints and inducements include:

1. Revise tax laws to eliminate property taxes on higher capital investments required for energy-saving systems; reduce tax rates on operating cost savings (profits) accrued from same; reduce allowable deductions on operating costs of wasteful systems; raise investment credits and depreciation rates on energy-saving systems and lower them on wasters.

2. Allocate cleaner fossil fuels on a national basis more generously to savers and regulate curtailment of wasters.

3. Eliminate waste in low-energy cost localities by surcharge on inequitably low rates in areas which are geographically favored.

4. Modify mortgage laws for investments on saver-systems by increasing the portion which can be financed, subsidizing costs, and reducing interest rates by government guarantee.

5. Reduce or eliminate the savings to the Purchaser for equipment or systems with high initial and ongoing energy consumption and short life, by surcharge or excise tax. On these inferior products, mandate & police "Truth in Advertising".

6. Structure laws, taxes and rate schedules to eliminate systems which transfer excessively high energy consumption burdens from Landlord to Tenant and encourage those which minimize the combined usage of Landlord and Tenant.

7. Structure inducement benefits to permit Engineering and Architectural Designers to optimize energy designs without suffering loss of fee.

8. Modify the philosophy and structure of energy rate schedules so that:

(a) Plus or minus rate adjustments may be selectively applied to wasters and savers respectively, instead of employing across-the-board increases in all energy rates.

(b) Avoid regressive rate increases for lower income groups.

(c) Permit higher Utility profits for energy sales based upon substantially higher energy conversion efficiency than is normal, but reduce profit formulae for those based on wasteful practices.

(d) Mandate new schedules which encourage private users to optimize fuel conservation without penalizing an acceptable Utility profit margin for special stand-by or auxiliary services.

9. On a National basis, co-ordinate the expertise of all professional and trade groups concerned with energy to establish acceptable guidelines for reasonable energy consumption in all applications of science, commerce and industry.

It is felt that these steps, taken in time, can alleviate the energy shortage on a current basis, and lengthen the lead time our researchers need to evolve new and practical energy sources, with minimum detriment to our environment and the least disruption to economic growth, life style and a free economy. Much dialogue is required on the concept proposed to enhance its validity as a solution acceptable to the entire public, despite its tone of federal interference.

ENERGY AND DEFENSE INDUSTRY PROTECTION ACT

HON. JOHN E. MOSS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. MOSS. Mr. Speaker, I am introducing today the Energy and Defense Industry Protection Act. This legislation is designed to prevent control by foreign persons of American companies engaged in the energy and defense industries.

In recent months we have witnessed an increasing number of takeovers of American companies by foreign persons. This situation can probably be traced to the devaluations of the dollar and the decline in prices on our Nation's stock markets.

I am concerned with the possibility of American companies engaged in vital industries being taken over by foreign persons. My bill attempts to deal with this by prohibiting foreign persons from owning, either directly or indirectly, 10 percent or more of such companies voting securities.

I intend for this bill to be a vehicle for hearings on this topic. It is my hope that the uSbcommittee on Commerce and Finance, which I chair, will be able to hold such hearings during the second session of the 93d Congress. It would be my intention to solicit the widest possible comment and to give all interested persons every reasonable opportunity to appear and testify.

SOVIET JEWS AND IRISH NATIONALISTS: PRISONERS OF CONSCIENCE

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. MOAKLEY. Mr. Speaker, out of my profound concern for the basic human rights of all peoples, I wish to bring to the attention of my colleagues the similarity of the tragic plight of both Soviet Jews and Irish nationalists at the present time.

It is my fervent hope that these "Prisoners of Conscience" as my constituent, Fred Burns O'Brien, so aptly describes them, will soon be accorded the full justice and dignity guaranteed them by international covenants and due them by all tenets of civilized society.

The following article states the case in such compelling terms that I am pleased to share it with both Members of Congress and the American people:

SOVIET JEWS AND IRISH NATIONALISTS: PRISONERS OF CONSCIENCE

(By Fred Burns O'Brien)

The basis of a democratic political system is the foundation, firmly entrenched, that each individual has the right to express his or her views publicly regardless of its content, even if it is deemed in derogation of the existing government. To have less than complete political rights is surely a breeding ground for violent confrontation. A political conscience might take a variety of forms, but it is housed within the confines of sound democratic principles that are permitted expression for the consumption and digestion of the beholding public.

Violence in Ireland is the direct consequence of a rejection of full implementation of demands for equality in the area of civil, human and political rights which generally encompasses the full spectrum of social interaction. The civil rights campaign was transposed to a more violent effort by an abject refusal of legitimate authorities to comprehend the necessity of immediate change. It was this same authority that catapulted the peaceful demonstration into armed revolt against the repressive statelet. Civil rights demands were of necessity transubstantiated into a demand for self-determination where the people themselves could institute a resolve for their own problems independent of an outside factor (Britain) that could only offer an imposed solution, whereby, irrespective of its motive, bears of the fact alone that it is an outside force of a foreign element seeking a foreign solution to an Irish domestic problem.

In a similar fashion, the struggle of Soviet Jews had commenced as a civil rights struggle in the same vein as that of the Irish but with a different final demand to effect justice. It is entirely possible that the demands of Soviet Jews may yet result in violent confrontation if their political exhortations are ignored.

As Soviet citizens, the Jewish community—a minority group liken to many others in Russia—is allegedly allotted the same rights as other citizens, but in practical application their rights are denied by those designated to implement such guarantees. Soviet law embraces the guarantee that all national groups are entitled to their own culture, language and traditions. This is deemed as a necessity due to the conglomeration of national groups that comprise the multi-national Soviet Union. To impose a Soviet culture would be unacceptable and impractical to such an array of diverse peoples and it was further concluded that all groups, save the Jews (in practice, not law), would be granted minority group social-autonomy within the massive Soviet society. The abrogation of these inherent rights of Soviet citizens in the instance of the Jewish minority group is a violation of the Soviet Constitution and the international covenants of human rights.

The Jewish crime is in requesting the right to emigrate to Israel and when this was denied them, they spoke out in political demonstration for which they have been harassed and incarcerated. The Irish crime is the desire for self-determination and the reunification of their nation, for which pursuit they have been interned without charge or trial.

Russian Jews ask only for rights awarded other citizens and they are denied, just as the Nationalists are denied equity within the Northern Irish society. The end result for the Jews is to seek to emigrate to Israel, because there would be no basis for self-determination within the present structure of the Soviet Union. Instead, they exercise the right under the Universal Declaration of Human Rights which states: "Everyone has the right to leave any country, including his own, and to return to his country." The Irish and Jews both sought civil rights and were rewarded negatively, coercing present courses of action as being of last resort. While the Jews emigrate to Israel, the Irish Nationalists demand self-determination in order to seek their national destiny.

In both cases of reference, the majority denied the minority the rights guaranteed both internationally and domestically. In the two instances, the peoples sought by peaceful means to effect a rectification and upon this failure resorted to more drastic measures. For pursuing political equity, the Irish and Jews alike were imprisoned for their thoughts of challenging, not legality, but raw authority and the power structure itself. There are no crimes involved in these situations, only political crimes as defined in a completely self-serving manner by those with the reins of authority.

The Soviet Union and Northern Ireland are by no means democracies, but they both purport to entertain all citizens as equal, though this is selective equality. A jew is treated like all Jews collectively and an Irish Nationalist like other Irish Nationalists and within these select confines there is equality; however, in the broader spectrum of society as a whole, there is group equality, but there is also the placement of one group over another in a ladder of equality. Structurally, there are barriers between classes of national or religious and political groupings whereby one is favored over the other(s) by reason of the dictates of the given power structure.

The Jew and the Nationalist are incarcerated for expressing political views that weigh heavily upon their conscience. This is morally and legally wrong by definition of equitable law and must be, in fact has been, rejected in its entirety by interested parties. No one should be imprisoned for his or her political beliefs or definition of social existence in political terms, but it happens continuously and must be curtailed for the protection of future generations.

But for the Irish Nationalists and Soviet Jews, the crisis has gone beyond the point of rectification, and far more serious alternatives have been incorporated into the situations. Those in Soviet prisons and British concentration camps are suffering indignities for their thoughts in a political context and are not the real criminals, whereas, the authorities demanding the incarceration of these political defendants embrace criminal actions.

Political imprisonment for crimes of thought and conscience evidence the weakness of a system or government that cannot survive the truth regardless of its detriment. A solid and just government can bear any tempest and survive if it encourages dissidents to make known their dissent and is prepared to act equitably in instances of clear abuse.

WILL THE REAL STOCKOWNERS PLEASE STAND UP (SO WE CAN FIND OUT WHO YOU ARE)?

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. MOORHEAD of Pennsylvania. Mr. Speaker, one of the many problems corporations have is identifying the real holders of their corporate issue.

This might not seem like much of a problem, but it is when one realizes that many small shareholders prefer to keep their stock in their broker's name, an activity encouraged by brokerage houses to cut down on their own paperwork.

Thus when a corporation contacts its shareholders it must communicate through various second-party brokerage houses.

This time-consuming and wasteful practice is the cause for growing concern among corporations seeking to increase dialog between stockowners and themselves.

A recent Business Week article carried the following note:

Union Electric Corporation of Carnegie, Pa., was so concerned about the problem that it commissioned a nationwide study and presented it to the Securities and Exchange Commission. The study, now being reviewed by the SEC, shows that of the 17% of all corporate stock now held in street names, as many as 68% of the actual owners are not getting reports and other information in a timely fashion.

The article, which I will put into the RECORD for the information of my colleagues, discusses some legislative remedies for the problem which the Congress should consider:

THE SILENCE IMPOSED BY STREET NAMES

In a move to simplify its bookkeeping, Tyler Corp., a diversified Dallas-based trucking and manufacturing company, last month offered to pay cash bonuses to holders of 20 shares or less of its common stock if they would turn the stock back to the company within 30 days. But the company expects that as many as 25% of its shareholders will not get the word in time because their stock is listed in a broker's "street name."

Tyler's frustration in trying to communicate with its stockholders is increasingly shared by other corporations, large and small. The problem is that since brokers refuse to divulge client lists, which they consider proprietary information, companies must rely on the already overworked brokers' back offices to pass along to stockholders all manner of important things—proxy statements, dividends, quarterly and annual reports, and, in Tyler's case, a special exchange offer. Companies are increasingly complaining that the brokers are falling down on the job.

Union Electric Steel Corp. of Carnegie, Pa., was so concerned about the problem that it commissioned a nationwide study and presented it to the Securities & Exchange Commission. The study, now being reviewed by the SEC, shows that of the 17% of all corporate stock now held in street names, as many as 68% of the actual owners are not getting reports and other information in a timely fashion.

PAPERWORK

The problem of communicating with the "real" stockholder is not new. Brokers encourage customers to keep their stock in the broker's name to cut down on Wall Street's massive paper work, which has crushed many a mismanaged firm to death. And many customers prefer the anonymity as well as the convenience of keeping their stock with a broker in a street name.

But at a time when many stockholders grumble about poor stock performance and stingy dividends, and as SEC disclosure rules grow more demanding, corporate managers are finding plenty of good reasons to want direct communication with all their stockholders. A big Midwest appliance manufacturer worries that the growing proportion of street names will make takeover attempts more difficult to spot, even though any holder of 5% or more of a company's stock is legally required to inform the SEC that he is making such a move.

International Multifoods Corp., a Minneapolis-based diversified food processor and restaurant chain operator, has a two-year program to woo "the mom and pop shareholder"—for example, by making its annual report more readable. The company also offers to mail copies of its "10 K" annual report filed with the SEC, perhaps the most useful source of information about any company. But in the last six months, street name holdings of the stock have increased nearly 12%. Thus, because of the costs involved, the company's offer does not extend to shares that are held in street names.

LUNCH DATES

Giant companies such as RCA Corp. spend $50,000 a year or more just to maintain special staffs that work only with brokerage back offices to get information to street name shareholders. "It also pays to take the head proxy clerks out to lunch once in a while," confides one corporate secretary. "When they have the big crush of proxies to mail out at annual report time, you know your stuff will go out first." And big brokers such as Merrill Lynch have invested heavily in computers and automatic labeling and envelope stuffing machines.

But a great many companies, it appears, are not getting the kind of service they want. For this reason, securities reform bills in Congress include provisions ordering the SEC to study the whole question of street name and nominee holdings and the impact of such practices on corporate stockholder communications.

Thus far no solutions are at hand, but two ideas are considered front runners. One would require brokers to give stockholders lists to companies under safeguards that would prevent a broker's competitors from seeing the names. The other idea, which many brokers favor, is to have companies "spread out" the closing dates of their fiscal years so that brokers are not deluged with work each spring.

TACHOGRAPH WILL HELP MONITOR FUEL SHORTAGE

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. FINDLEY. Mr. Speaker, on November 15, I introduced the Bus and Truck Safety Act of 1973. This bill would require each truck and bus under the jurisdiction of the Interstate Commerce Commission to be equipped with a tachograph, a recording instrument which provides a permanent record by chart of speed in miles per hour, distance traveled, and the number and duration of stops, as well as other pertinent information.

Experience in foreign countries where the tachograph is mandatory equipment shows clearly that these devices promote speed control, serve as a warning to drivers, and provide accurate records for owners, drivers, and law enforcement agencies. Several States already have such laws or are considering them. Bills have been introduced to require tachographs on buses in Connecticut, Massachusetts, and Rhode Island. A bill to require the use of tachographs on other vehicles in addition to buses was introduced in New York.

I am hopeful that hearings can be held on this bill and the Congress will enact it at an early date for several reasons.

Of primary concern to everyone is the urgent necessity to conserve our precious energy supplies. The House and Senate have passed bills setting a national speed limit of no more than 55 miles per hour for all vehicles. Enforcement of that standard will be left to State and local officials.

The tachograph will make enforcement much more uniform. It will make it quite unlikely that the giants of the highways—trucks and buses—will violate the new speed law and jeopardize the lives of passengers and other motorists alike.

A recent article in the Washington Star indicates that such violations are widespread among truckers and almost impossible to combat. Through the use of a secret and largely illegal network of citizen's band radios in the cabs of trucks, many have secured virtual immunity from speeding and overweight arrests.

Key codewords are exchanged by as many as 25 percent of the truckers on our Nation's highways, thereby informing each other of the locations of police vehicles, speedtraps, and law enforcement officials.

The bare statistics on truck accidents show the dangers involved. According to the National Safety Council, in 1972 alone there were approximately 3,500,000 big-rig accidents that killed 5,500 persons and caused $6 billion in property damage.

Obviously, it is hard enough for a truck to stop when it is traveling the legal speed limit. When it is speeding, it is even more difficult, and it is less likely that it will be able to stop with safety.

Text of newsstory follows:

RADIO CHATTER OK'S TRUCKS' HIGHBALLING

How many times have the big trailer trucks thundered by at 70-plus m.p.h. on major turnpike straightaways to leave motorists wondering how they get away with it?

How they get away with it, according to Pennsylvania State police, is through a secret and largely illegal net of citizen's band radios in the cabs of the trucks. The radios tell truckers where the law is—and where he is not.

Exchanging key code words over the radios, truckers know when police are not around and can roar down the highway as fast—and as overweight—as they please.

Key words include "Smokey the Bear," referring to state policemen, "chicken coops," for weighing stations, and "c'mon and run," meaning the coast is clear.

Estimates of the number of truckers equipped with radios vary upward from the federal government's 25 percent. There are no accurate figures because most truckers don't obtain the required federal license.

One new owner of a citizen's band radio is state police Cpl. Gary Mysel.

As he sat in his patrol car on the shoulder of Interstate 81 near Harrisburg, a group of tractor-trailers passed. Seconds later, the radio came alive.

"Smokey the Bear's sittin' near exit 28. He's in a plain wrapper (unmarked car)," it barked.

"Within five minutes they'll know 20 miles in both directions that we're sitting here," explained Cpl. Edward Fraser, Mysel's partner. Truckers hummed by at the legal speed for the next 30 minutes.

Officers say the two-way network gives truckers virtual immunity to speeding and overweight arrests. It had become a national highway safety problem before speed limits were lowered because of the energy crisis.

The network also helps explain what has long been a mystery to the average motorist: How can those trucks keep barrelling along at 70 miles per and never seem to get stopped by police?

"Now watch this," says Mysel as he drove the patrol car well away from the highway.

Picking up the microphone from his citizen's band radio and speaking in his best truckdriver voice, he broadcasts:

"I'm out here near exit 28 and Smokey's nowhere in sight. C'mon and run, C'mon, c'mon."

Minutes later, the rigs whiz by at well over the 55 m.p.h. limit.

"This is their free ticket," Fraser says of the radios. "The only truckers we get are the ones who don't have radios, or have them turned off."

No one has yet found an effective way to thwart the truckers' system.

The report on the truck drivers operation was developed by reporters for the Philadelphia Inquirer.

POLICE OFFICER IS HONORED FOR BRAVERY

HON. JAMES F. HASTINGS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. HASTINGS. Mr. Speaker, I should like to pay tribute to a young police officer from my district, who recently was awarded the Salamanca, N.Y., Police Department Medal of Honor for bravery.

The award was presented to Officer Timothy Jackson for rescuing a woman, trapped in her automobile which had plunged into the Allegany River. In the best tradition of the thousands of police officers throughout the Nation daily serving their communities, Officer Jackson entered the icy stream, removed the woman and performed mouth-to-mouth resuscitation until she regained consciousness.

Officer Jackson, married and the father of two children received scores of other honors from his community as well as a special letter of commendation from FBI Director Clarence Kelley.

In receiving the Medal of Honor, it was typical of Officer Jackson to say:

> In honoring me, they have also honored each and every member of this department.

I insert in the RECORD an article which gives an account of the Medal of Honor presentation and why Officer Jackson is so deserving of it.

The article follows:

PRESENT "MEDAL OF HONOR" TO SALAMANCA POLICE HERO

SALAMANCA.—City police paid tribute Saturday to Patrolman Timothy Jackson, whose heroism saved the life of Mrs. Wesley Fisher of Bradford, on November 6.

In a brief ceremony at the Coachman's Inn, Sgt. Perry Barrett, president of the Seneca Police Club of Salamanca awarded the 26-year old rookie policeman an engraved, bronze Medal of Honor on behalf of his fellow policemen in recognition of the valor he displayed "above and beyond the call of duty."

The medal, which hung from a wide band of green satin ribbon, was accompanied by a matching green bar or "ribbon"—highest awards for distinction that the Police Department can bestow.

Jackson will be permitted to wear the bar on his uniform every day, beginning this week, Police Chief John R. Kowalski told the Times Herald. It is the only such recognition ever given a policeman in this city.

Accepting the awards and a certificate in honor of his heroism, Patrolman Jackson said that ever since the near-tragic mishap occurred early last month, he has heard many expressions of appreciation from citizens of Salamanca for services performed routinely by all members of the Police Department.

Kiwanis members, Rotarians and other residents, Jackson said, have told him that the events of November 6 have provided citizens here with an opportunity to appreciate the police, and to publicly recognize the entire department for their work.

"In honoring me, they have also honored each and every member of this department," the young hero told his fellow police officers, city officials and their wives at the dinner Saturday.

"I am glad that I was able to help Mrs. Fisher, but I am certain that any policeman on the force could have done what I did."

Police Chief Kowalski read a letter from Clarence Kelley, director of the Federal Bureau of Investigation in Washington, DC, which praised Jackson for his prompt response, and for his concern for the life of another individual.

"My associates join me in extending our congratulations to you for your outstanding performance. We trust your career as a police officer will be rewarding in the future, and that you will continue to be an example to all law enforcement officers . . . in our profession," Mr. Kelly wrote.

Chief Kowalski also read a letter from C. William Baker, clerk of the Cattaraugus County Legislatire, enclosing Resolution 404 of Nov. 14, which commended the policeman for his bravery. The resolution had been presented by Legislators Carl E. Monkhouse of Allegany, Howard Peterson, Edward Nugent and Kenneth McClune of Salamanca, and approved by the Legislature.

James Griffiths and Marion Fisher of the Salamanca Police Commission presented Patrolman Jackson with certificates of recognition. Mr. Fisher on behalf of the Salamanca Moose Club, awarded Jackson a $100 check for the courage he displayed on Nov. 6. A letter of commendation from Sheriff Charles B. Hill was also read at the dinner.

Last week the policeman was the recipient of many citations, having been honored by the Kiwanis and Rotary Clubs, the County Civil Defense and Legislature.

Among those attending the dinner were policemen and their wives, members of the Common Council and Police Commission, and Mr. and Mrs. Wesley Fisher of Bradford.

Mrs. Fisher has said that she "always" wears her seat belt . . . but on the night of the accident, for some unexplained reason, she did not buckle it. She told Patrolman Jackson later that she also "always" locks her auto doors, and that on the night of Nov. 6, she failed to lock them.

If she had done either one of these things Nov. 6, it is doubtful whether Patrolman Jackson would have been able to save her life, police officers told the Times Herald.

PEANUT PROFITEERS—TAXPAYERS' BURDEN

HON. LAMAR BAKER

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. BAKER. Mr. Speaker, in recent weeks, a bill has been introduced to revise the present peanut program. I have taken the time to look into this program and have been fascinated with some of the little publicized information concerning this peanut program.

I want to turn a spotlight today on peanut profiteering and the peanut profiteering industry.

Peanut profiteers are forcing stagnation on a potentially great agricultural industry in order to line their own pockets with Government money. They are ripping off the Federal Government to the tune of increasing millions of dollars each year.

And it is all perfectly legal. Not right—but legal. Not necessary—but legal. Not just—but legal.

The peanut profiteering industry neatly slips a pork barrel onto every peanut bag—then the profiteers divvy up the contents of the barrel, while the American taxpayer is left holding the sack.

Other farm programs have been evolving over the years, moving away from Government controls and subsidies, toward market expansion and free enterprise.

Not the peanut program. The peanut profiteers have stayed clamped to high subsidies like an unweaned child with a full set of teeth.

What is peanut profiteering? How and why does it exist? Who are the peanut profiteers?

Two provisions of the permanent legislation for peanuts are the basic flaws:

One is the provision setting a minimum national acreage allotment of 1.61-million acres. This is divvied up among allotment farmowners. If you do not have an allotment, do not bother to grow peanuts because a big penalty is imposed to make sure there is no profit in growing peanuts without an allotment.

No. 2 is the provision that says peanuts grown on allotment acres get Government price-support at no less than 75 percent of parity.

That is the picture; only allotment holders can grow peanuts, and their peanuts are guaranteed price-support at a high level.

Now, add another—and vital—fact. Farmers have made such good use of technology that since 1955 peanut yields have gone up an average of 70 pounds per acre each year. This means that while the national peanut acreage allotment cannot, by law, be cut below 1.61-million acres, farmers really only need about 1.1-million acres to grow all the peanuts that go into U.S. food.

On about half a million acres each year, peanuts are grown which the Government does not need but has to buy.

That is what peanut profiteering is all about—using every device possible to maintain this ridiculous position in which the Government pays for the production of too many peanuts.

Profiteering comes in because the support is so high that an allotment is a very valuable asset to own. If you have a peanut allotment, you can lease your allotment acres for more than $100 an allotment acre to some dirt farmer who really wants, or needs, to farm for a living—and you can live high off the pork barrel of peanut profiteering.

Just about 25,000 allotment farmowners deal off their allotments each year—by sale or lease—to someone who wants to grow peanuts; and both parties profit because of the Government guaranteed bonanza price for peanuts.

Some 40 years ago when allotments went into effect, they were meant to prevent excess production and give each farmer his fair share of the market. Well, they have not prevented excess production—and all sense of equity has long since been lost in the shuffle and scuffle of dealing in allotments as if they were blue-chip securities—as indeed they seem to be for the peanut profiteers.

Let us take the profiteering out of peanuts and put production back into the hands of young farmers who will grow peanuts for the market, not the Government.

A PROPER MOVE BY REPRESENTATIVE TREEN

HON. F. EDWARD HÉBERT

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. HÉBERT. Mr. Speaker, my Republican colleague from Louisiana, the Honorable DAVID TREEN, has worked hard in behalf of the delegation for our fishermen.

As you know, Louisiana has many people who depend upon fishing for a livelihood, therefore the welfare of the industry is of vital concern to me and the rest of our State's delegation.

As dean of the Louisiana delegation, I want to commend DAVE TREEN for his efforts and in particular for his resolution expressing concern over the Nation's declining fishing industry which this House has approved.

It is best summed up by an editorial which appeared in the Baton Rouge Morning Advocate, which I include in the RECORD at this point:

A PROPER MOVE BY REPRESENTATIVE TREEN

In the light of more pressing affairs, the resolution approved by Congress at the behest of Rep. David Treen expressing concern over this nation's declining fishing industry may seem insignificant.

American fishermen have long been the underdog in the international quest for food from the sea and little attention has been paid to the fact that other nations sweep the waters off the United States coast clean through use of their highly developed technological skills.

Yet, as Treen noted, the industry does play a key role in the economy of the Louisiana coastal area and the same is true of other states along the Gulf of Mexico and the Atlantic and Pacific oceans.

Treen's resolution will not solve the problems of the American fishing industry, but it is, as he noted, a start toward at least doing something about them.

One of the first benefits from the resolution undoubtedly will come during the Law of the Sea Conference, now underway in New York.

If nothing else, the member nations of that conference can be advised that Congress is cognizant of the problems.

Just what can be done about them remains to be seen. There has been some talk of expanding the U.S. jurisdiction from the present 12 miles to 200, as other nations have extended their limits of "control." And there may be a request later for government subsidy of fishing fleets.

The communist nations have long subsidized such fleets. Russia has supplied Cuba with factory ships and trawlers so that nation can reap harvests from the Gulf of Mexico. Spain is currently building more ships for the island nation.

There is some sentiment that the United States cannot compete with the subsidized fleets. And there have been expressions in some quarters that the seas have been largely "fished out" and that it would be useless to expand the American fleet.

But insofar as can be determined, there has been no official establishment of the truth of these contentions.

Part of the plan, under Treen's resolution, is to hold hearings around the country in an effort to determine the true scope of the fishing industry's problem, then go back to Congress with proposed legislation to improve its stance.

The recommendation may be for subsidy. It may be for extending the jurisdictional limits. Or it may even be that, in order to ensure a continuing supply of fish, this nation turn to inland fish culture as China and Russia have done.

But, whatever the outcome, there will have been at least some effort made to perpetuate this little recognized, but valuable American industry.

Treen's resolution is not insignificant, either, to Louisiana or to the nation as a whole.

MRS. GORDON McLINTOCK

HON. JOHN J. ROONEY

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. ROONEY of New York. Mr. Speaker, I was shocked and saddened at the death, a few months ago, of Mrs. Gordon McLintock, wife of Vice Adm. Gordon McLintock, Superintendent of the U.S. Merchant Marine Academy for nearly 23 years, until his retirement in 1970. I had known the admiral and Mrs. McLintock all of those years. She lived a wonderful life and she wove into the fabric of that life loyalty, dedication, concern and love of a most admirable quality and pattern.

Mrs. McLintock's death came a day before commencement exercises of the last class of midshipmen to have attended the academy while her husband was its chief. The couple had been invited by the class president "to share our joy" on that day, but news of Mrs. McLintock's death arrived instead at the campus where she had been instrumental in raising a large part of the construction money and helping design the interior and decor of the U.S. Merchant Marine Interfaith Memorial Chapel.

A warm, charming woman, Mrs. McLintock became well known for her works in Nassau County during her husband's tenure at Kings Point.

Along with Mrs. William Paley and Mrs. John Hay Whitney, she inaugurated the annual North Shore Hospital Ball at the Academy in 1950 and had been deeply involved in the building of the hospital.

She was active in the Women's Propeller Club, a group of wives of men in shipping, and in Snug Harbor, a home for aged mariners on Staten Island.

Mr. Speaker, Mrs. McLintock was a lovely lady who was very good and very kind to both me and my family over the many years that we have known each other. Some of the finest memories of the relationship was of Mrs. McLintock taking my daughter, Mary Ann, and her brothers to academy football games during the fall.

We shall all miss Mrs. McLintock very much, Mr. Speaker, for she was a most unusual and wonderful woman. To Admiral McLintock the Rooneys extend their deepest sympathy and prayers during this hour of his great loss.

Under the permission heretofore granted me I include for the attention of my colleagues and the numerous friends of Mrs. McLintock, the memorial service held at Fort Myer Chapel, Arlington, Va.

Present at the service and interment were leaders of the maritime industry, the educational world, the armed forces, and representatives from the embassies, and graduates, and condolences received included those from the Chairman of the Joint Chiefs of Staff Admiral Moorer and Mrs. Moorer. While there was no official representation from the academy a number of the staff, officers, faculty, enlisted men and former stewards whom she had loved also attended.

MEMORIAL SERVICE

Fort Myer Chapel, Arlington, Virginia, June 27, 1973.

The Service is held in loving memory of: Wynne Russell McLintock.

THE ORGAN PRELUDE

THE INVOCATION

Captain R. W. Radcliffe, CHC, USN.

Jesus said, "I am the resurrection and the life; he who believes in me, though he die, yet shall he live, and whosoever lives and believes in me shall never die." (John 11: 25–26)

The eternal God is your dwelling place, and underneath are the everlasting arms. (Deuteronomy 33: 27a)

The Lord is my light and my salvation; whom shall I fear? The Lord is the stronghold of my life; of whom shall I be afraid? (Psalm 27: 1)

HYMN

America the Beautiful

O beautiful for spacious skies, for amber waves of grain,
For purple mountain majesties above the fruited plain!
America! America! God shed His grace on thee,
And crown thy good with brotherhood
From sea to shining sea!—Amen.

THE EULOGY

Captain Joshua Goldberg, CHC, USN (RET).

Delivered at her Funeral Service at the National Cemetery, Arlington, where she has the honor to be interred among all the great heroes of America.

Dear Gordon, dear sister Margaret and dear friends—

It is not easy to encompass in a few words at this parting service the full meaning of Wynne McLintock's life, its place in her family circle and its impact on her happy and tender life with Gordon, with whom she walked hand in hand and heart with heart to the very end of her mortal existence.

I shall permit myself to voice only a few points of her radiant personality. As a child, her sister Margaret tells me, Wynne was called in the family "Winsome Winnie." How charming and appropriate!

Later, as a senior girl at Dame Allen's School, Newcastle upon Tyne, she was voted "the most popular girl in the school" and crowned Queen Winnie at a lovely ceremony of flowers.

And "Winsome Winnie" grew up, when we met and learned to know her, into a Lady in the grand manner—a truly Grand Lady.

She came to us from the British Isles—the cradle of our culture—and brought blessings to our land. She cherished it and always prayed that our lucid banner ever shine as a symbol of the dignity and sacredness of the human personality.

The freshly blooming heather brought yesterday from Scotland by Captain and Mrs. Dry, and placed in her casket, unites her symbolically in death with her native land from which she carried so many precious gifts of mind and spirit to us.

Wherever Wynne moved she scattered around her serene graciousness. The hospitality in her home was infectious. Whoever found himself under her roof had the joyous privilege of feeling the warm spirit of the incomparable hostess. To be at the McLintocks' was to be and feel at home!

As Chaplain in the Third Naval District, I had the opportunity for some twenty years to observe Wynne at Gordon's side as his helpmate and life companion, guiding together the destiny of the United States Merchant Marine Academy, which, under her devoted stewardship has gained world-wide reputation and recognition.

Wherever American Merchant Marine Officers man our ships their hearts stir with fond memories of and affection for our departed Wynne—The First Lady of the Academy.

Her deep and abiding love for the midshipmen who studied and graduated from this unique institution is well known to them and how richly she contributed to every facet of the Academy's life not sparing her health even to the breaking point.

Wynne was not only winsome, a Lady in manner and thought, and dedicated to her husband's career, she was also deeply religious.

She was a main inspiration and deeply involved in the building of the majestic and beautiful chapel on the campus of the Academy—a veritable footstool to God's Eternal Throne. She worked tirelessly for the erection of this Sanctuary to glorify God's name and to serve as inspiration to worshippers within, and as a reminder to every passerby and passing ships that spiritual vitality has been woven into the fabric of the U.S. Merchant Marine Academy.

What a woman of sweetness and valor!

Now, Death has summoned our beloved Wynne. Our souls cry out unto Thee, O Lord, "What is man?" Is he the creature of dust, whose destiny is but to return to the dust from which he came?

The ancient sage has taught us, "The spirit of man is the lamp of the Lord." Not even the darkness of death can extinguish God's light, which He has kindled in the sanctuary of Wynne's soul. Therefore, O Lord, we thank Thee in this solemn hour for that which was deathless in the life of our cherished Wynne McLintock, and which is now revealed to us in all its beauty.

For her love that united us in life and which death cannot sever; for her companionship which we shared along life's path, and which still continues through the tenderness of memory; for the gifts of her heart and mind which brought us joy and happiness and now have become a precious heritage of the spirit: for all these and more, we give Thee our praise.

Grant us, O Lord, the strength of all the generations who in the face of bereavement proclaimed: The Lord hath given, the Lord hath taken away; blessed be the name of the Lord.

Our Eternal God and Father, send Thy angels from above to lift tenderly heavenward this precious soul. Dearest Wynne go thy way for the Lord hath called thee. Go thy way and may the Lord be with thee. May thy righteousness go before thee and the glory of the Lord receive thee.

Rest in Peace!

THE TWENTY-THIRD PSALM

Dominus regit me

The Lord is my shepherd; I shall not want.

He maketh me to lie down in green pastures:

And leadeth me beside the still waters.

He restoreth my soul: he leadeth me in the paths of righteousness for his name's sake.

Yea, though I walk through the valley of the shadow of death,

I will fear no evil: for thou art with me; thy rod and thy staff they comfort me.

Thou preparest a table before me in the presence of mine enemies: thou anointest my head with oil; my cup runneth over.

Surely goodness and mercy shall follow me all the days of my life; and I will dwell in the house of the Lord for ever.

THE GOSPEL ACCORDING TO ST. JOHN, 14: 1–6

Let not your heart be troubled: ye believe in God, believe also in me.

In my Father's house are many mansions: if it were not so, I would have told you. I go to prepare a place for you.

And if I go and prepare a place for you, I will come again, and receive you unto myself; that where I am, there ye may be also.

And whither I go ye know, and the way ye know.

Thomas saith unto him, Lord, we know not whither thou goest; and how can we know the way?

Jesus saith unto him, I am the way, the truth, and the life: no man cometh unto the Father, but by me.

HYMN

Faith of Our Fathers

Faith of our fathers living still,
In spite of dungeon, fire, and sword,
O how our hearts beat high with joy,
Whene'er we hear that glorious word:
Faith of our fathers, holy faith!
We will be true to thee till death.—Amen.

THE PRAYERS

Captain R. W. Radcliffe, CHC, USN.

Almighty God, with whom live the spirits of those who depart in the Lord, and with whom the souls of the faithful after death are in strength and gladness: We give our grateful thanks for the good example of your servant, Wynne, who, having finished her course in faith, does now rest from her labor. We pray to you that as a God of infinite compassion you will look down in tender love and pity upon your servant. In the stillness of our hearts we entreat for her your sustaining grace. Be her stay, her strength, and her shield, that trusting in you, she may feel your presence and, in the assurance of your love, be delivered out of her distress and sorrow. Through Jesus Christ our Lord. Amen.

Now the laborer's task is o'er
Now the battle day is past
Father in your gracious keeping.
Leave we now your servant sleeping.

Unto him who is able to keep you from falling and to present you faultless before his throne with exceeding joy, to the only wise God, our saviour, be honor, glory, dominion and power now and forevermore. Amen.

THE LORD'S PRAYER

(In unison)

HYMN

Eternal Father

Eternal Father, strong to save
Whose arm hath bound the restless wave,
Who biddest the mighty ocean deep
Its own appointed limits keep:
O hear us when we cry to thee
For those in peril on the sea!
*Lord stand beside the men who sail
Our Merchant Ships in storm and gale,
In peace and war their watch they keep
On every sea, on thy vast deep.
Be with them Lord by night and day,
For Merchant Mariners we pray.

THE BENEDICTION

Captain Theodore C. Herrmann, CHC, USN.

"And now, Wynne, unto God's gracious mercy and protection we commit you.

May the Lord bless you and keep you.

The Lord make his face to shine upon you, and be gracious unto you.

The Lord lift up his countenance upon you, and give you peace, both now and evermore. Amen.

THE ORGAN POSTLUDE

GRAVESIDE SERVICE

Captain R. W. Radcliffe, CHC, USN.

Our help is in the name of the Lord, who made heaven and earth. (Psalm 124: 8)

Say to them that are of a fearful heart, "Be strong, fear not! Behold your God will come and save you." (Isaiah 35: 4)

The steadfast love of the Lord is from everlasting to everlasting upon those who fear him, and his righteousness unto children's children. (Psalm 103: 17)

Forasmuch as the spirit of Wynne McLintock has entered into the life immortal, we therefore commit her body to its resting, but her spirit we commend to God, remembering how Jesus said upon his cross, "Father, into thy hands I commend my spirit."

Blessed are the dead who die in the Lord from henceforth: Yea, saith the Spirit, that they may rest from their labors; and their works do follow them.

Wynne Russell McLintock, beloved wife of Vice Admiral Gordon McLintock, former Superintendent of the United States Merchant Marine Academy, was born in Newcastle upon Tyne, England, the daughter of Captain John Russell Kidner of the British Merchant Navy, and Mrs. Kidner, and became an American citizen upon her marriage.

Loved throughout the world and affectionately remembered by so many of the midshipmen she served at Kings Point.

The richest gifts of nature and of grace adorned her mind and heart.

She was as the morning star in the midst of a cloud,

And as the moon at the full:

As the sun shining upon the temple of the Most High,

And as the rainbow giving light in the bright clouds:

And as the flower of roses in the spring of the year.

CHILD BATTLES WITH HIMSELF

HON. HENRY HELSTOSKI

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. HELSTOSKI. Mr. Speaker, diabetes is a surprisingly widespread, though little understood disease that presently affects nearly 6 million Americans. Diabetes is a metabolic disorder occurring in individuals with a hereditary predisposition to the disease, and scientists have not been able to determine the precise genetic defect which causes diabetes.

The most obvious characteristic of the disease is the patient's inability to metabolize carbohydrates properly. Metabolism, used within this context, refers to the breakdown of food substances into energy-releasing or storable forms. Carbohydrates, which include sugars and starches, are generally acknowledged to be the body's primary source of energy.

There are two basic forms of diabetes—juvenile diabetes and maturity-onset diabetes. Juvenile diabetes is generally considered to be the most severe form of the disease and its onset occurs early in life.

Many tragic complications may arise as a result of prolonged diabetes. These include disorders of the nervous system, gangrene, cerebral hemorrhage, hardening of the arteries, coronary disease, stroke, heart attack, renal problems, and blindness.

The Library of Congress estimates that by 1975, 1 in every 25 persons will be diabetic. Today, 30 million people throughout the world are affected by the disease.

Mr. Speaker, these facts clearly underscore the need for an expanded research and treatment program. In addition, I have received letters from many constituents who either have children afflicted with the disease or have it themselves, asking that we provide additional funds to fight diabetes.

A variety of bills designed to aid those who have the disease are presently before Congress. I have sponsored one of these, H.R. 6193—National Diabetes Act—which would expand the authority of the National Institute of Arthritis, Metabolism, and Digestive Diseases in order to advance the national attack on diabetes. Hearings have been held on this bill and other similar legislation, and presently it is pending before the House Commerce Committee Subcommittee on Public Health and Environment.

Mr. Speaker, in addition, today I would like to share an article with my colleagues which appeared November 29 in the Washington Post. The article, entitled "Child Battles With Himself; Learns to Control Diabetes," is a first person account by Richard A. Kasschau of life as a young diabetic. I call this article to the attention of my colleagues, because I believe Mr. Kasschau succeeds in providing additional insight into the rough life most diabetics face.

The article follows:

CHILD BATTLES WITH HIMSELF; LEARNS TO CONTROL DIABETES

(By Richard A. Kasschau)

This story is published to reflect another side of the disease of diabetes in the wake of widespread reaction to the account two weeks ago of William Gibson White's chilling early experiences with a diabetic child. Diabetes is one of the most serious diseases that strike Americans and, compared to some others—heart disease, cancer—is a mystery to the unaffected public. We hope that the combination of this account and White's, while still not telling the whole story of diabetes, will advance education about the disease.

I was eating like a horse ("as if each bite was the last straw!" to quote my father). I gradually started getting up for what became nightly trips to the bathroom, and all the while I was losing weight. On a Friday in May, 1951, my parents were finally moved to contact the family doctor, and his first reaction was to curtail my consumption of strawberries with sugar. That was my first contact with diabetes, a contact that has been maintained now more or less successfully for 22 years.

Diabetes entered my life at the end of fifth grade. Not even out of elementary school, and already a significant challenge: Was I to control my diabetes or was it to control me? My initial reaction was quite negative, but a father who was an engineer and a mother who was willing to learn were quickly to conspire to insure the result.

I was placed in the hospital the following Monday for a four-day period of adjustment to stabilize my condition and approximate the insulin dosage and diet I would require. The nurses educated me about insulin, diet and exercise and educated my parents about insulin reactions, prohibited foods and how to give injections.

Because of the seriousness with which my parents approached the condition, I became increasingly disturbed about my diabetes and gradually more rebellious. I didn't want to play with other boys, and increasingly I didn't want to assume responsibility for managing my diabetes. Testing the urine was fun for the first two weeks: Would the results be blue (good), green (OK, but you can do better), or yellowish-orange ("What did you snitch from the cookie jar?"). But I quick tired of the necessary routine.

---

*Second verse composed by Wynne McLintock, 27 Feb. 1968.

I was sent to the first year of the Tennessee Camp for Diabetic Children (TCDC) just outside Chattanooga in August, 1952. The camp was the turning point in my response to life's challenge. Aside from one episode in the fall of 1952, when I became completely fed up with giving myself my own injection, but finally did so under stern injunction from my father, I have given myself an injection unhesitatingly every morning for 21-plus years.

For the next five years, I returned each summer to TCDC as a camper. The next two years I went back as a junior counselor; the following two as a senior counselor in charge of 8 to 10 diabetic boys.

After nine years as camper and counselor I returned as an assistant in the camp infirmary for two years, and I finished my formal association with TCDC as assistant director of the camp during my last two years in college. I continue to support the camp with monetary contributions.

I finished graduate school and have since been employed as a professor at the University of South Carolina. Diabetes has been no hinderance at any time.

Watching the progress of research into the causes of diabetes over the years has been interesting. When asked each year at the diabetic camp, 50 to 60 of the 100 campers would indicate that they had a relative with diabetes. The apparent responsibility of inheritance as a causative factor has been widely confirmed. Beyond that the evidence is mixed, but generally negative. To attribute specific events with responsibility for "causing" diabetes is to indulge in potentially false reasoning. Night follows day, but it's not caused by day. Similarly, diabetes may follow "being dropped on the head" or "always eating candy," but there is very little evidence of cause.

More recently, the focus of research has been on a kind of hormonal imbalance. The solution may or may not be at hand, but the search continues.

Diabetic coma has been described to me many times: It results from consistent neglect usually covering a period of many days, even weeks. Except in the instance of "brittle" diabetics such as the White case in last week's story, those few whose insulin-diet-exercise balance are extremely narrow and difficult to maintain, a coma is a very rare thing and neither I nor many of my diabetic friends have ever experienced it.

Insulin reaction is something else, which may result from too much insulin or exercise and/or too little to eat. One winter morning in Rochester, when I was in college, I awoke the morning after a very active day in an insulin reaction. I dressed quickly and set out for the dining hall, realizing only after I had gone about 30 feet in the snow that I had forgotten my shoes! With my shoes on, the insulin reaction was corrected by the first glass of orange juice.

I have learned a number of things down through the years, both from personal experience and as a result of dealing with several hundred diabetics and their parents while at the Tennessee Camp for Diabetic Children. Perhaps the worst problem most diabetic children have is over-reactive parents who are well-intentioned but misguided in their emotionalism.

As with so many things in life, diabetes yields to reasonable treatment on all fronts. Treat the condition with respect and understanding and the conditions will respond predictably; abuse it and it will abuse you. Every time you eat too much you're going to spill the excess sugar through your urine; every time you exercise too much without taking in sufficient food you will have an insulin reaction.

As a child, in fact through the 12th grade, my parents weighed all of my food as part of the necessary program of balanced intake of food and insulin. Many adolescents rebel over cigarettes or sex or drugs or drinks, but I rebelled over controlled dieting. I had so many secret trips to the corner drug store for food during high school, that I finally had to start adjusting my own insulin to compensate for the excess calories I was always consuming.

As I entered college the many years of watching food being weighed finally began to return dividends to me because I quickly realized I had unintentionally become an expert at estimating what bulk of food represented how many grams.

Judging amounts of food is easy, but juggling insulin is a nightmare: You plan for an active day and cut the dosage and then end up going to the movies. You plan an inactive day, increase the dosage and then end up skiing all day. You can't win, but you try to break even. By leaving the insulin dosage constant and then consuming additional food if your schedule of activities warrants it, control becomes much easier and much more susceptible to an hour-by-hour modification.

The key to control, both for the parents of diabetic children and also for the diabetics themselves is to watch behavior. Most diabetics know what it's like to be going into an insulin reaction (or "shock" as some extremists like to call it), but different types of insulin, if present in excess amounts, cause different types of insulin reactions, some perceptible by the diabetic and some not. Even perceiving an oncoming reaction is not always enough.

Last year in Columbia, S.C., I left my university office to conduct an interview across town. I needed a coke when I left, but knew there was a soft drink machine where I was going. When I got there I was late, so I figured I'd conduct the interview and then get the coke.

During the interview I started into the reaction, and by the time I had completed the interview I was focused only on getting back to the university. But, while driving back, I remembered I had a check to deposit and that my bank was only a couple of blocks out of the way.

I never made it. Recognizing I was no longer in full control of myself, I pulled the car over to the side of the street and was slumped against the car window for four hours before the police decided there might be need for action. The result? Overreaction: an ambulance was called ($25) and I was rushed to a local emergency ward and admitted (another $25), all for the want of a Coke or some orange juice, which was all I required once in the emergency ward.

Thirty minutes after entering I was fully competent to drive myself back to the university, suffering only embarrassment at my second contact with a hospital in 22 years.

The insulin reaction is a most unusual thing to experience, but also to watch. In some diabetics it is accompanied by profuse sweating, an apparent thickening of the tongue and increasing inability to carry on normal activities, verbal or physical.

It is easy to correct, requiring only food (preferably with high sugar content), but it is widely misunderstood as a phenomenon. Many view it as a seizure, which it most definitely is not. The only real danger to the diabetic and his friends is the very rare convulsive insulin reaction in which a diabetic could potentially damage himself or others during his convulsions. However, these are very unusual, involving only 1 to 2 per cent of all diabetics and then only occasionally.

A diabetic insulin reaction is almost never fatal and likewise extremely unlikely to harm anything but pride. If all else fails, since reactions are caused by the relatively short-lived overabundance of insulin, diabetics will typically pull out of insulin reactions unaided, although this may well take many hours.

The lesson is not a hard one to draw: Overreaction on the part of well-meaning, but ill-informed people is the major problem most diabetics, whose disease is under control, have to face. Enough of the diabetic's good friends and supervisors should be informed of the condition so that they may be of help in the situations where an insulin reaction is most likely to occur. But activity should never be curtailed either for or because of a diabetic, and food, drinks, and merriment should continue independent of the presence of a diabetic participant. Each diabetic generally has enough knowledge of himself and his condition to know what he can and what he can't do or eat.

I'll give you one hint: "If anyone ever uses diabetes as an excuse for not doing or eating anything (except sugar or sugar-coated food items) you have just experienced someone inappropriately using diabetes as an excuse rather than the challenge most of us accept it to be.

By the way, if anyone has strawberries . . .

Richard A. Kasschau is an associate professor of psychology at the University of South Carolina who is on leave in Washington this year working in the Educational Affairs Office of the American Psychological Association. He received his Ph.D. in psychology from the University of Tennessee in 1967.

OUR AMERICAN SYSTEM IS ESSENTIALLY SOUND

HON. JENNINGS RANDOLPH

OF WEST VIRGINIA

IN THE SENATE OF THE UNITED STATES

Friday, December 21, 1973

Mr. RANDOLPH. Mr. President, last June a Canadian radio commentator, Gordon Sinclair, was fed up with the constant harangue of hate against the United States, and attempted to set the record straight. He succeeded to the extent that his editorial commentary is well on its way to becoming a classic statement in defense of America.

Columnist Mario Rossi recently observed in the Syracuse Herald-American, that Sinclair's biting reminder of America's true greatness is "a rare and welcome exception to the growing ranks of those who seem to take perverse pleasure in disparaging the United States." The approaching holiday season promises to give us only a brief respite from the troubles that beset us; the continuing crises of energy shortages, inflation, Watergate, and other problems will not suddenly disappear.

Yet, in the words of a dear friend, O. G. (Red) Kennedy of Chicago:

> Surely 80 percent or better of our laws, principles and our judicial and legislative systems are very sound—as is the free enterprise system.

Our challenge is to try to perform selective surgery on the parts of our system which need it—not destroy the whole system.

Mr. President, I feel that Mr. Sinclair's warm words of praise for America deserve the widest possible dissemination. I ask unanimous consent that the article by Columnist Rossi containing Mr. Sinclair's reassuring message be printed in the RECORD.

There being no objection, the article

was ordered to be printed in the Record as follows:

[From the Syracuse Herald-American, Nov. 25, 1973]

Post Scripts: Welcome Voice

(By Mario Rossi)

At a time when American prestige seems to be at a low point in the world and many of our beneficiaries of yesteryear are turning their backs on us, an editorial statement by Gordon Sinclair, Toronto radio and television commentator, is commanding wide attention.

Sinclair is a rare—and welcome exception—to the growing ranks of those who seem to take perverse pleasure in disparaging the United States. He cites American greatness and generosity and expresses confidence we'll be "up there" again. Here's part of what he said in his now famous broadcast.

"This Canadian thinks it is time to speak up for the Americans as the most generous and possibly the least appreciated people on all the earth.

"Germany, Japan and, to a lesser extent, Britain and Italy were lifted out of the debris of war by the Americans who poured in billions of dollars and forgave other billions in debts. None of these countries is today paying even the interest on its remaining debts to the United States.

AMERICANS PROPPED IT UP

"When the franc was in danger of collapsing in 1956, it was the Americans who propped it up, and their reward was to be insulted and swindled on the streets of Paris.

"I was there. I saw it.

"When distant cities are hit by earthquakes, it is the United States that hurries in to help. This spring, 59 American communities were flattened by tornadoes. Nobody helped.

"The Marshall Plan and the Truman Policy pumped billions upon billions of dollars into discouraged countries. Now newspapers in those countries are writing about the decadent, warmongering Americans.

"I'd like to see just one of those countries that is gloating over the erosion of the United States dollar build its own airplanes.

"Come on, let's hear it!

"Does any other country in the world have a plane to equal the Boeing Jumbo Jet, the Lockheed Tristar or the Douglas 10?

"If so, why don't they fly them? Why do all the international lines except Russia fly American planes?

"Why does no other land on earth even consider putting a man or woman on the moon?

"You talk about Japanese technocracy, and you get radios. You talk about German technocracy, and you get automobiles.

MOON ACCOMPLISHMENTS CITED

"You talk about American technocracy, and you find men on the moon—not once but several times—and safely home again.

"You talk about scandals, and the Americans put theirs right in the store window for everybody to look at.

"Even their draft-dodgers are not pursued and hounded. They are here on our streets, and most of them, unless they are breaking Canadian laws—are getting American dollars from Ma and Pa at home to spend here.

"When the railways of France, Germany and India were breaking down through age, it was the Americans who rebuilt them. When the Pennsylvania Railroad and the New York Central went broke, nobody loaned them an old caboose. Both are still broke.

"I can name you 5,000 times when the Americans raced to the help of other people in trouble. Can you name me even one time when someone else raced to the Americans in trouble?

"I don't think there was outside help even during the San Francisco earthquake.

"Our neighbors have faced it alone, and I'm one Canadian who is damned tired of hearing them kicked around.

REASSURING WORDS

"They will come out of this thing with their flag high. And when they do, they are entitled to thumb their nose at the lands that are gloating over their present troubles.

"I hope Canada is not one of these."

With the season of Thanksgiving still upon us, those reassuring words give us something extra to be grateful for. They constitute encouragement and they seem to tell us that all of America's humanitarian striving in the nearly 200 years of its history have not been in vain.

True, Mr. Sinclair seems to be in the minority in the arena of world opinion. True, he is just one voice. But in time he must be joined by many others, for good, which is its own reward, cannot help but persevere. When we stand in the sun again we won't, of course, as Mr. Sinclair suggests, thumb our nose at other nations.

The reason?

That would be un-American.

MONOPOLIES BLAMED FOR FOOD INCREASE

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, December 20, 1973

Mr. MOAKLEY. Mr. Speaker, there is a growing concern in this country that we face a food crisis which may parallel or even surpass the energy crisis in gravity.

Documentation about this serious problem was provided recently at hearings conducted by the Monopoly Subcommittee of the Senate Select Committee on Small Business. I am including a pertinent article on the subject from the Boston Herald-American of December 11 which was furnished by a distinguished constituent and former town manager of Norwood, Mass. Mr. Walter Blasenak.

I am anxious to bring this to the attention of my colleagues because it is imperative that we act promptly and forcefully to prevent further food increases resulting from these monopolistic practices.

The article follows:

Monopolies Blamed For Food Increases

(By William Robbins)

Washington—An official of the Federal Trade Commission told a Senate subcommittee yesterday that monopolistic practices were a significant cause of recent increases in the costs of the nation's food.

"Food price increases are equivalent to a regressive tax which transfers income from the poor, the old, racial minorities and other persons on the bottom of the socio-economic ladder," said Russell C. Parker, assistant to the director of the Federal Trade Commission's Bureau of Economics. He added that "if that transfer of income is to holders of monopoly power it is particularly repugnant."

Parker backed up his testimony before the monopoly subcommittee of the Senate Select Committee on Small Business with extensive statistics from studies by the agency.

The hearing on "corporate giantism and food prices" also heard a call by A. C. Hoffman, a retired vice president of the Krafts Foods Company, for intervention by the government to stop monopolistic trends, as well as demands by the food action campaign, a coalition of consumer-oriented organizations, for both legislative and administrative action.

Jim Hightower, campaign coordinator, former Sen. Fred R. Harris (D.–Okla.) and Sen. James Abourezk (D.–S.D.) all asserted that increasing monopolistic power in the food industry threatened to create food problems even more serious than the current energy crisis.

Recalling that 50 large companies had owned half of all food manufacturing assets in 1965, Parker said that concentration had continued to increase to the point where "I estimate that the current 50 largest companies may account for close to 60 percent of total food manufacturing assets."

Those same companies receive a still higher percentage of profits, the economist said.

THE PROBLEMS OF THE U.S. FISHING INDUSTRY

HON. LEONOR K. SULLIVAN

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mrs. SULLIVAN. Mr. Speaker, a recent editorial in the St. Louis Globe Democrat highlights the deplorable condition of our U.S. fishing industry.

The editorial points out that foreign fishing vessels taking fish off our shores are on the increase; that the type of equipment used by some of these vessels is like a vacuum cleaner, sucking up everything that moves; that many of these offshore fisheries resources are being depleted; and that, as a result of these activities, our seafood prices are soaring.

Mr. Speaker, I insert this editorial in the Record at this point:

Prevent Extinction of Ocean Fish

It would enrage food shoppers to know they are paying double to quadruple the amount they should pay for seafood because Russia and other nations are catching our fish.

It would enrage sportsmen to know that bluefin tuna, swordfish, white, striped, and Atlantic and Pacific blue marlin face near-extinction because foreign trawlers are wiping out whole species off our shores.

The depletion of almost all fish life off our shores is no longer just possible, but probable. Our herring population is down 95 percent, and sea scallops, haddock, mackerel, cod, yellow tail flounder and others are now almost endangered species.

Why? Because Russia harvests one-half of the total catch off New England. Because Japanese "long-line" fishermen put out baited hooks on lines 50 miles long. Because Norwegian trawlers, and others, are often longer than a football field and are sea-going vacuum cleaners which sweep the seas clean of all fish life. Because foreign ships operate for months as complete processing plants.

But most of all, because the United States has a 12-mile fishing limit. Many countries have a 200-mile limit.

In the past, The Globe-Democrat has pushed for an international treaty to regulate catches and fishing territories. But the situation is now too grave to await such a conference.

Therefore, the United States should take the advice of the newly formed Salt Water International Fishing Treaties (SWIFT), a conservation organization spawned by executives of Field and Stream Magazine. SWIFT calls for setting a five-year 200-mile fishing limit off American waters, limiting catches of tuna, and regulating the size by weight of each individual catch. It's time the United States protected its own continental waters—it's a cinch no other nation will.

Mr. Speaker, the members of my Committee on Merchant Marine and Fisheries are well aware of the problems enumerated in this editorial. We have been and will continue to take steps to alleviate this disastrous situation.

For instance, on December 4, 1973, the House passed legislation reported by my committee which declares the American lobster a creature of the Continental Shelf. This will make it unlawful for foreign vessels to take this species, thereby reserving this important resource—a fishery valued at approximately $35 million annually—for American fishermen only.

On the same day—by a rollcall vote of 405 to 0—the House passed a concurrent resolution reported by my committee declaring it a policy of Congress to support, protect, and enhance the coastal and offshore fisheries resources of the United States.

Another approach to resolving this problem that has been utilized lately is that of multilateral and bilateral agreements. We have worked out a number of these agreements with nations fishing off our coast, such as Russia, Japan, Poland, and, more recently, Rumania. Similar agreements should be entered into with other countries fishing in these waters, including East and West Germany, Bulgaria, Norway, Canada, Cuba, Spain, France, Greece, and Italy. My committee is on record urging the State Department to formulate such agreements at the earliest possible date. These agreements alone will not solve the problems of our declining fisheries. However, they do represent a step in the right direction and, if strengthened as they come up for renewal from time to time, they should assist considerably in the protection of our offshore resources.

Just recently, the State Department informed my committee that because of the United States firm stand at a recent meeting in Canada of the International Commission for the Northwest Atlantic Fisheries, agreement was reached on a 3-year program covering virtually all fisheries outside the U.S. 12-mile fisheries limit in the area from the Canadian border to North Carolina. Under the agreement, overall quotas will be reduced to allow the stocks to recover to a level which will produce the maximum sustainable yield. At the same time, individual allocations of these overall quotas will permit the United States to increase its catch and will decrease the allowable catch of foreign fleets.

Except for this resolute stand by our representatives, over-fishing would have continued in this area. The United States should take an equally firm stand with Japan regarding our Pacific salmon fishery.

Mr. Speaker, our coastal fisheries resources are in danger; corrective action is needed but the solution to this dilemma is complicated.

Our fishing industry, in general, supports the United States position recently advanced at the Law of the Sea Conference in Geneva which was held under the auspices of the United Nations Seabeds Committee. This position advocates coastal nation control over coastal species, coupled with a coastal nation preference to the fish based on that country's capacity to harvest. This right to control would extend to the full range of the species whether it is 13 miles, 213 miles, or more from shore. Also, the U.S. position advocates control by coastal nations of anadromous species—such as Atlantic and Pacific salmon—and international control over the species that are highly pelagic, such as tuna. This long-term approach should be vigorously pursued and, hopefully, it will provide the necessary controls to conserve these valuable resources of the sea.

In the meantime, certain segments of the U.S. fishing industry are urging the unilateral extension of our exclusive fisheries zone from 12 to 200 miles from shore as a means of protecting our fisheries resources. In fact, there are a number of bills pending before my committee to accomplish that purpose. The complexity of this issue, however, is demonstrated by the fact that our fishermen in the mid-Atlantic who fish off our coastal shores would be helped by such an extension; whereas, U.S. fishermen of the Gulf States and southern California who fish off the coasts of other countries would be severely damaged.

Mr. Speaker, my committee intends to do everything it can to help our U.S. fishermen and to preserve our fishery resources for the future. Each step, however, must be carefully weighed to assure that it does not do more harm than good. We will thoroughly investigate all proposed solutions. For instance, despite the alleged adverse effect the 200-mile legislation may have on some segments of our fishing industry, my committee plans to begin hearings on these bills in the next session of the 93d Congress.

All of the aforementioned concepts are sincerely proposed efforts to protect and conserve our coastal fisheries resources. Many problems confront us and solutions will not be easily found. They will require the wholehearted cooperation of industry, Government, and the consuming public. I am confident, however, that together we can and will meet these challenges and find workable solutions to our fisheries problems.

THE PROBLEMS OF INCENTIVES TO CONVERT FROM OIL TO COAL

HON. ROBERT J. HUBER

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, December 18, 1973

Mr. HUBER. Mr. Speaker, last Friday, December 14, I introduced an amendment to the emergency energy bill that was then being debated. I did not call up the amendment because debate was severely limited. I did not think it wise to present such an important matter amid the chaos that prevailed late Friday evening and early Saturday morning. The energy bill already had far too many important amendments attached to it that were never properly discussed. I did not see the need for another in light of the fact that it would not receive the full consideration it deserved.

Nevertheless, I do want to discuss my proposal here, for I do not intend to give up on this matter. My amendment reads as follows:

AMENDMENT TO H.R. 11882

On page B after line 4, add the following new paragraph:

All existing electric generating plants with the exception of those operating in areas within which air quality is below the minimum standard set forth in the Clean Air Act (42 U.S.C. 1857 et seq.) are encouraged to install equipment for rapid conversion to coal and may account for the cost of such equipment as an operating expense rather than as a capital investment.

and renumber accordingly.

At that time, I also intended to comment upon how this measure would protect the consumer. I would now like to insert into the RERORD the remarks I would have made Friday if I had been able to present my amendment:

Mr. Speaker, the purpose of my amendment is to insure that the consumer will not be faced with rising utility costs due to the fuel conversion requirement contained in the energy bill. If we are going to force electric generating plants to convert to coal, then there should at least be some incentive, other than Government coercion, for them to do so. The way to provide this incentive is for us to allow these companies to account for the conversion as an operating expense rather than as a capital investment, as provided for in this amendment. By doing this we will insure that the cost of such conversion will not be passed on to the consumer.

Without this amendment consumer costs will rise even higher, and the persons who will suffer the most will be the people who can least afford it. The wealthy will be able to pay for the higher costs without too much difficulty, but if you want to put more and more lower income citizens out in the cold then just pass this bill without the proposed amendment.

It also seems to me that we have a certain moral obligation to offer this "operating expense" incentive for it was the Government that urged and pleaded with these electric generating plants to convert from coal originally. In my own State of Michigan, in the city of Detroit, the Misterski Power Plant just finished converting from coal to oil this year. This was done, despite the fact they did not want to do it, because of constant harassment from the Wayne County Air Pollution Control Board to comply with the Environmental Protection Agency's directives. Now oil is in short supply and the Government is going to have the gall to tell this company that they must convert back to coal. It is obvious to me that the EPA's left hand doesn't know what the right hand is doing.

It is unfortunate, too, that it will cost more and use up more fuel for this plant to convert back to coal. In fact, I am advised that it would be more economical and save more fuel if this plant was now allowed to continue to operate on oil. If this is what is happening in my district I am sure it is happening in others as well.

Last April I wrote the then Administrator of EPA, William Ruckelshaus and told him that it was my strong feeling that we were on a collision course on the matter of energy versus the environment. I then urged him to co-ordinate this matter more carefully so that the environmental changes did not too adversely affect the ability of industries to function. Obviously, if corrective action had been taken at that time it is pos-

sible that we would not be here today debating this measure.

NIXON TAPE AT PARTY DRAWS COURT REBUKE

HON. ANCHER NELSEN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. NELSEN. Mr. Speaker, I take this opportunity to insert in the RECORD a story which appears in the Evening Star for this date, December 19, 1973, setting forth the circumstances wherein an attorney for consumer advocate Ralph Nader admitted before a U.S. District Judge William B. Jones that he had played a subpenaed tape at a Georgetown party at which a number of people were present.

The tape was apparently one of those subpenaed by the Nader organization in the legal fight with the Nixon administration over public contributions by the dairy industry. The newspaper account does not make it clear, but it was stated that it was understood by those who attended the party that they knew in advance that the tape would be played, which would clearly indicate, if true, that the attorney acted willfully and intentionally in disclosing this information.

The article indicates that the attorney may face disciplinary action by a legal grievance committee. My question is, Does not the action violate title 18, section 401, of the U.S. Criminal Code, wherein a U.S. judge has the power to punish contempt of its authority on the following three bases:

First, misbehavior of any of its officers in its presence or so near thereto as to obstruct the administration of justice;

Second, misbehavior of any of its officers in their official transactions; or

Third, disobedience or resistance to its lawful writ, process, order, rule, decree, or command.

The article follows:

NIXON TAPE AT PARTY DRAWS COURT REBUKE

(By Barry Kalb)

An attorney who played a White House tape at a party Monday night may face disciplinary action by a legal grievance committee.

William Dobrovir, an attorney for consumer advocate Ralph Nader, admitted today before U.S. District Judge William B. Jones that he had made "a very foolish mistake" in playing the tape at the Georgetown party.

Jones called it a "very serious" matter and suggested that if Justice Department attorneys feel Dobrovir committed a serious breach of legal ethics, the case should be referred to the Committee on Admissions and Grievances of the District of Columbia Bar Association.

The tape was one of those subpoenaed by a Nader organization in its legal fight with the Nixon administration over political contributions by the dairy industry. The tape was turned over to Dobrovir by the White House last week.

Justice Department Attorney Irwin Goldbloom told reporters after the brief hearing before Jones that he would consider the judge's suggestion.

One aspect of the incident remains in dispute. Dobrovir insisted he played the tape on the spur of the moment, but both Goldbloom and ABC news correspondent David Schoumacher, the reporter who first broke the story, said they understood that those who attended the party knew in advance that the tape would be played.

Dobrovir represents Nader and a number of consumer groups in a suit charging that the Nixon administration illegally raised federal milk subsidies in 1971 in return for what eventually amounted to some $422,500 in campaign donations from milk producers.

As part of the pre-trial investigation, Dobrovir subpoenaed a tape recording of a meeting of March 23, 1971, attended by President Nixon, several of his aides, and attorneys and representatives of the nation's three largest milk cooperatives—Associated Milk Producers, Inc., Mid American Dairymen, and Dairymen Inc.

Less than two weeks before that meeting, then-Secretary of Agriculture, Clifford Hardin, had refused to raise the subsidies.

But within days after the meeting, the administration reversed Hardin's decision and raised the subsidies. The extra profits to the milk producers resulting from this decision has been estimated at between $500 and $700 million.

The President has said that he raised the price supports under pressure by Congress.

Dobrovir said that he received the tape from Goldbloom last week, and emphasized that there were no outstanding judicial orders or claims of executive privilege that would dictate the tapes' being kept secret.

Dobrovir said that on Monday morning, with the help of a network correspondent—CBS correspondent Fred Graham said he was the one—he made two copies of the subpoenaed tape, and took one of them with him to play on his home tape recorder.

However, he said he stopped on the way at a party to which he had been invited and which was attended by himself and six other persons.

Dobrovir said he and the others were eating salami and chopped liver and having drinks when "I made a very foolish mistake, in the relaxation of the moment—I said I've got in my pocket . . . the hottest news item in town."

He said he took out his copy of the tape, and played "perhaps five minutes worth," but said it was very difficult to make out the conversation.

He admitted that when Schoumacher called him the next day to ask if he could hear the tape and mentioned that it had been played at the party the night before, he might have told Schoumacher, "Well, that was just for fun."

"I have a flip way of talking sometimes, which I certainly regret this time," Dobrovir told Jones.

Dobrovir said he has received a number of calls from reporters since Saturday asking if the tape would be made public, and he told them that in accordance with "my usual practice," it would be released to the press if and when it was filed in the court record.

Goldbloom asked Jones for a court order that would bar any use of pre-trial material for anything other than the case itself. Jones said he would sign such an order, but indicated that he would not keep any material filed in the record from being made public.

Jones said that while he considered the matter serious, he felt that to date Dobrovir had handled himself in a responsible manner. "I certainly accept Mr. Dobrovir's explanation, I'm quite satisfied that there will be no other occasion such as this," Jones said.

He also said he hoped the incident "will not in any way impede the progress that has recently been made in pre-trial discovery."

Dobrovir concluded his remarks to Jones by saying, "I realize I've made a very foolish mistake. I hope I've learned." He insisted that none of his clients in the case knew in advance that he was going to play the tape at the party.

The hostess for the party, an employe of a foundation-funded study group, objected to the characterization of the gathering in some news reports as a cocktail party.

"It was six close friends sitting around the fireplace eating salami," said the hostess, who preferred that her name not be used. "It was a very sedate kind of drop-by, because I think my Christmas tree is groovy. I just called them and asked them to stop by after work."

TESTIMONY OF RUSSELL D. HEMENWAY, NATIONAL DIRECTOR OF NCEC ON PROPOSED CONSTITUTIONAL AMENDMENT

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. DRINAN. Mr. Speaker, this morning, before the Senate Judiciary Committee's Subcommittee on Constitutional Amendments, Mr. Russell D. Hemenway, National Director of the National Committee for an Effective Congress, testified on behalf of H.R. 630. This amendment, proposed by Senator BAYH and myself, proposes to lower the age for eligibility for election to the Senate and the House from 30 to 27 and 25 to 22 years, respectively.

Mr. Hemenway's testimony was an excellent addition, and his support is welcome for the proposed amendment.

I attach here also the testimony of Mr. Karl Rove, the national chairman of the College Republican National Committee, the Student Auxiliary of the Republican Party. Mr. Rove will, hopefully, testify before the House Judiciary Committee's Subcommittee on Constitutional Rights which will hold hearings on this matter after the recess, at the beginning of the next session. I commend the following testimony to the attention of my colleagues:

TESTIMONY OF KARL ROVE

DEAR MR. CHAIRMAN: My name is Karl Rove and I serve as Chairman of the College Republican National Committee, the student auxiliary of the Republican Party. The College Republican movement, organized in all fifty states on over 1,000 campuses, is the nation's largest student political group with over 150,000 members. From its ranks have come many of the young leaders of the Republican Party including Congressman Bill Steiger of Wisconsin, a former national chairman.

I appreciate the opportunity to testify today in support of S.J. Resolution 5, which proposes a Constitutional Amendment to lower the age of eligibility for the House of Representatives from 25 to 22 and the age of eligibility for the United States Senate from 30 to 27.

Unlike other portions of the Constitution, the age clauses did not inspire lengthy exchanges in the Constitutional Convention of 1787 or THE FEDERALIST essayist published in the New York papers during 1787–1788.

The only direct reference to the age requirement came on June 22, 1787, during action by the Constitutional Convention on a resolution dealing with the House of Representatives.

George Mason of Virginia, after whom my college, George Mason University, is named, proposed an amendment adding "twenty-five years of age as a qualification for the members of the first branch." In the records of the Convention, Mason is quoted as saying that he "thought it absurd that a man today should not be permitted by the law to make a bargain for himself, and tomorrow should be authorized to manage the affairs of a great nation.

It was the more extraordinary as every man carried with him in his own experience a scale for measuring the deficiency of young politicians; since he would if interrogated be obliged to declare that his political opinions at the age of 21 were too crude and erroneous to merit an influence on public measures. It had been said that Congress had proved a good school for our young men. It might be so for anything he knew but if it were, he chose that they should bear the expense of their own education.

Mason was answered by George Wilson, who argued that he "was against abridging the rights of election in any shape. It was the same thing whether this were done by disqualifying the objects of choice, or the persons choosing. The motion tended to damp the efforts of genius, and of laudable ambition. There was no more reason for incapacitating youth than age, when the requisite qualifications were found."

Mason's amendment was carried that same day by a vote of seven states to three with one, New York, divided.

There is no discussion at all concerning the age requirement of thirty for membership in the Senate.

The Federalist Papers contain only a few oblique references to the necessity of a high degree of maturity in the representatives of the people.

Mason's arguments have not stood the test of time. Where once the legal age of majority—the ability to enter into contractual agreements and be classified as an adult in legal proceedings—was almost uniformly pegged in state statutes at twenty-one years or more, today only nine states have a legal age of majority greater than 18. This coupled with the recent enfranchisement of 18, 19, and 20 year olds, is a general recognition that America's young are mature enough to shoulder the burdens of citizenship.

It seems strange at the same time we are extending the franchise and lowering the age of majority because of a recognition of the maturity of young people, that the Constitutional age requirements for Congress are retained. The retention of these requirements is a further abridgement of the "rights of election" that Wilson referred to.

The Constitutional Amendment proposed by Senate Joint Resolution 5 would be a signal that the Constitution is not an arbitrary document, constructed for a time and a set of circumstances long past, but instead capable of rational change.

STATEMENT OF RUSSELL D. HEMENWAY

MR. CHAIRMAN: The National Committee for an Effective Congress is pleased to have been invited to testify before the Senate Subcommittee on Constitutional Amendments on a measure of particular merit. S. J. 5, the resolution which proposes a Constitutional Amendment to lower the minimum age requirement for Senators and Congressmen by three years, is consistent with a philosophy of government which our Committee has advocated and endorsed for many years. That is, that the interests of the American people are best served by a legislature that is continually refreshed by new ideas and responsive to the constant change which permeates our modern society. If enacted, we believe that the current measure could do much to bring increased vitality to Congress and our national deliberations.

History leaves scant information on the origins of our Constitution's present minimum age requirements. The very brevity of the record, however, gives some insight into the Founding Fathers' thinking on this issue.

The Virginia Plan as offered to the Constitutional Convention in 1787 by Edmund Randolph left room for age requirements to be prescribed for Congressmen, Senators and the President, but no specific ages were mentioned in that document. Rather, three blank spaces were left for the delegates to consider. There seems to have been no precedent for age requirements for all three offices. The Virginia Constitution of 1776, on which much of the Virginia Plan was predicated, had a minimum age requirement of 25 for that state's Senators and none at all for its Representatives. The concept of an age requirement for members of "the most numerous branch" seems to have originated in the deliberations of the Virginia delegates prior to the Convention and of those deliberations, no record remains.

The issue came to the floor of the Convention late in the afternoon of Tuesday, June 12, 1787. Resolved into a Committee of the Whole, the delegates had been in continuous session for three weeks, laboring with the ponderous questions of bicameralism and a national versus a federal structure. Age requirements for legislators apparently was a subject of relatively low priority, almost a last minute detail to be dispensed with quickly so that the Committee of the Whole could report out the revised Virginia Plan to the full convention the next day.

Madison reports that the first motion to be introduced was on the issue question of "The words requiring members of ye 1st branch to be the age of —— years." With *no* debate and over the dissenting vote of a single state (Maryland), this provision was overwhelmingly *struck down*. The delegates then moved directly to the question of Senatorial age and again *with no debate* inserted the minimum age of thirty.

Some ten days later the issue was reintroduced with a motion to fix the minimum age for Congressmen at 25. George Mason of Virginia, himself one of the oldest delegates, spoke briefly in favor of the motion pointing out that all men—in reflection—see their own younger years as lacking in wisdom and maturity. George Wilson, in dissent, argued that by passing the provision the country would deny to itself the energies and opinions of younger men and noted several examples of individuals younger than 25 who had made significant impact on the course of history.

This short but curiously modern sounding debate was resolved in Mason's favor—though it might be noted here he never signed the finished document. On a vote of 7 to 4 the minimum age of 25 years for Congressmen was inserted into the Constitution.

We review this chronology of events in order to draw three conclusions:

First, the subject of minimum age requirements was a subsidiary and not a primary concern of the Constitutional Convention. There was little or no debate devoted to the subject and the votes reflect far from unanimous opinion.

Second, the five year graduations from 25 to 30 and 35 which appear to have such internal logic and consistency were never proposed as a package, but were each arrived at separately.

Third, it was the Senatorial age of 30 which was arrived at first and which most concerned the delegates. This is completely understandable in light of the then prevailing concept of the Senate's future role. The upper body was to represent the States' interests in juxtaposition to those of the people. Patterned on the English House of Lords and the earlier Senates of Greece and Rome, the upper body was expected to be a council of noble and powerful elders whose wisdom would restrain and check the actions of the more numerous branch. This concept of a near-oligarchical system reflects the fact that the 18th century mind feared pure democracy nearly as much as it feared monarchy.

Our history since has proved this fear to be unfounded. With increasing faith in our noble experiment, the American people have passed amendment after amendment which reflect constantly growing reliance on the wisdom of the people regardless of their race, sex, station in society and, most recently, their age. Seven of the 26 Amendments to our Constitution, one quarter of the total, have served to broaden the base of democracy. The 17th Amendment greatly modified that earlier view of the Senate and the 14th, 15th, 19th, and 23rd, 24th, and 25th Amendments struck down the archaic poll tax and extended suffrage to members of all races, women, residents of the District of Columbia, and 18-year-olds. And each extension of the suffrage has been followed by similar extensions of representation in our national legislature. One could hardly argue that the resulting infusion of opinion from varying elements of our society has been anything but beneficial.

Accordingly, the NCEC would like to go on record in support of the currently proposed amendment as an appropriate further step in an historical progression which has proven eminently successful. By extending the vote to 18-year-olds the country demonstrated its overwhelming willingness to incorporate the judgments of its younger citizens. We can find no evidence that that trust has been misplaced. Nor can we find any evidence to support the view that the inclusion of younger persons in our national councils would somehow prove a detriment.

It will be argued that persons of less than 25 and 30 years do not possess the wisdom, judgment and maturity to hold a place in Congressional deliberations. This argument used by George Mason 200 years ago, and indeed as old as time itself, is, I feel, the only argument that can be brought against this proposed amendment. But I would submit it is neither a compelling, nor even a particularly relevant one.

The terms "wisdom," "judgment," and "maturity" are as ambiguous and defiant of definition as any in the English language. Yet doubtless much of the testimony from this witness chair will be concerned with their definition and application to young American citizens. Moreover, the great weight of evidence that will be drawn from sociologists, anthropologists, psychologists, and other scientists whose task it is to quantify the word "maturity" will undeniably indicate that people today mature faster both mentally and physically and are better educated than ever before. That data was persuasive in the case of the 18-year-old Amendment, and is equally as relevant and persuasive now.

In the same vein, it will be noted that the median age of all Americans has now fallen to 25 years of age. Can it be said that we have a truly democratic representation of national views if we have no representatives below this age?

Finally, it will be rightly pointed out that society may yet come to grief in the hands of the aged as quickly as in the hands of the youthful. The older person may indeed have more seasoned wisdom, but the younger has perhaps the more inquisitive and flexible mind, greater energy and a devotion to ideals and idealism which in recent months we have found to have been in sadly short supply. One need only look at the record of Congress in recent years to note the especially notable contributions of many freshmen members and other young Congressmen and Senators.

The Committee for an Effective Congress

by all means wishes to pursue this issue to the extreme. No one is suggesting that an entire generation be elected to the halls of Congress. What we do hope is that those individuals who are perceived by the electorate to best represent the views of that particular constituency *not* be denied election merely on the basis of the current age restrictions. Over the past 25 years, the NCEC has met with, endorsed, supported, and worked with hundreds of candidates for the House and Senate of all ages and political affiliations. We assert unequivocally that there are men and women across this country who regardless of their age are fully qualified to represent the public's views. Nevertheless, were there only *one* man or woman "under age," and the electorate in *its* wisdom found him or her adequate for the job, should that person be denied the chance to serve? We feel the answer must be no.

An oligarchy elects those wiser or more powerful than the electorate; a democracy elects representatives from its own ranks. Our history has been one of constant discovery of that larger wisdom. This seems to us to be a good time to take yet a further step on that road of self-discovery and we support the proposed Amendment with the hope that it will be swiftly enacted.

WHEN WILL THE U.N. ACT?

HON. LESTER L. WOLFF

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. WOLFF. Mr. Speaker, the latest tragic news of Arab guerrilla massacres of unarmed civilians reminds us in the starkest terms that elements of the Arab world simply do not believe in the settlement of serious international problems by any method other than murder and terror. This is certainly not a new development by any means, but it again raises the very serious concern of the absolute lack of action by the United Nations on this problem. The international organization, which is purportedly dedicated to the enhancement of civilized discourse among nations, has not taken one step in the direction of condemning, censuring, or controlling the outrageous activities of the Arab guerrillas or the states that permit their training and planning within their borders.

When will the United Nations act? Do we have to wait until all air travelers and all diplomats are in constant terror? And when will the United States insist upon the U.N. taking responsibility?

Below is a chronology of the long series of acts of terror perpetrated by the terrorists, followed by an editorial which appeared in this morning's New York Daily News.

The articles follow:

Arab Terrorism: A Chronology

1968

July 23—El Al airliner hijacked en route from Rome. Landed in Algiers.

December 26—El Al airliner attacked at Athens Airport. One Israeli citizen killed.

1969

February 18—El Al airliner attacked in Zurich. One pilot killed and another wounded.

May 22—An attempt on David Ben-Gurion's life, thwarted, while he was in Copenhagen.

August 17—An incendiary bomb thrown into Jewish-owned Marks and Spencer chain store in London.

August 18—An act of sabotage perpetrated in the Israeli Tourist Office in Copenhagen.

August 23—Sabotage act carried out against Jewish children's school in Teheran.

August 25—Bomb thrown into Zim Israel Shipping Lines office in London. A female employee wounded.

August 29—TWA airliner hijacked to Damascus. Two Israeli passengers were held prisoners in Syria for many months.

September 8—Hand grenades thrown into Israeli embassies in The Hague and in Berne, and into El Al office in Brussels.

November 9—Time-bomb discovered at Jewish community center in Berlin.

November 27—Hand grenade thrown into El Al office in Athens. A Greek child killed and two Greek civilians wounded.

December 21—Attempt to hijack airliner in Athens.

1970

February 10—El Al airliner attacked in Munich. An Israeli citizen killed and eight wounded.

February 13— Jewish home for the aged set afire in Germany. Seven aged persons killed and others wounded.

February 21—Forty-seven passengers and crew of Swissair airliner died when the plane blew up in mid-air, en route from Zurich to Lod. There were 13 Israeli citizens among the dead.

February 21—An Austrian airlines plane was miraculously saved from similar fate, when an explosive charge went off while it was in flight. The plane landed safely in Vienna.

February 22—Lufthansa jumbo airliner hijacked and landed in Aden.

May 4—Terrorists opened fire in Israel Embassy in the capital of Paraguay, killing the wife of the Embassy secretary and wounding a female employee.

September 6—Three passenger airliners of Pan American, TWA and BOAC hijacked with 400 passengers. The first was blown up in Cairo and the other two landed at Zarka, Jordan.

September 6—Abortive attempt to hijack an El Al airliner en route from Amsterdam to New York. A steward was wounded.

September 9—A BOAC plane—en route from Bahrein to London—was forced to land at Zarka, Jordan.

1971

June 11—Terrorist speedboat fired upon and damaged an Israel-bound Liberian tanker sailing into the Red Sea.

November 28—Wasfi el Tel, Premier of Jordan, was gunned down and killed by terrorists in a Cairo hotel.

1972

February 6—Gas tanks sabotaged in Holland.

February 8—Engine plant blown up in Hamburg.

February 22—Oil pipeline sabotaged near Hamburg.

April 29—Letter-bomb sent to Israel Pavilion at German exhibition.

August 5—Oil storage tanks blown up in Trieste.

August 16—Explosion in the luggage compartment of El Al airliner after takeoff from Rome.

September 5—Eleven Israeli participants in the Munich Olympic Games murdered.

September 19—Economic adviser to Israel Embassy in London killed in the explosion of a letter-bomb. The Embassy received three additional letter-bombs, mailed from Holland. Letter-bombs mailed to Israel Embassies in Paris, Geneva, Montreal, New York, Vienna, Washington and Ottawa.

September 20—Letter-bomb sent to Israel Embassy in Brussels. Bomb explosion at Buenos Aires synagogue.

September 21—Letter-bombs sent to Israel Embassies in Kinshasa, Buenos Aires and Phnom Penh.

October 4—Letter-bomb received at offices of the H.I.A.S., Jewish welfare organization.

October 10—Letter-bomb to two Jews in Rhodesia and to a woman heading the Hadassah organization in New York.

October 13—Bomb discovered at El Al offices in Paris.

October 14—Letter-bomb addressed from Malaysia exploded in New York, wounding a local post office worker.

October 17—Bomb discovered at the entrance to a Rotterdam office building, housing the agency of Zim Israel Shipping Lines.

October 29—Lufthansa plane hijacked en route from Lebanon to Turkey and flown to Yugoslavia. The airliner was released in Munich.

October 31—Letter-bomb received at Israel Embassy in Nigeria.

November 4—Letter-bomb to Zionist youth club in Frankfurt.

November 11—Five letter-bombs to Israeli delegation and to Jewish organizations in Geneva. Fourteen letter-bombs in the period of November 1–11 to Jewish addresses and organizations in Britain, one of them severely wounding a Jewish merchant.

November 21—Four letter-bombs discovered in Toronto, two of them addressed to Jews.

December—Terrorist group uncovered in Greece. Planned to arrive by ship at Haifa on a suicide mission. The terrorists came from Lebanon. Terrorist arrested in London in possession of weapons and explosives, which he planned to use against an Israel embassy in Scandinavia.

December 28—Six members of the Israeli diplomatic mission to Bangkok kidnapped and held as hostages. They were released after 19 hours; the kidnappers flew to Cairo.

1973

January 9—Bomb explosion in front of Jewish Agency in Paris. Terrorist group disembarked from S.S. Messapia in Cyprus, planning to carry out sabotage acts in Haifa. The terrorists flew from Cyprus to Beirut.

January 24—Letter-bomb mailed to Israel consul in Santiago, Chile, wounding police handling it.

January 25—Letter-bomb sent to rabbi in Montreal discovered at Montreal Airport.

January 31—Three terrorists detained in Vienna on January 20 and three others arrested at the Austro-Italian border. All six had travelled from Beirut planning to attack Jewish immigrants from the U.S.S.R.

February 7—Arab terrorists attempted to hijack a train carrying Soviet Jewish emigrants in Austria.

March 1—Murder by Arab terrorists of U.S. and Belgian diplomats in Khartoum.

March 3—Attack in Beirut harbor on Cypriot vessel carrying Christian pilgrims to the Holy Land.

March 6—Attempts to blow up an El Al terminal and Israeli bank offices in New York.

March 12—Murder of Israeli businessman in Cyprus.

March 15—Attempt to blow up the Israeli Embassy in Paris.

March 20—Attempted terror operation at Rome Airport.

April 20—Explosive experts uncovered and dismantled a letter-bomb sent to the Israeli Ambassador in Bolivia.

April 27—An Italian employee of El Al in Rome shot to death by an Arab terrorist.

May 2—Two Arab terrorists opened fire on Dutch police who tried to check their papers.

May 8—Attempt to machine-gun the Israeli Embassy in Paris.

May—Arab terrorists threatened British businessmen with violence unless they paid blackmail money to the "Palestine People's Fighting Fund."

July 1—Col. Yosef Alon, Israeli air and naval attache in Washington, shot to death in front of his home.

July 19—Attempt to blow up El Al offices in Athens.

July 20—A Japanese Air Lines jumbo jet with 143 persons on board hijacked.

August 5—A gunfire and grenade attack by Arab terrorists at Athens Airport killed three persons and left 55 wounded.

September 6—Three Arab terrorists seeking the release of a fellow terrorist, imprisoned in Khartoum after the murders of one Belgian and two American diplomats, seized the Saudi Arabian Embassy in Paris taking 11 hostages, including five Arab diplomats, and threatened to execute one or more of the hostages or blow up the Embassy. Italian police arrested four Arabs near the Rome airport. The terrorists had ultra-modern ground-to-air missile launchers and intended to shoot down an Israeli El Al airliner on its stopover at the Fiumicino Airport.

September 7—Black September terrorists responsible for an explosion at the West Berlin Radio and Television Fair. The explosion rocked the exhibit of a West German firm promoting Israeli products and blasted a hole in the exhibition floor, shattered windows and destroyed electronic equipment on the shelves.

September 30—Two Arab terrorists seized four hostages on the Moscow-Vienna express—three Soviet Jews on their way to Israel and an Austrian customs officials—and forced the Austrian government to yield to terrorist demands that it restrict transit through its territory for Jewish emigrants from the U.S.S.R. and close down the transit center at Schoenau Castle near Vienna.

[From the New York Daily News, Dec. 19, 1973]

A MURDEROUS BAND

Arab terrorists bombed and machine-gunned an American airliner in Rome on Monday, hijacked a German plane and, after stops in Greece and Syria, finally gave up in Kuwait.

The trail of carnage these savages left in their wake set a new record in senseless, cold blooded butchery.

This horror to end horrors occurred just about a week after the United Nations General Assembly, for the umpteenth time in the last five years, pushed aside consideration of international action against terrorism. The excuse this year was lack of time.

How long should it take the supposed conscience of mankind to work up a righteous rage over wanton murder? Either the UN lacks the guts to take a stand, or the dominant Third World forces that rule the Assembly secretly condone terrorist outrages that they publicly condemn.

The Assembly has just voted to recess instead of adjourn the present session so that members will be on call for long-range kibbitzing of the Geneva conference.

Instead of moping around waiting for opportunities to posture and speechify, the members should turn their full attention to the scourge of terrorism.

Let's at least force a vote on stern retribution for international outlaws. Then the world can see who stands for law and order and who sides with kill-crazy terrorists.

If the Assembly can't do that, it ought to redesign the UN's blue-and-white symbol in more appropriate colors—like blood red or glaring yellow.

PHILLIP CARL KAZANJIAN NAMED "OUTSTANDING LAW STUDENT IN CALIFORNIA FOR 1973"

HON. GEORGE E. DANIELSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. DANIELSON. Mr. Speaker, I would like to bring to my colleagues' attention the extraordinary achievements of a young Californian, Phillip Carl Kazanjian, who has recently been selected as the "Outstanding Law Student in California for 1973." Mr. Kazanjian was chosen by the California Law Student Association from more than 16,000 law students attending California law schools. I think that after learning a little more of Mr. Kazanjian's successes, you will agree with me that the law students made a wise choice.

Few young people have accomplished as much as Phillip Kazanjian has in so few years. While a student at Lincoln University Law School in San Francisco, he was editor-in-chief of the Lincoln Law Review, president of the Student Bar Association, and editor of the Amicus Curiae, the law school news journal. He was also a member of the Lincoln Law Honor Society. Despite all these activities, Mr. Kazanjian had time while a law student to become recognized as one of the Nation's leading authorities on legal education, law and youth. He has had articles published in the American Bar Association Journal, the California Trial Lawyers Association Journal, the Student Lawyer Journal, and the Town Hall Reporter.

Mr. Kazanjian has been active outside of law school as well. On the State level, he has participated as a commissioner on the California Attorney General's Commission on Community-Police Relations and as president of the California Law Student Association. Nationally, he has served as chairman of the 1972 annual meeting of the American Bar Association Law Student Division, as a delegate to the American Bar Association's Young Lawyers Section, and in 1971 as governor of the Ninth Judicial Circuit, representing more than 18,000 students attending 43 law schools in five Western States.

Mr. Kazanjian has received numerous honors for his amazing list of accomplishments. He is the only law student in the Nation to be honored twice with the American Bar Association Law Student Division's Gold Key Award for his contributions to the legal profession. He was commended by the California Assembly and Senate in 1971 and named Lincoln University's "Man of the Year" in 1972. Twice he was a recipient of the American Jurisprudence Award for excellence in scholarship. Upon graduating from Lincoln University Law School in July, 1973, Phillip Kazanjian was honored by the California Senate "on assembling perhaps the most outstanding record of accomplishment ever attained by a law student."

The honors that have been showered on Phillip Kazanjian in recognition of his achievements leave no doubt that he has concentrated on putting his extraordinary talents to the best possible use. His efforts thus far deserve our congratulations, our admiration, and our respect. I predict that he will make an outstanding contribution to his chosen profession in the years to come.

ENVIRONMENTAL CONCERN

HON. DONALD G. BROTZMAN

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. BROTZMAN. Mr. Speaker, nearly 4 years ago I first proposed that the House of Representatives reorganize itself to the task of eliminating environmental degradation in the United States. To this end, I proposed the establishment of a standing Committee on the Environment with jurisdiction to consider legislation on the subjects of air pollution, water pollution, solid waste disposal, noise pollution, herbicide and pesticide abuse, and weather modification. By the end of the 92d Congress, 215 of the Members of Congress were cosponsors of this proposal. Now, I am pleased to note, the Select Committee on Committees has recommended the establishment of a standing Committee on Energy and Environment with jurisdiction over the areas generally specified in my original resolution.

Changes in the structure of this institution take place in a deliberate and evolutionary fashion; and rightly so. The constant realignment of the committee structure to meet the exigencies of the day would retard our ability to enact sound legislation. With regard to the environment, the House of Representatives can claim, with some pride, to have addressed the major pollution problems endemic to this industrial-technological age. I do claim, however, that some of these problems currently are under the scrutiny, irregularly, of two, three, and even four different committees, a situation which is neither efficient nor conducive to the coordinated leadership which the Nation and world so desperately need for the environmental quality crusade.

Consequently, Mr. Speaker, I heartily applaud the thrust of the Select Committee on Committees' recommendations relative to the Committee on Energy and Environment. A single standing committee would have numerous advantages over the present approach to environmental problems. Its members would be chiefly concerned with the subject of environmental degradation. They would have the benefit of a professional staff whose chief efforts would be directed to environmental matters. Especially important they could view our environmental problems from a broad prespective, taking care to not attack one form of pollution by generating another of greater magnitude. Moreover, a standing committee would have the obvious advantage of the ability to provide enabling legislation and funding.

I also approve of the Select Committee's recommendation that the new committee have jurisdiction over energy matters. It is my view that a conserving attitude toward our environment and its natural resources can go hand in hand with efficient, economical use of fuel. While the Nation's current energy dilemma will require more mining and burning of coal, more construction of refineries and pipelines, more offshore drilling and experimental mining, these measures can be carried out with a minimum of expense to the environment. Again, however, it is incumbent on the Congress to provide a mechanism that cuts through the jurisdictional quagmire which prevents concerted action.

We are not talking in terms of a few years or even a decade of environmental therapy, Mr. Speaker. It may well take 100 years or more of research and applied science to restore clean air, with a proper balance of carbon dioxide and oxygen. Or to rescue bodies of water such as Lake Erie, San Francisco Bay, and the Potomac River from their current status as open sewers. Or to learn how to dispose of our solid wastes and our chemical and radiological poisons without having them turn up to bedevil our children and grandchildren like Biblical plagues. Or to learn how to control insect and plant pests without killing our wildlife and upsetting our ecological balances.

I ask my colleagues, then, to carefully consider the Committee on Committees' report on "Committee Structure and Procedures of the House of Representatives." We must now take advantage of the momentum of support which has developed since the original introduction of my proposal before the effective capacity to produce answers to the earth's environmental problems is lost. The early consideration of the Select Committee's working draft will enable us to fulfill our obligation to leave the Earth, its atmosphere and waters in better condition than we found them.

THE ESTABLISHMENT OF A FEDERAL ZOOLOGICAL AND AQUARIUM BOARD

HON. G. WILLIAM WHITEHURST

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. WHITEHURST. Mr. Speaker, today I am introducing legislation to provide badly needed assistance to our Nation's zoos and aquariums. This bill establishes a Federal Zoological and Aquarium Board, consisting of 17 members representing both Government and private groups knowledgeable regarding the needs of zoos and aquariums. The Board is authorized to determine standards for the accreditation of zoos and aquariums, and it will also provide assistance through direct project grants and loan guarantees to help zoos and aquariums improve their facilities in order to meet these standards. In addition, the Board will sponsor pilot projects which will serve as models for high national standards.

This bill is the product of substantial consultation with many representatives of zoos, aquariums, and zoological organizations, as well as private citizens. Senator MARK HATFIELD and his staff have also provided invaluable assistance and cooperation in the development of this legislation. Indeed, Senator HATFIELD has introduced a companion bill, S. 2774, in that body.

As what we like to call civilization expands into more and more wilderness areas, zoos may well become the last refuge of many vanishing species. It is incumbent upon us to see that zoos and aquariums are maintained so that these creatures receive the best possible care.

Consequently, I urge that the Congress act quickly to pass this measure.

VOLUNTEER DEVELOPMENT CORPS AT WORK

HON. WILLIAM A. STEIGER

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, December 19, 1973

Mr. STEIGER of Wisconsin. Mr. Speaker, as you recall, in December Congress approved a thorough-going reorientation of U.S. foreign assistance aimed at—

Sharing American technical expertise,

Food production, rural development and nutrition,

Maximum use of the private sector, including cooperatives, and

Undertakings that governments and organizations in the developing countries request.

I was very pleased, therefore, when my constituents, Mr. and Mrs. Francis J. Zehren of Sheboygan, reported to me December 13 on their return from Costa Rica. For what they have done with a few of the dollars we authorized and appropriated for the Agency for International Development seems directly in line with the policies Congress established in the Foreign Assistance Act of 1973.

Late last summer, a dairymen's cooperative in San Isidro, Costa Rica, asked Volunteer Development Corps, a private organization U.S. cooperatives have established, to help get its new milk pasteurizing and bottling plant in operation. The co-op is Cooperativa Agropecuaria de Coronado, 10 miles outside San Jose.

VDC's president, David W. Angevine, asked Truman Torgerson of Manitowoc, general manager of Lake-to-Lake Dairy Cooperative, which operates five milk processing plants in our area, to recommend for the assignment someone qualified who might be able to volunteer his services. Mr. Torgerson recommended Mr. Zehren, Lake-to-Lakes plant coordinator, and offered to grant him leave with pay if Mr. Zehren wished to volunteer his services. Mr. Zehren agreed to do so.

When the Costa Rica co-op received its plant equipment in early November, Mr. and Mrs. Zehren followed. VDC paid their travel, lodging, and meals. The Costa Rica co-op provided Mr. Zehren's in-country transportation, an interpreter, and secretarial help in preparing his report and recommendations to the Costa Rica co-op's manager.

Mr. Zehren spent 6 weeks in Costa Rica. He helped the co-op's staff place the equipment, connect it, and begin operating it efficiently. The co-op, Mr. Zehren tells me, has chosen its equipment well. The plant can process a half-million pounds of milk a day, which is about what the co-op's members now produce. Its building and production line can be readily expanded when this becomes necessary.

Eighty-five dairymen own the co-op. Some of them have 2 cows; others have 60 or 70. Until it built this plant, the co-op has functioned as bargaining agent for its members with milk processors in San Jose.

Mr. Zehren's recommendations were very simple. In the plant itself, he recommended the co-op buy one additional piece of laboratory equipment, costing about $20, establish proper records to control product inventories, and improve sanitary facilities for plant employees.

To improve the quality of milk received at the plant, Mr. Zehren recommended that members install cooling equipment on their farms. He feels that perhaps half the members have large enough herds, can afford joint ownership of cooling equipment centrally located on another member's farm. He also suggested a system of monetary and nonmonetary rewards for premium producers.

Mr. Zehren believes the Costa Rica co-op will act on his recommendations. The co-op's manager, Octavio Barquero Alvarado, is an experienced businessman, and he has assembled a competent staff. Mr. and Mrs. Zehren are expecting Senor and Senora Barquero to visit them in Sheboygan next summer.

I was amazed at how little this all cost. Lake-to-Lake Dairy Cooperative provided the essential ingredient—Mr. Zehren's services for 6 weeks. VDC spent $3,500 for the Zehren's travel and living expenses. The Costa Rica co-op provided perhaps $1,000 worth of services to Mr. Zehren.
